SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 < {}^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on application.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to each pill.

The Curd of Cow's Milk Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

Doliber-Goodale Co., Boston, Mass.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

DR. WILLIAM A. HAMMOND'S SANITARIUM

—FOR—

DISEASES OF THE NERVOUS SYSTEM,

WASHINGTON, D. C.

DR. WILLIAM A. HAMMOND announces to the medical profession that he has returned from New York to Washington, D. C., where he has established, in a building especially erected for the purpose, a *Sanitarium* for the treatment of mild and curable cases of mental derangement, diseases of the nervous system generally, cases of the morphia and chloral habits, and such other affections as may properly be treated by the remedial agencies under his control. His experience during many years has convinced him that most diseases embraced within the above-named classes can be managed much more successfully in an institution of this kind, under the constant supervision of the physician and with the aid of means not otherwise at command, than when the patients are seen by their medical advisers at intervals of several hours or days.

The *Sanitarium*, which has been constructed under the superintendence of A. B. Mullett, Esq., late architect of the United States Treasury department, and is situated on Columbia Heights, at the corner of Fourteenth Street and Sheridan Avenue. The position is the highest in the immediate vicinity of Washington, the soil is dry, and all the surroundings are free from noxious influences. It is readily reached by the Fourteenth Street Railway, the cars of which run to the doors. The building is very large, and as perfect in structure and arrangements as is possible from a knowledge of sanitary science and of the requirements of such an institution. It accommodates about thirty patients. So far as the rooms, table, etc., are concerned, they are equal to such as exist in the best hotels of our large cities. Electricity in all its forms; baths, douches, massage, inhalations, nursing, etc., are provided as may be required by patients, in addition to such other medical treatment as may be deemed advisable.

A large *Solarium* for sun-baths and exercise in cold or inclement weather and heated with steam in winter, is constructed on the top of the main building.

Each patient is thoroughly examined by Dr. Hammond and receives his daily personal attention, while Dr. E. L. Tompkins, a physician of ample hospital experience and of tried executive ability, resides in the institution and has, under Dr. Hammond, the immediate superintendence.

The *Sanitarium* is now opened for the reception of patients.

For further information Dr. Hammond can be addressed at The Sanitarium, Fourteenth Street and Sheridan Avenue, Washington, D. C.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron,** is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

Paris—CLIN & CO.—Paris

AND BY ALL DRUGGISTS.

CAPSULES MATHEY-CAYLUS

WITH THIN ENVELOPE OF GLUTEN.

CONTAINING COPAIBA AND ESSENCE OF SANTAL; COPAIBA, CUBEBS, AND THE ESSENCE OF SANTAL; COPAIBA, IRON, AND THE ESSENCE OF SANTAL.

"**The Mathey-Caylus Capsules,** of the *Essence of* "*Santal*, associated with the Balsams, possess an incontesta- "ble efficaciousness, and are employed with the greatest "success for the rapid cure of old or recent *Discharges*, "*Gonorrhœa, Blenorrhœa, Leucorrhœa, Cystitis of the Neck*, "*Urethritis, Catarrh*, and other *diseases of the bladder*, together "with all affections of the *Urinary Passages.*"

"Thanks to their thin envelope of *Gluten*, which is essen- "tially assimilable, the *Mathey-Caylus Capsules* are digested "by the most delicate persons, and never weary the stomach."

—*Gazette des Hopitaux de Paris.*

CLIN & CO., Paris,

AND OF ALL DRUGGISTS.

NEURALGIAS

PILLS OF DR. MOUSSETTE.

The **Moussette Pills** of aconitine and quinium, calm or cure *Gastralgia, Hemicrania, Headache, Sciatica*, and the most obstinate Neuralgias.

"The sedative action exerted by the **Moussette Pills** "upon the apparatus of the sanguineous circulation by the "intermediation of the vaso-motor nerves, indicates their "use in *neuralgias of the trigemini nerves*, (fifth pair), *con-* "*gestive neuralgias*, and *painful and inflammatory Rheumatismal* "*affections.*"

"Aconitine produces marvelous effects in the treatment "of *facial neuralgias* when they are not symptomatic of "intracranial tumor."—*Society of Biology of Paris, Meeting* "*of the 28th February, 1880.*

DOSE—Take 3 to 6 pills during the twenty-four hours.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR.

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

Laroche

Sole Agents for the United States for the above Preparations.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE., Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William St., New York,

Sole Agents for the above Preparations.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. **A NON-ALCOHOLIC LIQUID.** WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

THIRD EDITION.

ACCIDENTS AND EMERGENCIES

By CHARLES W. DULLES, M.D.

"This is the third edition, with revisions and enlargements, of an excellent manual, the practical qualities of which have been proved many times. It is a work that ought to be in every home, and every home that has a copy kept where it can be consulted at short notice is likely to find it worth many times its small cost."—*Philadelphia Evening Telegraph*, May 5, 1888.

"The illustrations are good and sufficiently numerous. The language is simple, being entirely devoid of technicalities, and the methods of treatment recommended are trustworthy and reliable. The manual is one of the best of this class of books and should be in the library of every householder, ready for reference at a moment's notice."—*Science*, May 18, 1888.

Sent on receipt of 75 Cents.

ADDRESS: **Medical and Surgical Reporter,**
P.O. Box 843. **PHILADELPHIA, PA.**

McARTHUR'S SYRUP.

(SYR: HYPOPHOS: COMP: C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION,** sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

Mention this Journal. McARTHUR HYPOPHOSPHITE CO., BOSTON, Mass.

THERE IS A PEPSIN

WHICH IS UNIFORMLY ACTIVE, PERMANENT, AND RELIABLE,

IT IS "FAIRCHILD'S."

This Pepsin will not spoil, will not become soft and sticky in the vial, even if left long uncorked.

Fairchild's Pepsin will not "gum up" if dispensed in powders, plain, or with the drugs usually combined with pepsin.

Fairchild's is not a partial peptone, and has none of the well-known characteristics of peptone.

Fairchild's is the pioneer pepsin, it showed the way. It "got there" early.

Its activity has never been exaggerated.

All this time, whilst other manufacturers were still offering the high-dilution saccharated and amylated article, Fairchild's Pepsin was steadily making its way on its merit. Now, no one ventures to ask a hearing for these *placebo-pepsins.*

When physicians now prescribe "pepsin" they mean pepsin—not milk sugar, and pepsin.

All these years, Fairchild's Pepsin was always and everywhere found to do just what was claimed for it—in spite of the attitude, genuine or assumed, which held that all "claims" about pepsin must be taken with a liberal discount.

Every *bona fide* test demonstrated its reliability.

We have never found it necessary to explain or excuse any deficiency or inaction as due to "deteriorated" specimens.

Fairchild's will not disappoint the prescriber under any condition proper for pepsin.

WITH SUCH A RECORD Fairchild's Pepsin is a good one to stand by

FAIRCHILD BROS. & FOSTER,

82 and 84 Fulton St., New York.

7 Snow Hill Buildings, London, E. C.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength and efficacy than heretofore.

The ordinary dose is a large wineglassful (4 ounces), taken fasting. Most efficacious and more acceptable to the palate when heated or mixed with an equal quantity of very hot water.

"The most suitable aperient for prolonged use."—Prof. SEEGEN.

"After twenty years' use, I appreciate it as highly as ever."—Prof. VIRCHOW.

The New York Pharmaceutical Company

BEDFORD SPRINGS, MASS.

An Important Communication
TO PHYSICIANS.

Thirteen years have now elapsed since the introduction of SCOTT'S EMULSION of PURE NORWEGIAN COD LIVER OIL with HYPOPHOSPHITES of LIME and SODA, since which time its growth and development have been very large, not only in this country but in South America, Great Britain and a large part of Continental Europe, and it has, in a very large degree, supplanted the Plain Cod Liver Oil. Its success is largely due to the happy combination of all its components, making a perfect chemical union, that will not separate for years, which we believe is not true of any other Cod Liver Oil preparation.

The innumerable reports from Physicians, of the brilliant results obtained justifies the statement that in almost every case where Cod Liver Oil is indicated, Scott's Emulsion is infinitely superior.

Physicians who have never tried this Emulsion, or who have been induced to try something else in its stead, will do us the favor to send for sample, and we know they will always use it in preference to plain Cod Liver Oil or any other preparation.

We also call your attention to the following preparations :

CHERRY-MALT PHOSPHITES.

A combination of the tonic principles of Prunus Virginiana, Malted Barley, Hypophosphites of Lime and Soda, and Fruit Juices. An elegant and efficient brain and nerve tonic.

BUCKTHORN CORDIAL (Rhamnus Frangula.)

Prepared from carefully selected German Buckthorn Bark, Juglans Bark, and Aromatics. The undoubted remedy for Habitual Constipation.

Be sure and send for samples of the above—delivered free.

SPORTING AND ATHLETIC GOODS OF EVERY DESCRIPTIO

The POCKET RECORD which has been issued from this office for TWENTY THREE YEARS has been issued this year better than it ever was before.

All the old, and approved features are retained, and some new ones are introduced. Special attention has been paid to the paper, printing, and binding. The 30 Patient books are printed with dates, or without them. This, because it is clear that many physicians prefer books with dates. Our subscribers will be safe in ordering, and let them do it now.

Western Pennsylvania Medical College,

City of Pittsburgh.

The *Regular Session* begins on the last Tuesday of September and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation.

A three years' graded course is also provided. The *Spring Session* embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects: this session begins the Second Tuesday in April and continues ten weeks.

The laboratories are open during the collegiate year for instruction in Chemistry, Microscopy, practical demonstrations in Medical and Surgical Pathology, and lessons in Normal Histology.

Special importance attaches to the superior clinical advantages possessed by this college. For particulars, see annual announcements and catalogue, for which address the Secretary, Prof. W. J. ASDALE. 2107 Penn. Avenue, Pittsburgh.

MEDICAL DEPARTMENT

The 123d ANNUAL WINTER SESSION will begin Monday, Oct. 1st, at 12 M., and continue 7 months.

The PRELIMINARY SESSION begins Monday, September 17th, the SPRING TERM Monday, May 6th, 1889.

The Curriculum is graded, and three annual Winter Sessions are required. Practical instruction, including laboratory-work in Chemistry, Histology, Osteology, and Pathology, with Bedside Instruction in Medicine, Surgery, and Gynæcology are a part of the regular course and without additional expense.

For catalogue and announcement containing particulars, apply to DR. JAMES TYSON, Sec'y, 36th and Woodland Ave., Phila.

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S, and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY'S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures.

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

For further particulars, and for College Circular, apply to

H. O. WALKER, M.D., Secretary,
33 Lafayette Ave., Detroit, Mich.

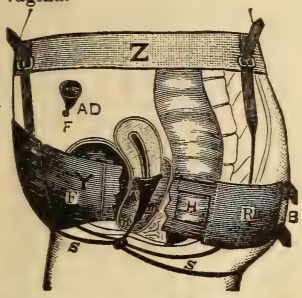
STAUFER'S

UTERINE SUPPORTER

HARD RUBBER. SPRING STEM.

This supporter, as now made, is the result of seventeen years' experience in manufacturing instruments for the treatment of displacements of the womb, aided by the suggestions of a large number of practitioners who have used these well-known supporters in the past.

The construction of the instrument shown in the cut is such that the cup inclines forward, and this inclination, together with the curve in the stem adapts it to the axis of the uterus and vagina.



There is a Coil-spring in the tube at *m*, which prevents shock to the womb when the patient sits down.

The instrument is held in position by means of a belt (Z or Y) and elastic cords (S S). One form of belt (Z) surrounds the waist; another (Y) is made like an abdominal supporter. The belts are made of 3-ply, fine cotton material, with elastic hip-straps, and buckle at the back.

Self-Sustaining Supporter.—The supporter may also be used without a belt, when no great bodily exertion calls for the latter. A little stem (F) is screwed on the cup (A), instead of the longer stem (*n*), as shown in the figure A D, and the instrument becomes self-sustaining.

The cup is made in sizes ranging from $1\frac{1}{4}$ inches to $2\frac{1}{4}$ inches in diameter, the difference from one size to another being $\frac{1}{8}$ inch. The size most frequently used is $1\frac{3}{4}$ inches across the cup.

SELECTION In ordering, give exact measure around the hips, just below crest of ilium, and the width of cup on top, as nearly as this can be estimated.

EXCHANGE Dr. Staufer will exchange one size of the supporter for another, if desired. PROVIDED the request is made within a reasonable time, and when the *three rubber parts* are returned in good condition.

THE BELTS ARE NOT EXCHANGED.

Because they are apt to show the effect of use, and there is no trouble about getting a good fit, if the correct measure is sent.

PRICE

The instrument complete, with belt Z, costs	$4.00
" " " " " Y, "	5.00

COLDEN'S LIQUID BEEF TONIC.

ORIGINAL LABEL:
"Colden's Liebig's Liquid Extract of Beef and Tonic Invigorator."

An Invaluable Aid in the Treatment of all Cases of Debility.

☞ ESTABLISHED 15 YEARS. ☞ ENDORSED BY SCORES OF PHYSICIANS. ☞ BEWARE OF IMITATIONS.

☞ ESSENTIALLY DIFFERENT FROM ALL OTHER BEEF TONICS.

COLDEN'S LIQUID BEEF TONIC consists of the Extract of Beef (by Baron Liebig's process), spirit rendered non-injurious to the most delicate stomach by extraction of Fusel Oil, Soluble Citrate of Iron, Cinchona, Gentian, and simple aromatics. An official analysis of this preparation by the eminent chemist, ARTHUR HILL HASSALL, M.D., F.R.S., and an endorsement of by Sir ERASMUS WILSON, F.R.S., is printed on the label of each bottle.

In the treatment of all cases of Debility, Convalescence from severe illness, Anæmia, Malarial Fever, Chlorosis, Incipient Consumption, Lack of Nerve Tone, and of the Alcohol and Opium Habits, and all maladies requiring a Tonic Nutrient, it is superior to all other preparations.

It acts directly on the sentient gastric nerves, stimulating the follicles to secretion, and gives to weakened individuals that first prerequisite to improvement, an appetite.—By the urgent request of several eminent members of the medical profession, I have added to each wineglassful of this preparation two grains of SOLUBLE CITRATE OF IRON, and which is designated on the label WITH IRON, "No. 1;" while the same preparation, WITHOUT IRON, is designated on the label as "No. 2."

☞ *I will, upon application, send a sample bottle of* COLDEN'S LIQUID BEEF TONIC *to any physician in regular standing. Please ask your Dispensing Druggist (if he has not already a supply) to order it. In prescribing this preparation physicians should be particular to mention* "COLDEN'S," *viz.,* "EXT. CARNIS FL. COMP. (COLDEN)." *It is put up in pint bottles, and* CAN BE HAD OF WHOLESALE AND RETAIL DRUGGISTS GENERALLY THROUGHOUT THE UNITED STATES.

C. N. CRITTENTON, Sole Agent, 115 Fulton Street, New York.

GLENN'S SULPHUR SOAP.

All physicians know the great value of the local use of Sulphur in the TREATMENT OF DISEASES OF THE SKIN. GLENN'S SULPHUR SOAP is the ORIGINAL and BEST combination of its kind, and the one now generally used. For sale by all Druggists at 25 cents a cake, or three cakes for 60 cents. Beware of counterfeits.

CONSTANTINE'S PINE TAR SOAP.

BY FAR THE BEST TAR SOAP MADE. Has been on trial among physicians for very many years as a toilet soap and healing agent, and its superior virtues have been unanimously conceded in ALL CASES WHERE THE USE OF TAR IS INDICATED.

Unsolicited expressions of its excellence have been received from the Medical Faculty generally. None genuine unless stamped "A. A. Constantine's Persian Healing Pine Tar Soap." For sale by all Druggists.

Wholesale Depot, C. N. CRITTENTON, 115 Fulton Street, New York.

Please mention this Journal. ☞ Samples of above Soaps SENT FREE on application to any physician enclosing card.

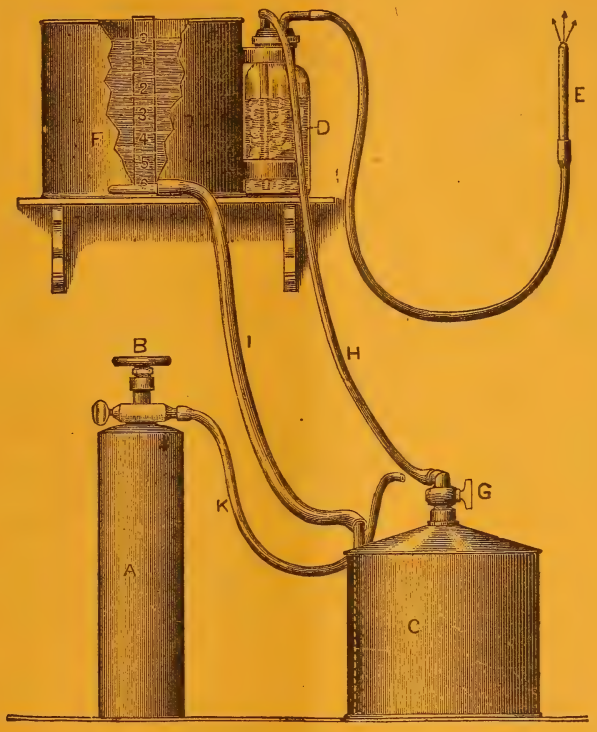
PURE OXYGEN

AND

APPARATUS FOR ITS THERAPEUTIC ADMINISTRATION



At the solicitation of a number of medical practitioners interested in oxygen treatment, we have devised apparatus for the therapeutic administration of this gas both by inhalation and by enema. We present an illustration of the latter. It is provided with a gauge by which the quantity of gas administered can be readily ascertained. We believe the apparatus we offer will be found to be the most convenient and economical device for the purpose on the market. We are prepared to supply Pure Oxygen Gas, or a mixture of Oxygen and Nitrous Oxide in definite proportions respectively of 20 per cent. and 40 per cent. of Nitrous Oxide, in cylinders of 40 or 100 gallons each. Full directions sent with each apparatus.

PRICES.

ENEMA APPARATUS	$12.00
INHALING APPARATUS	5.00
FORTY GALLON CYLINDER	6.00
FORTY GALLON CYLINDER FILLED	8.00
ONE HUNDRED GALLON CYLINDER	15.00
ONE HUNDRED GALLON CYLINDER FILLED	20.00

The Gas whether pure or mixed is supplied at the uniform price of 5 cents per gallon. The cost of the cylinders will be refunded on their return empty, with the valves in good condition.

THE S. S. WHITE DENTAL MFG. CO.,

PHILADELPHIA, NEW YORK, BOSTON, CHICAGO, BROOKLYN.

TO EACH SUBSCRIBER.

---o---

Dear Doctor:

I beg your co-operation in endeavoring to get all the subscribers to the MEDICAL AND SURGICAL REPORTER to cordially accept a condition usual with first-class periodicals, that is, that subscriptions shall be paid in advance. There are still some of our subscribers who have accounts unsettled for the year 1888, and they are urged to pay this amount and the price for the year 1889 as soon as possible.

The evidences of approval of the REPORTER by medical men are multiplying. The subscription list is growing larger, and it is hoped that all who are now subscribers will long continue their patronage, and that they will heartily support the publisher in endeavoring to maintain those principles of business which experience shows to be best for all, not only for the publishers but for also the subscribers.

SO SEND WHAT YOU OWE, SOON.

Make all checks or money-orders payable to

CHARLES W. DULLES.

Address,

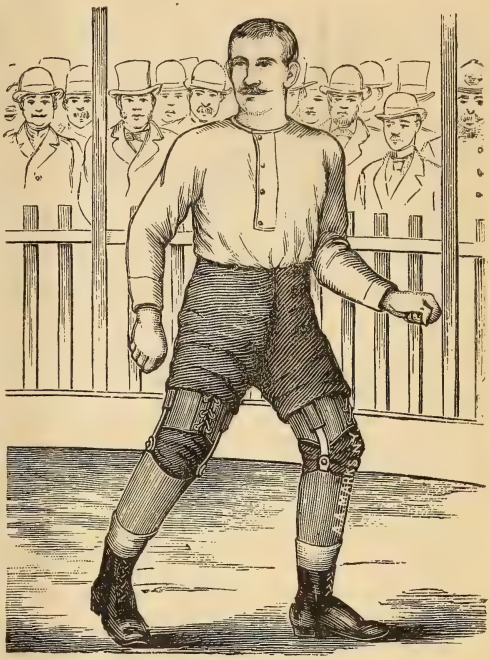
LEGS and ARMS with RUBBER FEET and HANDS

(MARKS' PATENTS.)

Indorsed by the United States Government, the Industrial Exhibition Commissioners of New York, Philadelphia, Atlanta, New Orleans, etc., the eminent surgeons in the country, the press, and over 9,000 men, women, and children who wear them, residing in all parts of the world.



The Rubber Foot and Hand possess the most natural appearance, the greatest durability and comfort of all artificial limbs. Vast numbers of mutilated men and women are, by the use of rubber feet and hands, enabled to mingle with the rest of the world without betraying their loss or experience great inconvenience. Farmers, mechanics, professionals, and even athletes, who have lost one or more of their limbs, are enabled to resume their vocations by the use of these remarkable inventions.

MR. A. A. MARKS: ITHACA, TOMPKINS CO., N.Y., Jan. 15, 1888.

DEAR SIR: Rubber feet are the wonders of the world. I have challenged every maker in the world to produce a man that has a pair of artificial feet to walk with me. I can walk a mile in thirteen minutes, and not hurry myself any. I do not take a back seat for any unprofessional with two good natural feet, in a one mile walk. I have the pleasure of announcing that my record in walking professionally is unequaled in the world by any one with artificial legs. THOMAS CLEARY.

By a copyright formula, furnished by us on request, applicants can supply us with all the data necessary to secure fit and satisfactory results, while they remain at home. One-half the legs and arms furnished by us are made from measurements and profiles, without our seeing the wearer. This new method is a great convenience for those living at a distance. Fit always guaranteed.

A treatise of 400 pages, and nearly 200 illustrations, and nearly a thousand endorsements and testimonals, sent to those needing artificial legs or arms, who will give a description of their case. The same will be sent to physicians and surgeons free of charge. Address,

A. A. MARKS, 701 Broadway, New York City.

SEND CHECK OR POSTAL NOTE

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 < {}^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on application.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to each pill.

W. H. SCHIEFFELIN & CO.,

170 & 172 WILLIAMS STREET, NEW YORK,

SOLE LICENSEES AND SOLE AGENTS FOR THE UNITED STATES.

A NEW USE

FOR

Liquid Peptonoids.

Successfully used in Dissolving the False Membrane in Diphtheria.

A Physician writes: "In an experience of over thirty years I have never used anything to equal your LIQUID PEPTONOIDS as a local application with a spray. It will dissolve the membrane and destroy the diphtheritic odor in less than twenty-four hours. I use the LIQUID PEPTONOIDS full strength as a spray, two or three times a day, in bad cases."

Used successfully by another physician in two desperate cases:

"I was induced to try LIQUID PEPTONOIDS in two very desperate cases of DIPHTHERIA. I think I never saw throats more heavily coated with exudate than were these, and I think I never saw it more rapidly disappear than in these cases, by frequent spraying with your LIQUID PEPTONOIDS."

LIQUID PEPTONOIDS can be taken by patients unable to ingest food in any other form. In *Dyspepsia* and *loss of appetite* its effects are positive, its digestive properties assisting in the digestion of food taken and its peptogenic properties quickly stimulating the natural digestive secretions of the stomach.

Pancrobilin.

Prepared (in both Liquid and Pill form) from Extract of Pancreas and Bile.

This preparation is designed expressly to increase the digestion and absorption of fats.

We believe that the fat-digesting properties of pancreatine and bile are inseparable, and that without their union in the intestinal tract but little, if any, fat would be digested and absorbed.

PANCROBILIN will be found of great service in *Phthisis and other wasting diseases, Nervous Prostration, Constipation, Inanition, Malnutrition, Intestinal Indigestion,* and wherever there is a failure to assimilate fats.

If the skin is first wet with LIQUID PANCROBILIN, the inunction of oils will be greatly facilitated.

LIQUID PANCROBILIN is put up in pound bottles.

PILL PANCROBILIN is put up in bottles holding 100 pills. The coating of the pills will resist acid digestion when given as directed, but will be quickly dissolved in the alkaline secretions of the duodenum.

Phospho-Caffein Comp.

(*Granular Effervescing.*)

Formula for each dessertspoonful:—

Caffein.
Acidi Phosphorici, ää, gr. ss.
Antipyrin.
Ext. Apii. Grav. dulc. (*Celery*), *ää gr.* .
Sodii Bromidi, gr. v.

The satisfactory results produced by PHOSPHO-CAFFEIN COMP. in *Headaches, Neuralgia, Insomnia, Neurasthenia, and general Nervous Irritability,* are not due to the effect of any one ingredient, but to the happy effect of the combination. A thorough series of comparative tests have demonstrated the superiority of the above formula over any other in the market.

REED & CARNRICK, New York.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron,** is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

Paris—CLIN & CO.—Paris

"Aconitine produces marvelous effects in the treatment "of *facial neuralgias* when they are not symptomatic of "intracranial tumor."—*Society of Biology of Paris, Meeting* "*of the 28th February, 1880.*

Dose—Take 3 to 6 pills during the twenty-four hours.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

Laroche

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE., Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

Sole Agents for the above Preparations.

A LETTER

RELATING TO

PIL: ANTISEPTIC AND ANTISEPTIC COMP.

The late eminent physician and most acute observer, DR. AUSTIN FLINT, Sr., has said: "Physicians are often consulted by patients, who, although far from being well, have no well-defined malady. They complain of langour, lassitude, want of buoyancy, aching of the limbs, and mental depression. They are wakeful during the night and enter upon their daily pursuits with a sense of fatigue."

'An investigation of the different organs of the body reveals no evidence of disease, the lungs, heart, and kidneys are sound. Some of the affections embraced in the posological catalogue may be discovered, yet the morbid condition is real.'" Hardly a practicing physician will read the above without recalling at once a number of cases with the identical symptoms as given by DR. FLINT. He will also remember how stubbornly such cases have resisted all the usual remedies, and dietetic precautions. Now what is the trouble and what the remedy? The trouble is simply chronic blood poisoning from Malaria, sewer gas, or what is far more likely from the products of a defective assimilation of food in the blood circulation. The remedy lies in first destroying these ptomainse, and for this there is no better or more quickly-acting remedy than Pil. Antiseptic, made by WARNER & Co., as any intelligent physician will see at a glance on noting its composition, or he will realize happily upon prescribing the remedy. This is not theory, but fact, tested by experience.—DR. F. S. GRANT.

PIL: ANTISEPTIC.

Each Pill contains: Sulphite Soda, 1 gr. Salicylic Acid, 1 gr. Ext. Nuc. Vomica, ¼ gr.

DOSE—1 to 3 Pills.

Pil. Antiseptic is prescribed with great advantage in cases of Dyspepsia attended with acid stomach and enfeebled digestion following excessive indulgence in eating or drinking. It is used with advantage in Rheumatism.

PIL: ANTISEPTIC COMP.

Each Pill contains: Sulphite Soda, 1 gr. Salicylic Acid, 1 gr. Ext. Nuc. Vomica, ⅛ gr. Powd. Capsicum, 1-10 gr. Conc't Pepsin, 1 gr.

DOSE—1 to 3 Pills.

Pil. Antiseptic Comp. are prescribed with great advantage in cases of Dyspepsia, Indigestion, and malassimilation of food.

The Curd of Cow's Milk Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

The New York Pharmaceutical Company

BEDFORD SPRINGS, MASS.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea. suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month, thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

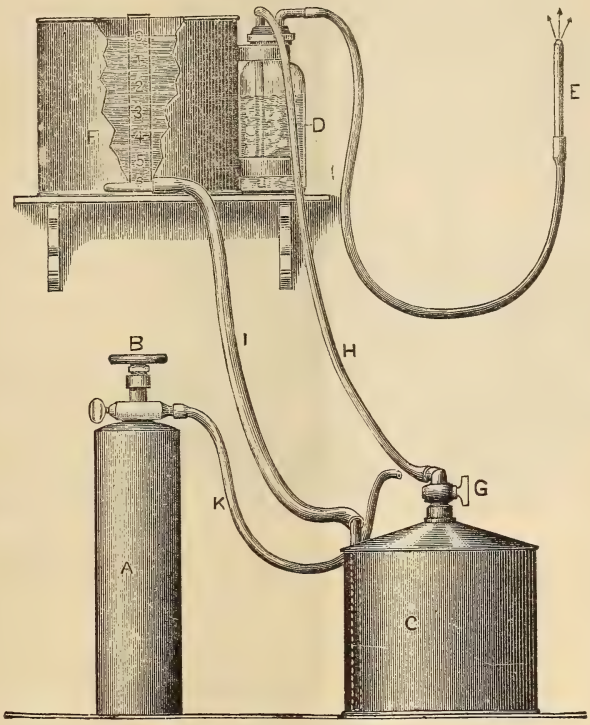
At the College Building, N. W. Cor. Broad and Lombard Streets, Philadelphia.

PURE OXYGEN

AND

APPARATUS FOR ITS THERAPEUTIC ADMINISTRATION



At the solicitation of a number of medical practitioners interested in oxygen treatment, we have devised apparatus for the therapeutic administration of this gas both by inhalation and by enema. We present an illustration of the latter. It is provided with a gauge by which the quantity of gas administered can be readily ascertained. We believe the apparatus we offer will be found to be the most convenient and economical device for the purpose on the market. We are prepared to supply Pure Oxygen Gas, or a mixture of Oxygen and Nitrous Oxide in definite proportions respectively of 20 per cent. and 40 per cent. of Nitrous Oxide, in cylinders of 40 or 100 gallons each. Full directions sent with each apparatus.

PRICES.

ENEMA APPARATUS	$12.00
INHALING APPARATUS	5.00
FORTY GALLON CYLINDER	6.00
FORTY GALLON CYLINDER FILLED	8.00
ONE HUNDRED GALLON CYLINDER	15.00
ONE HUNDRED GALLON CYLINDER FILLED	20.00

The Gas whether pure or mixed is supplied at the uniform price of 5 cents per gallon. The cost of the cylinders will be refunded on their return empty, with the valves in good condition.

An Important Communication
TO PHYSICIANS.

Thirteen years have now elapsed since the introduction of SCOTT'S EMULSION of PURE NORWEGIAN COD LIVER OIL with HYPOPHOSPHITES of LIME and SODA, since which time its growth and development have been very large, not only in this country but in South America, Great Britain and a large part of Continental Europe, and it has, in a very large degree, supplanted the Plain Cod Liver Oil. Its success is largely due to the happy combination of all its components, making a perfect chemical union, that will not separate for years, which we believe is not true of any other Cod Liver Oil preparation.

The innumerable reports from Physicians, of the brilliant results obtained justifies the statement that in almost every case where Cod Liver Oil is indicated, Scott's Emulsion is infinitely superior.

Physicians who have never tried this Emulsion, or who have been induced to try something else in its stead, will do us the favor to send for sample, and we know they will always use it in preference to plain Cod Liver Oil or any other preparation.

We also call your attention to the following preparations :

CHERRY-MALT PHOSPHITES.

A combination of the tonic principles of Prunus Virginiana, Malted Barley, Hypophosphites of Lime and Soda, and Fruit Juices. An elegant and efficient brain and nerve tonic.

BUCKTHORN CORDIAL (Rhamnus Frangula.)

Prepared from carefully selected German Buckthorn Bark, Juglans Bark, and Aromatics. The undoubted remedy for Habitual Constipation.

Be sure and send for samples of the above—delivered free.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

To whom all orders for samples must be addressed.

SVAPNIA IS FOR SALE BY DRUGGISTS GENERALLY.

Western Pennsylvania Medical College,

City of Pittsburgh.

The *Regular Session* begins on the last Tuesday of September and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation.

A three years' graded course is also provided. The *Spring Session* embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects: this session begins the Second Tuesday in April and continues ten weeks.

The laboratories are open during the collegiate year for instruction in Chemistry, Microscopy, practical demonstrations in Medical and Surgical Pathology, and lessons in Normal Histology.

Special importance attaches to the superior clinical advantages possessed by this college. For particulars, see annual announcements and catalogue, for which address the Secretary, Prof. W. J. ASDALE, 2107 Penn. Avenue, Pittsburgh.

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S, and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY'S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures.

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

MEDICAL DEPARTMENT

The 123d ANNUAL WINTER SESSION will begin Monday, Oct. 1st, at 12 M., and continue 7 months.

The PRELIMINARY SESSION begins Monday, September 17th, the SPRING TERM Monday, May 6th, 1889.

The Curriculum is graded, and three annual Winter Sessions are required. Practical instruction, including laboratory-work in Chemistry, Histology, Osteology, and Pathology, with Bedside Instruction in Medicine, Surgery, and Gynæcology are a part of the regular course and without additional expense.

For catalogue and announcement containing particulars, apply to DR. JAMES TYSON, Sec'y,
36th and Woodland Ave., Phila.

Best Two-Wheeled Vehicle-Spring in the World. Send two-cent stamp for Catalogue. Address J. P. CALLAN, Aurora, Ill.

BUFFALO LITHIA WATER

IN THE

Uric Acid Diathesis, Bright's Disease of the Kidneys, Chronic Inflammation of the Bladder, &c.

Dr. THOMAS H. BUCKLER, of Paris (formerly of Baltimore), SUGGESTER OF LITHIA as a Solvent for URIC ACID.

"Nothing I could say would add to the **WELL-KNOWN REPUTATION OF THE BUFFALO LITHIA WATER. I HAVE FREQUENTLY USED IT WITH GOOD RESULTS IN URIC ACID DIATHESIS, RHEUMATISM AND GOUT,** and with this object I have ordered it to Europe from Coleman & Rogers, of Baltimore. Lithia is in no form so valuable as where it exists in the Carbonate (the form in which it is found in the **BUFFALO LITHIA WATER**), Nature's mode of solution and division in water which has passed through Lepedolite and Spondumine Mineral formation."

Dr. WM. A. HAMMOND, of New York, Surgeon-General U. S. Army (Retired), Professor of Diseases of the Mind and Nervous System in the University of New York, &c.

"I have for some time made use of the Buffalo Lithia Water in cases of affections of the **NERVOUS SYSTEM,** complicated with **BRIGHT'S DISEASE OF THE KIDNEYS** or with a **GOUTY DIATHESIS.** The results have been eminently satisfactory. Lithia has for many years been a favorite remedy with me in like cases, but the **BUFFALO WATER CERTAINLY ACTS BETTER THAN ANY EXTEMPORANEOUS SOLUTION OF THE LITHIA SALTS,** and is, moreover, better borne by the Stomach. I also often prescribe it in those cases of **CEREBRAL HYPERÆMIA** resulting from over-mental work—in which the condition called **NERVOUS DYSPEPSIA EXISTS**—and generally with marked benefit."

HUNTER McGUIRE, M.D., LL.D., Late Professor of Surgery, Medical College of Virginia, Richmond.

"**BUFFALO LITHIA WATER,** *Spring No. 2,* as an **ALKALINE DIURETIC,** *is invaluable.* In **URIC ACID GRAVEL,** *and, indeed,* in *diseases generally dependent* upon a **URIC ACID DIATHESIS,** *it is a remedy of extraordinary potency.* I have prescribed it in cases of **RHEUMATIC GOUT,** *which had resisted the ordinary remedies, with wonderful good results.* I have *used it also in my own case, being a great sufferer from this malady, and have derived more benefit from it than from any other remedy.*"

Dr. ROBERT BATTEY, of Georgia, SUGGESTER OF BATTEY'S OPERATION.

"I would state that I have been using the Buffalo Lithia Water, No. 2, in my practice for three years past, in cases of **CHRONIC INFLAMMATION** of the **BLADDER,** whether induced by **STONE,** by enlarged **PROSTATE** in the aged, or by **NEGLECTED GONORRHŒA, AND HAVE SECURED EXCELLENT RESULTS,** which encourages me to prescribe it for the future."

Dr. CYRUS EDSON, of New York,
Chief Inspector of Cutaneous Diseases in Health Department and President of the Board of Pharmacy.

"I have frequently made use of **BUFFALO LITHIA WATER,** Spring No. 2, in my practice, *with excellent results.* It is a potent remedy in correcting **RHEUMATIC DIATHESIS.** In a case of **URIC ACID GRAVEL,** in which I recently prescribed it, **ITS BENEFICIAL EFFECTS WERE APPARENT AFTER THE THIRD DOSE.** I have also prescribed it with great benefit in **BRIGHT'S DISEASE OF THE KIDNEYS.**"

Water in Cases of one dozen half-gallon Bottles, Five Dollars per Case, at the Springs.

THOMAS F. GOODE,

PROPRIETOR,

BUFFALO LITHIA SPRINGS,

VIRGINIA.

BABIES.

"The next thing to the real is a picture of it."

We would like to send you our portfolio of baby portraits. May we? If you are unacquainted with the merits of our Lactated Food, we would also like to send you a sample of it. Sugar of milk the basis, no cane sugar, free from starch, highest value in nutrients, easily assimilated. A trial will prove its value.

WELLS & RICHARDSON CO., Proprietors, Burlington, Vt.

THERE IS A PEPSIN

WHICH IS UNIFORMLY ACTIVE, PERMANENT, AND RELIABLE,

IT IS "FAIRCHILD'S."

This Pepsin will not spoil, will not become soft and sticky in the vial, even if left long uncorked.

Fairchild's Pepsin will not "gum up" if dispensed in powders, plain, or with the drugs usually combined with pepsin.

Fairchild's is not a partial peptone, and has none of the well-known characteristics of peptone.

Fairchild's is the pioneer pepsin, it showed the way. It "got there" early.

Its activity has never been exaggerated.

All this time, whilst other manufacturers were still offering the high-dilution saccharated and amylated article, Fairchild's Pepsin was steadily making its way on its merit. Now, no one ventures to ask a hearing for these *placebo-pepsins*.

When physicians now prescribe "pepsin" they mean pepsin—not milk sugar, and pepsin.

All these years, Fairchild's Pepsin was always and everywhere found to do just what was claimed for it—in spite of the attitude, genuine or assumed, which held that all "claims" about pepsin must be taken with a liberal discount.

Every *bona fide* test demonstrated its reliability.

We have never found it necessary to explain or excuse any deficiency or inaction as due to "deteriorated" specimens.

Fairchild's will not disappoint the prescriber under any condition proper for pepsin.

With Such a Record Fairchild's Pepsin is a good one to stand by.

FAIRCHILD BROS. & FOSTER,
82 and 84 Fulton St., New York.

7 Snow Hill Buildings, London, E. C.

COMPRESSED TABLETS.

WE ask the attention of Physicians to the annexed list of recent additions of Compressed Tablets, as we think all of them are well deserving the careful attention of practitioners. We would be pleased to send to any physician, circular matter, compiled with great care and accuracy, giving therapeutic value and results in a concise form, that we are confident will be of interest, and possibly of advantage, to medical men who have not yet had access to the foreign and home authorities from which we have culled the information we give.

Acid Boracic, ... 5 grs.
Acetanilide, ... 3 and 5 "
Antifebrin, ... 3 " 5 "
Antipyrine, ... 3, 5 " 10 "
Blaud's
Ferri. Sulph. Exsic., 2 grs., Potass. Carb., 1 4-5 grs., Sacch. Alb., 1⅔ grs.
Iodol. . . . . ½, 1, 2, 3, and 5 grs.
Manganese Binoxide, ... 1 " 2 "
Opium, Camphor and Carb. Ammon., Opium Denarcot. ½ gr., Camphor, 2 grs., Ammon. Carb., 2½ grs.
Quinia Tannate, and Chocolate 1 grain, Quiniæ Tannat. 1 gr., Ext. Cacao, 9 grs.
Quinia Tannate and Chocolate, 2½ grs., Quiniæ Tannat. 2½ grs., Ext. Cacao, 7½ grs.
Salol, ... 2½ and 5 grs.
Sodium Succinate, ... 2 " 5 "
Thalline Sulphate, ... 2, 3 " 5 "
Trinitrin (Nitro-Glycerin), 1-20, 1-25, 1-33, 1-50, 1-100, and 1-200 gr.
Terpin Hydrate, ... 2, 3 and 5 grs

ANTISEPTIC TABLETS.

7.7 Hydrarg. Chlor. Corros., 7.3 Ammonium Chloride.

More than six months since, we sent a circular to the drug trade, stating that we had discontinued the manufacture of the Antiseptic Tablets introduced by us several years since at the suggestion of Dr. Charles Meigs Wilson, of this city. We have, however, received so many letters from physicians urging us to resume the manufacture, insisting that the Tablets prepared by us dissolved more readily and were more satisfactory than any substitute they had been able to procure, that we feel we could not ignore such persistent demands from our medical friends who have found our tablets an absolute necessity. We have therefore concluded to again prepare them, in a building entirely separate from our main establishment, with appliances and admirably devised protection by means of improved respirators, that will completely overcome any harmful effects to those engaged in their manufacture.

Druggists and physicians will be glad to learn that the Tablets as now prepared are perfectly white and free from the coloring-matter that we formerly added. This was done to lessen the danger of their being taken, or used in mistake; to guard against any such possibility, each Tablet, as now made, has the word "POISON" stamped upon it.

JOHN WYETH & BROTHER,

CHEMISTS, PHILADELPHIA.

BUFFALO LITHIA WATER

IN THE TREATMENT OF CHRONIC GASTRIC CATARRH

CLINICAL REPORTS.

CHRONIC GASTRIC CATARRH AND URIC ACID CALCULI.

A case stated by Dr. JNO. C. COLEMAN, of Scottsburg, Va., a retired Surgeon of the U. S. Navy.

"Mr. C. was for a number of years a sufferer from **CHRONIC GASTRIC CATARRH.** While his diet *was exclusively* **TEA** and **CRACKERS, BREAD** and **MILK,** *and other similar articles,* it was frequently thrown off in an undigested state soon after taking it, and at times he discharged from an empty stomach a strongly acid glairy mucus. A marked **URIC ACID DIATHESIS** supervened, consequent upon which he suffered for a period of some two years great **VESICAL IRRITATION** and possible **CYSTITIS,** attended by pain so intense and constantly present, as to require that he should be kept for the most part under the influence of opiates. After a persistent, but ineffectual exhibition of all remedies supposed to be indicated in the case, he was put for the latter affection upon the **BUFFALO LITHIA WATER,** Spring No. 2, with the happiest possible effect.

"In a few weeks, after commencing the use of it, the irritable condition of the *Bladder* was so far relieved that he was enabled to dispense entirely with the use of opiates. At the expiration of some eight weeks he had an attack of unusual severity, from which he was relieved by the discharge of a **CALCULUS,** followed at short intervals by the discharge of three others, which proved to be the termination of this trouble, as from that time there was entire subsidence of the painful symptoms described, and the *Bladder* resumed its natural state.

"While prescribed with special reference to the relief of the *Irritable Bladder,* the action of the water was not less surprisingly happy in the **GASTRIC AFFECTION,** with remarkable promptness correcting the highly acid condition of the **STOMACH,** restoring a healthy digestion and assimilation, and *tone* and *vigor* to the depressed *Nervous System.*

"In a few months he was able to eat, with perfect impunity, the coarsest articles of diet. He is now, after a lapse of several years, in robust health, having had no return of these painful maladies."

CHRONIC GASTRIC CATARRH.

Case of JOHN P. KEELING, Esq., stated by Dr. S. S. KEELING, Norfolk, Va., Member Medical Society of Virginia.

"Mr. John P. Keeling labored under **CHRONIC DYSPEPSIA,** and was always subject to attacks of *Spasmodic Gastralgia* immediately upon taking food into the stomach, which attacks were not at all amenable to treatment. Not unfrequently the stomach *rejected everything in the way of food and drink,* and he was of necessity confined to the lightest possible articles of diet, *meat and vegetables being entirely excluded.* He became so prostrated that it was with difficulty he could walk across his chamber floor, and had often to be lifted about. Such was the state of his **NERVOUS SYSTEM** *that great solicitude was felt as to his mental condition.*

"He visited Baltimore for medical aid, and was for many months under the treatment of some of the most eminent men of the profession in that city, but without beneficial result, and was finally advised that he had nothing to hope from remedies.

"Returning in an extremely critical condition to his home in the county of Princess Anne, he came under my professional care. Satisfied that medicine was unavailing in the case, I advised the **BUFFALO LITHIA WATER,** Spring No. 2. His stomach, however, was in a highly irritable condition, and I found it necessary to administer it in very small quantities; and it was at first given not exceeding an ounce at a dose, repeated at stated intervals. At the expiration of the third day the irritability of the stomach was decidedly less, and the quantity was then increased from day to day until the thirteenth day, when I found that the patient could take twelve ounces, which I regard as maximum dose at any time. Persisting in its use, on the twenty-eighth day he was free from pain, the stomach in a normal condition readily receiving both solids and liquids in moderate quantities, strength greatly increased, and nervous symptoms entirely relieved. At the expiration of the seventh week he was able to attend actively and regularly to his business on the farm. His recovery, which I regard as one of the most remarkable I ever knew of, I attribute entirely to the **BUFFALO LITHIA WATER.**"

GASTRO-INTESTINAL CATARRH.

Case of Mrs. Dr. F. J. GREGORY, of Virginia, reported by F. J. GREGORY, M.D., Keysville, Va.

"For eighteen months my wife, aged forty-one years, was a sufferer from a **GASTRO-INTESTINAL CATARRH,** which resisted my best-directed efforts at relief. The taking of the smallest quantity of the most easily-digested food on the stomach would produce an attack of *nausea and vomiting, the severity of which is seldom witnessed,* and when the stomach was free of food she would have attacks of *Gastralgia of the most excruciating nature.* She also suffered from habitual constipation, and at times with hemorrhages from the bowels. I pursued the usual line of treatment, such as simple bitters, Dilute Hydrocyanic Acid, Bismuth, etc., and called to my help two of the most skilled physicians in Southside Virginia, who supplemented my treatment with some of the newer drugs, such as **EFFERVESCING BICARB. POTASS. LACTOPEPTINE, CARLSBAD MINERAL SALTS,** etc., but with no benefit, and so her condition went on from bad to worse *until death seemed almost imminent from inanition.* I then put her on a milk diet with a glass of **BUFFALO LITHIA WATER,** Spring No. 2, every hour or so during the day, and *after the use of the first bottle improvement was marked, and before a case of it was used I regarded her cure as complete.* It has been nearly two years since, and there has been only one slight recurrence, which was a few days since, and it readily disappeared on the use of the water for a few days."

Water in cases of one dozen half-gallon bottles, $5 per case, at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C\ H_3)_2{=}C{=}(C_2\ H_5\ SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6\ H_4 \begin{smallmatrix} O.C_2H_5 \\ NH\ (CO{-}CH_3) \end{smallmatrix}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on application.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to each pill.

The Curd of Cow's Milk
Made as Soft and Digestible as that of
Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

Doliber-Goodale Co., Boston, Mass.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

Paris—CLIN & CO.—Paris

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE**, is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

Laroche

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE., Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William St., New York,

Sole Agents for the above Preparations.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

BABIES.

"The next thing to the real is a picture of it."

We would like to send you our portfolio of baby portraits. May we? If you are unacquainted with the merits of our Lactated Food, we would also like to send you a sample of it. Sugar of milk the basis, no cane sugar, free from starch, highest value in nutrients, easily assimilated. A trial will prove its value.

WELLS & RICHARDSON CO., Proprietors, Burlington, Vt.

McARTHUR'S SYRUP.

(SYR: HYPOPHOS: COMP: C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION**, sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

Mention this Journal. McARTHUR HYPOPHOSPHITE CO., BOSTON, MASS.

Friedrichshall.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength and efficacy than heretofore

The ordinary dose is a large wineglassful (4 ounces), taken fasting. Most efficacious and more acceptable to the palate when heated or mixed with an equal quantity of very hot water.

"The most suitable aperient for prolonged use."—Prof. SEEGEN.

"After twenty years' use, I appreciate it as highly as ever."—Prof. VIRCHOW.

POSITIVE MEDICATION

WITH POSITIVE AND DECIDED RESULTS, BY THE EMPLOYMENT OF THE

Viburnum Compound of Dr. Hayden

IN

Female Disorders

AND ALL SPASMODIC AFFECTIONS OF BOTH SEXES

TWENTY-TWO YEARS before the profession, without accident or complaint. Absolutely safe and free from all NARCOTICS or poisons—prompt and reliable in its action with no unpleasant sequelæ.

THE VIBURNUM COMPOUND of Dr. Hayden is employed in the leading hospitals and remedial institutions and by the most eminent physicians and gynæcologists with marked success.

We have the testimonials of

FIVE THOUSAND PHYSICIANS

testifying to the great merits of the VIBURNUM COMPOUND of Dr. Hayden—more than were ever given before for any special remedy in the world. Dispensed by all reliable Apothecaries, put up in 4 oz., 10 oz., and 16 oz. bottles.

For formula, report of cases, treatment, special directions, and much other interesting matter, and the written testimonials of

ONE THOUSAND PHYSICIANS

send your address for our eighty-page ILLUSTRATIVE HANDBOOK, FREE.

The New York Pharmaceutical Company

BEDFORD SPRINGS, MASS.

An Important Communication
TO PHYSICIANS.

Thirteen years have now elapsed since the introduction of SCOTT'S EMULSION of PURE NORWEGIAN COD LIVER OIL with HYPOPHOSPHITES of LIME and SODA, since which time its growth and development have been very large, not only in this country but in South America, Great Britain and a large part of Continental Europe, and it has, in a very large degree, supplanted the Plain Cod Liver Oil. Its success is largely due to the happy combination of all its components, making a perfect chemical union, that will not separate for years, which we believe is not true of any other Cod Liver Oil preparation.

The innumerable reports from Physicians, of the brilliant results obtained justifies the statement that in almost every case where Cod Liver Oil is indicated, Scott's Emulsion is infinitely superior.

Physicians who have never tried this Emulsion, or who have been induced to try something else in its stead, will do us the favor to send for sample, and we know they will always use it in preference to plain Cod Liver Oil or any other preparation.

We also call your attention to the following preparations:

CHERRY-MALT PHOSPHITES.

A combination of the tonic principles of Prunus Virginiana, Malted Barley, Hypophosphites of Lime and Soda, and Fruit Juices. An elegant and efficient brain and nerve tonic.

BUCKTHORN CORDIAL (Rhamnus Frangula.)

Prepared from carefully selected German Buckthorn Bark, Juglans Bark, and Aromatics. The undoubted remedy for Habitual Constipation.

Be sure and send for samples of the above—delivered free.

DR. WILLIAM A. HAMMOND,
The World-Famed Specialist in Mind Diseases, says:

"New York, July 10, 1888.

"I am familiar with various systems for improving the memory, including, among others, those of Feinaigle, Gouraud, and Dr. Pick, and I have recently become acquainted with the system in all its details and applications taught by Prof. Loisette. I am, therefore enabled to state that his is, in all its essential features, entirely original; that its principles and methods are different from all others, and that it presents no material analogies to that of any other system.

"I consider Prof. Loisette's system to be a new departure in the education of the memory and attention, and of very great value; that it being a systematic body of principles and methods, it should be studied as an entirety to be understood and appreciated: that a correct view of it cannot be obtained by examining isolated passages of it.

WILLIAM A. HAMMOND."

'To Prof. Loisette, 237 Fifth Avenue, N. Y.

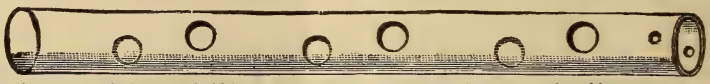
For more than four years the Perfection Douche has been subjected to the severest practical tests, by experienced gynaecologist in every part of this country, no objection, in a single instance, having been made to the principles upon which it is constructed.

It provides ample and comfortable support, with a slight elevation of either the shoulders or hips, furnishes means for the prolonged application of a sufficiently large amount of hot water, and completely conveys away all the drip without risk of wetting the clothing. No other apparatus for applying hot water in the treatment of uterine and pelvic diseases combines as many desirable and practical qualities. COMFORT, CONVENIENCE, DURABILITY, AND THOROUGHNESS OF APPLICATION are its main points of excellence.

Descriptive circulars, prices, and testimonials are furnished on application. These afford satisfactory evidence of unqualified endorsement of its superior advantages, and show the high appreciation in which the instrument is held by those who have repeatedly recommended and tested its work.

Applications for the Douche or for circulars or testimonials may be made to agents, or to "THE PERFECTION DOUCHE," Box 7, ALBANY, N. Y.

ANTISEPTIC DRAINAGE TUBES.—Glass.



These Tubes have large holes, one-half inch apart, arranged alternately on opposite sides.
They are carefully finished, especial care being taken to make them smooth.
In addition to the drainage-holes, each tube has at one end two smaller holes for the insertion of Safety-Pin, through which it is prevented slipping into the wound.

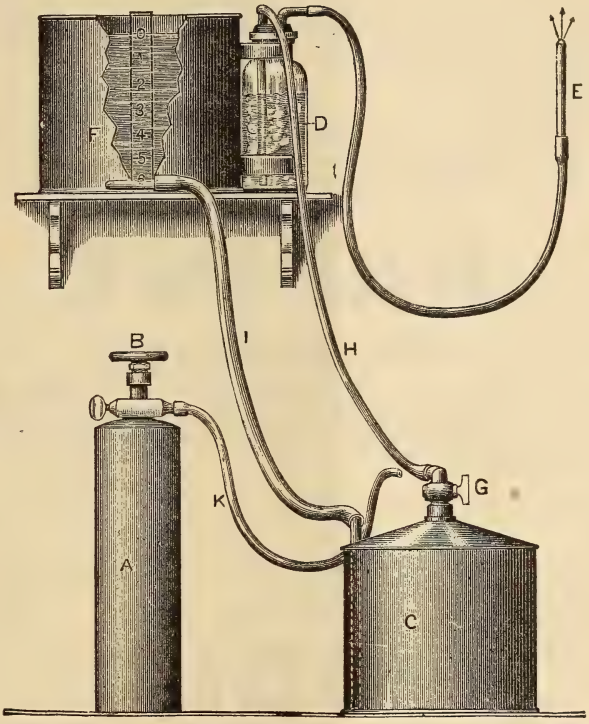
PURE OXYGEN

AND

APPARATUS FOR ITS THERAPEUTIC ADMINISTRATION



At the solicitation of a number of medical practitioners interested in oxygen treatment, we have devised apparatus for the therapeutic administration of this gas both by inhalation and by enema. We present an illustration of the latter. It is provided with a gauge by which the quantity of gas administered can be readily ascertained. We believe the apparatus we offer will be found to be the most convenient and economical device for the purpose on the market. We are prepared to supply Pure Oxygen Gas, or a mixture of Oxygen and Nitrous Oxide in definite proportions respectively of 20 per cent. and 40 per cent. of Nitrous Oxide, in cylinders of 40 or 100 gallons each. Full directions sent with each apparatus.

PRICES.

ENEMA APPARATUS	$12.00
INHALING APPARATUS	5.00
FORTY GALLON CYLINDER	6.00
FORTY GALLON CYLINDER FILLED	8.00
ONE HUNDRED GALLON CYLINDER	15.00
ONE HUNDRED GALLON CYLINDER FILLED	20.00

The Gas whether pure or mixed is supplied at the uniform price of 5 cents per gallon. The cost of the cylinders will be refunded on their return empty, with the valves in good condition.

PHILADELPHIA, NEW YORK, BOSTON, CHICAGO, BROOKLYN.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

MEDICAL DEPARTMENT

The 123d ANNUAL WINTER SESSION will begin Monday, Oct. 1st, at 12 M., and continue 7 months

The PRELIMINARY SESSION begins Monday, September 17th, the SPRING TERM Monday, May 6th, 1889.

The Curriculum is graded, and three annual Winter Sessions are required. Practical instruction, including laboratory-work in Chemistry, Histology, Osteology, and Pathology, with Bedside Instruction in Medicine, Surgery, and Gynæcology are a part of the regular course and without additional expense.

For catalogue and announcement containing particulars, apply to DR. JAMES TYSON, Sec'y,
36th and Woodland Ave., Phila.

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S, and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY'S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures.

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

For further particulars, and for College Circular, apply to

H. O. WALKER, M.D., Secretary,
33 Lafayette Ave., Detroit, Mich.

The only prominent Emulsion of Cod-Liver Oil introduced directly to the medical profession. It is advertised exclusively in medical journals.

HYDROLEINE.

(HYDRATED OIL.)

Produces rapid increase in Flesh and Strength.

FORMULA.—Each Dose contains:			
Pure Cod Liver Oil.....80 m. (drops)		Soda.....1-3 Grains.	
Distilled Water.....35 "		Salicylic Acid.....1-4 "	
Soluble Pancreatin..... 5 Grains.		Hyocholic Acid.....1-20 "	

Recommended and Prescribed by EMINENT PHYSICIANS Everywhere. It is pleasant to the Taste and acceptable to the most delicate Stomach.

IT IS ECONOMICAL IN USE AND CERTAIN IN RESULTS.

HYDROLEINE (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhuæ, but a hydro-pancreated preparation, containing acids and a small percentage of soda. Pancreatin is the digestive principle of fatty foods, and in the soluble form here used, readily converts the oleaginous material into assimilable matter, a change so necessary to the reparative process in all wasting diseases.

The following are some of the diseases in which **HYDROLEINE** is indicated:

Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis, General Debility, etc.

TO BRAIN WORKERS of all classes, **HYDROLEINE** is invaluable, supplying as it does, the true brain-food, and being more easily assimilated by the digestive organs than any other emulsion.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," and "Consumption and Wasting Diseases," by two distinguished London physicians, which will be sent free on application.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE UNITED STATES. 115 FULTON STREET, N. Y.

A Sample of Hydroleine will be sent free upon application, to any physician (enclosing business card) in the U. S.

SEND CHECK OR POSTAL NOTE

FELLOWS'
HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The essential elements** to the Animal Organization—Potash and Lime.

The **Oxydizing Agents**—Iron and Manganese;

The **Tonics**—Quinine and Strychnine,

And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

LEGS and ARMS with RUBBER FEET and HANDS

(MARKS' PATENTS.)

Indorsed by the United States Government, the Industrial Exhibition Commissioners of New York, Philadelphia, Atlanta, New Orleans, etc, the eminent surgeons in the country, the press, and over 9,000 men, women, and children who wear them, residing in all parts of the world.

The Rubber Foot and Hand possess the most natural appearance, the greatest durability and comfort of all artificial limbs. Vast numbers of mutilated men and women are, by the use of rubber feet and hands, enabled to mingle with the rest of the world without betraying their loss or experience great inconvenience. Farmers, mechanics, professionals, and even athletes, who have lost one or more of their limbs, are enabled to resume their vocations by the use of these remarkable inventions.

MR. A. A. MARKS: ITHACA, TOMPKINS CO., N.Y., Jan. 15, 1888.

DEAR SIR: Rubber feet are the wonders of the world. I have challenged every maker in the world to produce a man that has a pair of artificial feet to walk with me. I can walk a mile in thirteen minutes, and not hurry myself any. I do not take a back seat for any unprofessional with two good natural feet, in a one mile walk. I have the pleasure of announcing that my record in walking professionally is unequaled in the world by any one with artificial legs. THOMAS CLEARY.

By a copyright formula, furnished by us on request, applicants can supply us with all the data necessary to secure fit and satisfactory results, while they remain at home. One-half the legs and arms furnished by us are made from measurements and profiles, without our seeing the wearer. This new method is a great convenience for those living at a distance. Fit always guaranteed.

A treatise of 400 pages, and nearly 200 illustrations, and nearly a thousand endorsements and testimonials, sent to those needing artificial legs or arms, who will give a description of their case. The same will be sent to physicians and surgeons free of charge. Address,

A. A. MARKS, 701 Broadway, New York City.

BABIES.

"The next thing to the real is a picture of it."

We would like to send you our free portfolio of baby portraits. May we? If you are unacquainted with the merits of our Lactated Food, we would also like to send you a sample of it. All charges paid. Sugar of milk the basis, no cane sugar, free from starch, highest value in nutrients, easily assimilated. A trial will prove its value.

WELLS & RICHARDSON CO., Proprietors, Burlington, Vt.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 \begin{matrix} O.C_2H_5 \\ NH\,(CO—CH_3) \end{matrix}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeable symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on application.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to eac pill.

SOLE LICENSEES AND SOLE AGENTS FOR THE UNITED STATES.

SUCCUS ALTERANS

(McDADE.)

SUCCUS ALTERANS is a purely vegetable compound of the preserved juices of Stillingia Sylvatica Lappa Minor, Phytolacca Decandra, Smilax Sarsaparilla, and Xanthoxylum Carolinianum, as collected by Dr. Geo. W. McDade, exclusively for Eli Lilly & Co., and endorsed by Dr. J. Marion Sims.

SUCCUS ALTERANS continues to gain favor from its remarkable Alterative and Tonic properties, *eliminating specific poison from the blood* and *increasing the proportion of red corpuscles in anæmic patients* to a wonderful degree; is endorsed by the medical profession, and in use by many hospitals of note.

SUCCUS ALTERANS in venereal and cutaneous diseases is fast supplanting Mercury, the Iodides, and Arsenic; and is a certain remedy for Mercurialization, Iodism, and the dreadful effects often following the use of Arsenic in skin diseases.

SUCCUS ALTERANS is also strongly recommended for its Tonic and Alterative effects in myriad forms of scrofulous disease, and in all cases where anæmia is a factor. Such patients rapidly develop a good appetite, sleep soundly, and gain flesh rapidly. Many cases are on record where patients increased ten to twenty-five pounds in weight in a few weeks.

SUCCUS ALTERANS is giving satisfactory results in treatment of *Chronic Rheumatism*, and can be used with confidence.

SUCCUS ALTERANS may be given for any length of time, without injury to the patient.

SUCCUS ALTERANS is put up in pint round amber bottles, and *never in bulk.*

PHYSICIANS who have not received Dr. McDade's latest publication, the Monographia Syphilitica, should send their address, mentioning this journal, and we will mail a copy. It contains a paper, illustrated with colored plates, by Dr. D. H. Goodwillie, of New York, on the "Sequelæ of Syphilis," reports of cases in practice, and many other valuable papers.

ELIXIR PURGANS.

Elixir Purgans (Lilly) reliably stimulates the dormant liver without undue irritation, and has gentle yet positive effect upon the alimentary tract. In Habitual Constipation, so common in Women and Children, it will be found particularly useful. Its endorsement at Bellevue and many other prominent hospitals East and West, as well as its employment in general practice by the most eminent medical men, confirms the experience of years in its use.

Each Teaspoonful Represents

Rhamnus Purshiana, -	**10 grs.**
Euonymus Atropur., - -	**8 grs.**
Cassia Acutifolia (Purif.)	**10 grs.**
Iris Versicolor, - - -	**4 grs.**
Hyoscyamus Niger, -	**2 grs.**
Aromatics, etc.	

IN PRESCRIBING, PLEASE BE CAREFUL TO WRITE

ELIXIR PURGANS (LILLY),

THAT OTHER PREPARATIONS MAY NOT BE SUBSTITUTED.

HIGHLY RECOMMENDED.

We take pleasure in endorsing the Elixir Purgans (Lilly) as prepared from the above formula, for in it we find a near approach to positive *perfection* in the form of a *Liquid Cathartic*, and, from our experience with the preparation, can highly recommend it to the profession.

NEURALGIAS

PILLS OF DR. MOUSSETTE.

The **Moussette Pills** of aconitine and quinium, calm or cure *Gastralgia, Hemicrania, Headache, Sciatica*, and the most obstinate Neuralgias.

"The sedative action exerted by the **Moussette Pills** "upon the apparatus of the sanguineous circulation by the "intermediation of the vaso-motor nerves, indicates their "use in *neuralgias of the trigemini nerves*, (fifth pair), *con-* "*gestive neuralgias*, and *painful and inflammatory Rheumatismal* "*affections.*"

"Aconitine produces marvelous effects in the treatment "of *facial neuralgias* when they are not symptomatic of "intracranial tumor."—*Society of Biology of Paris, Meeting* "*of the 28th February, 1880.*

Dose—Take 3 to 6 pills during the twenty-four hours.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark. of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE., Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

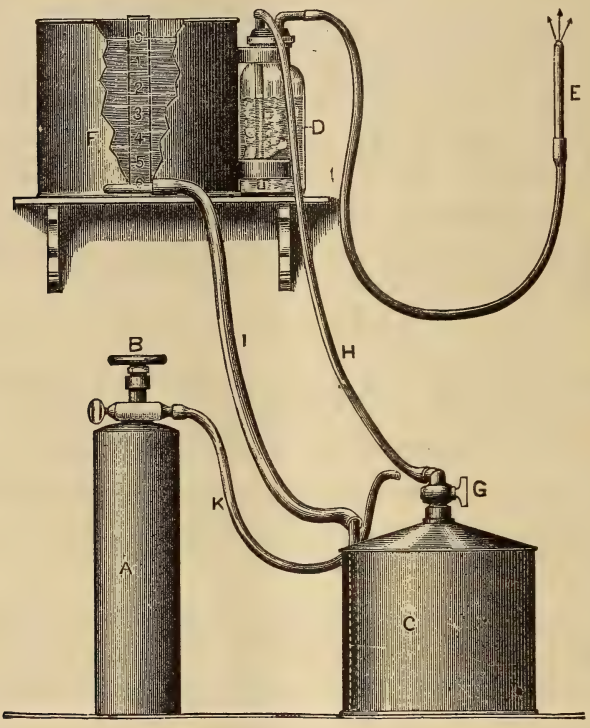
PURE OXYGEN

AND

APPARATUS FOR ITS THERAPEUTIC ADMINISTRATION



At the solicitation of a number of medical practitioners interested in oxygen treatment, we have devised apparatus for the therapeutic administration of this gas both by inhalation and by enema. We present an illustration of the latter. It is provided with a gauge by which the quantity of gas administered can be readily ascertained. We believe the apparatus we offer will be found to be the most convenient and economical device for the purpose on the market. We are prepared to supply Pure Oxygen Gas, or a mixture of Oxygen and Nitrous Oxide in definite proportions respectively of 20 per cent. and 40 per cent. of Nitrous Oxide, in cylinders of 40 or 100 gallons each. Full directions sent with each apparatus.

PRICES.

ENEMA APPARATUS	$12.00
INHALING APPARATUS	5.00
FORTY GALLON CYLINDER	6.00
FORTY GALLON CYLINDER FILLED	8.00
ONE HUNDRED GALLON CYLINDER	15.00
ONE HUNDRED GALLON CYLINDER FILLED	20.00

The Gas whether pure or mixed is supplied at the uniform price of 5 cents per gallon. The cost of the cylinders will be refunded on their return empty, with the valves in good condition.

PRICE REDUCED.

True Salicylic Acid.

CRYSTALLIZED FROM

WINTERGREEN OIL.—ITS NATURAL SOURCE.

DR. P. W. LATHAM, Downing Professor of Medicine at Cambridge (England), lecturing on the treatment of gout and rheumatism at the Royal College of Physicians, says:

"The true Salicylic Acid obtained from the vegetable kingdom must alone be employed. If you have to give large doses, avoid giving the artificial product obtained from carbolic acid, however much it may have been dialyzed and purified. Give the acid without any alkali or base," etc.

A reprint of this exceedingly valuable paper will be sent on application.

A DESIDERATUM—not always appreciated.

The quality of medicines used in the prescription is as important a factor in the cure of disease as a correct diagnosis; and a physician violates no code, either of ethics or morals, in demanding of his druggist that which he knows to be reliable, instead of leaving to the latter to decide whose preparations he shall or shall not use.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea. suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month. thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

WATSON, M.D.; DEMONSTRATOR OF PATHOLOGY, R. W. SEISS, M.D.; DEMONSTRATOR OF FRACTURE DRESSING, C. L. BOWER, M.D.; OBSTETRICS AND DISEASES OF CHILDREN, W. H. L. HALE, M.D.; DEMONSTRATOR OF CHEMISTRY, J. H. KYNER, PH. G.

Individual practical instruction, in all branches of surgery and medicine, to physicians only, during the entire year. The College has well-fitted laboratories of pathology, microscopy, anatomy, surgery, electro-therapeutics, and massage.

In addition to the clinical facilities of the dispensary, the professors utilize, for purposes of instruction, their services in the Philadelphia, Pennsylvania, Wills, Howard, Episcopal, Orthopædic, Jewish, St. Mary's, St. Agnes', and St. Christopher's Hospitals.

The Fee for each branch, for six consecutive weeks from date of issue, is $15.00. Any number of branches may be taken General Ticket for the thirteen clinical courses, for six consecutive weeks, $100.00. Ticket for Summer course, from July 2d to September 15th, $60.00. One month, Summer course, $25.00. One branch, Summer course, $10.00.

For Announcement address L. W. STEINBACH, M.D., Secretary,
At the College Building, N. W. Cor. Broad and Lombard Streets, Philadelphia.

An Important Communication
TO PHYSICIANS.

Thirteen years have now elapsed since the introduction of SCOTT'S EMULSION of PURE NORWEGIAN COD LIVER OIL with HYPOPHOSPHITES of LIME and SODA, since which time its growth and development have been very large, not only in this country but in South America, Great Britain and a large part of Continental Europe, and it has, in a very large degree, supplanted the Plain Cod Liver Oil. Its success is largely due to the happy combination of all its components, making a perfect chemical union, that will not separate for years, which we believe is not true of any other Cod Liver Oil preparation.

The innumerable reports from Physicians, of the brilliant results obtained justifies the statement that in almost every case where Cod Liver Oil is indicated, Scott's Emulsion is infinitely superior.

Physicians who have never tried this Emulsion, or who have been induced to try something else in its stead, will do us the favor to send for sample, and we know they will always use it in preference to plain Cod Liver Oil or any other preparation.

We also call your attention to the following preparations:

CHERRY-MALT PHOSPHITES.

A combination of the tonic principles of Prunus Virginiana, Malted Barley, Hypophosphites of Lime and Soda, and Fruit Juices. An elegant and efficient brain and nerve tonic.

BUCKTHORN CORDIAL (Rhamnus Frangula.)

Prepared from carefully selected German Buckthorn Bark, Juglans Bark, and Aromatics. The undoubted remedy for Habitual Constipation.

Be sure and send for samples of the above—delivered free.

SCOTT & BOWNE, 132 South Fifth Ave., New York

GENUINE BLAUD'S PILLS.

These pills, which have been inserted in the new French Pharmacopœia, have been employed with the greatest success for more than fifty years by most French and foreign physicians, to cure anemia, chlorosis, and all chlorotic affections in which iron is indicated.

Here is the opinion of men most eminent in medical science who have employed them:

"For thirty-five years, in which I have practised medicine, I have recognized the incontestable advantages of BLAUD'S PILLS over all other ferruginous preparations, and I regard them as the best anti-chlorotic."—DR. DOUBLE, *Ex-President of the Academy of Medicine.*

"Of all the ferruginous preparations, which have given good results in the treatment of chlorotic affections, BLAUD'S PILLS appear to us to deserve to hold the first rank."—*Dictionnaire universel de médecine*, Vol. II, p. 99.

These pills, prepared according to the genuine formule of the originator, by his nephew, Aug. Blaud, Pharmacist of the Faculty of Paris, are sold only in bottles of 200 pills and half bottles of 100 pills, at a cost of 5 and 3 francs ($1.00, and seventy-five cents), and never in smaller quantities. *See that his name is stamped on each pill.* **PARIS, 8 RUE PAYENNE, and at every Pharmacy.** (Beware of imitations.)

The Curd of Cow's Milk
Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

Doliber-Goodale Co., Boston, Mass.

THERE IS A PEPSIN

WHICH IS UNIFORMLY ACTIVE, PERMANENT, AND RELIABLE,

IT IS "FAIRCHILD'S."

This Pepsin will not spoil, will not become soft and sticky in the vial, even if left long uncorked.

Fairchild's Pepsin will not "gum up" if dispensed in powders, plain, or with the drugs usually combined with pepsin.

Fairchild's is not a partial peptone, and has none of the well-known characteristics of peptone.

Fairchild's is the pioneer pepsin, it showed the way. It "got there" early.

Its activity has never been exaggerated.

All this time, whilst other manufacturers were still offering the high-dilution saccharated and amylated article, Fairchild's Pepsin was steadily making its way on its merit. Now, no one ventures to ask a hearing for these *placebo-pepsins*.

When physicians now prescribe "pepsin" they mean pepsin—not milk sugar, and pepsin.

All these years, Fairchild's Pepsin was always and everywhere found to do just what was claimed for it—in spite of the attitude, genuine or assumed, which held that all "claims" about pepsin must be taken with a liberal discount.

Every *bona fide* test demonstrated its reliability.

We have never found it necessary to explain or excuse any deficiency or inaction as due to "deteriorated" specimens.

Fairchild's will not disappoint the prescriber under any condition proper for pepsin.

WITH SUCH A RECORD Fairchild's Pepsin is a good one to stand by.

Western Pennsylvania Medical College,

City of Pittsburgh.

The *Regular Session* begins on the last Tuesday of September and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation.

A three years' graded course is also provided. The *Spring Session* embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects: this session begins the Second Tuesday in April and continues ten weeks.

The laboratories are open during the collegiate year for instruction in Chemistry, Microscopy, practical demonstrations in Medical and Surgical Pathology, and lessons in Normal Histology.

Special importance attaches to the superior clinical advantages possessed by this college. For particulars, see annual announcements and catalogue, for which address the Secretary, Prof. W. J. ASDALE. 2107 Penn. Avenue, Pittsburgh.

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S, and ST. LUKE'S HOSPITAL, at the COLLEGE EYE and EAR INFIRMARY, ST. MARY'S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures.

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

For further particulars, and for College Circular, apply to

BUFFALO LITHIA WATER

IN THE TREATMENT OF

ALBUMINURIA, WHETHER OF BRIGHT'S DISEASE, PREGNANCY, OR SCARLET FEVER.

Dr. WM. B. TOWLES, Professor of Anatomy and Materia Medica in the Medical Department of the University of Virginia.

"BUFFALO LITHIA WATER, No. 2, belongs to the ALKALINE OF, *perhaps, to the* ALKALINE-SALINE Class, *for it has proved far more efficacious in many diseased conditions than any of the simple* ALKALINE *waters.*

. . . . . .

"*Its effects are marked in causing a disappearance of* ALBUMEN *from the Urine.* In a single case of BRIGHT'S DISEASE OF THE KIDNEYS I witnessed *decided beneficial results from its use, and from its action in this case I should have great confidence in it as a remedy in certain stages of the disease.*"

Dr. GRAEME M. HAMMOND, of New York, Professor of Diseases of the Mind and Nervous System in the New York Post-Graduate Medical School and Hospital.

"In *all* cases of BRIGHT'S DISEASE of the KIDNEYS I have found BUFFALO LITHIA WATER *of the greatest service in increasing the quantity of urine and in eliminating the* ALBUMEN."

Dr. GEORGE W. MILTENBERGER, Professor of Obstetrics, University of Maryland,

Before the Medical and Chirurgical Faculty of the State of Maryland, recommended BUFFALO LITHIA WATER as an ALKALINE Diuretic in ALBUMINURIA of PREGNANCY.—See *Trans. Faculty of State of Maryland*, 1886.

Dr. WM. H. DOUGHTY, Professor of Materia Medica and Therapeutics, Medical College of Georgia; Member of American Medical Association, etc.

"Over the NAUSEA AND VOMITING OF PREGNANCY, PARTICULARLY IN THE LATTER MONTHS, WHERE URÆMIC CONDITIONS are possibly established, and in PUERPERAL CONVULSIONS, URÆMIA CO-EXISTING, BUFFALO LITHIA WATER often exerts *marked control.*"

Dr. CALEB WINSLOW, 23 McCulloh Street, Baltimore, Member of the Medical and Chirurgical Faculty of Maryland.

"I have found the BUFFALO LITHIA WATER, Spring No. 2, of marked service in relieving the *Nausea* of *Pregnant Women.* I frequently resort to it at intervals *during the whole course of Pregnancy.* Being *antacid, laxative, diuretic, and tonic, it seems well adapted to relieve the disturbances usually attendant upon Gestation, and I have no doubt its free use might remove* URÆMIC POISON, *and prevent Convulsions produced thereby.*"

Dr. JOS. HOLT, New Orleans, President Board of Health, State of Louisiana.

"I have prescribed BUFFALO LITHIA WATER freely in affections of the *Kidneys* and *Urinary* passages, particularly in GOUTY *subjects.* in ALBUMINURIA, and in irritable conditions of the *Bladder* and *Urethra* in *females.* The results have been such as to satisfy me *of the extraordinary value of this Water in a large class of cases usually most difficult to treat.*"

Dr. JAMES B. McCAW, Professor of the Practice of Medicine in the Virginia Medical College.

[Extract from the Proceedings of the Richmond Academy of Medicine, October 15, 1878.]

"Dr. McCaw also SPOKE of the great value of BUFFALO LITHIA WATER in ALBUMINURIA of *Scarlet Fever* and in ALBUMINURIA of *Pregnant Women.*"

Dr. J. T. DAVIDSON, New Orleans, La., ex-President New Orleans Surgical and Medical Association.

"I have for several years prescribed BUFFALO LITHIA WATER, Spring No. 2, in all cases of *Scarlet Fever,* directing it to be drunk *ad libitum, with the effect of relieving all traces of* ALBUMEN *in the urine,* and have found it equally efficacious in renal diseases requiring the use of alkaline water."

Dr. G. W. SEMPLE, Hampton, Va., President Medical Society of Virginia.

"In SCARLET FEVER I have known BUFFALO LITHIA WATER *restore a healthy and abundant secretion of Urine, when it was highly charged with* ALBUMEN *and the secretion almost suppressed.*"

Dr. MARTIN L. JAMES, of Richmond, Va., Professor of Materia Medica and Therapeutics, Medical Society of Virginia.

[Proceedings of the Richmond, Virginia, Academy of Medicine, December 16, 1880.]

"The President of the Academy, Dr. M. L. James, reported a case of *Congestion* of the *Kidneys* in a lady eight months advanced in *Pregnancy, attended by marked Œdema,* both over the extremities and surface, and by URÆMIC POISONING *to such an extent as very seriously impaired the vision of the patient,* relieved by the free use of this Water for three weeks.

"Other remedies, he stated, were used in these cases, *but the favorable results seemed clearly attributable to the action of the Water.*"

Dr. HARVEY L. BYRD, of Baltimore, President and Professor of Obsetrics and Diseases of Women and Children in the Baltimore Medical College, formerly Professor of Practical Medicine, etc.

"I have prescribed BUFFALO LITHIA WATER with the most satisfactory results, both as a *remedy* and *prophylactic* in the *Parturient* or *Pregnant Puerperal Eclampsia* or *Convulsions; and I may say that I know of no remedy of equal efficacy with the Water of Spring No. 2 in Sequelæ of Scarlatina.*

"It has an *ascertained value* in BRIGHT'S DISEASE. *A knowledge of its action in that disease thus far would seem* to warrant the belief that it would, in many instances, *at least in its early stages, arrest it entirely, and in its more advanced stage prove a decided comfort and palliative.*

Water in cases of one dozen half-gallon bottles, $5.00 per case at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

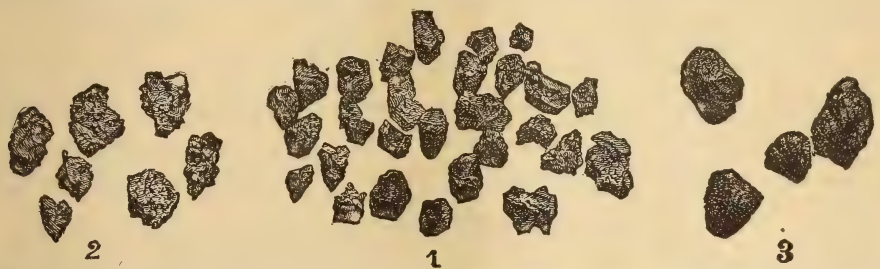
Buffalo Lithia Water

In the TREATMENT OF URINARY DEPOSIT.

Case of Dr. B. J. WEISTLING, of Middleton, Pa., stated by himself.

"Experience in its use in **STONE in the BLADDER** in my own person enables me to attest the efficacy of the **BUFFALO LITHIA WATER** in this painful malady. After having been long subjected to sufferings, the intensity of which cannot be described, I have, under the influence of this Water, passed an ounce of **CALCULI (URIC ACID)**, some of which weighed as much as four grains, affording inexpressible relief and leaving me in a condition of comparative ease and comfort.

"On one occasion I passed thirty-five **CALCULI** in forty-eight hours. The appearance of these **CALCULOUS NUCLEI** indicates unmistakably, I think, that they were all *component particles of one large* **CALCULUS** *destroyed by the action of the Water, by means of solution and disintegration.* At my advanced period of life (I am seventy-seven years and six months of age), and in my feeble general health, a surgical operation was not to be thought of, and the Water seems to have accomplished all that such an operation, if successful, could have done."



[The above plate is from a photograph, and represents the exact size and shape of some of the Calculi passed by Dr. Weistling. They were preserved by his son, Dr. J. Weir Weistling.]

Case stated by Dr. G. HALSTED ROYLAND, late Professor of Surgery, Baltimore Medical College, Member American Medical Association.

"The case of Mr. C., which came under my observation as Resident Physician at the Springs during the season of 1884, affords undoubted evidence that Buffalo Lithia Water is a **SOLVENT** *for Urinary Deposit*, commonly known as **STONE in the BLADDER.** He was operated upon for **STONE**, the operation affording but partial and temporary relief. A year afterward he visited the **BUFFALO LITHIA SPRINGS**, at the same time passing small quantities of a *Urinary Deposit*, of the **TRIPLE PHOSPHATE of AMMONIA** and **MAGNESIA VARIETY**, and his sufferings such as required that he should be kept constantly under the influence of opiates. In some eight weeks the solvent properties of the Water *were evident in the diminished consistency of the deposit, the increased quantity discharged, and by its change from Concrete Lumps to fine Sand*, which he discharged to the amount of *Four Ounces.* After a time, however, the quantity gradually diminished, and finally ceased, and he left the Springs *with the deposit dissolved* and *washed out of the system*, and the *Diathesis fons et origi morbi* altered. There had been a disappearance of the attending distressing symptoms, and great improvement in his general condition."

Dr. MARTIN L. JAMES, of Richmond, Va., Professor of Materia Medica and Therapeutics, Medical Society of Virginia.

[Proceedings of the Richmond, Virginia, Academy of Medicine, December 16, 1880.]

"The President of the Academy, Dr. M. L. James, reported three cases of marked **URIC ACID DIATHESIS** successfully treated by the Water of Spring No. 2 of the **BUFFALO LITHIA SPRINGS** of Virginia. In one of these patients there were, as a result of this Diathesis, **SANDY DEPOSITS** in the *Urine, Inflammation of the Kidneys, Irritability of the Bladder, and Hæmaturia*, and, finally, the passage of a **CALCULUS** of the size of a cherry, formed on a blood-clot as a nucleus. In another case there were frequent attacks of **NEPHRITIC COLIC**, attended by **SANDY DEPOSITIONS** in the urine. After the free use of this Water in these cases, no further manifestations of the disorder occurred."

Dr. HENRY M. WILSON, of Baltimore, ex-President Medical and Chirurgical Faculty of Maryland.

"My experience in the use of the **BUFFALO LITHIA WATER** has not been large, *but it is of such a positive character that I do not hesitate to express my preference for it, as a* **DIURETIC** in **URINARY CALCULI**, *over all other waters that I have ever used.*"

Water in cases of one dozen half-gallon bottles, $5 per case, at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 < {}^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on application.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to eac pill.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF

THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE., Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

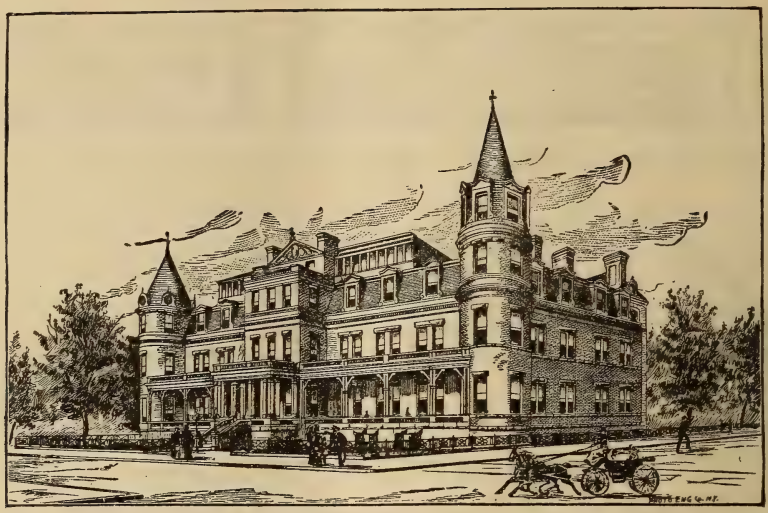
KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William St., New York,

Sole Agents for the above Preparations.



DR. WILLIAM A. HAMMOND'S SANITARIUM

—FOR—

DISEASES OF THE NERVOUS SYSTEM,

WASHINGTON, D. C.

DR. WILLIAM A. HAMMOND announces to the medical profession that he has returned from New York to Washington, D. C., where he has established, in a building especially erected for the purpose, a *Sanitarium* for the treatment of mild and curable cases of mental derangement, diseases of the nervous system generally, cases of the morphia and chloral habits, and such other affections as may properly be treated by the remedial agencies under his control. His experience during many years has convinced him that most diseases embraced within the above-named classes can be managed much more successfully in an institution of this kind, under the constant supervision of the physician and with the aid of means not otherwise at command, than when the patients are seen by their medical advisers at intervals of several hours or days.

The *Sanitarium*, which has been constructed under the superintendence of A. B. Mullett, Esq., late architect of the United States Treasury department, and is situated on Columbia Heights, at the corner of Fourteenth Street and Sheridan Avenue. The position is the highest in the immediate vicinity of Washington, the soil is dry, and all the surroundings are free from noxious influences. It is readily reached by the Fourteenth Street Railway, the cars of which run to the doors. The building is very large, and as perfect in structure and arrangements as is possible from a knowledge of sanitary science and of the requirements of such an institution. It accommodates about thirty patients. So far as the rooms, table, etc., are concerned, they are equal to such as exist in the best hotels of our large cities. Electricity in all its forms; baths, douches, massage, inhalations, nursing, etc., are provided as may be required by patients, in addition to such other medical treatment as may be deemed advisable.

A large *Solarium* for sun-baths and exercise in cold or inclement weather and heated with steam in winter, is constructed on the top of the main building.

Each patient is thoroughly examined by Dr. Hammond and receives his daily personal attention, while Dr. E. L. Tompkins, a physician of ample hospital experience and of tried executive ability, resides in the institution and has, under Dr. Hammond, the immediate superintendence.

The *Sanitarium* is now opened for the reception of patients.

For further information Dr. Hammond can be addressed at The Sanitarium, Fourteenth Street and Sheridan Avenue, Washington, D. C.

LENTZ'S
NEW COMPACT
OPERATING SET
No. 10.

One Amputating Knife (Leg and Arm). One Finger Knife. One Hernia Knife. One Sharp Curved Bistoury. Two Scalpels. One Tenotome. One Tenaculum. One pair Scissors, curved or flat. One Saw, 9-inch blade. One Liston's Spring Bone Forceps. One Artery and Needle Forceps, improved. One Dressing Forceps. One Esmarch's Flat Rubber Tourniquets, with Chain. One Director, with Aneurism Needle. Two Silver Probes. Silk, Wire, Wax, and Needles.

The above instruments are put up in a fine Morocco Case with nickel trimmings, lined with velvet, and has extra space for Trephine and Elevator, if desired. With the *sixteen* instruments contained in this case, any ordinary operation may be performed.

Size, 11 in. long, 4 in. wide, 2 in. high

Price, $25. With Trephine and Handle and Trephine Elevator in addition, $29.65. We also make the above case with hard rubber antiseptic handles on knives and saw. Price, $29.00. With Trephine and Elevator in addition, $33.65.

Discount 25 pr. ct. to Physicians

Our New Catalogue of 260 pages will be sent on receipt of 10 cents for postage.

BABIES.

"The next thing to the real is a picture of it."

We would like to send you our free portfolio of baby portraits. May we? If you are unacquainted with the merits of our Lactated Food, we would also like to send you a sample of it. All charges paid. Sugar of milk the basis, no cane sugar, free from starch, highest value in nutrients, easily assimilated. A trial will prove its value.

WELLS & RICHARDSON CO., Proprietors, Burlington, Vt.

McARTHUR'S SYRUP.

(SYR: HYPOPHOS: COMP: C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION,** sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

Mention this Journal. McARTHUR HYPOPHOSPHITE CO., BOSTON, Mass.

THERE IS A PEPSIN

WHICH IS UNIFORMLY ACTIVE, PERMANENT, AND RELIABLE,

IT IS "FAIRCHILD'S."

This Pepsin will not spoil, will not become soft and sticky in the vial, even if left long uncorked.

Fairchild's Pepsin will not "gum up" if dispensed in powders, plain, or with the drugs usually combined with pepsin.

Fairchild's is not a partial peptone, and has none of the well-known characteristics of peptone.

Fairchild's is the pioneer pepsin, it showed the way. It "got there" early.

Its activity has never been exaggerated.

All this time, whilst other manufacturers were still offering the high-dilution saccharated and amylated article, Fairchild's Pepsin was steadily making its way on its merit. Now, no one ventures to ask a hearing for these *placebo-pepsins.*

When physicians now prescribe "pepsin" they mean pepsin—not milk sugar, and pepsin.

All these years, Fairchild's Pepsin was always and everywhere found to do just what was claimed for it—in spite of the attitude, genuine or assumed, which held that all "claims" about pepsin must be taken with a liberal discount.

Every *bona fide* test demonstrated its reliability.

We have never found it necessary to explain or excuse any deficiency or inaction as due to "deteriorated" specimens.

Fairchild's will not disappoint the prescriber under any condition proper for pepsin.

WITH SUCH A RECORD Fairchild's Pepsin is a good one to stand by.

SPORTING AND ATHLETIC GOODS OF EVERY DESCRIPTION.

An Important Communication
TO PHYSICIANS.

Thirteen years have now elapsed since the introduction of SCOTT'S EMULSION of PURE NORWEGIAN COD LIVER OIL with HYPOPHOSPHITES of LIME and SODA, since which time its growth and development have been very large, not only in this country but in South America, Great Britain and a large part of Continental Europe, and it has, in a very large degree, supplanted the Plain Cod Liver Oil. Its success is largely due to the happy combination of all its components, making a perfect chemical union, that will not separate for years, which we believe is not true of any other Cod Liver Oil preparation.

The innumerable reports from Physicians, of the brilliant results obtained justifies the statement that in almost every case where Cod Liver Oil is indicated, Scott's Emulsion is infinitely superior.

Physicians who have never tried this Emulsion, or who have been induced to try something else in its stead, will do us the favor to send for sample, and we know they will always use it in preference to plain Cod Liver Oil or any other preparation.

We also call your attention to the following preparations :

CHERRY-MALT PHOSPHITES.

A combination of the tonic principles of Prunus Virginiana, Malted Barley, Hypophosphites of Lime and Soda, and Fruit Juices. An elegant and efficient brain and nerve tonic.

BUCKTHORN CORDIAL (Rhamnus Frangula.)

Prepared from carefully selected German Buckthorn Bark, Juglans Bark, and Aromatics. The undoubted remedy for Habitual Constipation.

Be sure and send for samples of the above—delivered free.

SCOTT & BOWNE, 132 South Fifth Ave., New York

PRICE $2.50 EACH

STAUFER'S
Hard-Rubber Speculums

THE ADVANTAGES OF THIS SERIES OF SPECULUMS MAY BE SUMMED UP AS FOLLOWS.

FIRST SERIES.—By this hollow and light conductor speculum a size may be introduced to permit the entire cervix to enter and hold it. The objection to a taper speculum, moving back, when left untouched is thus overcome. A sheet made to surround the external end, is no hindrance to view on operation and obviates exposure of the patient. With this assurance the subject presses the top of the finger upon the edge when so ordered. No. 2 is the usual size for multipara, and most useful when only one is ordered.

FIELD OF VIEW.—This is increased by two fold of a glass of same size outside at the point. The shell is thin and made of specially strong vulcanite. The mouth is slightly concave, which materially adds to the field of view.

LIGHT AND VIEW.—The taper admits of a conical concentrated column of light. The enamel, a bright red, reflects the object in view in a natural way and not magnified. The edge is perfectly smooth and by rotation the cervix exhibits itself all around. There is a perforation near the outer end, as an outside signal to show where the point is during introduction and rotation.

TAPER.—The advantage in this, in addition to (3) is that a third person can see the condition, and actual treatment as plainly as the operator can while the instrument is held stationary a class of students can move past and see the vaginal parts of the uterus as plain as if located externally. Chiefly on this account they are now used in a number of clinics.

PRICE, $2.50.

Send order (with money) to

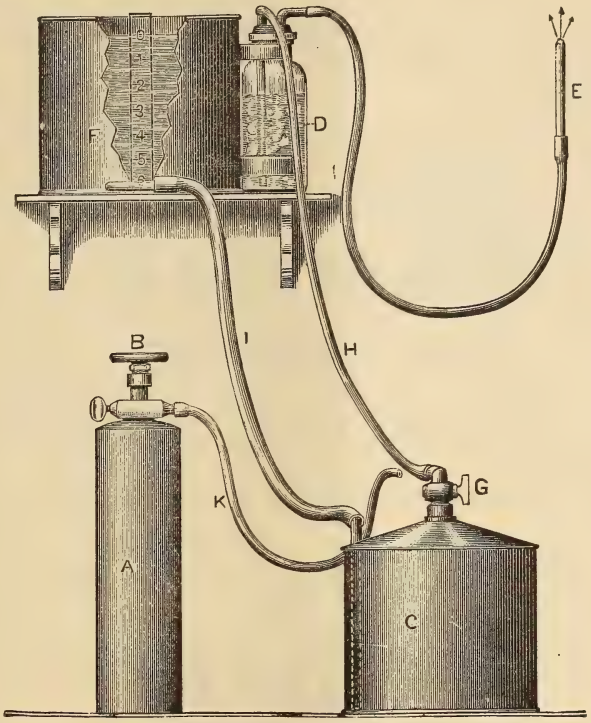
PURE OXYGEN

AND

APPARATUS FOR ITS THERAPEUTIC ADMINISTRATION



At the solicitation of a number of medical practitioners interested in oxygen treatment, we have devised apparatus for the therapeutic administration of this gas both by inhalation and by enema. We present an illustration of the latter. It is provided with a gauge by which the quantity of gas administered can be readily ascertained. We believe the apparatus we offer will be found to be the most convenient and economical device for the purpose on the market. We are prepared to supply Pure Oxygen Gas, or a mixture of Oxygen and Nitrous Oxide in definite proportions respectively of 20 per cent. and 40 per cent. of Nitrous Oxide, in cylinders of 40 or 100 gallons each. Full directions sent with each apparatus.

PRICES.

ENEMA APPARATUS	$12.00
INHALING APPARATUS	5.00
FORTY GALLON CYLINDER	6.00
FORTY GALLON CYLINDER FILLED	8.00
ONE HUNDRED GALLON CYLINDER	15.00
ONE HUNDRED GALLON CYLINDER FILLED	20.00

The Gas whether pure or mixed is supplied at the uniform price of 5 cents per gallon. The cost of the cylinders will be refunded on their return empty, with the valves in good condition.

PHILADELPHIA, NEW YORK, BOSTON, CHICAGO, BROOKLYN.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

The 123d ANNUAL WINTER SESSION will begin Monday, Oct. 1st, at 12 M., and continue 7 months.

The PRELIMINARY SESSION begins Monday, September 17th, the SPRING TERM Monday, May 6th, 1889.

The Curriculum is graded, and three annual Winter Sessions are required. Practical instruction, including laboratory-work in Chemistry, Histology, Osteology, and Pathology, with Bedside Instruction in Medicine, Surgery, and Gynæcology are a part of the regular course and without additional expense.

For catalogue and announcement containing particulars, apply to DR. JAMES TYSON, Sec'y, 36th and Woodland Ave., Phila.

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S, and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY'S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures.

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

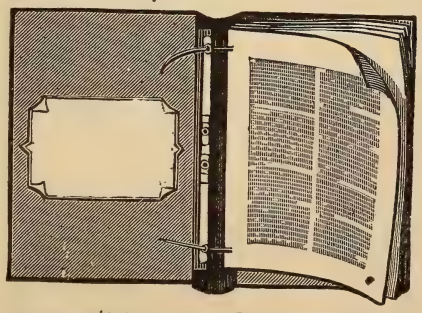
For further particulars, and for College Circular, apply to

H. O. WALKER, M.D., Secretary,

33 Lafayette Ave., Detroit, Mich.

BINDER

A handsome Binder for the Reporter will be sent for 50 CTS.



Address MEDICAL AND SURGICAL REPORTER,

P. O. Box 843. PHILADELPHIA

REPORTER VACCINE VIRUS.

(HUMANIZED.)

For some time we have ceased to advertise VACCINE VIRUS, for a very good reason, viz: **We could not get what we found reliable.** Now we can, and offer our subscribers Crusts from healthy infants at

ONE DOLLAR, OR TWO DOLLARS

according to size. They are from the best source we know of, and we can recommend them.

But dealing in VACCINE VIRUS is an accommodation to our subscribers, and not a source of material profit to us; so we must have **Money sent with Order.** If crusts don't take, we will get another.

MEDICAL AND SURGICAL REPORTER,

P. O. Box 843. PHILADELPHIA.

The only prominent Emulsion of Cod-Liver Oil introduced directly to the medical profession. It is advertised exclusively in medical journals.

HYDROLEINE.

(HYDRATED OIL.)

Produces rapid increase in Flesh and Strength.

FORMULA.—Each Dose contains:

Pure Cod Liver Oil	80 m. (drops)	Soda	1-3 Grains
Distilled Water	35 "	Salicylic Acid	1-4 "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	1-20 "

Recommended and Prescribed by EMINENT PHYSICIANS Everywhere. It is pleasant to the Taste and acceptable to the most delicate Stomach.

IT IS ECONOMICAL IN USE AND CERTAIN IN RESULTS.

HYDROLEINE (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhuæ, but a hydro-pancreated preparation, containing acids and a small percentage of soda. Pancreatin is the digestive principle of fatty foods, and in the soluble form here used, readily converts the oleaginous material into assimilable matter, a change so necessary to the reparative process in all wasting diseases.

The following are some of the diseases in which **HYDROLEINE** is indicated:

Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis, General Debility, etc.

TO BRAIN WORKERS of all classes, **HYDROLEINE** is invaluable,-supplying as it does, the true brain-food, and being more easily assimilated by the digestive organs than any other emulsion.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," and "Consumption and Wasting Diseases," by two distinguished London physicians, which will be sent free on application.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE UNITED STATES. 115 FULTON STREET, N. Y.

A Sample of Hydroleine will be sent free upon application, to any physician (enclosing business card) in the U. S.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. **A NON-ALCOHOLIC LIQUID.** WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

Champagne ANALYZED

Of Interest to all Medical Practitioners.

WHAT IS SAID BY

THOMAS KING CHAMBERS, M.D., F.R.C.P.
R. OGDEN DOREMUS, M.D.
F. W. PAVY, M.D., F.R.S.

"Champagne, with a minimum of alcohol, is by far the wholesomest, and possesses remarkable exhilarating power."—THOMAS KING CHAMBERS, M.D., F.R.C.P.

"Having occasion to investigate the question of wholesome beverages, I have made a chemical analysis of the most prominent brands of Champagne. I find G. H. Mumm & Co.'s Extra Dry to contain, in a marked degree, less alcohol than the others. I therefore most cordially commend it not only for its purity but as the most wholesome of the Champagnes."—R. OGDEN DOREMUS, M.D., *Professor of Chemistry, Bellevue Hospital Medical College, New York.*

"Champagne, while only possessing the alcoholic strength of natural wines, is useful for exciting the flagging powers in case of exhaustion"—F. W. PAVY, M.D., F.R.S., *Lecturer on Physiology at Guy's Hospital, London.*

The remarkable vintage of 1884 of **C. H. MUMM & CO.'S EXTRA DRY CHAMPAGNE,** the finest for a number of years, is now imported into this market, and pronounced by connoisseurs unsurpassed for excellence and bouquet.

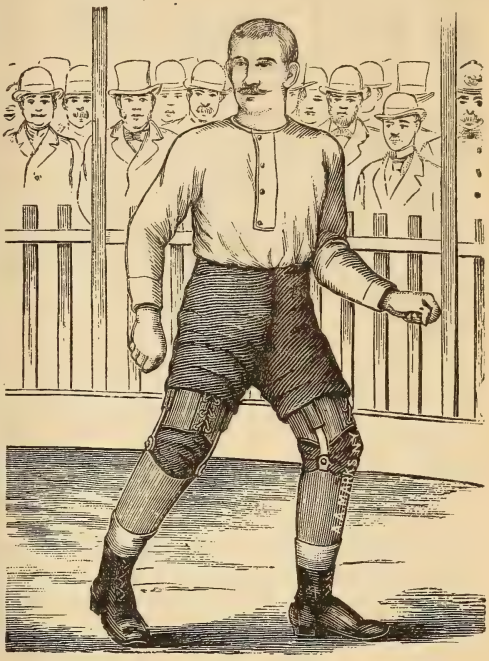
LEGS and ARMS with RUBBER FEET and HANDS

(MARKS' PATENTS.)

Indorsed by the United States Government, the Industrial Exhibition Commissioners of New York, Philadelphia, Atlanta, New Orleans, etc, the eminent surgeons in the country, the press, and over 9,000 men, women, and children who wear them, residing in all parts of the world.

The Rubber Foot and Hand possess the most natural appearance the greatest durability and comfort of all artificial limbs. Vast numbers of mutilated men and women are, by the use of rubber feet and hands, enabled to mingle with the rest of the world without betraying their loss or experience great inconvenience. Farmers, mechanics professionals, and even athletes, who have lost one or more of their limbs, are enabled to resume their occupations by the use of these remarkable inventions.



MR. A. A. MARKS: ITHACA, TOMPKINS CO., N.Y., Jan. 15, 1888.

DEAR SIR: Rubber feet are the wonders of the world. I have challenged every maker in the world to produce a man that has a pair of artificial feet to walk with me. I can walk a mile in thirteen minutes, and not hurry myself any. I do not take a back seat for any unprofessional with two good natural feet, in a one mile walk. I have the pleasure of announcing that my record in walking professionally is unequaled in the world by any one with artificial legs. THOMAS CLEARY.

By a copyright formula, furnished by us on request, applicants can supply us with all the data necessary to secure fit and satisfactory results, while they remain at home. One-half the legs and arms furnished by us are made from measurements and profiles, without our seeing the wearer. This new method is a great convenience for those living at a distance. Fit always guaranteed.

A treatise of 400 pages, and nearly 200 illustrations, and nearly a thousand endorsements and testimonials, sent to those needing artificial legs or arms who will give a description of their case. The same will be sent to physicians and surgeons free of charge. Address,

A. A. MARKS, 701 Broadway, New York City.

BABIES.

"The next thing to the real is a picture of it."

We would like to send you our free portfolio of baby portraits. May we? If you are unacquainted with the merits of our Lactated Food, we would also like to send you a sample of it. All charges paid. Sugar of milk the basis, no cane sugar, free from starch, highest value in nutrients, easily assimilated. A trial will prove its value.

WELLS & RICHARDSON CO., Proprietors, Burlington, Vt.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University, and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 <^{O.C_2 H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on application.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to eac pill.

W. H. SCHIEFFELIN & CO.,

170 & 172 WILLIAMS STREET, NEW YORK,

SOLE LICENSEES AND SOLE AGENTS FOR THE UNITED STATES.

Carnrick's Soluble Food

Is the nearest approach to Human Milk that has thus far been produced.

During the past season a large number of Physicians and eminent Chemists visited our Laboratory at Goshen, N. Y., and witnessed every detail connected with the production of Carnrick's Soluble Food. This invitation to witness our process is continuously open to Physicians and Chemists. All expenses from New York to Goshen and return will be paid by us. The care used in gathering the milk, its sterilization, and the cleanliness exercised in every step, cannot be excelled.

Pancrobilin.

Prepared (in both Liquid and Pill form) from Extract of Pancreas and Bile.

This preparation is designed expressly to increase the digestion and absorption of fats.

We believe that the fat-digesting properties of pancreatine and bile are inseparable, and that without their union in the intestinal tract but little, if any, fat would be digested and absorbed.

PANCROBILIN will be found of great service in *Phthisis and other wasting diseases, Nervous Prostration, Constipation, Inanition, Malnutrition, Intestinal Indigestion,* and wherever there is a failure to assimilate fats.

If the skin is first wet with LIQUID PANCROBILIN, the inunction of oils will be greatly facilitated.

LIQUID PANCROBILIN is put up in pound bottles.

PILL PANCROBILIN is put up in bottles holding 100 pills. The coating of the pills will resist acid digestion when given as directed, but will be quickly dissolved in the alkaline secretions of the duodenum.

Phospho-Caffein Comp.

(*Granular Effervescing.*)

Formula for each dessertspoonful:—

Caffein.
Acidi Phosphorici, ää, gr. ss.
Antipyrin.
Ext. Apii. Grav. dulc. (*Celery*), *ää gr.* .
Sodii Bromidi, gr. v.

The satisfactory results produced by PHOSPHO-CAFFEIN COMP. in *Headaches, Neuralgia, Insomnia, Neurasthenia, and general Nervous Irritability,* are not due to the effect of any one ingredient, but to the happy effect of the combination. A thorough series of comparative tests have demonstrated the superiority of the above formula over any other in the market.

REED & CARNRICK, New York.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence"

—*Paris Society of Medicine. Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

Paris—CLIN & CO.—Paris

NEURALGIAS

PILLS OF DR. MOUSSETTE.

The **Moussette Pills** of aconitine and quinium, calm or cure *Gastralgia, Hemicrania, Headache, Sciatica*, and the most obstinate Neuralgias.

"The sedative action exerted by the **Moussette Pills** "upon the apparatus of the sanguineous circulation by the "intermediation of the vaso-motor nerves, indicates their "use in *neuralgias of the trigemini nerves*, (fifth pair), *con-* "*gestive neuralgias*, and *painful and inflammatory Rheumatismal* "*affections*."

"Aconitine produces marvelous effects in the treatment "of *facial neuralgias* when they are not symptomatic of "intracranial tumor."—*Society of Biology of Paris, Meeting* "*of the 28th February, 1880.*

DOSE—Take 3 to 6 pills during the twenty-four hours.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE**, is prepared from the three Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR.

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without in any way deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE., Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

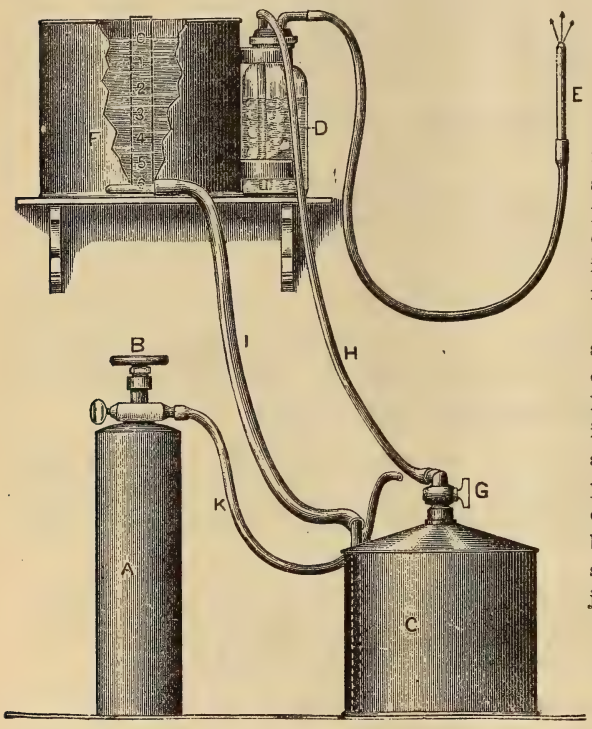
E. FOUGERA & CO., 30 North William St., New York,

Sole Agents for the above Preparations.

THERAPEUTIC ADMINISTRATION

OF

PURE OXYGEN BY ENEMA.



While in the exhibition of Oxygen for lung troubles direct inhalation is considered essential, in other diseases many physicians prefer administration by enema. In derangements affecting assimilation, for instance, marked benefit has followed this method.

The apparatus herewith shown is simple in construction and effective in operation. The administration is absolutely under the control of the operator in charge, as regards both the quantity and the rapidity of the flow. Both these points were carefully considered in designing the apparatus, and no other before the profession more completely subordinates the administration to the judgment of the operator.

PRICES.

Enema Apparatus	$12.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure or mixed	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$20.00
Enema Apparatus	$12.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$32.00

We are prepared to supply Pure Oxygen Gas, or a mixture of Oxygen and Nitrous Oxide in definite proportions respectively of 20 per cent. and 40 per cent. of Nitrous Oxide, in Cylinders of 40 or 100 gallons each The Gas, whether pure or mixed, is sold at the uniform price of 5 cents a gallon. The cost of the Cylinders will be refunded on their return empty with the valves in good condition.

Full description and directions accompany each apparatus or will be supplied on application.

BEDFORD SPRINGS, MASS.

EFFERVESCENT SPECIALTIES

WM. R. WARNER & CO.'S
TRIPLE
(Effervescent)
BROMIDES

Advantages:—Useful in Headache, Nervousness, Sleeplessness, Migraine, Diurnal Epilepsy, Etc.

℞ Sodium Brom. grs. 15.
Potassium Brom. grs. 10.
Ammonium Brom. grs. 5.

Administer one teaspoonful in half a glass of water. Drink while effervescing. In Diurnal Epilepsy take a dessertspoonful three times daily until sense of taste is partly destroyed; after this reduce the frequency of dose, but keep the fauces in a benumbed condition.

WM. R. WARNER & CO.'S
CHALYBEATE
(Effervescent)
SALINE
(Ferric Saline Effervescens, Dr. Means)

℞ 1 gr. Citro-tartrate of Iron and 20 grs. of Soda.

DOSE.—A heaping teaspoonful of the salt, containing 1 gr. Citro-tartrate of Iron and 20 grs of Soda, to be taken in a glass two-thirds full of water and drunk while effervescing. If a more decided effect is desired, warm instead of cold water may be used. In all cases this draught should be taken but once or twice a day, and then on an empty stomach, preferably before breakfast. No restrictions as to diet. One or two Pil. Digestiva (W. & Co.) may be taken at noon, before eating, as a dinner pill.

WM. R. WARNER & CO.'S
(ANTIPYRINE ET SODIUM SALICYLATE)
ANTALGIC
(Effervescent)
SALINE

℞ Antipyrine, 4 grs. Salicylate of Soda, 4 grs.
In each dessertspoonful.

DOSE.—One dessertspoonful, to be repeated as often as the case may require. Almost a specific in Neuralgic Headache. Prescribed in all cases where Antipyrine is used, with more better and more certain results.

WM. R. WARNER & CO.'S
APERIENT
(Effervescent)
SALINE

A pleasant and excellent aperient and refrigerant, very acceptable to the stomach. Given in all cases indicating the need of an active aperient, and to be given daily to all patients under treatment with Dosimetric therapeutics. (See Wm. R. Warner & Co.'s Dosimetric Granules)

DOSE.—One tablespoonful in half a glass of water.

PREPARATIONS SUPPLIED BY ALL LEADING DRUGGISTS.

☞Samples of the above Salts furnished upon request.

The Curd of Cow's Milk
Made as Soft and Digestible as that of
Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

An Important Communication
TO PHYSICIANS.

Thirteen years have now elapsed since the introduction of SCOTT'S EMULSION of PURE NORWEGIAN COD LIVER OIL with HYPOPHOSPHITES of LIME and SODA, since which time its growth and development have been very large, not only in this country but in South America, Great Britain and a large part of Continental Europe, and it has, in a very large degree, supplanted the Plain Cod Liver Oil. Its success is largely due to the happy combination of all its components, making a perfect chemical union, that will not separate for years, which we believe is not true of any other Cod Liver Oil preparation.

The innumerable reports from Physicians, of the brilliant results obtained justifies the statement that in almost every case where Cod Liver Oil is indicated, Scott's Emulsion is infinitely superior.

Physicians who have never tried this Emulsion, or who have been induced to try something else in its stead, will do us the favor to send for sample, and we know they will always use it in preference to plain Cod Liver Oil or any other preparation.

We also call your attention to the following preparations :

CHERRY-MALT PHOSPHITES.

A combination of the tonic principles of Prunus Virginiana, Malted Barley, Hypophosphites of Lime and Soda, and Fruit Juices. An elegant and efficient brain and nerve tonic.

BUCKTHORN CORDIAL (Rhamnus Frangula.)

Prepared from carefully selected German Buckthorn Bark, Juglans Bark, and Aromatics. The undoubted remedy for Habitual Constipation.

Be sure and send for samples of the above—delivered free.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea. suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month: thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

LONDON, 16 Coleman St. CALCUTTA, 9 & 10 Dalhousie Square. PARIS, 5 Rue de la Paix. MONTREAL, 374 St. Paul St.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

Physician in Charge, Dr. CHARLES MEIGS WILSON

The new Hospital building situated in the centre of the city, has accommodation for twenty patients and ten private rooms. Each private room has a special nurse, electric-bells, open fire-place, and meals privately served. Pay patients may enter the Hospital at any time previous to their confinement. The hygienic arrangements and sewage of the Hospital are perfect. Ample protection is provided against fire. A limited number of free and pay beds are reserved in an isolated portion of the building for Gynaecological cases.

Two courses of instruction in practical obstetrics and in practical gynaecology are given each year commeneing in April and in October. Free patients only are used for purposes of clinical demonstration.

For particulars as to the admission of patients, or the courses of instruction in obstetrics and gynaecology, apply to DR. CHARLES MEIGS WILSON, Physician in Charge, by letter or in person, at the Charity, S. W. Cor. 11th and Cherry Sts. Phila., daily at 12 o'clock noon.

ANTISEPTIC DRAINAGE TUBES.—Glass.

These Tubes have large holes, one-half inch apart, arranged alternately on opposite sides.

They are carefully finished, especial care being taken to make them smooth.

In addition to the drainage-holes, each tube has at one end two smaller holes for the insertion of Safety-Pin, through which it is prevented slipping into the wound.

SPORTING AND ATHLETIC GOODS OF EVERY DESCRIPTION.

THERE IS A PEPSIN

WHICH IS UNIFORMLY ACTIVE, PERMANENT, AND RELIABLE,

IT IS "FAIRCHILD'S."

This Pepsin will not spoil, will not become soft and sticky in the vial, even if left long uncorked.

Fairchild's Pepsin will not "gum up" if dispensed in powders, plain, or with the drugs usually combined with pepsin.

Fairchild's is not a partial peptone, and has none of the well-known characteristics of peptone.

Fairchild's is the pioneer pepsin, it showed the way. It "got there" early.

Its activity has never been exaggerated.

All this time, whilst other manufacturers were still offering the high-dilution saccharated and amylated article, Fairchild's Pepsin was steadily making its way on its merit. Now, no one ventures to ask a hearing for these *placebo-pepsins.*

When physicians now prescribe "pepsin" they mean pepsin—not milk sugar, and pepsin.

All these years, Fairchild's Pepsin was always and everywhere found to do just what was claimed for it—in spite of the attitude, genuine or assumed, which held that all "claims" about pepsin must be taken with a liberal discount.

Every *bona fide* test demonstrated its reliability.

We have never found it necessary to explain or excuse any deficiency or inaction as due to "deteriorated" specimens.

Fairchild's will not disappoint the prescriber under any condition proper for pepsin.

WITH SUCH A RECORD Fairchild's Pepsin is a good one to stand by

FAIRCHILD BROS. & FOSTER,

82 and 84 Fulton St., New York.

7 Snow Hill Buildings, London, E. C.

PHYSICIANS' LEDGER

Think how much time you spend every year over your accounts, and what a bother it is to make out your bills!

Now, one of the great merits of

The Model Ledger

is that it enables a physician to make out his bills with great ease. Besides this, it tells at a glance just how much he has earned in any quarter; how much he has received; and how much is still due him. These are all good things for a doctor to know.

PRICE $2.50 EACH

STAUFER'S

Hard-Rubber Speculums

THE ADVANTAGES OF THIS SERIES OF SPECULUMS MAY BE SUMMED UP AS FOLLOWS

FIRST SERIES.—By this hollow and light conductor speculum a size may be introduced to permit the entire cervix to enter and hold it. The objection to a taper speculum, moving back, when left untouched is thus overcome. A sheet made to surround the external end, is no hindrance to view on operation and obviates exposure of the patient. With this assurance the subject presses the top of the finger upon the edge when so ordered. No. 2 Is the usual size for multipara, and most useful when only one is ordered.

FIELD OF VIEW.—This is increased by two fold of a glass of same size outside at the point. The shell is thin and made of specially strong vulcanite. The mouth is slightly concave, which materially adds to the field of view.

LIGHT AND VIEW.—The taper admits of a conical concentrated column of light. The enamel, a bright red, reflects the object in view in a natural way and not magnified. The edge is perfectly smooth and by rotation the cervix exhibits itself all around. There is a perforation near the outer end, as an outside signal to show where the point is during introduction and rotation.

TAPER.—The advantage in this, in addition to (3) is that a third person can see the condition, and actual treatment as plainly s the operator can while the instrument is held stationary a class of students can move past and see the vaginal parts of the ut rus as plain as if located externally. Chiefly on this account they are now used in a number of clinics.

PRICE, $2.50.

Send order (with money) to

University of Pennsylvania

MEDICAL DEPARTMENT

The 123d ANNUAL WINTER SESSION will begin Monday, Oct. 1st, at 12 M., and continue 7 months.

The PRELIMINARY SESSION begins Monday, September 17th, the SPRING TERM Monday, May 6th, 1889.

The Curriculum is graded, and three annual Winter Sessions are required. Practical instruction, including laboratory-work in Chemistry, Histology, Osteology, and Pathology, with Bedside Instruction in Medicine, Surgery, and Gynæcology are a part of the regular course and without additional expense.

For catalogue and announcement containing particulars, apply to DR. JAMES TYSON, Sec'y, 36th and Woodland Ave., Phila.

Western Pennsylvania Medical College,

City of Pittsburgh.

The *Regular Session* begins on the last Tuesday of September and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation.

A three years' graded course is also provided. The *Spring Session* embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects: this session begins the Second Tuesday in April and continues ten weeks.

The laboratories are open during the collegiate year for instruction in Chemistry, Microscopy, practical demonstrations in Medical and Surgical Pathology, and lessons in Normal Histology.

Special importance attaches to the superior clinical advantages possessed by this college. For particulars, see annual announcements and catalogue, for which address the Secretary, Prof. W. J. ASDALE. 2107 Penn. Avenue, Pittsburgh.

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S, and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures.

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

For further particulars, and for College Circular, apply to

ILLUSTRATED CATALOGUE ON APPLICATION.

BUFFALO LITHIA WATER

IN THE

Uric Acid Diathesis, Bright's Disease of the Kidneys, Chronic Inflammation of the Bladder, &c.

Dr. THOMAS H. BUCKLER, of Paris (formerly of Baltimore), SUGGESTER OF LITHIA as a Solvent for URIC ACID.

"Nothing I could say would add to the **WELL-KNOWN REPUTATION OF THE BUFFALO LITHIA WATER. I HAVE FREQUENTLY USED IT WITH GOOD RESULTS IN URIC ACID DIATHESIS, RHEUMATISM AND GOUT,** and with this object I have ordered it to Europe from Coleman & Rogers, of Baltimore. Lithia is in no form so valuable as where it exists in the Carbonate (the form in which it is found in the **BUFFALO LITHIA WATER),** Nature's mode of solution and division in water which has passed through Lepedolite and Spondumine Mineral formation."

Dr. WM. A. HAMMOND, of New York, Surgeon-General U. S. Army (Retired), Professor of Diseases of the Mind and Nervous System in the University of New York, &c.

"I have for some time made use of the Buffalo Lithia Water in cases of affections of the **NERVOUS SYSTEM,** complicated with **BRIGHT'S DISEASE OF THE KIDNEYS** or with a **GOUTY DIATHESIS.** The results have been eminently satisfactory. Lithia has for many years been a favorite remedy with me in like cases, but the **BUFFALO WATER CERTAINLY ACTS BETTER THAN ANY EXTEMPORANEOUS SOLUTION OF THE LITHIA SALTS,** and is, moreover, better borne by the Stomach. I also often prescribe it in those cases of **CEREBRAL HYPERÆMIA** resulting from over-mental work—in which the condition called **NERVOUS DYSPEPSIA EXISTS**—and generally with marked benefit."

HUNTER McGUIRE, M.D., LL.D., Late Professor of Surgery, Medical College of Virginia, Richmond.

"**BUFFALO LITHIA WATER,** *Spring No. 2,* as an **ALKALINE DIURETIC,** *is invaluable.* In **URIC ACID GRAVEL,** *and, indeed,* in *diseases generally dependent* upon a **URIC ACID DIATHESIS,** *it is a remedy of extraordinary potency.* I have prescribed it in cases of **RHEUMATIC GOUT,** *which had resisted the ordinary remedies, with wonderful good results.* I have *used it also in my own case, being a great sufferer from this malady, and have derived more benefit from it than from any other remedy.*"

Dr. ROBERT BATTEY, of Georgia, SUGGESTER OF BATTEY'S OPERATION.

"I would state that I have been using the Buffalo Lithia Water, No. 2, in my practice for three years past, in cases of **CHRONIC INFLAMMATION** of the **BLADDER,** whether induced by **STONE,** by enlarged **PROSTATE** in the aged, or by **NEGLECTED GONORRHŒA, AND HAVE SECURED EXCELLENT RESULTS,** which encourages me to prescribe it for the future."

Dr. CYRUS EDSON, of New York,
Chief Inspector of Cutaneous Diseases in Health Department and President of the Board of Pharmacy.

"I have frequently made use of **BUFFALO LITHIA WATER,** Spring No. 2, in my practice, *with excellent results.* It is a potent remedy in correcting **RHEUMATIC DIATHESIS.** In a case of **URIC ACID GRAVEL,** in which I recently prescribed it, **ITS BENEFICIAL EFFECTS WERE APPARENT AFTER THE THIRD DOSE.** I have also prescribed it with great benefit in **BRIGHT'S DISEASE OF THE KIDNEYS."**

Water in Cases of one dozen half-gallon Bottles, Five Dollars per Case, at the Springs.

THOMAS F. GOODE,

PROPRIETOR,

BUFFALO LITHIA SPRINGS,

VIRGINIA.

COMPRESSED TABLETS.

WE ask the attention of Physicians to the annexed list of recent additions of Compressed Tablets, as we think all of them are well deserving the careful attention of practitioners. We would be pleased to send to any physician, circular matter, compiled with great care and accuracy, giving therapeutic value and results in a concise form, that we are confident will be of interest, and possibly of advantage, to medical men who have not yet had access to the foreign and home authorities from which we have culled the information we give.

Acid Boracic, ... 5 grs.
Acetanilide, ... 3 and 5 "
Antifebrin, ... 3 " 5 "
Antipyrine, ... 3, 5 " 10 "
Blaud's
Ferri. Sulph. Exsic., 2 grs., Potass. Carb., 1 4-5 grs., Sacch. Alb., 1⅔ grs.
Iodol. . . . . ½, 1, 2, 3, and 5 grs.
Manganese Binoxide, ... 1 " 2 "
Opium, Camphor and Carb. Ammon., Opium Denarcot. ½ gr., Camphor, 2 grs., Ammon. Carb., 2½ grs.
Quinia Tannate, and Chocolate 1 grain, Quiniæ Tannat. 1 gr., Ext. Cacao, 9 grs.
Quinia Tannate and Chocolate, 2½ grs., Quiniæ Tannat. 2½ grs., Ext. Cacao, 7½ grs.
Salol, ... 2½ and 5 grs.
Sodium Succinate, ... 2 " 5 "
Thalline Sulphate, ... 2, 3 " 5 "
Trinitrin (Nitro-Glycerin), 1-20, 1-25, 1-33, 1-50, 1-100, and 1-200 gr.
Terpin Hydrate, ... 2, 3 and 5 grs

ANTISEPTIC TABLETS.

7.7 Hydrarg. Chlor. Corros., 7.3 Ammonium Chloride.

More than six months since, we sent a circular to the drug trade, stating that we had discontinued the manufacture of the Antiseptic Tablets introduced by us several years since at the suggestion of Dr. Charles Meigs Wilson, of this city. We have, however, received so many letters from physicians urging us to resume the manufacture, insisting that the Tablets prepared by us dissolved more readily and were more satisfactory than any substitute they had been able to procure, that we feel we could not ignore such persistent demands from our medical friends who have found our tablets an absolute necessity. We have therefore concluded to again prepare them, in a building entirely separate from our main establishment, with appliances and admirably devised protection by means of improved respirators, that will completely overcome any harmful effects to those engaged in their manufacture.

Druggists and physicians will be glad to learn that the Tablets as now prepared are perfectly white and free from the coloring-matter that we formerly added. This was done to lessen the danger of their being taken, or used in mistake; to guard against any such possibility, each Tablet, as now made, has the word "POISON" stamped upon it.

BUFFALO LITHIA WATER

IN THE TREATMENT OF CHRONIC GASTRIC CATARRH

CLINICAL REPORTS.

CHRONIC GASTRIC CATARRH AND URIC ACID CALCULI.

A case stated by Dr. JNO. C. COLEMAN, of Scottsburg, Va., a retired Surgeon of the U. S. Navy.

"Mr. C. was for a number of years a sufferer from **CHRONIC GASTRIC CATARRH.** While his diet *was exclusively* **TEA** and **CRACKERS, BREAD** and **MILK,** *and other similar articles,* it was frequently thrown off in an undigested state soon after taking it, and at times he discharged from an empty stomach a strongly acid glairy mucus. A marked **URIC ACID DIATHESIS** supervened, consequent upon which he suffered for a period of some two years great **VESICAL IRRITATION** and possible **CYSTITIS,** attended by pain so intense and constantly present, as to require that he should be kept for the most part under the influence of opiates. After a persistent, but ineffectual exhibition of all remedies supposed to be indicated in the case, he was put for the latter affection upon the **BUFFALO LITHIA WATER,** Spring No. 2, with the happiest possible effect.

"In a few weeks, after commencing the use of it, the irritable condition of the *Bladder* was so far relieved that he was enabled to dispense entirely with the use of opiates. At the expiration of some eight weeks he had an attack of unusual severity, from which he was relieved by the discharge of a **CALCULUS,** followed at short intervals by the discharge of three others, which proved to be the termination of this trouble, as from that time there was entire subsidence of the painful symptoms described, and the *Bladder* resumed its natural state.

"While prescribed with special reference to the relief of the *Irritable Bladder,* the action of the water was not less surprisingly happy in the **GASTRIC AFFECTION,** with remarkable promptness correcting the highly acid condition of the **STOMACH,** restoring a healthy digestion and assimilation, and *tone* and *vigor* to the depressed *Nervous System.*

"In a few months he was able to eat, with perfect impunity, the coarsest articles of diet. He is now, after a lapse of several years, in robust health, having had no return of these painful maladies."

CHRONIC GASTRIC CATARRH.

Case of JOHN P. KEELING, Esq., stated by Dr. S. S. KEELING, Norfolk, Va., Member Medical Society of Virginia.

"Mr. John P. Keeling labored under **CHRONIC DYSPEPSIA,** and was always subject to attacks of *Spasmodic Gastralgia* immediately upon taking food into the stomach, which attacks were not at all amenable to treatment. Not unfrequently the stomach *rejected everything in the way of food and drink,* and he was of necessity confined to the lightest possible articles of diet, *meat and vegetables being entirely excluded.* He became so prostrated that it was with difficulty he could walk across his chamber floor, and had often to be lifted about. Such was the state of his **NERVOUS SYSTEM** *that great solicitude was felt as to his mental condition.*

"He visited Baltimore for medical aid, and was for many months under the treatment of some of the most eminent men of the profession in that city, but without beneficial result, and was finally advised that he had nothing to hope from remedies.

"Returning in an extremely critical condition to his home in the county of Princess Anne, he came under my professional care. Satisfied that medicine was unavailing in the case, I advised the **BUFFALO LITHIA WATER,** Spring No. 2. His stomach, however, was in a highly irritable condition, and I found it necessary to administer it in very small quantities; and it was at first given not exceeding an ounce at a dose, repeated at stated intervals. At the expiration of the third day the irritability of the stomach was decidedly less, and the quantity was then increased from day to day until the thirteenth day, when I found that the patient could take twelve ounces, which I regard as maximum dose at any time. Persisting in its use, on the twenty-eighth day he was free from pain, the stomach in a normal condition readily receiving both solids and liquids in moderate quantities, strength greatly increased, and nervous symptoms entirely relieved. At the expiration of the seventh week he was able to attend actively and regularly to his business on the farm. His recovery, which I regard as one of the most remarkable I ever knew of, I attribute entirely to the **BUFFALO LITHIA WATER."**

GASTRO-INTESTINAL CATARRH.

Case of Mrs. Dr. F. J. GREGORY, of Virginia, reported by F. J. GREGORY, M.D., Keysville, Va.

"For eighteen months my wife, aged forty-one years, was a sufferer from a **GASTRO-INTESTINAL CATARRH,** which resisted my best-directed efforts at relief. The taking of the smallest quantity of the most easily-digested food on the stomach would produce an attack of *nausea and vomiting, the severity of which is seldom witnessed,* and when the stomach was free of food she would have attacks of *Gastralgia of the most excruciating nature.* She also suffered from habitual constipation, and at times with hemorrhages from the bowels. I pursued the usual line of treatment, such as simple bitters, Dilute Hydrocyanic Acid, Bismuth, etc., and called to my help two of the most skilled physicians in Southside Virginia, who supplemented my treatment with some of the newer drugs, such as **EFFERVESCING BICARB. POTASS. LACTOPEPTINE, CARLSBAD MINERAL SALTS,** etc., but with no benefit, and so her condition went on from bad to worse *until death seemed almost imminent from inanition.* I then put her on a milk diet with a glass of **BUFFALO LITHIA WATER,** Spring No. 2, every hour or so during the day, and *after the use of the first bottle improvement was marked, and before a case of it was used I regarded her cure as complete.* It has been nearly two years since, and there has been only one slight recurrence, which was a few days since, and it readily disappeared on the use of the water for a few days."

Water in cases of one dozen half-gallon bottles, $5 per case, at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University, and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit. Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F. and has the composition $C_6 H_4 <^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on application.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to each pill.

W. H. SCHIEFFELIN & CO.,

SPORTING AND ATHLETIC GOODS OF EVERY DESCRIPTION.

An Important Communication
TO PHYSICIANS.

Thirteen years have now elapsed since the introduction of SCOTT'S EMULSION of PURE NORWEGIAN COD LIVER OIL with HYPOPHOSPHITES of LIME and SODA, since which time its growth and development have been very large, not only in this country but in South America, Great Britain and a large part of Continental Europe, and it has, in a very large degree, supplanted the Plain Cod Liver Oil. Its success is largely due to the happy combination of all its components, making a perfect chemical union, that will not separate for years, which we believe is not true of any other Cod Liver Oil preparation.

The innumerable reports from Physicians, of the brilliant results obtained justifies the statement that in almost every case where Cod Liver Oil is indicated, Scott's Emulsion is infinitely superior.

Physicians who have never tried this Emulsion, or who have been induced to try something else in its stead, will do us the favor to send for sample, and we know they will always use it in preference to plain Cod Liver Oil or any other preparation.

We also call your attention to the following preparations :

CHERRY-MALT PHOSPHITES.

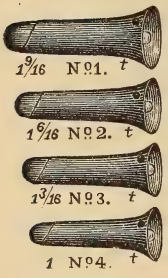
A combination of the tonic principles of Prunus Virginiana, Malted Barley, Hypophosphites of Lime and Soda, and Fruit Juices. An elegant and efficient brain and nerve tonic.

BUCKTHORN CORDIAL (Rhamnus Frangula.)

Prepared from carefully selected German Buckthorn Bark, Juglans Bark, and Aromatics. The undoubted remedy for Habitual Constipation.

Be sure and send for samples of the above—delivered free.

SCOTT & BOWNE, 132 South Fifth Ave., New York



PRICE $2.50 EACH

STAUFER'S
Hard-Rubber Speculums

THE ADVANTAGES OF THIS SERIES OF SPECULUMS MAY BE SUMMED UP AS FOLLOWS

FIRST SERIES.—By this hollow and light conductor speculum a size may be introduced to permit the entire cervix to enter and hold it. The objection to a taper speculum, moving back, when left untouched is thus overcome. A sheet made to surround the external end, is no hindrance to view on operation and obviates exposure of the patient. With this assurance the subject presses the top of the finger upon the edge when so ordered. No. 2 Is the usual size for multipara, and most useful when only one is ordered.

FIELD OF VIEW.—This is increased by two fold of a glass of same size outside at the point. The shell is thin and made of specially strong vulcanite. The mouth is slightly concave, which materially adds to the field of view.

LIGHT AND VIEW.—The taper admits of a conical concentrated column of light. The enamel, a bright red, reflects the object in view in a natural way and not magnified. The edge is perfectly smooth and by rotation the cervix exhibits itself all around. There is a perforation near the outer end, as an outside signal to show where the point is during introduction and rotation.

TAPER.—The advantage in this, in addition to (3) is that a third person can see the condition, and actual treatment as plainly as the operator can while the instrument is held stationary a class of students can move past and see the vaginal parts of the uterus as plain as if located externally. Chiefly on this account they are now used in a number of clinics.

PRICE, $2.50.

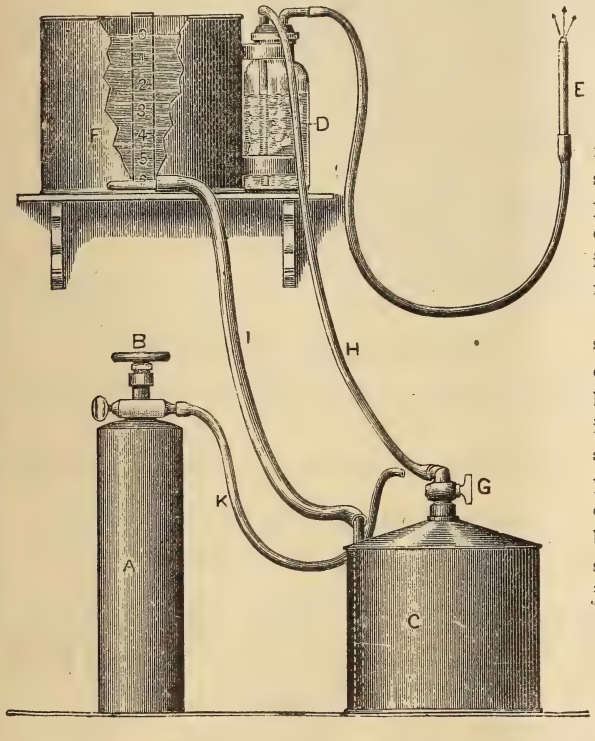
THERAPEUTIC ADMINISTRATION

OF

PURE OXYGEN BY ENEMA.



While in the exhibition of Oxygen for lung troubles direct inhalation is considered essential, in other diseases many physicians prefer administration by enema. In derangements affecting assimilation, for instance, marked benefit has followed this method.

The apparatus herewith shown is simple in construction and effective in operation. The administration is absolutely under the control of the operator in charge, as regards both the quantity and the rapidity of the flow. Both these points were carefully considered in designing the apparatus, and no other before the profession more completely subordinates the administration to the judgment of the operator.

PRICES.

Enema Apparatus	$12.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure or mixed	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$20.00
Enema Apparatus	$12.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$32.00

We are prepared to supply Pure Oxygen Gas, or a mixture of Oxygen and Nitrous Oxide in definite proportions respectively of 20 per cent. and 40 per cent. of Nitrous Oxide, in Cylinders of 40 or 100 gallons each The Gas, whether pure or mixed, is sold at the uniform price of 5 cents a gallon. The cost of the Cylinders will be refunded on their return empty with the valves in good condition.

Full description and directions accompany each apparatus or will be supplied on application.

Physician in Charge, Dr. CHARLES MEIGS WILSON

The new Hospital building situated in the centre of the city, has accommodation for twenty patients and ten private rooms. Each private room has a special nurse, electric-bells, open fire-place, and meals privately served. Pay patients may enter the Hospital at any time previous to their confinement. The hygienic arrangements and sewage of the Hospital are perfect. Ample protection is provided against fire. A limited number of free and pay beds are reserved in an isolated portion of the building for Gynaecological cases.

Two courses of instruction in practical obstetrics and in practical gynaecology are given each year commeneing in April and in October. Free patients only are used for purposes of clinical demonstration.

For particulars as to the admission of patients, or the courses of instruction in obstetrics and gynaecology, apply to DR. CHARLES MEIGS WILSON, Physician in Charge, by letter or in person, at the Charity, S. W. Cor. 11th and Cherry Sts Phila., daily at 12 o'clock noon.

McARTHUR'S SYRUP.

(SYR: HYPOPHOS: COMP: C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION,** sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

The Curd of Cow's Milk Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

Doliber-Goodale Co., Boston, Mass.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of
CLIN & CO., Paris.

SOLUTION OF
THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

Paris—CLIN & CO.—Paris
AND BY ALL DRUGGISTS.

CAPSULES
MATHEY-CAYLUS
WITH THIN ENVELOPE OF GLUTEN.

CONTAINING COPAIBA AND ESSENCE OF SANTAL; COPAIBA, CUBEBS, AND THE ESSENCE OF SANTAL: COPAIBA, IRON, AND THE ESSENCE OF SANTAL.

"**The Mathey-Caylus Capsules,** of the *Essence of* "*Santal*, associated with the Balsams, possess an incontesta- "ble efficaciousness, and are employed with the greatest "success for the rapid cure of old or recent *Discharges*, "*Gonorrhœa, Blenorrhœa, Leucorrhœa, Cystitis of the Neck*, "*Urethritis, Catarrh*, and other *diseases of the bladder*, together "with all affections of the *Urinary Passages*."

"Thanks to their thin envelope of *Gluten*, which is essen- "tially assimilable, the *Mathey-Caylus Capsules* are digested "by the most delicate persons, and never weary the stomach."

—*Gazette des Hopitaux de Paris.*

AND OF ALL DRUGGISTS.

NEURALGIAS
PILLS OF DR. MOUSSETTE.

The **Moussette Pills** of aconitine and quinium, calm or cure *Gastralgia, Hemicrania, Headache, Sciatica*, and the most obstinate Neuralgias.

"The sedative action exerted by the **Moussette Pills** "upon the apparatus of the sanguineous circulation by the "intermediation of the vaso-motor nerves, indicates their "use in *neuralgias of the trigemini nerves*, (fifth pair), *con-* "*gestive neuralgias*, and *painful and inflammatory Rheumatismal* "*affections*."

"Aconitine produces marvelous effects in the treatment "of *facial neuralgias* when they are not symptomatic of "intracranial tumor."—*Society of Biology of Paris, Meeting* "*of the 28th February, 1880.*

DOSE—Take 3 to 6 pills during the twenty-four hours.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF
CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,
A STIMULATING RESTORATIVE
—AND—
ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce with a measure containing exactly five grains; also in bottles of four, eight and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE., Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William St., New York,

Sole Agents for the above Preparations.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

RIO CHEMICAL CO., St. Louis, Mo., U. S. A.

LONDON. PARIS. CALCUTTA. MONTREAL.

For more than four years the Perfection Douche has been subjected to the severest practical tests, by experienced gynaecologist in every part of this country, no objection, in a single instance, having been made to the principles upon which it is constructed.

It provides ample and comfortable support, with a slight elevation of either the shoulders or hips, furnishes means for the prolonged application of a sufficiently large amount of hot water, and completely conveys away all the drip without risk of wetting the clothing. No other apparatus for applying hot water in the treatment of uterine and pelvic diseases combines as many desirable and practical qualities. COMFORT, CONVENIENCE, DURABILITY, AND THOROUGHNESS OF APPLICATION are its main points of excellence.

Descriptive circulars, prices, and testimonials are furnished on application. These afford satisfactory evidence of unqualified endorsement of its superior advantages, and show the high appreciation in which the instrument is held by those who have repeatedly recommended and tested its work.

Applications for the Douche or for circulars or testimonials may be made to agents, or to "THE PERFECTION DOUCHE," BOX 7, ALBANY, N. Y.

Western Pennsylvania Medical College,

City of Pittsburgh.

The *Regular Session* begins on the last Tuesday of September and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation.

A three years' graded course is also provided. The *Spring Session* embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects: this session begins the Second Tuesday in April and continues ten weeks.

The laboratories are open during the collegiate year for instruction in Chemistry, Microscopy, practical demonstrations in Medical and Surgical Pathology, and lessons in Normal Histology.

Special importance attaches to the superior clinical advantages possessed by this college. For particulars, see annual announcements and catalogue, for which address the Secretary, Prof. W. J. ASDALE. 2107 Penn. Avenue, Pittsburgh.

University of Pennsylvania

MEDICAL DEPARTMENT

The 123d ANNUAL WINTER SESSION will begin Monday, Oct. 1st, at 12 M., and continue 7 months.

The PRELIMINARY SESSION begins Monday, September 17th, the SPRING TERM Monday, May 6th, 1889.

The Curriculum is graded, and three annual Winter Sessions are required. Practical instruction, including laboratory-work in Chemistry, Histology, Osteology, and Pathology, with Bedside Instruction in Medicine, Surgery, and Gynæcology are a part of the regular course and without additional expense.

For catalogue and announcement containing particulars, apply to DR. JAMES TYSON, Sec'y, 36th and Woodland Ave., Phila.

DR. MASSEY'S PRIVATE SANITARIUM

3240 Chestnut Street

PHILADELPHIA

This institution, in addition to complete arrangements for the treatment of Nervous Diseases by rest, electricity, massage, etc., under comfortable surroundings, is specially equipped for the treatment of cases of Fibroid Tumors and other intractable diseases of the pelvic viscera, by the conservative use of strong electric currents. For particulars, address

DR. G. BETTON MASSEY

1706 Walnut Street, Philadelphia

Best Two-Wheeled Vehicle-Spring in the World. Send two-cent stamp for Catalogue. Address J. P. CALLAN, Aurora, Ill

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S, and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY'S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures.

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

For further particulars, and for College Circular, apply to

33 Lafayette Ave., Detroit, Mich

THE PROVIDENT LIFE AND TRUST COMPANY

OF PHILADELPHIA

Office, No. 409 Chestnut Street

INCORPORATED, 3D MONTH 22, 1865. **CHARTER PERPETUAL**

CAPITAL, $1,000,000. ASSETS, $20,115,023.49.

INSURES LIVES, GRANTS ANNUITIES, RECEIVES MONEY ON DEPOSIT, returnable on demand, for which interest is allowed, and is empowered by law to act as EXECUTOR, ADMINISTRATOR, TRUSTEE, GUARDIAN, ASSIGNEE, COMMITTEE, RECEIVER, AGENT, &c., for the faithful performance of which its capital and surplus fund furnish ample security.

ALL TRUST FUNDS and INVESTMENTS ARE KEPT SEPARATE AND APART from the assets of the Company.

OWNERS OF REAL ESTATE are invited to look into that branch of the Trust Department which has the care of this description of property. It is presided over by an officer learned in the law of Real Estate, seconded by capable and trustworthy assistants. Some of them give their undivided attention to its care and management.

The incomes of parties residing abroad carefully collected and duly remitted.

SAMUEL R. SHIPLEY, President. T. WISTAR BROWN, Vice-President.
ASA S. WING, Vice-Pres't and Actuary JOSEPH ASHBROOK, Manager of Ins. Dept.
J. ROBERTS FOULKE, Trust Officer.

DIRECTORS.—Sam'l R. Shipley, T. Wistar Brown, Richard Cadoury, Henry Haines, Richard Wood, William Hacker, J. M. Albertson, Israel Morris, Chas. Hartshorne, William Gummere, Frederic Collins, Philip C. Garrett, Justus C. Strawbridge, James V. Watson, Asa S. Wing.

The only prominent Emulsion of Cod-Liver Oil introduced directly to the medical profession. It is advertised exclusively in medical journals.

HYDROLEINE.

(HYDRATED OIL.)

Produces rapid increase in Flesh and Strength.

FORMULA.—Each Dose contains:			
Pure Cod Liver Oil.....80 m. (drops)		Soda.....1-3 Grains	
Distilled Water.....35 "		Salicylic Acid.....1-4 "	
Soluble Pancreatin..... 5 Grains.		Hyocholic Acid.....1-20 "	

Recommended and Prescribed by EMINENT PHYSICIANS Everywhere. It is pleasant to the Taste and acceptable to the most delicate Stomach.

IT IS ECONOMICAL IN USE AND CERTAIN IN RESULTS.

HYDROLEINE (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhuæ, but a hydro-pancreated preparation, containing acids and a small percentage of soda. Pancreatin is the digestive principle of fatty foods, and in the soluble form here used, readily converts the oleaginous material into assimilable matter, a change so necessary to the reparative process in all wasting diseases.

The following are some of the diseases in which **HYDROLEINE** is indicated:

Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis, General Debility, etc.

TO BRAIN WORKERS of all classes, **HYDROLEINE** is invaluable, supplying as it does, the true brain-food, and being more easily assimilated by the digestive organs than any other emulsion.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," and "Consumption and Wasting Diseases," by two distinguished London physicians, which will be sent free on application.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE UNITED STATES. 115 FULTON STREET, N. Y.

A Sample of Hydroleine will be sent free upon application, to any physician (enclosing business card) in the U. S.

FELLOWS'

HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The essential elements** to the Animal Organization—Potash and Lime.

The **Oxydizing Agents**—Iron and Manganese;

The **Tonics**—Quinine and Strychnine,

And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

LEGS and ARMS with RUBBER FEET and HANDS

(MARKS' PATENTS.)

Indorsed by the United States Government, the Industrial Exhibition Commissioners of New York, Philadelphia, Atlanta, New Orleans, etc., the eminent surgeons in the country, the press, and over 9,000 men, women, and children who wear them, residing in all parts of the world.

The Rubber Foot and Hand possess the most natural appearance, the greatest durability and comfort of all artificial limbs. Vast numbers of mutilated men and women are, by the use of rubber feet and hands, enabled to mingle with the rest of the world without betraying their loss or experience great inconvenience. Farmers, mechanics, professionals, and even athletes, who have lost one or more of their limbs, are enabled to resume their vocations by the use of these remarkable inventions.

MR. A. A. MARKS: ITHACA, TOMPKINS CO., N.Y., Jan. 15, 1888.

DEAR SIR: Rubber feet are the wonders of the world. I have challenged every maker in the world to produce a man that has a pair of artificial feet to walk with me. I can walk a mile in thirteen minutes, and not hurry myself any. I do not take a back seat for any unprofessional with two good natural feet, in a one mile walk. I have the pleasure of announcing that my record in walking professionally is unequaled in the world by any one with artificial legs. THOMAS CLEARY.

By a copyright formula, furnished by us on request, applicants can supply us with all the data necessary to secure fit and satisfactory results, while they remain at home. One-half the legs and arms furnished by us are made from measurements and profiles, without our seeing the wearer. This new method is a great convenience for those living at a distance. Fit always guaranteed.

A treatise of 400 pages, and nearly 200 illustrations, and nearly a thousand endorsements and testimonals, sent to those needing artificial legs or arms, who will give a description of their case. The same will be sent to physicians and surgeons free of charge. Address,

A. A. MARKS, 701 Broadway, New York City.

SEND CHECK OR POSTAL NOTE

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Engen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University, and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.—307° F and has the composition $C_6 H_4 <^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on pplication.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to eac pill.

W. H. SCHIEFFELIN & CO.,

170 & 172 WILLIAMS STREET, NEW YORK,

SOLE LICENSEES AND SOLE AGENTS FOR THE UNITED STATES.

SUCCUS ALTERANS

(McDADE.)

SUCCUS ALTERANS is a purely vegetable compound of the preserved juices of Stillingia Sylvatica Lappa Minor, Phytolacca Decandra, Smilax Sarsaparilla, and Xanthoxylum Carolinianum, as collected by DR. GEO. W. MCDADE, exclusively for ELI LILLY & Co., and endorsed by DR. J. MARION SIMS.

SUCCUS ALTERANS continues to gain favor from its remarkable Alterative and Tonic properties, *eliminating specific poison from the blood* and *increasing the proportion of red corpuscles in anæmic patients* to a wonderful degree; is endorsed by the medical profession, and in use by many hospitals of note.

SUCCUS ALTERANS in venereal and cutaneous diseases is fast supplanting Mercury, the Iodides, and Arsenic; and is a certain remedy for Mercurialization, Iodism, and the dreadful effects often following the use of Arsenic in skin diseases.

SUCCUS ALTERANS is also strongly recommended for its Tonic and Alterative effects in myriad forms of scrofulous disease, and in all cases where anæmia is a factor. Such patients rapidly develop a good appetite, sleep soundly, and gain flesh rapidly. Many cases are on record where patients increased ten to twenty-five pounds in weight in a few weeks.

SUCCUS ALTERANS is giving satisfactory results in treatment of *Chronic Rheumatism*, and can be used with confidence.

SUCCUS ALTERANS may be given for any length of time, without injury to the patient.

SUCCUS ALTERANS is put up in pint round amber bottles, and *never in bulk.*

PHYSICIANS who have not received DR. MCDADE'S latest publication, the MONOGRAPHIA SYPHILITICA, should send their address, mentioning this journal, and we will mail a copy. It contains a paper, illustrated with colored plates, by DR. D. H. GOODWILLIE, of New York, on the "Sequelæ of Syphilis," reports of cases in practice, and many other valuable papers.

ELIXIR PURGANS.

ELIXIR PURGANS (LILLY) reliably stimulates the dormant liver without undue irritation, and has gentle yet positive effect upon the alimentary tract. In HABITUAL CONSTIPATION, so common in WOMEN AND CHILDREN, it will be found particularly useful. Its endorsement at Bellevue and many other prominent hospitals East and West, as well as its employment in general practice by the most eminent medical men, confirms the experience of years in its use.

Each Teaspoonful Represents

Rhamnus Purshiana,	**10 grs.**
Euonymus Atropur.,	**8 grs.**
Cassia Acutifolia (Purif.)	**10 grs.**
Iris Versicolor,	**4 grs.**
Hyoscyamus Niger,	**2 grs.**
Aromatics, etc.	

IN PRESCRIBING, PLEASE BE CAREFUL TO WRITE

ELIXIR PURGANS (LILLY),

THAT OTHER PREPARATIONS MAY NOT BE SUBSTITUTED.

HIGHLY RECOMMENDED.

We take pleasure in endorsing the ELIXIR PURGANS (LILLY) as prepared from the above formula, for in it we find a near approach to positive *perfection* in the form of a *Liquid Cathartic*, and, from our experience with the preparation, can highly recommend it to the profession.

JAMES R. HEALY, M.D., *Sup't Infants' and Children's Hospital, Randall's Island, N. Y.*

SUPPLIED BY ALL DRUGGISTS.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE**, is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

Sole Agents for the United States for the above Preparations.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE., Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

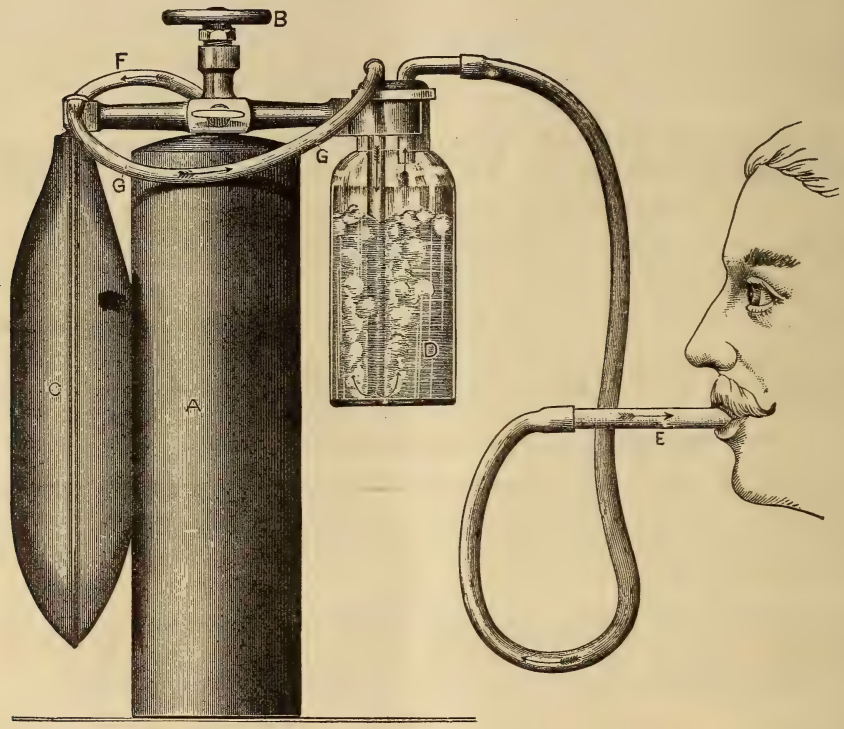
E. FOUGERA & CO., 30 North William St., New York,

Sole Agents for the above Preparations.

INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or mixure of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00

PRICE REDUCED.

True Salicylic Acid.

CRYSTALLIZED FROM

WINTERGREEN OIL.—ITS NATURAL SOURCE.

DR. P. W. LATHAM, Downing Professor of Medicine at Cambridge (England), lecturing on the treatment of gout and rheumatism at the Royal College of Physicians, says:

"The true Salicylic Acid obtained from the vegetable kingdom must alone be employed. If you have to give large doses, avoid giving the artificial product obtained from carbolic acid, however much it may have been dialyzed and purified. Give the acid without any alkali or base," etc.

A reprint of this exceedingly valuable paper will be sent on application.

A DESIDERATUM—not always appreciated.

The quality of medicines used in the prescription is as important a factor in the cure of disease as a correct diagnosis; and a physician violates no code, either of ethics or morals, in demanding of his druggist that which he knows to be reliable, instead of leaving to the latter to decide whose preparations he shall or shall not use.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength and efficacy than heretofore.

The ordinary dose is a large wineglassful (4 ounces), taken fasting. Most efficacious and more acceptable to the palate when heated or mixed with an equal quantity of very hot water.

"*The most suitable aperient for prolonged use.*"—Prof. SEEGEN.

"*After twenty years' use, I appreciate it as highly as ever.*"—Prof. VIRCHOW.

OF ALL DRUGGISTS AND MINERAL-WATER DEALERS.

An Important Communication
TO PHYSICIANS.

Thirteen years have now elapsed since the introduction of SCOTT'S EMULSION of PURE NORWEGIAN COD LIVER OIL with HYPOPHOSPHITES of LIME and SODA, since which time its growth and development have been very large, not only in this country but in South America, Great Britain and a large part of Continental Europe, and it has, in a very large degree, supplanted the Plain Cod Liver Oil. Its success is largely due to the happy combination of all its components, making a perfect chemical union, that will not separate for years, which we believe is not true of any other Cod Liver Oil preparation.

The innumerable reports from Physicians, of the brilliant results obtained justifies the statement that in almost every case where Cod Liver Oil is indicated, Scott's Emulsion is infinitely superior.

Physicians who have never tried this Emulsion, or who have been induced to try something else in its stead, will do us the favor to send for sample, and we know they will always use it in preference to plain Cod Liver Oil or any other preparation.

We also call your attention to the following preparations:

CHERRY-MALT PHOSPHITES.

A combination of the tonic principles of Prunus Virginiana, Malted Barley, Hypophosphites of Lime and Soda, and Fruit Juices. An elegant and efficient brain and nerve tonic.

BUCKTHORN CORDIAL (Rhamnus Frangula.)

Prepared from carefully selected German Buckthorn Bark, Juglans Bark, and Aromatics. The undoubted remedy for Habitual Constipation.

Be sure and send for samples of the above—delivered free.

The Curd of Cow's Milk
Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

GENUINE BLAUD'S PILLS.

These pills, which have been inserted in the new French Pharmacopœia, have been employed with the greatest success for more than fifty years by most French and foreign physicians, to cure anemia, chlorosis, and all chlorotic affections in which iron is indicated.

Here is the opinion of men most eminent in medical science who have employed them.

"For thirty-five years, in which I have practised medicine, I have recognized the incontestable advantages of BLAUD'S PILLS over all other ferruginous preparations, and I regard them as the best anti-chlorotic."—DR. DOUBLE, *Ex-President of the Academy of Medicine.*

"Of all the ferruginous preparations, which have given good results in the treatment of chlorotic affections, BLAUD'S PILLS appear to us to deserve to hold the first rank."—*Dictionnaire universel de médecine,* Vol. II, p. 99.

These pills, prepared according to the genuine formule of the originator, by his nephew, Aug. Blaud, Pharmacist of the Faculty of Paris, are sold only in bottles of 200 pills and half bottles of 100 pills, at a cost of 5 and 3 francs ($1.00, and seventy-five cents), and never in smaller quantities. *See that his name is stamped on each pill.* **PARIS, 8 RUE PAYENNE, and at every Pharmacy.** (Beware of imitations.)

BLAUD

REPORTER VACCINE VIRUS.

(HUMANIZED.)

For some time we have ceased to advertise VACCINE VIRUS, for a very good reason, viz: **We could not get what we found reliable.** Now we can, and offer our subscribers Crusts from healthy infants at

SPORTING AND ATHLETIC GOODS OF EVERY DESCRIPTION.

THERE IS A PEPSIN

WHICH IS UNIFORMLY ACTIVE, PERMANENT, AND RELIABLE,

IT IS "FAIRCHILD'S."

This Pepsin will not spoil, will not become soft and sticky in the vial, even if left long uncorked.

Fairchild's Pepsin will not "gum up" if dispensed in powders, plain, or with the drugs usually combined with pepsin.

Fairchild's is not a partial peptone, and has none of the well-known characteristics of peptone.

Fairchild's is the pioneer pepsin, it showed the way. It "got there" early.

Its activity has never been exaggerated.

All this time, whilst other manufacturers were still offering the high-dilution saccharated and amylated article, Fairchild's Pepsin was steadily making its way on its merit. Now, no one ventures to ask a hearing for these *placebo-pepsins*.

When physicians now prescribe "pepsin" they mean pepsin—not milk sugar, and pepsin.

All these years, Fairchild's Pepsin was always and everywhere found to do just what was claimed for it—in spite of the attitude, genuine or assumed, which held that all "claims" about pepsin must be taken with a liberal discount.

Every *bona fide* test demonstrated its reliability.

We have never found it necessary to explain or excuse any deficiency or inaction as due to "deteriorated" specimens.

Fairchild's will not disappoint the prescriber under any condition proper for pepsin.

WITH SUCH A RECORD Fairchild's Pepsin is a good one to stand by

FAIRCHILD BROS. & FOSTER,
82 and 84 Fulton St., New York.

7 Snow Hill Buildings, London, E. C.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea, suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month: thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality in Boston,	. . . . .	25.60	per 1000.
" of Women in Boston,	. . . . .	29,00	" "
" in **Murdock's Free Surgical Hospital,**	.	**5.00**	" "
" New York,	. . . . .	26.32	" "
" Philadelphia,	. . . . .	20.00	" "
" Chicago,	. . . . .	20.90	" "
" St. Louis,	. . . . .	20.49	" "

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

Murdock Liquid Food Co., Boston.

WAMPOLE'S

GRANULAR

EFFERVESCENT

BROMO-PYRINE.

Containing in Each Heaping Teaspoonful:

Caffein Hydrobromate, . 1 Gr.

SVAPNIA

OR

PURIFIED OPIUM

FOR PHYSICIANS USE ONLY.

Contains the Anodyne and Soporific Alkaloids, Codeia, Narceia and Morphia.

Excludes the Poisonous and Convulsive Alkaloids, Thebaine, Narcotine and Papaverine.

SVAPNIA has been in steadily increasing use for over twenty years, and whenever used has given great satisfaction.

To PHYSICIANS OF REPUTE, not already acquainted with its merits, samples will be mailed on application.

SVAPNIA is made to conform to a uniform standard of Opium of Ten per cent. Morphia strength.

JOHN FARR, Manufacturing Chemist, New York.

C. N. CRITTENTON, Gen'l Agent, 115 Fulton St., N. Y.

To whom all orders for samples must be addressed.

SVAPNIA IS FOR SALE BY DRUGGISTS GENERALLY.

STAUFER'S

Hard-Rubber Speculums

PRICE $2.50 EACH

THE ADVANTAGES OF THIS SERIES OF SPECULUMS MAY BE SUMMED UP AS FOLLOWS

FIRST SERIES.—By this hollow and light conductor speculum a size may be introduced to permit the entire cervix to enter and hold it. The objection to a taper speculum, moving back, when left untouched is thus overcome. A sheet made to surround the external end, is no hindrance to view on operation and obviates exposure of the patient. With this assurance the subject presses the top of the finger upon the edge when so ordered. No. 2 is the usual size for multipara, and most useful when only one is ordered.

FIELD OF VIEW.—This is increased by two fold of a glass of same size outside at the point. The shell is thin and made of specially strong vulcanite. The mouth is slightly concave, which materially adds to the field of view.

LIGHT AND VIEW.—The taper admits of a conical concentrated column of light. The enamel, a bright red, reflects the object in view in a natural way and not magnified. The edge is perfectly smooth and by rotation the cervix exhibits itself all around. There is a perforation near the outer end, as an outside signal to show where the point is during introduction and rotation.

TAPER.—The advantage in this, in addition to (3) is that a third person can see the condition, and actual treatment as plainly as the operator can while the instrument is held stationary a class of students can move past and see the vaginal parts of the uterus as plain as if located externally. Chiefly on this account they are now used in a number of clinics.

PRICE, $2.50.

University of Pennsylvania

MEDICAL DEPARTMENT

The 123d ANNUAL WINTER SESSION will begin Monday, Oct. 1st, at 12 M., and continue 7 months.

The PRELIMINARY SESSION begins Monday, September 17th, the SPRING TERM Monday, May 6th, 1889.

The Curriculum is graded, and three annual Winter Sessions are required. Practical instruction, including laboratory-work in Chemistry, Histology, Osteology, and Pathology, with Bedside Instruction in Medicine, Surgery, and Gynæcology are a part of the regular course and without additional expense.

For catalogue and announcement containing particulars, apply to DR. JAMES TYSON, Sec'y,
36th and Woodland Ave., Phila.

J.P. CALLAN'S HAMMOCK-SPRING

Best Two-Wheeled Vehicle-Spring in the World. Send two-cent stamp for Catalogue. Address J. P. CALLAN, Aurora, Ill.

Western Pennsylvania Medical College,

City of Pittsburgh.

The *Regular Session* begins on the last Tuesday of September and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation.

A three years' graded course is also provided. The *Spring Session* embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects: this session begins the Second Tuesday in April and continues ten weeks.

The laboratories are open during the collegiate year for instruction in Chemistry, Microscopy, practical demonstrations in Medical and Surgical Pathology, and lessons in Normal Histology.

Special importance attaches to the superior clinical advantages possessed by this college. For particulars, see annual announcements and catalogue, for which address the Secretary, Prof. W. J. ASDALE, 2107 Penn. Avenue, Pittsburgh.

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S, and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures.

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

For further particulars, and for College Circular, apply to

H. O. WALKER, M.D., Secretary,
33 Lafayette Ave., Detroit, Mich.

STUDENTS' MICROSCOPES $38.00 TO $46.00 COMPLETE.

ILLUSTRATED CATALOGUE ON APPLICATION.

BUFFALO LITHIA WATER

IN THE TREATMENT OF

ALBUMINURIA, WHETHER OF BRIGHT'S DISEASE, PREGNANCY, OR SCARLET FEVER.

Dr. WM. B. TOWLES, Professor of Anatomy and Materia Medica in the Medical Department of the University of Virginia.

"BUFFALO LITHIA WATER, No. 2, belongs to the ALKALINE or, *perhaps, to the* ALKALINE-SALINE Class, *for it has proved far more efficacious in many diseased conditions than any of the simple* ALKALINE *waters.*

. . . . . .

"*Its effects are marked in causing a disappearance of* ALBUMEN *from the Urine.* In a single case of BRIGHT'S DISEASE OF THE KIDNEYS I witnessed *decided beneficial results from its use, and from its action in this case I should have great confidence in it as a remedy in certain stages of the disease.*"

Dr. GRAEME M. HAMMOND, of New York, Professor of Diseases of the Mind and Nervous System in the New York Post-Graduate Medical School and Hospital.

"In *all* cases of BRIGHT'S DISEASE of the KIDNEYS I have found BUFFALO LITHIA WATER *of the greatest service in increasing the quantity of urine and in eliminating the* ALBUMEN."

Dr. GEORGE W. MILTENBERGER, Professor of Obstetrics, University of Maryland,

Before the Medical and Chirurgical Faculty of the State of Maryland, recommended BUFFALO LITHIA WATER as an ALKALINE Diuretic in ALBUMINURIA of PREGNANCY.—See *Trans. Faculty of State of Maryland,* 1886.

Dr. WM. H. DOUGHTY, Professor of Materia Medica and Therapeutics, Medical College of Georgia; Member of American Medical Association, etc.

"Over the NAUSEA AND VOMITING OF PREGNANCY, PARTICULARLY IN THE LATTER MONTHS, WHERE URÆMIC CONDITIONS are possibly established, and in PUERPERAL CONVULSIONS, URÆMIA CO-EXISTING, BUFFALO LITHIA WATER often exerts *marked control.*"

Dr. CALEB WINSLOW, 23 McCulloh Street, Baltimore, Member of the Medical and Chirurgical Faculty of Maryland.

"I have found the BUFFALO LITHIA WATER, Spring No. 2, of marked service in relieving the *Nausea of Pregnant Women.* I frequently resort to it at intervals *during the whole course of Pregnancy.* Being *antacid, laxative, diuretic, and tonic, it seems well adapted to relieve the disturbances usually attendant upon Gestation, and I have no doubt its free use might remove* URÆMIC POISON, *and prevent Convulsions produced thereby.*"

Dr. JOS. HOLT, New Orleans, President Board of Health, State of Louisiana.

"I have prescribed BUFFALO LITHIA WATER freely in affections of the *Kidneys* and *Urinary* passages, particularly in GOUTY *subjects,* in ALBUMINURIA, and in irritable conditions of the *Bladder* and *Urethra* in *females.* The results have been such as to satisfy me *of the extraordinary value of this Water in a large class of cases usually most difficult to treat.*"

Dr. JAMES B. McCAW, Professor of the Practice of Medicine in the Virginia Medical College.

[Extract from the Proceedings of the Richmond Academy of Medicine, October 15, 1878.]

"Dr. McCaw also spoke of the great value of BUFFALO LITHIA WATER in ALBUMINURIA of *Scarlet Fever* and in ALBUMINURIA of *Pregnant Women.*"

Dr. J. T. DAVIDSON, New Orleans, La., ex-President New Orleans Surgical and Medical Association.

"I have for several years prescribed BUFFALO LITHIA WATER, Spring No. 2, in all cases of *Scarlet Fever,* directing it to be drunk *ad libitum, with the effect of relieving all traces of* ALBUMEN *in the urine,* and have found it equally efficacious in renal diseases requiring the use of alkaline water."

Dr. G. W. SEMPLE, Hampton, Va., President Medical Society of Virginia.

"In SCARLET FEVER I have known BUFFALO LITHIA WATER *restore a healthy and abundant secretion of Urine, when it was highly charged with* ALBUMEN *and the secretion almost suppressed.*"

Dr. MARTIN L. JAMES, of Richmond, Va., Professor of Materia Medica and Therapeutics, Medical Society of Virginia.

[Proceedings of the Richmond, Virginia, Academy of Medicine, December 16, 1880.]

"The President of the Academy, Dr. M. L. James, reported a case of *Congestion* of the *Kidneys* in a lady eight months advanced in *Pregnancy, attended by marked Œdema,* both over the extremities and surface, and by URÆMIC POISONING *to such an extent as very seriously impaired the vision of the patient,* relieved by the free use of this Water for three weeks.

"Other remedies, he stated, were used in these cases, *but the favorable results seemed clearly attributable to the action of the Water.*"

Dr. HARVEY L. BYRD, of Baltimore, President and Professor of Obsetrics and Diseases of Women and Children in the Baltimore Medical College, formerly Professor of Practical Medicine, etc.

"I have prescribed BUFFALO LITHIA WATER with the most satisfactory results, both as a *remedy* and *prophylactic* in the *Parturient* or *Pregnant Puerperal Eclampsia* or *Convulsions; and I may say that I know of no remedy of equal efficacy with the Water of Spring No. 2 in Sequelæ of Scarlatina.*

"It has an *ascertained value* in BRIGHT'S DISEASE. *A knowledge of its action in that disease thus far would seem* to warrant the belief that it would, in many instances, *at least in its early stages, arrest it entirely, and in its more advanced stage prove a decided comfort and palliative.*

Water in cases of one dozen half-gallon bottles, $5.00 per case at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

Doctors Should Prescribe

Lactated Food when their little patients are poorly nourished. Its base is sugar of milk, it contains no cane sugar or starch, is easily assimilated, and possesses the highest value in nutrients.

Lactated Food

is prescribed by many physicians whenever an easily digested and strengthening food is indicated. The great variety of palatable ways in which it may be prepared makes it especially valuable in convalescence. Eminent practitioners term it the food *par excellence*

For Infants and Invalids.

A regular size package of Lactated Food, and an interesting pamphlet, "The Nutrition of Infants and Invalids," will be sent, charges paid, to any Physician. Correspondence solicited.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully,

L. WOLFF, M.D.,
Demonstrator of Chemistry, Jefferson Medical College.

THIRD EDITION.

ACCIDENTS AND EMERGENCIES

By CHARLES W. DULLES, M.D.

"This is the third edition, with revisions and enlargements, of an excellent manual, the practical qualities of which have been proved many times. It is a work that ought to be in every home, and every home that has a copy kept where it can be consulted at short notice is likely to find it worth many times its small cost."—*Philadelphia Evening Telegraph*, May 5, 1888.

"The illustrations are good and sufficiently numerous. The language is simple, being entirely devoid of technicalities, and the methods of treatment recommended are trustworthy and reliable. The manual is one of the best of this class of books and should be in the library of every householder, ready for reference at a moment's notice."—*Science*, May 18, 1888.

Sent on receipt of 75 Cents.

ADDRESS: Medical and Surgical Reporter,
P.O. Box 843. PHILADELPHIA, PA.

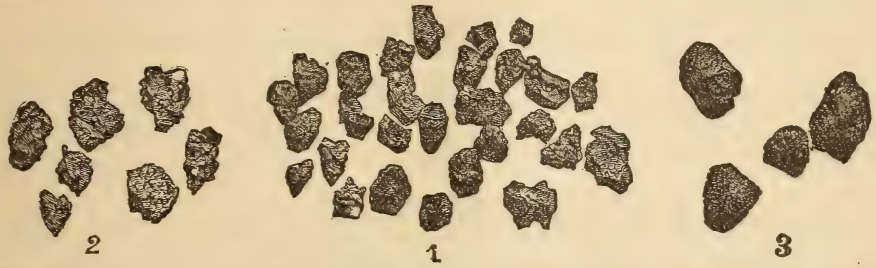
Buffalo Lithia Water

In the TREATMENT OF URINARY DEPOSIT.

Case of Dr. B. J. WEISTLING, of Middleton, Pa., stated by himself.

"Experience in its use in **STONE in the BLADDER** in my own person enables me to attest the efficacy of the **BUFFALO LITHIA WATER** in this painful malady. After having been long subjected to sufferings, the intensity of which cannot be described, I have, under the influence of this Water, passed an ounce of **CALCULI (URIC ACID)**, some of which weighed as much as four grains, affording inexpressible relief and leaving me in a condition of comparative ease and comfort.

"On one occasion I passed thirty-five **CALCULI** in forty-eight hours. The appearance of these **CALCULOUS NUCLEI** indicates unmistakably, I think, that they were all *component particles of one large* **CALCULUS** *destroyed by the action of the Water, by means of solution and disintegration.* At my advanced period of life (I am seventy-seven years and six months of age), and in my feeble general health, a surgical operation was not to be thought of, and the Water seems to have accomplished all that such an operation, if successful, could have done."



[The above plate is from a photograph, and represents the exact size and shape of some of the Calculi passed by Dr. Weistling. They were preserved by his son, Dr. J. Weir Weistling.]

Case stated by Dr. G. HALSTED ROYLAND, late Professor of Surgery, Baltimore Medical College, Member American Medical Association.

"The case of Mr. C., which came under my observation as Resident Physician at the Springs during the season of 1884, affords undoubted evidence that Buffalo Lithia Water is a **SOLVENT** *for Urinary Deposit*, commonly known as **STONE in the BLADDER.** He was operated upon for **STONE**, the operation affording but partial and temporary relief. A year afterward he visited the **BUFFALO LITHIA SPRINGS**, at the same time passing small quantities of a *Urinary Deposit*, of the **TRIPLE PHOSPHATE of AMMONIA** and **MAGNESIA VARIETY**, and his sufferings such as required that he should be kept constantly under the influence of opiates. In some eight weeks the solvent properties of the Water *were evident in the diminished consistency of the deposit, the increased quantity discharged, and by its change from Concrete Lumps to fine Sand*, which he discharged to the amount of *Four Ounces.* After a time, however, the quantity gradually diminished, and finally ceased, and he left the Springs *with the deposit dissolved* and *washed out of the system*, and the *Diathesis fons et origi morbi* altered. There had been a disappearance of the attending distressing symptoms, and great improvement in his general condition."

Dr. MARTIN L. JAMES, of Richmond, Va., Professor of Materia Medica and Therapeutics, Medical Society of Virginia.

[Proceedings of the Richmond, Virginia, Academy of Medicine, December 16, 1880.]

"The President of the Academy, Dr. M. L. James, reported three cases of marked **URIC ACID DIATHESIS** successfully treated by the Water of Spring No. 2 of the **BUFFALO LITHIA SPRINGS** of Virginia. In one of these patients there were, as a result of this Diathesis, **SANDY DEPOSITS** in the *Urine, Inflammation of the Kidneys, Irritability of the Bladder, and Hæmaturia*, and, finally, the passage of a **CALCULUS** of the size of a cherry, formed on a blood-clot as a nucleus. In another case there were frequent attacks of **NEPHRITIC COLIC**, attended by **SANDY DEPOSITIONS** in the urine. After the free use of this Water in these cases, no further manifestations of the disorder occurred."

Dr. HENRY M. WILSON, of Baltimore, ex-President Medical and Chirurgical Faculty of Maryland.

"My experience in the use of the **BUFFALO LITHIA WATER** has not been large, *but it is of such a positive character that I do not hesitate to express my preference for it, as a* **DIURETIC** in **URINARY CALCULI,** *over all other waters that I have ever used.*"

Water in cases of one dozen half-gallon bottles, $5 per case, at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 <^{O C_2 H_5}_{NH (CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeable symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on pplication.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to eac pill.

SPORTING AND ATHLETIC GOODS OF EVERY DESCRIPTION.

An Important Communication
TO PHYSICIANS.

Thirteen years have now elapsed since the introduction of SCOTT'S EMULSION of PURE NORWEGIAN COD LIVER OIL with HYPOPHOSPHITES of LIME and SODA, since which time its growth and development have been very large, not only in this country but in South America, Great Britain and a large part of Continental Europe, and it has, in a very large degree, supplanted the Plain Cod Liver Oil. Its success is largely due to the happy combination of all its components, making a perfect chemical union, that will not separate for years, which we believe is not true of any other Cod Liver Oil preparation.

The innumerable reports from Physicians, of the brilliant results obtained justifies the statement that in almost every case where Cod Liver Oil is indicated, Scott's Emulsion is infinitely superior.

Physicians who have never tried this Emulsion, or who have been induced to try something else in its stead, will do us the favor to send for sample, and we know they will always use it in preference to plain Cod Liver Oil or any other preparation.

We also call your attention to the following preparations:

CHERRY-MALT PHOSPHITES.

A combination of the tonic principles of Prunus Virginiana, Malted Barley, Hypophosphites of Lime and Soda, and Fruit Juices. An elegant and efficient brain and nerve tonic.

BUCKTHORN CORDIAL (Rhamnus Frangula.)

Prepared from carefully selected German Buckthorn Bark, Juglans Bark, and Aromatics. The undoubted remedy for Habitual Constipation.

Be sure and send for samples of the above—delivered free.

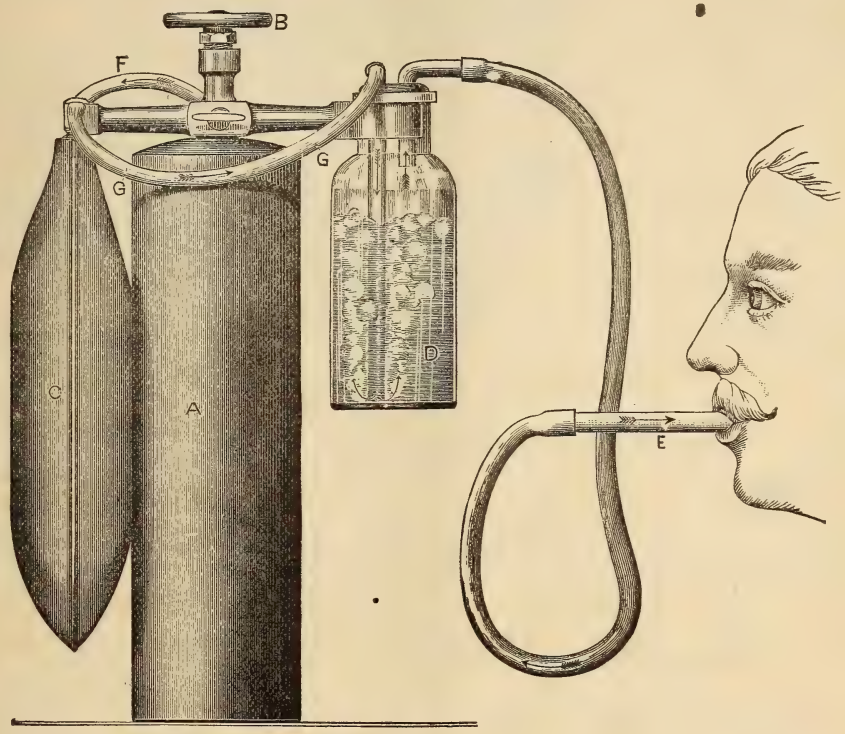
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or mixure of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15 00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

REPORTER VACCINE VIRUS.
(HUMANIZED.)

For some time we have ceased to advertise VACCINE VIRUS, for a very good reason, viz: **We could not get what we found reliable.** Now we can, and offer our subscribers Crusts from healthy infants at

ONE DOLLAR, OR TWO DOLLARS

according to size. They are from the best source we know of, and we can recommend them.

But dealing in VACCINE VIRUS is an accommodation to our subscribers, and not a source of material profit to us; so we must have **Money sent with Order.** If crusts don't take, we will get another.

McARTHUR'S SYRUP.

(SYR: HYPOPHOS: COMP: C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION,** sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

Mention this Journal. McARTHUR HYPOPHOSPHITE CO., BOSTON, Mass.

THERE IS A PEPSIN

WHICH IS UNIFORMLY ACTIVE, PERMANENT, AND RELIABLE,

IT IS "FAIRCHILD'S."

This Pepsin will not spoil, will not become soft and sticky in the vial, even if left long uncorked.

Fairchild's Pepsin will not "gum up" if dispensed in powders, plain, or with the drugs usually combined with pepsin.

Fairchild's is not a partial peptone, and has none of the well-known characteristics of peptone.

Fairchild's is the pioneer pepsin, it showed the way. It "got there" early.

Its activity has never been exaggerated.

All this time, whilst other manufacturers were still offering the high-dilution saccharated and amylated article, Fairchild's Pepsin was steadily making its way on its merit. Now, no one ventures to ask a hearing for these *placebo-pepsins.*

When physicians now prescribe "pepsin" they mean pepsin—not milk sugar, and pepsin.

All these years, Fairchild's Pepsin was always and everywhere found to do just what was claimed for it—in spite of the attitude, genuine or assumed, which held that all "claims" about pepsin must be taken with a liberal discount.

Every *bona fide* test demonstrated its reliability.

We have never found it necessary to explain or excuse any deficiency or inaction as due to "deteriorated" specimens.

Fairchild's will not disappoint the prescriber under any condition proper for pepsin.

WITH SUCH A RECORD Fairchild's Pepsin is a good one to stand by.

THE WELL-KNOWN APERIENT MINERAL WATER.

IMPORTANT NOTICE.

By reason of an improved method of caption, by which dilution is avoided, FRIEDRICHSHALL WATER will be found now to be of considerably greater strength and efficacy than heretofore.

The ordinary dose is a large wineglassful (4 ounces), taken fasting. Most efficacious and more acceptable to the palate when heated or mixed with an equal quantity of very hot water.

"*The most suitable aperient for prolonged use.*"—Prof. SEEGEN.

"*After twenty years' use, I appreciate it as highly as ever.*"—Prof. VIRCHOW.

OF ALL DRUGGISTS AND MINERAL-WATER DEALERS.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

The Curd of Cow's Milk
Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

Doliber-Goodale Co., Boston, Mass.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF

THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine

(MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

Paris—CLIN & CO.—Paris

"The sedative action exerted by the **Moussette Pills** "upon the apparatus of the sanguineous circulation by the "intermediation of the vaso-motor nerves, indicates their "use in *neuralgias of the trigeminl nerves*, (fifth pair), *con-* "*gestive neuralgias*, and *painful and inflammatory Rheumatismal* "*affections*."

"Aconitine produces marvelous effects in the treatment "of *facial neuralgias* when they are not symptomatic of "intracranial tumor."—*Society of Biology of Paris, Meeting* "*of the 28th February, 1880.*

DOSE—Take 3 to 6 pills during the twenty-four hours.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce with a measure containing exactly five grains; also in bottles of four, eight and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE., Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William St., New York,

Sole Agents for the above Preparations.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhœa, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

Address, MEDICAL AND SURGICAL REPORTER,
P. O. Box 843, PHILADELPHIA.

The only prominent Emulsion of Cod-Liver Oil introduced directly to the medical profession. It is advertised exclusively in medical journals.

HYDROLEINE.

(HYDRATED OIL.)

Produces rapid increase in Flesh and Strength.

FORMULA.—Each Dose contains:

Pure Cod Liver Oil.....80 m. (drops)	Soda.....1-3 Grains.
Distilled Water.....35 "	Salicylic Acid.....1-4 "
Soluble Pancreatin..... 5 Grains.	Hyocholic Acid.....1-90 "

Recommended and Prescribed by EMINENT PHYSICIANS Everywhere. It is pleasant to the Taste and acceptable to the most delicate Stomach.

IT IS ECONOMICAL IN USE AND CERTAIN IN RESULTS.

HYDROLEINE (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhuæ, but a hydro-pancreated preparation, containing acids and a small percentage of soda. Pancreatin is the digestive principle of fatty foods, and in the soluble form here used, readily converts the oleaginous material into assimilable matter, a change so necessary to the reparative process in all wasting diseases.

The following are some of the diseases in which **HYDROLEINE** is indicated:

Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis, General Debility, etc.

TO BRAIN WORKERS of all classes, **HYDROLEINE** is invaluable, supplying as it does, the true brain-food, and being more easily assimilated by the digestive organs than any other emulsion.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," and "Consumption and Wasting Diseases," by two distinguished London physicians, which will be sent free on application.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE UNITED STATES. 115 FULTON STREET, N. Y.

A Sample of Hydroleine will be sent free upon application, to any physician (enclosing business card) in the U. S.

POSITIVE MEDICATION

WITH POSITIVE AND DECIDED RESULTS, BY THE EMPLOYMENT OF THE

Viburnum Compound of Dr. Hayden

IN

Female Disorders

AND ALL SPASMODIC AFFECTIONS OF BOTH SEXES

TWENTY-TWO YEARS before the profession, without accident or complaint. Absolutely safe and free from all NARCOTICS or poisons—prompt and reliable in its action with no unpleasant sequelæ.

THE VIBURNUM COMPOUND of Dr. Hayden is employed in the leading hospitals and remedial institutions and by the most eminent physicians and gynæcologists with marked success.

We have the testimonials of

FIVE THOUSAND PHYSICIANS

testifying to the great merits of the VIBURNUM COMPOUND of Dr. Hayden—more than were ever given before for any special remedy in the world. Dispensed by all reliable Apothecaries, put up in 4 oz., 10 oz., and 16 oz. bottles.

For formula, report of cases, treatment, special directions, and much other interesting matter, and the written testimonials of

ONE THOUSAND PHYSICIANS

send your address for our eighty-page ILLUSTRATIVE HANDBOOK, FREE.

The New York Pharmaceutical Company

BEDFORD SPRINGS, MASS.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality	in Boston,	25 60	per 1000.
"	of Women in Boston,	29,00	" "
"	in **Murdock's Free Surgical Hospital,**	**5.00**	" "
"	New York,	26.32	" "
"	Philadelphia,	20.00	" "
"	Chicago,	20 90	" "
"	St. Louis,	20 49	" "

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

Murdock Liquid Food Co., Boston.

Champagne ANALYZED

Of Interest to all Medical Practitioners.

WHAT IS SAID BY

THOMAS KING CHAMBERS, M.D., F.R.C.P.
R. OGDEN DOREMUS, M.D.
F. W. PAVY, M.D., F.R.S.

"Champagne, with a minimum of alcohol, is by far the wholesomest, and possesses remarkable exhilarating power."—THOMAS KING CHAMBERS, M.D., F.R.C.P.

"Having occasion to investigate the question of wholesome beverages, I have made a chemical analysis of the most prominent brands of Champagne. I find G. H. Mumm & Co.'s Extra Dry to contain, in a marked degree, less alcohol than the others I therefore most cordially commend it not only for its purity but as the most wholesome of the Champagnes."—R. OGDEN DOREMUS, M.D., *Professor of Chemistry, Bellevue Hospital Medical College, New York.*

"Champagne, while only possessing the alcoholic strength of natural wines, is useful for exciting the flagging powers in case of exhaustion"—F. W. PAVY, M.D., F.R.S., *Lecturer on Physiology at Guy's Hospital, London.*

The remarkable vintage of 1884 of **G. H. MUMM & CO.'S EXTRA DRY CHAMPAGNE,** the finest for a number of years, is now imported into this market, and pronounced by connoisseurs unsurpassed for excellence and bouquet.

FRED'K DE BARY & CO., New York,

THIRD EDITION.

ACCIDENTS AND EMERGENCIES

By CHARLES W. DULLES, M.D.

"This is the third edition, with revisions and enlargements, of an excellent manual, the practical qualities of which have been proved many times. It is a work that ought to be in every home, and every home that has a copy kept where it can be consulted at short notice is likely to find it worth many times its small cost."—*Philadelphia Evening Telegraph*, May 5, 1888.

"The illustrations are good and sufficiently numerous. The language is simple, being entirely devoid of technicalities, and the methods of treatment recommended are trustworthy and reliable. The manual is one of the best of this class of books and should be in the library of every householder, ready for reference at a moment's notice."—*Science*, May 18, 1888.

LEGS and ARMS with RUBBER FEET and HANDS

(MARKS' PATENTS.)

Indorsed by the United States Government, the Industrial Exhibition Commissioners of New York, Philadelphia, Atlanta, New Orleans, etc., the eminent surgeons in the country, the press, and over 9,000 men, women, and children who wear them, residing in all parts of the world.

The Rubber Foot and Hand possess the most natural appearance, the greatest durability and comfort of all artificial limbs. Vast numbers of mutilated men and women are, by the use of rubber feet and hands, enabled to mingle with the rest of the world without betraying their loss or experience great inconvenience. Farmers, mechanics, professionals, and even athletes, who have lost one or more of their limbs, are enabled to resume their vocations by the use of these remarkable inventions.

MR. A. A. MARKS: ITHACA, TOMPKINS CO., N.Y., Jan. 15, 1888.

DEAR SIR: Rubber feet are the wonders of the world. I have challenged every maker in the world to produce a man that has a pair of artificial feet to walk with me. I can walk a mile in thirteen minutes, and not hurry myself any. I do not take a back seat for any unprofessional with two good natural feet, in a one mile walk. I have the pleasure of announcing that my record in walking professionally is unequaled in the world by any one with artificial legs. THOMAS CLEARY.

By a copyright formula, furnished by us on request, applicants can supply us with all the data necessary to secure fit and satisfactory results, while they remain at home. One-half the legs and arms furnished by us are made from measurements and profiles, without our seeing the wearer. This new method is a great convenience for those living at a distance. Fit always guaranteed.

A treatise of 400 pages, and nearly 200 illustrations, and nearly a thousand endorsements and testimonals, sent to those needing artificial legs or arms, who will give a description of their case. The same will be sent to physicians and surgeons free of charge. Address,

A. A. MARKS, 701 Broadway, New York City.

LONGMANS, GREEN & CO.'S
NEW MEDICAL BOOKS.

Lectures to Practitioners.

On the Diseases of the Kidney.

Amenable to Surgical Treatment. Copiously illustrated by Cases, Statistics, and Preparations. By DAVID NEWMAN, M.D., Surgeon to the Western Infirmary (Out-door Department); Lecturer on Pathology at the Royal Glasgow Infirmary, etc. 8vo. $5 50.

"The work fills a very important place in surgical literature. In fact, we know of none where the diseases of the kidneys are diagnosed so intelligently, and the pathological changes given so clearly."—*Medical Times.*

15 EAST SIXTEENTH ST., NEW YORK.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University, and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 < {}^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on pplication.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to eac pill.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

Sole Agents for the United States for the above Preparations.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872, 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William St., New York,

Sole Agents for the above Preparations.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality in Boston,	. . . . .	25.60	per 1000.

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

Murdock Liquid Food Co., Boston.

PENN MUTUAL LIFE INSURANCE CO.

OF PHILADELPHIA.

University of Pennsylvania

MEDICAL DEPARTMENT

The 123d ANNUAL WINTER SESSION will begin Monday, Oct. 1st, at 12 M., and continue 7 months.

The PRELIMINARY SESSION begins Monday, September 17th, the SPRING TERM Monday, May 6th, 1889.

The Curriculum is graded, and three annual Winter Sessions are required. Practical instruction, including laboratory-work in Chemistry, Histology, Osteology, and Pathology, with Bedside Instruction in Medicine, Surgery, and Gynæcology are a part of the regular course and without additional expense.

For catalogue and announcement containing particulars, apply to DR. JAMES TYSON, Sec'y,
36th and Woodland Ave., Phila.

Western Pennsylvania Medical College,

City of Pittsburgh.

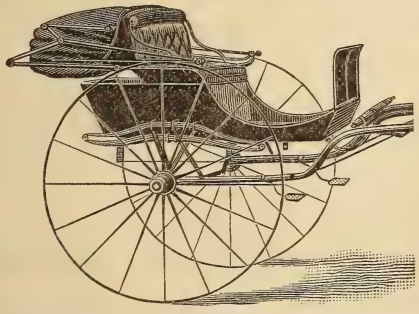
The *Regular Session* begins on the last Tuesday of September and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation.

A three years' graded course is also provided. The *Spring Session* embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects: this session begins the Second Tuesday in April and continues ten weeks.

The laboratories are open during the collegiate year for instruction in Chemistry, Microscopy, practical demonstrations in Medical and Surgical Pathology, and lessons in Normal Histology.

Special importance attaches to the superior clinical advantages possessed by this college. For particulars, see annual announcements and catalogue, for which address the Secretary, Prof. W. J. ASDALE, 2107 Penn. Avenue, Pittsburgh.

J.P. CALLAN'S HAMMOCK-SPRING



Best Two-Wheeled Vehicle-Spring in the World. Send two-cent stamp for Catalogue. Address J. P. CALLAN, Aurora, Ill.

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S, and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY'S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures.

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

For further particulars, and for College Circular, apply to
H. O. WALKER, M.D., Secretary,
33 Lafayette Ave., Detroit, Mich.

STUDENTS' MICROSCOPES $38.00 TO $46.00 COMPLETE.

ILLUSTRATED CATALOGUE ON APPLICATION.

EFFERVESCENT SPECIALTIES

WM. R. WARNER & CO.'S

TRIPLE
(Effervescent)
BROMIDES

Advantages:—Useful in Headache, Nervousness, Sleeplessness, Migraine, Diurnal Epilepsy, Etc.

℞ Sodium Brom. grs. 15.
Potassium Brom. grs. 10.
Ammonium Brom. grs. 5.

Administer one teaspoonful in half a glass of water. Drink while effervescing. In Diurnal Epilepsy take a dessertspoonful three times daily until sense of taste is partly destroyed; after this reduce the frequency of dose, but keep the fauces in a benumbed condition.

WM. R. WARNER & CO.'S

CHALYBEATE
(Effervescent)
SALINE
(Ferric Saline Effervescens, Dr. Means)

℞ 1 gr. Citro-tartrate of Iron and 20 grs. of Soda.

DOSE.—A heaping teaspoonful of the salt, containing 1 gr. Citro-tartrate of Iron and 20 grs. of Soda, to be taken in a glass two-thirds full of water and drunk while effervescing. If a more decided effect is desired, warm instead of cold water may be used. In all cases this draught should be taken but once or twice a day, and then on an empty stomach, preferably before breakfast. No restrictions as to diet. One or two Pil. Digestiva (W. & Co.) may be taken at noon, before eating, as a dinner pill.

WM. R. WARNER & CO.'S

(ANTIPYRINE ET SODIUM SALICYLATE)
ANTALGIC
(Effervescent)
SALINE

℞ Antipyrine, 4 grs. Salicylate of Soda, 4 grs.
In each dessertspoonful.

DOSE.—One dessertspoonful, to be repeated as often as the case may require. Almost a specific in Neuralgic Headache. Prescribed in all cases where Antipyrine is used, with more better and more certain results.

WM. R. WARNER & CO.'S

APERIENT
(Effervescent)
SALINE

A pleasant and excellent aperient and refrigerant, very acceptable to the stomach. Given in all cases indicating the need of an active aperient, and to be given daily to all patients under treatment with Dosimetric therapeutics. (See Wm. R. Warner & Co.'s Dosimetric Granules.)

DOSE.—One tablespoonful in half a glass of water.

PREPARATIONS SUPPLIED BY ALL LEADING DRUGGISTS.

☞Samples of the above Salts furnished upon request.

The Curd of Cow's Milk
Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

Doliber-Goodale Co., Boston, Mass.

19 Regent Street, London, S. W.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "**Hunyadi**" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

An Important Communication
TO PHYSICIANS.

Thirteen years have now elapsed since the introduction of SCOTT'S EMULSION of PURE NORWEGIAN COD LIVER OIL with HYPOPHOSPHITES of LIME and SODA, since which time its growth and development have been very large, not only in this country but in South America, Great Britain and a large part of Continental Europe, and it has, in a very large degree, supplanted the Plain Cod Liver Oil. Its success is largely due to the happy combination of all its components, making a perfect chemical union, that will not separate for years, which we believe is not true of any other Cod Liver Oil preparation.

The innumerable reports from Physicians, of the brilliant results obtained justifies the statement that in almost every case where Cod Liver Oil is indicated, Scott's Emulsion is infinitely superior.

Physicians who have never tried this Emulsion, or who have been induced to try something else in its stead, will do us the favor to send for sample, and we know they will always use it in preference to plain Cod Liver Oil or any other preparation.

We also call your attention to the following preparations:

CHERRY-MALT PHOSPHITES.

A combination of the tonic principles of Prunus Virginiana, Malted Barley, Hypophosphites of Lime and Soda, and Fruit Juices. An elegant and efficient brain and nerve tonic.

BUCKTHORN CORDIAL (Rhamnus Frangula.)

Prepared from carefully selected German Buckthorn Bark, Juglans Bark, and Aromatics. The undoubted remedy for Habitual Constipation.

Be sure and send for samples of the above—delivered free.

SCOTT & BOWNE, 132 South Fifth Ave., New York.

CALIFORNIA VINTAGE CO.
21 PARK PLACE. N.Y.

Geo Hamlin Prest. Chas Roome Parmele Treas.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully,

L. WOLFF, M.D.,
Demonstrator of Chemistry, Jefferson Medical College.

Physician in Charge, Dr. CHARLES MEIGS WILSON

The new Hospital building situated in the centre of the city, has accommodation for twenty patients and ten private rooms. Each private room has a special nurse, electric-bells, open fire-place, and meals privately served. Pay patients may enter the Hospital at any time previous to their confinement. The hygienic arrangements and sewage of the Hospital are perfect. Ample protection is provided against fire. A limited number of free and pay beds are reserved in an isolated portion of the building for Gynaecological cases.

Two courses of instruction in practical obstetrics and in practical gynaecology are given each year commencing in April and in October. Free patients only are used for purposes of clinical demonstration.

For particulars as to the admission of patients, or the courses of instruction in obstetrics and gynaecology, apply to DR. CHARLES MEIGS WILSON, Physician in Charge, by letter or in person, at the Charity, S. W. Cor. 11th and Cherry Sts. Phila., daily at 12 o'clock noon.

ANTISEPTIC DRAINAGE TUBES.—Glass.

These Tubes have large holes, one-half inch apart, arranged alternately on opposite sides.

They are carefully finished, especial care being taken to make them smooth.

In addition to the drainage-holes, each tube has at one end two smaller holes for the insertion of Safety-Pin, through which it is prevented slipping into the wound.

SPORTING AND ATHLETIC GOODS OF EVERY DESCRIPTION.

THERE IS A PEPSIN

WHICH IS UNIFORMLY ACTIVE, PERMANENT, AND RELIABLE,

IT IS "FAIRCHILD'S."

This Pepsin will not spoil, will not become soft and sticky in the vial, even if left long uncorked.

Fairchild's Pepsin will not "gum up" if dispensed in powders, plain, or with the drugs usually combined with pepsin.

Fairchild's is not a partial peptone, and has none of the well-known characteristics of peptone.

Fairchild's is the pioneer pepsin, it showed the way. It "got there" early.

Its activity has never been exaggerated.

All this time, whilst other manufacturers were still offering the high-dilution saccharated and amylated article, Fairchild's Pepsin was steadily making its way on its merit. Now, no one ventures to ask a hearing for these *placebo-pepsins.*

When physicians now prescribe "pepsin" they mean pepsin—not milk sugar, and pepsin.

All these years, Fairchild's Pepsin was always and everywhere found to do just what was claimed for it—in spite of the attitude, genuine or assumed, which held that all "claims" about pepsin must be taken with a liberal discount.

Every *bona fide* test demonstrated its reliability.

We have never found it necessary to explain or excuse any deficiency or inaction as due to "deteriorated" specimens.

Fairchild's will not disappoint the prescriber under any condition proper for pepsin.

WITH SUCH A RECORD Fairchild's Pepsin is a good one to stand by

FAIRCHILD BROS. & FOSTER,

82 and 84 Fulton St., New York.

7 Snow Hill Buildings, London, E. C.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

ST. LOUIS, MO.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea. suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month: thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

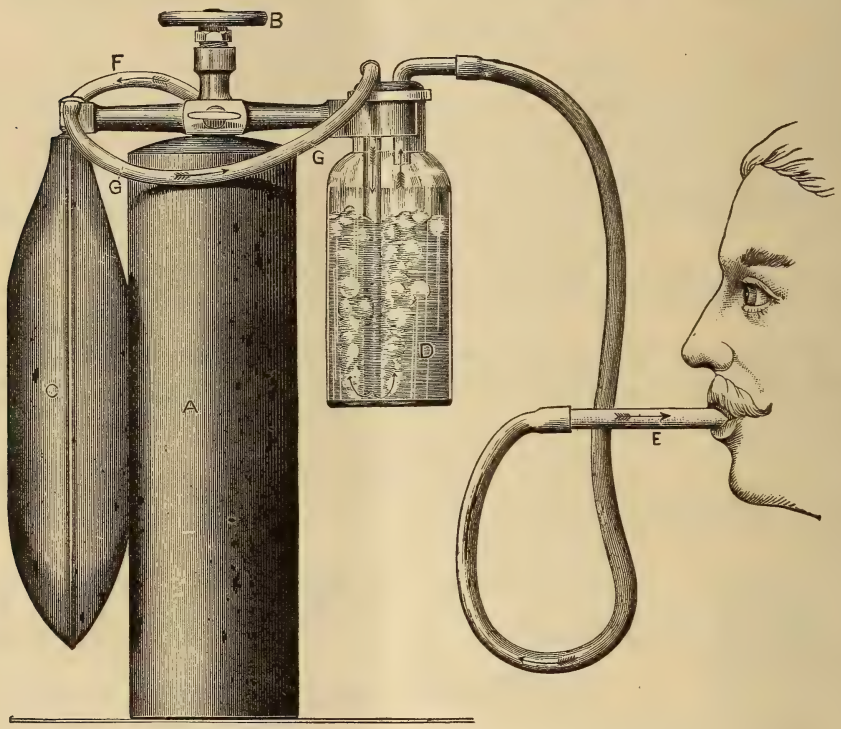
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or mixure of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

BUFFALO LITHIA WATER

IN THE

Uric Acid Diathesis, Bright's Disease of the Kidneys, Chronic Inflammation of the Bladder, &c.

Dr. THOMAS H. BUCKLER, of Paris (formerly of Baltimore), SUGGESTER OF LITHIA as a Solvent for URIC ACID.

"Nothing I could say would add to the **WELL-KNOWN REPUTATION OF THE BUFFALO LITHIA WATER. I HAVE FREQUENTLY USED IT WITH GOOD RESULTS IN URIC ACID DIATHESIS, RHEUMATISM AND GOUT,** and with this object I have ordered it to Europe from Coleman & Rogers, of Baltimore. Lithia is in no form so valuable as where it exists in the Carbonate (the form in which it is found in the **BUFFALO LITHIA WATER**), Nature's mode of solution and division in water which has passed through Lepedolite and Spondumine Mineral formation."

Dr. WM. A. HAMMOND, of New York, Surgeon-General U. S. Army (Retired), Professor of Diseases of the Mind and Nervous System in the University of New York, &c.

"I have for some time made use of the Buffalo Lithia Water in cases of affections of the **NERVOUS SYSTEM,** complicated with **BRIGHT'S DISEASE OF THE KIDNEYS** or with a **GOUTY DIATHESIS.** The results have been eminently satisfactory. Lithia has for many years been a favorite remedy with me in like cases, but the **BUFFALO WATER CERTAINLY ACTS BETTER THAN ANY EXTEMPORANEOUS SOLUTION OF THE LITHIA SALTS,** and is, moreover, better borne by the Stomach. I also often prescribe it in those cases of **CEREBRAL HYPERÆMIA** resulting from over-mental work—in which the condition called **NERVOUS DYSPEPSIA EXISTS**—and generally with marked benefit."

HUNTER McGUIRE, M.D., LL.D., Late Professor of Surgery, Medical College of Virginia, Richmond.

"**BUFFALO LITHIA WATER,** *Spring No. 2,* as an **ALKALINE DIURETIC,** *is invaluable.* In **URIC ACID GRAVEL,** *and, indeed,* in *diseases generally dependent* upon a **URIC ACID DIATHESIS,** *it is a remedy of extraordinary potency.* I have prescribed it in cases of **RHEUMATIC GOUT,** *which had resisted the ordinary remedies, with wonderful good results.* I have *used it also in my own case, being a great sufferer from this malady, and have derived more benefit from it than from any other remedy.*"

Dr. ROBERT BATTEY, of Georgia, SUGGESTER OF BATTEY'S OPERATION.

"I would state that I have been using the Buffalo Lithia Water, No. 2, in my practice for three years past, in cases of **CHRONIC INFLAMMATION** of the **BLADDER,** whether induced by **STONE,** by enlarged **PROSTATE** in the aged, or by **NEGLECTED GONORRHŒA, AND HAVE SECURED EXCELLENT RESULTS,** which encourages me to prescribe it for the future."

Dr. CYRUS EDSON, of New York,
Chief Inspector of Cutaneous Diseases in Health Department and President of the Board of Pharmacy.

"I have frequently made use of **BUFFALO LITHIA WATER,** Spring No. 2, in my practice, *with excellent results.* It is a potent remedy in correcting **RHEUMATIC DIATHESIS.** In a case of **URIC ACID GRAVEL,** in which I recently prescribed it, **ITS BENEFICIAL EFFECTS WERE APPARENT AFTER THE THIRD DOSE.** I have also prescribed it with great benefit in **BRIGHT'S DISEASE OF THE KIDNEYS.**"

Water in Cases of one dozen half-gallon Bottles, Five Dollars per Case, at the Springs.

THOMAS F. GOODE,

PROPRIETOR,

BUFFALO LITHIA SPRINGS,

VIRGINIA.

COMPRESSED TABLETS.

WE ask the attention of Physicians to the annexed list of recent additions of Compressed Tablets, as we think all of them are well deserving the careful attention of practitioners. We would be pleased to send to any physician, circular matter, compiled with great care and accuracy, giving therapeutic value and results in a concise form, that we are confident will be of interest, and possibly of advantage, to medical men who have not yet had access to the foreign and home authorities from which we have culled the information we give.

Acid Boracic, ... 5 grs.
Acetanilide, ... 3 and 5 "
Antifebrin, ... 3 " 5 "
Antipyrine, ... 3, 5 " 10 "
Blaud's
Ferri. Sulph. Exsic., 2 grs., Potass. Carb., 1 4-5 grs., Sacch. Alb., 1⅔ grs.
Iodol. . . . . ½, 1, 2, 3, and 5 grs.
Manganese Binoxide, ... 1 " 2 "
Opium, Camphor and Carb. Ammon., Opium Denarcot. ½ gr., Camphor, 2 grs., Ammon. Carb., 2½ grs.
Quinia Tannate, and Chocolate 1 grain, Quiniæ Tannat. 1 gr., Ext. Cacao, 9 grs.
Quinia Tannate and Chocolate, 2½ grs., Quiniæ Tannat. 2½ grs., Ext. Cacao, 7½ grs.
Salol, ... 2½ and 5 grs.
Sodium Succinate, ... 2 " 5 "
Thalline Sulphate, ... 2, 3 " 5 "
Trinitrin (Nitro-Glycerin), 1-20, 1-25, 1-33, 1-50, 1-100, and 1-200 gr.
Terpin Hydrate, ... 2, 3 and 5 grs

ANTISEPTIC TABLETS.

7.7 Hydrarg. Chlor. Corros., 7.3 Ammonium Chloride.

More than six months since, we sent a circular to the drug trade, stating that we had discontinued the manufacture of the Antiseptic Tablets introduced by us several years since at the suggestion of Dr. Charles Meigs Wilson, of this city. We have, however, received so many letters from physicians urging us to resume the manufacture, insisting that the Tablets prepared by us dissolved more readily and were more satisfactory than any substitute they had been able to procure, that we feel we could not ignore such persistent demands from our medical friends who have found our tablets an absolute necessity. We have therefore concluded to again prepare them, in a building entirely separate from our main establishment, with appliances and admirably devised protection by means of improved respirators, that will completely overcome any harmful effects to those engaged in their manufacture.

Druggists and physicians will be glad to learn that the Tablets as now prepared are perfectly white and free from the coloring-matter that we formerly added. This was done to lessen the danger of their being taken, or used in mistake; to guard against any such possibility, each Tablet, as now made, has the word "POISON" stamped upon it.

JOHN WYETH & BROTHER,

CHEMISTS, PHILADELPHIA.

Carnrick's Soluble Food

Is the nearest approach to Human Milk that has thus far been produced.

During the past season a large number of Physicians and eminent Chemists visited our Laboratory at Goshen, N. Y., and witnessed every detail connected with the production of Carnrick's Soluble Food. This invitation to witness our process is continuously open to Physicians and Chemists. All expenses from New York to Goshen and return will be paid by us. The care used in gathering the milk, its sterilization, and the cleanliness exercised in every step, cannot be excelled.

Pancrobilin.

Prepared (in both Liquid and Pill form) from Extract of Pancreas and Bile.

This preparation is designed expressly to increase the digestion and absorption of fats.

We believe that the fat-digesting properties of pancreatine and bile are inseparable, and that without their union in the intestinal tract but little, if any, fat would be digested and absorbed.

PANCROBILIN will be found of great service in *Phthisis and other wasting diseases, Nervous Prostration, Constipation, Inanition, Malnutrition, Intestinal Indigestion,* and wherever there is a failure to assimilate fats.

If the skin is first wet with LIQUID PANCROBILIN, the inunction of oils will be greatly facilitated.

LIQUID PANCROBILIN is put up in pound bottles.

PILL PANCROBILIN is put up in bottles holding 100 pills. The coating of the pills will resist acid digestion when given as directed, but will be quickly dissolved in the alkaline secretions of the duodenum.

Phospho-Caffein Comp.

(*Granular Effervescing.*)

Formula for each dessertspoonful:—

Caffein.
Acidi Phosphorici, ää, gr. ss.
Antipyrin.
Ext. Apii Grav. dulc. (*Celery*), *ää gr. i.*
Sodii Bromidi, gr. v.

The satisfactory results produced by PHOSPHO-CAFFEIN COMP. in *Headaches, Neuralgia, Insomnia, Neurasthenia, and general Nervous Irritability,* are not due to the effect of any one ingredient, but to the happy effect of the combination. A thorough series of comparative tests have demonstrated the superiority of the above formula over any other in the market.

REED & CARNRICK, New York.

BUFFALO LITHIA WATER

IN THE TREATMENT OF CHRONIC GASTRIC CATARRH

CLINICAL REPORTS.

CHRONIC GASTRIC CATARRH AND URIC ACID CALCULI.

A case stated by Dr. JNO. C. COLEMAN, of Scottsburg, Va., a retired Surgeon of the U. S. Navy.

"Mr. C. was for a number of years a sufferer from **CHRONIC GASTRIC CATARRH.** While his diet *was exclusively* **TEA** and **CRACKERS, BREAD** and **MILK,** *and other similar articles,* it was frequently thrown off in an undigested state soon after taking it, and at times he discharged from an empty stomach a strongly acid glairy mucus. A marked **URIC ACID DIATHESIS** supervened, consequent upon which he suffered for a period of some two years great **VESICAL IRRITATION** and possible **CYSTITIS,** attended by pain so intense and constantly present, as to require that he should be kept for the most part under the influence of opiates. After a persistent, but ineffectual exhibition of all remedies supposed to be indicated in the case, he was put for the latter affection upon the **BUFFALO LITHIA WATER,** Spring No. 2, with the happiest possible effect.

"In a few weeks, after commencing the use of it, the irritable condition of the *Bladder* was so far relieved that he was enabled to dispense entirely with the use of opiates. At the expiration of some eight weeks he had an attack of unusual severity, from which he was relieved by the discharge of a **CALCULUS,** followed at short intervals by the discharge of three others, which proved to be the termination of this trouble, as from that time there was entire subsidence of the painful symptoms described, and the *Bladder* resumed its natural state.

"While prescribed with special reference to the relief of the *Irritable Bladder,* the action of the water was not less surprisingly happy in the **GASTRIC AFFECTION,** with remarkable promptness correcting the highly acid condition of the **STOMACH,** restoring a healthy digestion and assimilation, and *tone* and *vigor* to the depressed *Nervous System.*

"In a few months he was able to eat, with perfect impunity, the coarsest articles of diet. He is now, after a lapse of several years, in robust health, having had no return of these painful maladies."

CHRONIC GASTRIC CATARRH.

Case of JOHN P. KEELING, Esq., stated by Dr. S. S. KEELING, Norfolk, Va., Member Medical Society of Virginia.

"Mr. John P. Keeling labored under **CHRONIC DYSPEPSIA,** and was always subject to attacks of *Spasmodic Gastralgia* immediately upon taking food into the stomach, which attacks were not at all amenable to treatment. Not unfrequently the stomach *rejected everything in the way of food and drink,* and he was of necessity confined to the lightest possible articles of diet, *meat and vegetables being entirely excluded.* He became so prostrated that it was with difficulty he could walk across his chamber floor, and had often to be lifted about. Such was the state of his **NERVOUS SYSTEM** *that great solicitude was felt as to his mental condition.*

"He visited Baltimore for medical aid, and was for many months under the treatment of some of the most eminent men of the profession in that city, but without beneficial result, and was finally advised that he had nothing to hope from remedies.

"Returning in an extremely critical condition to his home in the county of Princess Anne, he came under my professional care. Satisfied that medicine was unavailing in the case, I advised the **BUFFALO LITHIA WATER,** Spring No. 2. His stomach, however, was in a highly irritable condition, and I found it necessary to administer it in very small quantities; and it was at first given not exceeding an ounce at a dose, repeated at stated intervals. At the expiration of the third day the irritability of the stomach was decidedly less, and the quantity was then increased from day to day until the thirteenth day, when I found that the patient could take twelve ounces, which I regard as maximum dose at any time. Persisting in its use, on the twenty-eighth day he was free from pain, the stomach in a normal condition readily receiving both solids and liquids in moderate quantities, strength greatly increased, and nervous symptoms entirely relieved. At the expiration of the seventh week he was able to attend actively and regularly to his business on the farm. His recovery, which I regard as one of the most remarkable I ever knew of, I attribute entirely to the **BUFFALO LITHIA WATER."**

GASTRO-INTESTINAL CATARRH.

Case of Mrs. Dr. F. J. GREGORY, of Virginia, reported by F. J. GREGORY, M.D., Keysville, Va.

"For eighteen months my wife, aged forty-one years, was a sufferer from a **GASTRO-INTESTINAL CATARRH,** which resisted my best-directed efforts at relief. The taking of the smallest quantity of the most easily-digested food on the stomach would produce an attack of *nausea and vomiting, the severity of which is seldom witnessed,* and when the stomach was free of food she would have attacks of *Gastralgia of the most excruciating nature.* She also suffered from habitual constipation, and at times with hemorrhages from the bowels. I pursued the usual line of treatment, such as simple bitters, Dilute Hydrocyanic Acid, Bismuth, etc., and called to my help two of the most skilled physicians in Southside Virginia, who supplemented my treatment with some of the newer drugs, such as **EFFERVESCING BICARB. POTASS. LACTOPEPTINE, CARLSBAD MINERAL SALTS,** etc., but with no benefit, and so her condition went on from bad to worse *until death seemed almost imminent from inanition.* I then put her on a milk diet with a glass of **BUFFALO LITHIA WATER,** Spring No. 2, every hour or so during the day, and *after the use of the first bottle improvement was marked, and before a case of it was used I regarded her cure as complete.* It has been nearly two years since, and there has been only one slight recurrence, which was a few days since, and it readily disappeared on the use of the water for a few days."

Water in cases of one dozen half-gallon bottles, $5 per case, at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University, and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 <^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on pplication.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to eac pill.

W. H. SCHIEFFELIN & CO.,

SOLE LICENSEES AND SOLE AGENTS FOR THE UNITED STATES.

An Important Communication
TO PHYSICIANS.

Thirteen years have now elapsed since the introduction of SCOTT'S EMULSION of PURE NORWEGIAN COD LIVER OIL with HYPOPHOSPHITES of LIME and SODA, since which time its growth and development have been very large, not only in this country but in South America, Great Britain and a large part of Continental Europe, and it has, in a very large degree, supplanted the Plain Cod Liver Oil. Its success is largely due to the happy combination of all its components, making a perfect chemical union, that will not separate for years, which we believe is not true of any other Cod Liver Oil preparation.

The innumerable reports from Physicians, of the brilliant results obtained justifies the statement that in almost every case where Cod Liver Oil is indicated, Scott's Emulsion is infinitely superior.

Physicians who have never tried this Emulsion, or who have been induced to try something else in its stead, will do us the favor to send for sample, and we know they will always use it in preference to plain Cod Liver Oil or any other preparation.

We also call your attention to the following preparations:

CHERRY-MALT PHOSPHITES.

A combination of the tonic principles of Prunus Virginiana, Malted Barley, Hypophosphites of Lime and Soda, and Fruit Juices. An elegant and efficient brain and nerve tonic.

BUCKTHORN CORDIAL (Rhamnus Frangula.)

Prepared from carefully selected German Buckthorn Bark, Juglans Bark, and Aromatics. The undoubted remedy for Habitual Constipation.

Be sure and send for samples of the above—delivered free.

SCOTT & BOWNE, 132 South Fifth Ave., New York.

CALIFORNIA VINTAGE CO.

Geo Hamlin Prest. Chas Roome Parmele Treas.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully,

L. WOLFF, M.D.,
Demonstrator of Chemistry, Jefferson Medical College.

Doctors Should Prescribe

Lactated Food when their little patients are poorly nourished. Its base is sugar of milk, it contains no cane sugar or starch, is easily assimilated, and possesses the highest value in nutrients.

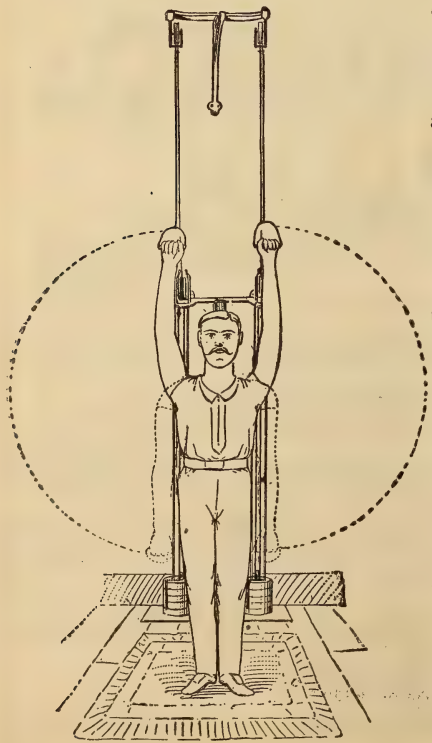
Lactated Food

is prescribed by many physicians whenever an easily digested and strengthening food is indicated. The great variety of palatable ways in which it may be prepared makes it especially valuable in convalescence. Eminent practitioners term it the food *par excellence*

For Infants and Invalids.

A regular size package of Lactated Food, and an interesting pamphlet, "The Nutrition of Infants and Invalids," will be sent, charges paid, to any Physician. Correspondence solicited.

WELLS, RICHARDSON & CO., Burlington, Vt.



THE Medical Profession are cordially invited to visit our GYMNASIUM SHOWROOM containing over FIVE THOUSAND DOLLARS worth of apparatus for the advancement of physical culture.

Our O. K. Machine No. 2

Price, $10. Sent by Express to any part of the United States or Canada. No charge for casing.

Is endorsed by all Physicians who have seen it. It will develop any and every muscle of the body.

ADAPTED TO OLD AND YOUNG, MALE AND FEMALE.

We will mail our Manual of Physical Culture, together with complete catalogue, free, on application.

SPECIAL DISCOUNT TO THE PROFESSION.

SPORTING AND ATHLETIC GOODS OF EVERY DESCRIPTION.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

ST. LOUIS, MO.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

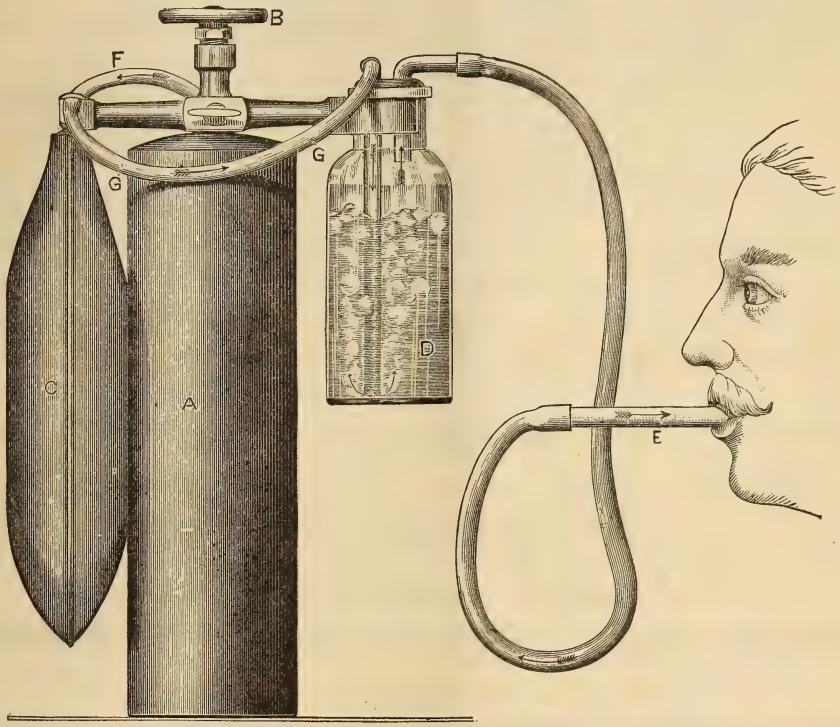
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or mixure of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

ONE THOUSAND PHYSICIANS

send your address for our eighty-page ILLUSTRATIVE HANDBOOK, FREE.

The New York Pharmaceutical Company
BEDFORD SPRINGS, MASS.

McARTHUR'S SYRUP.

(SYR : HYPOPHOS : COMP : C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION**, sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

Mention this Journal. McARTHUR HYPOPHOSPHITE CO., BOSTON, MASS.

Spring Diet.

A Nutritious Diet for Infants during the Winter and Spring months has a very important bearing on the ability of the little ones to withstand the strain of the heated term during the ensuing summer.

Nestlé's Milk Food is noted for its nourishing properties, producing firm flesh, hard bone, and tough muscle. Prepared with water only, it is both nutritious and economical, and requires the addition of no foreign element to render it digestible, as in the case of a recent attempt to imitate Nestlé's Food. Every prominent writer on infant diets awards Nestlé's Food the first place. Each new compound put on the market in the last few years has either aimed at *imitating* Nestlé's Food or *attacking* it thereby testifying to its superiority.

DR. WILLIAM A. HAMMOND'S SANITARIUM

—FOR—

DISEASES OF THE NERVOUS SYSTEM,

WASHINGTON, D. C.

DR. WILLIAM A. HAMMOND announces to the medical profession that he has returned from New York to Washington, D. C., where he has established, in a building especially erected for the purpose, a *Sanitarium* for the treatment of mild and curable cases of mental derangement, diseases of the nervous system generally, cases of the morphia and chloral habits, and such other affections as may properly be treated by the remedial agencies under his control. His experience during many years has convinced him that most diseases embraced within the above-named classes can be managed much more successfully in an institution of this kind, under the constant supervision of the physician and with the aid of means not otherwise at command, than when the patients are seen by their medical advisers at intervals of several hours or days.

The *Sanitarium*, which has been constructed under the superintendence of A. B. Mullett, Esq., late architect of the United States Treasury department, and is situated on Columbia Heights, at the corner of Fourteenth Street and Sheridan Avenue. The position is the highest in the immediate vicinity of Washington, the soil is dry, and all the surroundings are free from noxious influences. It is readily reached by the Fourteenth Street Railway, the cars of which run to the doors. The building is very large, and as perfect in structure and arrangements as is possible from a knowledge of sanitary science and of the requirements of such an institution. It accommodates about thirty patients. So far as the rooms, table, etc., are concerned, they are equal to such as exist in the best hotels of our large cities. Electricity in all its forms; baths, douches, massage, inhalations, nursing, etc., are provided as may be required by patients, in addition to such other medical treatment as may be deemed advisable.

A large *Solarium* for sun-baths and exercise in cold or inclement weather and heated with steam in winter, is constructed on the top of the main building.

Each patient is thoroughly examined by Dr. Hammond and receives his daily personal attention, while Dr. E. L. Tompkins, a physician of ample hospital experience and of tried executive ability, resides in the institution and has, under Dr. Hammond, the immediate superintendence.

The *Sanitarium* is now opened for the reception of patients.

For further information Dr. Hammond can be addressed at The Sanitarium, Fourteenth Street and Sheridan Avenue, Washington, D. C.

PHILADELPHIA LYING-IN CHARITY.

South West corner of 11th and Cherry Sts. Phila. Pa.

CONSULTING OBSTETRICIANS

Dr. ELLWOOD WILSON **Dr. THEOPHILUS PARVIN** **Dr. WILLIAM H. PARISH**

CONSULTING SURGEONS

Dr. D. HAYES AGNEW **Dr. SAMUEL W. GROSS** **Dr. JOHN B. ROBERTS**

***Physician in Charge,* Dr. CHARLES MEIGS WILSON**

The new Hospital building situated in the centre of the city, has accommodation for twenty patients and ten private rooms. Each private room has a special nurse, electric-bells, open fire-place, and meals privately served. Pay patients may enter the Hospital at any time previous to their confinement. The hygienic arrangements and sewage of the Hospital are perfect. Ample protection is provided against fire. A limited number of free and pay beds are reserved in an isolated portion of the building for Gynaecological cases.

Two courses of instruction in practical obstetrics and in practical gynaecology are given each year commencing in April and in October. Free patients only are used for purposes of clinical demonstration.

For particulars as to the admission of patients, or the courses of instruction in obstetrics and gynaecology, apply to DR. CHARLES MEIGS WILSON, Physician in Charge, by letter or in person, at the Charity, S. W. Cor. 11th and Cherry Sts. Phila., daily at 12 o'clock noon.

For more than four years the Perfection Douche has been subjected to the severest practical tests, by experienced gynaecologist in every part of this country, no objection, in a single instance, having been made to the principles upon which it is constructed.

It provides ample and comfortable support, with a slight elevation of either the shoulders or hips, furnishes means for the prolonged application of a sufficiently large amount of hot water, and completely conveys away all the drip without risk of wetting the clothing. No other apparatus for applying hot water in the treatment of uterine and pelvic diseases combines as many desirable and practical qualities. COMFORT, CONVENIENCE, DURABILITY, AND THOROUGHNESS OF APPLICATION are its main points of excellence.

Descriptive circulars, prices, and testimonials are furnished on application. These afford satisfactory evidence of unqualified endorsement of its superior advantages, and show the high appreciation in which the instrument is held by those who have repeatedly recommended and tested its work.

Applications for the Douche or for circulars or testimonials may be made to agents, or to "THE PERFECTION DOUCHE," BOX 7, ALBANY, N. Y.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality in Boston,	25.60	per	1000.
" of Women in Boston,	29,00	"	"
" in **Murdock's Free Surgical Hospital,**	**5.00**	"	"
" New York,	26.32	"	"
" Philadelphia,	20.00	"	"
" Chicago,	20 90	"	"
" St. Louis,	20.49	"	"

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

Murdock Liquid Food Co., Boston.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

"Aconitine produces marvelous effects in the treatment "of *facial neuralgias* when they are not symptomatic of "intracranial tumor."—*Society of Biology of Paris, Meeting* "*of the 28th February, 1880.*

Dose—Take 3 to 6 pills during the twenty-four hours.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 1872 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William St., New York,

Sole Agents for the above Preparations.

PHYSICIANS' LEDGER

Think how much time you spend every year over your accounts, and what a bother it is to make out your bills!

Now, one of the great merits of

The Model Ledger

is that it enables a physician to make out his bills with great ease. Beside this, it tells at a glance just how much he has earned in any quarter; how much he has received; and how much is still due him. These are all good things for a doctor to know.

Address, MEDICAL AND SURGICAL REPORTER,
P. O. Box 843. PHILADELPHIA.

The only prominent Emulsion of Cod-Liver Oil introduced directly to the medical profession. It is advertised exclusively in medical journals.

HYDROLEINE.

(HYDRATED OIL.)

Produces rapid increase in Flesh and Strength.

FORMULA.—Each Dose contains:

Pure Cod Liver Oil	30 m. (drops)	Soda	1-3 Grains
Distilled Water	35 "	Salicylic Acid	1-4 "
Soluble Pancreatin	5 Grains.	Hyocholic Acid	1-20 "

Recommended and Prescribed by EMINENT PHYSICIANS Everywhere. It is pleasant to the Taste and acceptable to the most delicate Stomach.

IT IS ECONOMICAL IN USE AND CERTAIN IN RESULTS.

HYDROLEINE (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhuæ, but a hydro-pancreated preparation, containing acids and a small percentage of soda. Pancreatin is the digestive principle of fatty foods, and in the soluble form here used, readily converts the oleaginous material into assimilable matter, a change so necessary to the reparative process in all wasting diseases.

The following are some of the diseases in which HYDROLEINE is indicated:

Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis, General Debility, etc.

TO BRAIN WORKERS of all classes, **HYDROLEINE** is invaluable, supplying as it does, the true brain-food, and being more easily assimilated by the digestive organs than any other emulsion.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," and "Consumption and Wasting Diseases," by two distinguished London physicians, which will be sent free on application.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE UNITED STATES. 115 FULTON STREET, N. Y.

A Sample of Hydroleine will be sent free upon application, to any physician (enclosing business card) in the U. S.

The Curd of Cow's Milk Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

WHOLESALE AND RETAIL WAREROOMS

1104 CHESTNUT STREET. 1106

Nearly a hundred years ago Count Rumford, one of the ablest scientists the world has ever produced, penned these remarkable words:

"I am astonished that the custom of wearing flannel next to the skin should not prevail more universally. I am confident it would prevent a multitude of diseases; and I know of no greater luxury than the comfortable sensation which arises from wearing it, especially after one is a little accustomed to it."

Dr. Jaeger's experiments upon the same subject have more than comfirmed all this; for they have not only demonstrated the great superiority of wool, but also the absolute unfitness of cotton and linen for the clothing of the human body and that there is no one prophylactic equal to properly graded, woven and constructed woolen underwear.

The soft, smooth, elastic "stockinet" fabrics used in the Jaeger system, especially in the underwear, silence all objection on the score of weight, coarseness, thickness, and irritating qualities. They are not "medicated" nor rendered dangerous by noxious dyes. The soft, gray colors are produced by the intermixture of the natural white and dark wools.

All garments are guaranteed to be made of absolutely pure wool and they comprise every article of clothing for both sexes and all ages.

Illustrated catalogue with price list and samples free.

SCRIBNER & SULZER,

1104 CHESTNUT ST. 1106

FELLOWS'
HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The essential elements** to the Animal Organization—Potash and Lime.

The **Oxydizing Agents**—Iron and Manganese;

The **Tonics**—Quinine and Strychnine,

And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

Circulars sent to Physicians on Application.

FOR SALE BY ALL DRUGGISTS.

ARTIFICIAL LEGS AND ARMS
WITH
RUBBER FEET AND HANDS.

Although a man may meet with the misfortune of having both his legs severed from his body, he is not necessarily helpless. By having artificial legs applied, with rubber feet attached, he can be restored to his usefulness.

Fig. 2 is from an instantaneous photograph of a man ascending a ladder; he has two artificial legs substituting his natural ones, which were crushed by a railroad accident and amputated.

Fig. 1 exposes his stumps. With his rubber feet he can ascend or descend a ladder, balance himself on the rungs, and have his hands at liberty. He can walk and mingle with persons without betraying his loss; in fact, he is restored to his former self for all practical purposes.

FIG. 1.

With the old methods of complicated ankle-joints these results could not be so thoroughly attained.

Over nine thousand in practical use, scattered in all parts of the world. Many of these have been supplied without presenting themselves to us, simply by sending measurements on a copyright formula which any one can easily fill out. The press, eminent surgeons, and competent judges in many parts of the world have commended the rubber foot and hand for their remarkable advantages.

Awarded the highest prizes at every competitive exhibition.

Endorsed and purchased by the U. S. Government for pensioners of the army and navy.

A treatise of 400 pages and copyright formula, *sent free.*

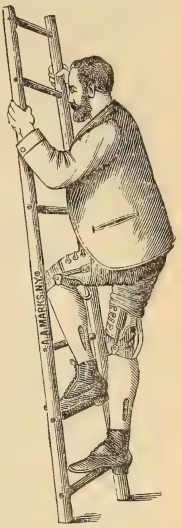

FIG. 2.

A. A. MARKS,

701 BROADWAY, NEW YORK CITY.

Doctors Should Prescribe

Lactated Food when their little patients are poorly nourished. Its base is sugar of milk, it contains no cane sugar or starch, is easily assimilated, and possesses the highest value in nutrients.

Lactated Food

is prescribed by many physicians whenever an easily digested and strengthening food is indicated. The great variety of palatable ways in which it may be prepared makes it especially valuable in convalescence. Eminent practitioners term it the food *par excellence*

For Infants and Invalids.

A regular size package of Lactated Food, and an interesting pamphlet, "The Nutrition of Infants and Invalids," will be sent, charges paid, to any Physician. Correspondence solicited.

WELLS, RICHARDSON & CO., Burlington, Vt.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University, and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 <^{O.C_2H_5}_{NH\,(CO—CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on pplication.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and our grains to eac pill.

W. H. SCHIEFFELIN & CO.,

170 & 172 WILLIAMS STREET, NEW YORK,

SOLE LICENSEES AND SOLE AGENTS FOR THE UNITED STATES.

SUCCUS ALTERANS

(McDADE.)

SUCCUS ALTERANS is a purely vegetable compound of the preserved juices of Stillingia Sylvatica Lappa Minor, Phytolacca Decandra, Smilax Sarsaparilla, and Xanthoxylum Carolinianum, as collected by Dr. Geo. W. McDade, exclusively for Eli Lilly & Co., and endorsed by Dr. J. Marion Sims.

SUCCUS ALTERANS continues to gain favor from its remarkable Alterative and Tonic properties, *eliminating specific poison from the blood* and *increasing the proportion of red corpuscles in anæmic patients* to a wonderful degree; is endorsed by the medical profession, and in use by many hospitals of note.

SUCCUS ALTERANS in venereal and cutaneous diseases is fast supplanting Mercury, the Iodides, and Arsenic; and is a certain remedy for Mercurialization, Iodism, and the dreadful effects often following the use of Arsenic in skin diseases.

SUCCUS ALTERANS is also strongly recommended for its Tonic and Alterative effects in myriad forms of scrofulous disease, and in all cases where anæmia is a factor. Such patients rapidly develop a good appetite, sleep soundly, and gain flesh rapidly. Many cases are on record where patients increased ten to twenty-five pounds in weight in a few weeks.

SUCCUS ALTERANS is giving satisfactory results in treatment of *Chronic Rheumatism*, and can be used with confidence.

SUCCUS ALTERANS may be given for any length of time, without injury to the patient.

SUCCUS ALTERANS is put up in pint round amber bottles, and ***never in bulk.***

PHYSICIANS who have not received Dr. McDade's latest publication, the Monographia Syphilitica, should send their address, mentioning this journal, and we will mail a copy. It contains a paper, illustrated with colored plates, by Dr. D. H. Goodwillie, of New York, on the "Sequelæ of Syphilis," reports of cases in practice, and many other valuable papers.

ELIXIR PURGANS.

Elixir Purgans (Lilly) reliably stimulates the dormant liver without undue irritation, and has gentle yet positive effect upon the alimentary tract. In Habitual Constipation, so common in Women and Children, it will be found particularly useful. Its endorsement at Bellevue and many other prominent hospitals East and West, as well as its employment in general practice by the most eminent medical men, confirms the experience of years in its use.

Each Teaspoonful Represents	
Rhamnus Purshiana, -	10 grs.
Euonymus Atropur., - -	8 grs.
Cassia Acutifolia (Purif.)	10 grs.
Iris Versicolor, - - -	4 grs.
Hyoscyamus Niger, -	2 grs.
Aromatics, etc.	

IN PRESCRIBING, PLEASE BE CAREFUL TO WRITE

ELIXIR PURGANS (LILLY),

THAT OTHER PREPARATIONS MAY NOT BE SUBSTITUTED.

HIGHLY RECOMMENDED.

We take pleasure in endorsing the Elixir Purgans (Lilly) as prepared from the above formula, for in it we find a near approach to positive *perfection* in the form of a *Liquid Cathartic*, and, from our experience with the preparation, can highly recommend it to the profession.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William St., New York,

Sole Agents for the above Preparations.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality in Boston,	. . . . .	25.60	per 1000.
" of Women in Boston,	. . . . .	29,00	" "
" in **Murdock's Free Surgical Hospital,**	.	**5.00**	" "
" New York,	. . . . .	26.32	" "
" Philadelphia,	. . . . .	20.00	" "
" Chicago,	. . . . .	20 90	" "
" St. Louis,	. . . . .	20.49	" "

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

Physician in Charge, Dr. CHARLES MEIGS WILSON

The new Hospital building situated in the centre of the city, has accommodation for twenty patients and ten private rooms. Each private room has a special nurse, electric-bells, open fire-place, and meals privately served. Pay patients may enter the Hospital at any time previous to their confinement. The hygienic arrangements and sewage of the Hospital are perfect. Ample protection is provided against fire. A limited number of free and pay beds are reserved in an isolated portion of the building for Gynaecological cases.

Two courses of instruction in practical obstetrics and in practical gynaecology are given each year commencing in April and in October. Free patients only are used for purposes of clinical demonstration.

For particulars as to the admission of patients, or the courses of instruction in obstetrics and gynaecology, apply to DR. CHARLES MEIGS WILSON, Physician in Charge, by letter or in person, at the Charity, S. W. Cor. 11th and Cherry Sts. Phila., daily at 12 o'clock noon.

University of Pennsylvania

MEDICAL DEPARTMENT

The 123d ANNUAL WINTER SESSION will begin Monday, Oct. 1st, at 12 M., and continue 7 months.

The PRELIMINARY SESSION begins Monday, September 17th, the SPRING TERM Monday, May 6th, 1889.

The Curriculum is graded, and three annual Winter Sessions are required. Practical instruction, including laboratory-work in Chemistry, Histology, Osteology, and Pathology, with Bedside Instruction in Medicine, Surgery, and Gynæcology are a part of the regular course and without additional expense.

For catalogue and announcement containing particulars, apply to DR. JAMES TYSON, Sec'y,
36th and Woodland Ave., Phila.

Western Pennsylvania Medical College,

City of Pittsburgh.

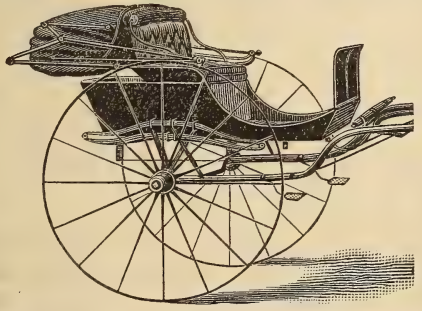
The *Regular Session* begins on the last Tuesday of September and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation.

A three years' graded course is also provided. The *Spring Session* embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects: this session begins the Second Tuesday in April and continues ten weeks.

The laboratories are open during the collegiate year for instruction in Chemistry, Microscopy, practical demonstrations in Medical and Surgical Pathology, and lessons in Normal Histology.

Special importance attaches to the superior clinical advantages possessed by this college. For particulars, see annual announcements and catalogue, for which address the Secretary, Prof. W. J. ASDALE, 2107 Penn. Avenue, Pittsburgh.

J.P. CALLAN'S HAMMOCK-SPRING



Best Two-Wheeled Vehicle-Spring in the World. Send two-cent stamp for Catalogue. Address J. P. CALLAN, Aurora, Ill.

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S, and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY'S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures.

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

PRICE REDUCED.

True Salicylic Acid.

CRYSTALLIZED FROM
WINTERGREEN OIL.—ITS NATURAL SOURCE.

DR. P. W. LATHAM, Downing Professor of Medicine at Cambridge (England), lecturing on the treatment of gout and rheumatism at the Royal College of Physicians, says:

"The true Salicylic Acid obtained from the vegetable kingdom must alone be employed. If you have to give large doses, avoid giving the artificial product obtained from carbolic acid, however much it may have been dialyzed and purified. Give the acid without any alkali or base," etc.

A reprint of this exceedingly valuable paper will be sent on application.

A DESIDERATUM—not always appreciated.

The quality of medicines used in the prescription is as important a factor in the cure of disease as a correct diagnosis; and a physician violates no code, either of ethics or morals, in demanding of his druggist that which he knows to be reliable, instead of leaving to the latter to decide whose preparations he shall or shall not use.

GENUINE BLAUD'S PILLS.

These pills, which have been inserted in the new French Pharmacopœia, have been employed with the greatest success for more than fifty years by most French and foreign physicians, to cure anemia, chlorosis, and all chlorotic affections in which iron is indicated.

Here is the opinion of men most eminent in medical science who have employed them:

"For thirty-five years, in which I have practised medicine, I have recognized the incontestable advantages of BLAUD'S PILLS over all other ferruginous preparations, and I regard them as the best anti-chlorotic."—DR. DOUBLE, *Ex-President of the Academy of Medicine.*

"Of all the ferruginous preparations, which have given good results in the treatment of chlorotic affections, BLAUD'S PILLS appear to us to deserve to hold the first rank."—*Dictionnaire universel de médecine*, Vol. II, p. 99.

These pills, prepared according to the genuine formule of the originator, by his nephew, Aug. Blaud, Pharmacist of the Faculty of Paris, are sold only in bottles of 200 pills and half bottles of 100 pills, at a cost of 5 and 3 francs ($1.00, and seventy-five cents), and never in smaller quantities. *See that his name is stamped on each pill.* **PARIS, 8 RUE PAYENNE, and at every Pharmacy.** (Beware of imitations.)

ANTISEPTIC DRAINAGE TUBES.—Glass.

These Tubes have large holes, one-half inch apart, arranged alternately on opposite sides.

They are carefully finished, especial care being taken to make them smooth.

In addition to the drainage-holes, each tube has at one end two smaller holes for the insertion of Safety-Pin, through which it is prevented slipping into the wound.

FURNISHED IN SEVEN SIZES.

No. 1,	$1.25 per doz.	No. 4,	$1.55 per doz.
No. 2,	1.25 "	No. 5,	1.70 "
No. 3,	1.40 "	No. 6,	1.90 "

No. 7, $2.10 per dozen.

RAW CAT-GUT. I put this up in coils of 10 feet, four difierent sizes, Nos. 1, 2, 3, 4 (4 is thickest). Nos. 2 and 3 are the most useful sizes. **No. 1 Coil, 10 Cents; No. 2 Coil, 12 Cents; No. 3 Coil, 14 Cents; No. 4 Coil, 16 Cents.** Full directions with each coil for making it absolutely aseptic.

WILLIAM SNOWDEN,

The Curd of Cow's Milk Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

Doliber-Goodale Co., Boston, Mass.

THERE IS A PEPSIN

WHICH IS UNIFORMLY ACTIVE, PERMANENT, AND RELIABLE,

IT IS "FAIRCHILD'S."

This Pepsin will not spoil, will not become soft and sticky in the vial, even if left long uncorked.

Fairchild's Pepsin will not "gum up" if dispensed in powders, plain, or with the drugs usually combined with pepsin.

Fairchild's is not a partial peptone, and has none of the well-known characteristics of peptone.

Fairchild's is the pioneer pepsin, it showed the way. It "got there" early.

Its activity has never been exaggerated.

All this time, whilst other manufacturers were still offering the high-dilution saccharated and amylated article, Fairchild's Pepsin was steadily making its way on its merit. Now, no one ventures to ask a hearing for these *placebo-pepsins.*

When physicians now prescribe "pepsin" they mean pepsin—not milk sugar, and pepsin.

All these years, Fairchild's Pepsin was always and everywhere found to do just what was claimed for it—in spite of the attitude, genuine or assumed, which held that all "claims" about pepsin must be taken with a liberal discount.

Every *bona fide* test demonstrated its reliability.

We have never found it necessary to explain or excuse any deficiency or inaction as due to "deteriorated" specimens.

Fairchild's will not disappoint the prescriber under any condition proper for pepsin.

WITH SUCH A RECORD Fairchild's Pepsin is a good one to stand by

FAIRCHILD BROS. & FOSTER,
82 and 84 Fulton St., New York.
7 Snow Hill Buildings, London, E. C.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea. suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month: thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

LONDON, 16 Coleman St. CALCUTTA, 9 & 10 Dalhousie Square. PARIS, 5 Rue de la Paix. MONTREAL, 374 St. Paul St.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

Platt's Chlorides

THE HOUSEHOLD DISINFECTANT

Platt's Chlorides is an odorless, colorless, saturated solution of those chloride salts which have proven most reliable and acceptable as deodorants, disinfectants, and antiseptics; is at once clean, powerful and stainless (contains no mercury), and is especially designed for the hygienic uses of the physician and the practical domestic uses of the housekeeper. It destroys the vitality of bacteria or disease-producing germs, while it is not dangerous or disagreeable, the least possible labor is involved in its use, and it is supplied at very slight cost.

It is sold in quart bottles by druggists everywhere, price 50 cents. But as this concentrated liquid admits of dilution, according to the directions on each bottle, with from four to twelve times its bulk of water, each quart bottle really represents about three gallons of disinfectant strong enough for general uses.

From the fact that so many thousands of physicians indorse the preparation and have found it an article of more than ordinary value and usefulness, we believe that in every sick-room, whether the disease be contagious or not, the use of this odorless disinfectant is of every-day utility and sanitary assistance, and does prove an aid and blessing to the patient, and a comfort and protection to the attendants.

To any physician who for any reason may be still unfamiliar with the practical value of Platt's Chlorides a sample will be sent, by express, prepaid, on request.

Address, giving both Post and Express Offices.

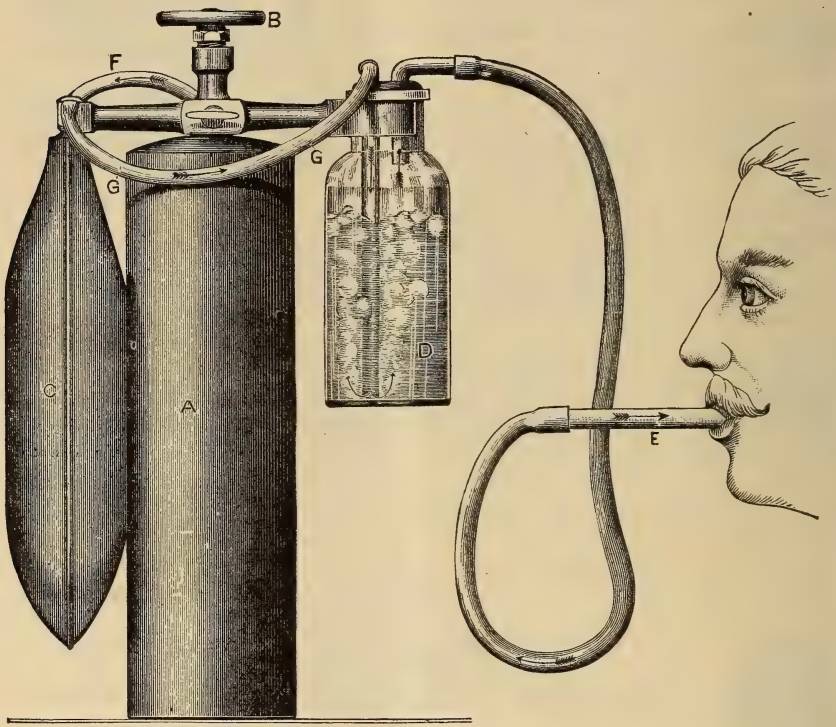
HENRY B. PLATT,

36 Platt St., New York.

INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or mixure of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

BUFFALO LITHIA WATER

IN THE TREATMENT OF

ALBUMINURIA, WHETHER OF BRIGHT'S DISEASE, PREGNANCY, OR SCARLET FEVER.

Dr. WM. B. TOWLES, Professor of Anatomy and Materia Medica in the Medical Department of the University of Virginia.

"BUFFALO LITHIA WATER, No. 2, belongs to the ALKALINE or, *perhaps, to the* ALKALINE-SALINE Class, *for it has proved far more efficacious in many diseased conditions than any of the simple* ALKALINE *waters.*

. . . . . .

"*Its effects are marked in causing a disappearance of* ALBUMEN *from the Urine.* In a single case of BRIGHT'S DISEASE OF THE KIDNEYS I witnessed *decided beneficial results from its use, and from its action in this case I should have great confidence in it as a remedy in certain stages of the disease.*"

Dr. GRAEME M. HAMMOND, of New York, Professor of Diseases of the Mind and Nervous System in the New York Post-Graduate Medical School and Hospital.

"In *all* cases of BRIGHT'S DISEASE of the KIDNEYS I have found BUFFALO LITHIA WATER *of the greatest service in increasing the quantity of urine and in eliminating the* ALBUMEN."

Dr. GEORGE W. MILTENBERGER, Professor of Obstetrics, University of Maryland,

Before the Medical and Chirurgical Faculty of the State of Maryland, recommended BUFFALO LITHIA WATER as an ALKALINE Diuretic in ALBUMINURIA of PREGNANCY.—See *Trans. Faculty of State of Maryland*, 1886.

Dr. WM. H. DOUGHTY, Professor of Materia Medica and Therapeutics, Medical College of Georgia; Member of American Medical Association, etc.

"Over the NAUSEA AND VOMITING OF PREGNANCY, PARTICULARLY IN THE LATTER MONTHS, WHERE URÆMIC CONDITIONS are possibly established, and in PUERPERAL CONVULSIONS, URÆMIA CO-EXISTING, BUFFALO LITHIA WATER often exerts *marked control.*"

Dr. CALEB WINSLOW, 23 McCulloh Street, Baltimore, Member of the Medical and Chirurgical Faculty of Maryland.

"I have found the BUFFALO LITHIA WATER, Spring No. 2, of marked service in relieving the *Nausea of Pregnant Women.* I frequently resort to it at intervals *during the whole course of Pregnancy.* Being *antacid, laxative, diuretic, and tonic, it seems well adapted to relieve the disturbances usually attendant upon Gestation, and I have no doubt its free use might remove* URÆMIC POISON, *and prevent Convulsions produced thereby.*"

Dr. JOS. HOLT, New Orleans, President Board of Health, State of Louisiana.

"I have prescribed BUFFALO LITHIA WATER freely in affections of the *Kidneys* and *Urinary* passages, particularly in GOUTY *subjects*, in ALBUMINURIA, and in irritable conditions of the *Bladder* and *Urethra* in *females.* The results have been such as to satisfy me *of the extraordinary value of this Water in a large class of cases usually most difficult to treat.*"

Dr. JAMES B. McCAW, Professor of the Practice of Medicine in the Virginia Medical College.

[Extract from the Proceedings of the Richmond Academy of Medicine, October 15, 1878.]

"Dr. McCaw also spoke of the great value of BUFFALO LITHIA WATER in ALBUMINURIA of *Scarlet Fever* and in ALBUMINURIA of *Pregnant Women.*"

Dr. J. T. DAVIDSON, New Orleans, La., ex-President New Orleans Surgical and Medical Association.

"I have for several years prescribed BUFFALO LITHIA WATER, Spring No. 2, in all cases of *Scarlet Fever*, directing it to be drunk *ad libitum, with the effect of relieving all traces of* ALBUMEN *in the urine*, and have found it equally efficacious in renal diseases requiring the use of alkaline water."

Dr. G. W. SEMPLE, Hampton, Va., President Medical Society of Virginia.

"In SCARLET FEVER I have known BUFFALO LITHIA WATER *restore a healthy and abundant secretion of Urine, when it was highly charged with* ALBUMEN *and the secretion almost suppressed.*"

Dr. MARTIN L. JAMES, of Richmond, Va., Professor of Materia Medica and Therapeutics, Medical Society of Virginia.

[Proceedings of the Richmond, Virginia, Academy of Medicine, December 16, 1880.]

"The President of the Academy, Dr. M. L. James, reported a case of *Congestion* of the *Kidneys* in a lady eight months advanced in *Pregnancy, attended by marked Œdema*, both over the extremities and surface, and by URÆMIC POISONING *to such an extent as very seriously impaired the vision of the patient*, relieved by the free use of this Water for three weeks.

"Other remedies, he stated, were used in these cases, *but the favorable results seemed clearly attributable to the action of the Water.*"

Dr. HARVEY L. BYRD, of Baltimore, President and Professor of Obstetrics and Diseases of Women and Children in the Baltimore Medical College, formerly Professor of Practical Medicine, etc.

"I have prescribed BUFFALO LITHIA WATER with the most satisfactory results, both as a *remedy* and *prophylactic* in the *Parturient* or *Pregnant Puerperal Eclampsia* or *Convulsions; and I may say that I know of no remedy of equal efficacy with the Water of Spring No. 2 in Sequelæ of Scarlatina.*

"It has an *ascertained value* in BRIGHT'S DISEASE. *A knowledge of its action in that disease thus far would seem* to warrant the belief that it would, in many instances, *at least in its early stages, arrest it entirely, and in its more advanced stage prove a decided comfort and palliative.*

Water in cases of one dozen half-gallon bottles, $5.00 per case at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

DR. JAEGER'S
SANITARY WOOLEN SYSTEM CO.

——OF PHILADELPHIA.——

WHOLESALE AND RETAIL WAREROOMS

1104 CHESTNUT STREET. 1106

Nearly a hundred years ago Count Rumford, one of the ablest scientists the world has ever produced, penned these remarkable words:

"I am astonished that the custom of wearing flannel next to the skin should not prevail more universally. I am confident it would prevent a multitude of diseases; and I know of no greater luxury than the comfortable sensation which arises from wearing it, especially after one is a little accustomed to it."

Dr. Jaeger's experiments upon the same subject have more than comfirmed all this; for they have not only demonstrated the great superiority of wool, but also the absolute unfitness of cotton and linen for the clothing of the human body and that there is no one prophylactic equal to properly graded, woven and constructed woolen underwear.

The soft, smooth, elastic "stockinet" fabrics used in the Jaeger system, especially in the underwear, silence all objection on the score of weight, coarseness, thickness, and irritating qualities. They are not "medicated" nor rendered dangerous by noxious dyes. The soft, gray colors are produced by the intermixture of the natural white and dark wools.

All garments are guaranteed to be made of absolutely pure wool and they comprise every article of clothing for both sexes and all ages.

MEDICAL AND SURGICAL REPORTER,
P O. Box 843. PHILADELPHIA.

CALIFORNIA VINTAGE CO.

21 PARK PLACE. N.Y.

Geo Hamlin Prest. Chas Roome Parmele Treas.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully,

L. WOLFF, M.D.,
Demonstrator of Chemistry, Jefferson Medical College.

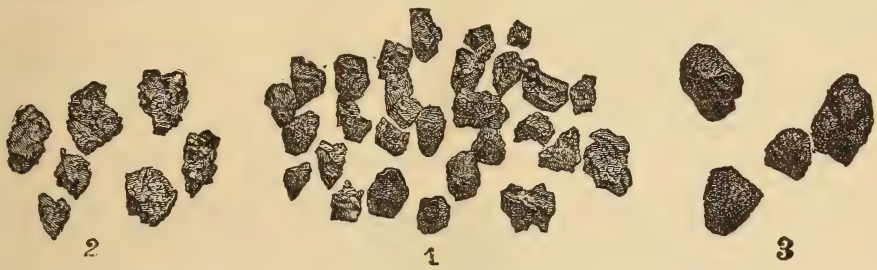
Buffalo Lithia Water

In the TREATMENT OF URINARY DEPOSIT.

Case of Dr. B. J. WEISTLING, of Middleton, Pa., stated by himself.

"Experience in its use in **STONE in the BLADDER** in my own person enables me to attest the efficacy of the **BUFFALO LITHIA WATER** in this painful malady. After having been long subjected to sufferings, the intensity of which cannot be described, I have, under the influence of this Water, passed an ounce of **CALCULI (URIC ACID)**, some of which weighed as much as four grains, affording inexpressible relief and leaving me in a condition of comparative ease and comfort.

"On one occasion I passed thirty-five **CALCULI** in forty-eight hours. The appearance of these **CALCULOUS NUCLEI** indicates unmistakably, I think, that they were all *component particles of one large* **CALCULUS** *destroyed by the action of the Water, by means of solution and disintegration.* At my advanced period of life (I am seventy-seven years and six months of age), and in my feeble general health, a surgical operation was not to be thought of, and the Water seems to have accomplished all that such an operation, if successful, could have done."



[The above plate is from a photograph, and represents the exact size and shape of some of the Calculi passed by Dr. Weistling. They were preserved by his son, Dr. J. Weir Weistling.]

Case stated by Dr. G. HALSTED BOYLAND, late Professor of Surgery, Baltimore Medical College, Member American Medical Association.

"The case of Mr. C., which came under my observation as Resident Physician at the Springs during the season of 1884, affords undoubted evidence that Buffalo Lithia Water is a **SOLVENT** *for Urinary Deposit*, commonly known as **STONE in the BLADDER.** He was operated upon for **STONE**, the operation affording but partial and temporary relief. A year afterward he visited the **BUFFALO LITHIA SPRINGS**, at the same time passing small quantities of a *Urinary Deposit*, of the **TRIPLE PHOSPHATE of AMMONIA** and **MAGNESIA VARIETY**, and his sufferings such as required that he should be kept constantly under the influence of opiates. In some eight weeks the solvent properties of the Water *were evident in the diminished consistency of the deposit, the increased quantity discharged, and by its change from Concrete Lumps to fine Sand,* which he discharged to the amount of *Four Ounces.* After a time, however, the quantity gradually diminished, and finally ceased, and he left the Springs *with the deposit dissolved* and *washed out of the system*, and the *Diathesis fons et origi morbi* altered. There had been a disappearance of the attending distressing symptoms, and great improvement in his general condition."

Dr. MARTIN L. JAMES, of Richmond, Va., Professor of Materia Medica and Therapeutics, Medical Society of Virginia.

[Proceedings of the Richmond, Virginia, Academy of Medicine. December 16, 1880.]

"The President of the Academy, Dr. M. L. James, reported three cases of marked **URIC ACID DIATHESIS** successfully treated by the Water of Spring No. 2 of the **BUFFALO LITHIA SPRINGS** of Virginia. In one of these patients there were, as a result of this Diathesis, **SANDY DEPOSITS** in the *Urine, Inflammation of the Kidneys, Irritability of the Bladder, and Hæmaturia*, and, finally, the passage of a **CALCULUS** of the size of a cherry, formed on a blood-clot as a nucleus. In another case there were frequent attacks of **NEPHRITIC COLIC**, attended by **SANDY DEPOSITIONS** in the urine. After the free use of this Water in these cases, no further manifestations of the disorder occurred."

Dr. HENRY M. WILSON, of Baltimore, ex-President Medical and Chirurgical Faculty of Maryland.

"My experience in the use of the **BUFFALO LITHIA WATER** has not been large, *but it is of such a positive character that I do not hesitate to express my preference for it, as a* **DIURETIC** in **URINARY CALCULI**, *over all other waters that I have ever used.*"

Water in cases of one dozen half-gallon bottles, $5 per case, at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University, and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 \begin{matrix} O.C_2H_5 \\ NH(CO-CH_3) \end{matrix}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on pplication.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and our grains to eac pill.

A Peerless Chemico-Physiological Food and Restorative

Crystalline Phosphate

A TISSUE FOOD

PHOSPHATIC FOOD PRODUCTS TRADE MARK

Contains all essential inorganic components of the tissues in a semi-solid, easily soluble, crystalline mass,

COMPOSED OF

ACID PHOSPHATE OF CALCIUM.

WITH

Acid Phosphate of Magnesium,
" " " Iron,
" " " Sodium,
" " " Potassium,
Chloride of Potassium,
" " Sodium
Sulphate of Potassium,
and Phosphoric acid.

INDICATIONS:

STOMACH DISORDERS, such as Indigestion, Flatulence Gastric Catarrh, and Poor Appetite, Constipation, etc.

WRONGS OF NUTRITION, as in Scrofula, Rickets, Caries, Marasmus, Delayed Union of Fractures, Necrosis of Tissue, Difficult or Delayed Dentition and Development, etc.

NERVOUS AND GENERAL DEBILITY AND SLEEPLESSNESS, as from Sexual Excess, Venerial Disease, Childbearing, Nursing, Loss of Blood or other fluids, Menstrual and other Diseases of Women, abuse of Alcohol, Tobacco and Narcotics, Protracted Illness, etc.

DEBILITY AND DYSPEPSIA.—*Your preparation of* **Crystalline Phosphate,** *have found to be very excellent in cases of Debility from Nerve Exhaustion. It is a good auxilliary in Gastric and Dyspeptic Troubles, and from my experience I regard it as a reliable preparation.* T. GRISWOLD COMSTOCK, A. M., M. D., PH. D., ST. LOUIS, MO.

Geo Hamlin Prest. Chas Roome Parmele Treas.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully,

L. WOLFF, M.D.,
Demonstrator of Chemistry, Jefferson Medical College.

23291 DOCTORS

As far as we can ascertain from their letters and our agents' reports, prescribe Lactated Food. Those who once see its effects prescribe it wherever an easily assimilated and highly nutritious food is indicated, for either infants or invalids.

USE LACTATED FOOD

For it contains neither cane sugar nor starch; its base is sugar of milk; it is a cooked, pre-digested, non-irritating food. The great variety of palatable ways in which it may be prepared renders it specially valuable in convalescence.

SEND FOR FREE SAMPLE

If you are yet unacquainted with the merits of Lactated Food. We will forward, charges paid, on request, with interesting literature.

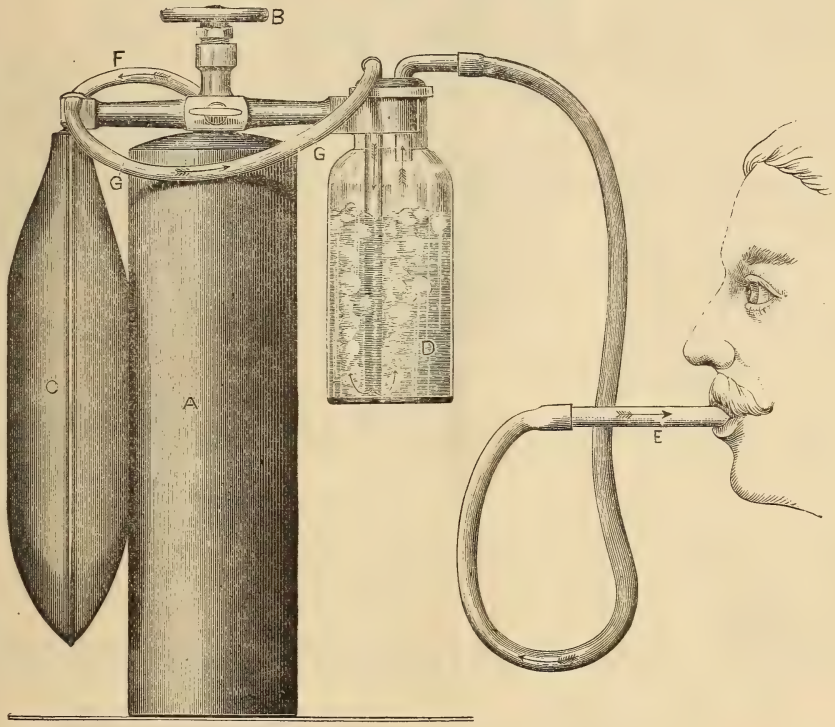
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or mixure of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

The New York Pharmaceutical Company
BEDFORD SPRINGS, MASS.

McARTHUR'S SYRUP.

(SYR: HYPOPHOS: COMP: C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION,** sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality in Boston,	. . . . .	25.60	per 1000.
" of Women in Boston,	. . . . .	29,00	" "
" in **Murdock's Free Surgical Hospital,**	.	**5.00**	" "
" New York,	. . . . .	26.32	" "
" Philadelphia,	. . . . .	20.00	" "
" Chicago,	. . . . .	20 90	" "
" St. Louis,	. . . . .	20.49	" "

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

Murdock Liquid Food Co., Boston.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

DR. JAEGER'S
SANITARY WOOLEN SYSTEM CO.

——OF PHILADELPHIA.——

WHOLESALE AND RETAIL WAREROOMS

1104 CHESTNUT STREET. 1106

Nearly a hundred years ago Count Rumford, one of the ablest scientists the world has ever produced, penned these remarkable words:

"I am astonished that the custom of wearing flannel next to the skin should not prevail more universally. I am confident it would prevent a multitude of diseases; and I know of no greater luxury than the comfortable sensation which arises from wearing it, especially after one is a little accustomed to it."

Dr. Jaeger's experiments upon the same subject have more than comfirmed all this; for they have not only demonstrated the great superiority of wool, but also the absolute unfitness of cotton and linen for the clothing of the human body and that there is no one prophylactic equal to properly graded, woven and constructed woolen underwear.

The soft, smooth, elastic "stockinet" fabrics used in the Jaeger system, especially in the underwear, silence all objection on the score of weight, coarseness, thickness, and irritating qualities. They are not "medicated" nor rendered dangerous by noxious dyes. The soft, gray colors are produced by the intermixture of the natural white and dark wools.

All garments are guaranteed to be made of absolutely pure wool and they comprise every article of clothing for both sexes and all ages.

Illustrated catalogue with price list and samples free.

Our goods cannot be bought through any other house in Philadelphia.

BEWARE OF IMITATIONS.

SCRIBNER & SULZER,

1104 CHESTNUT ST. 1106

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

RIO CHEMICAL CO., St. Louis, Mo., U. S. A.

LONDON. PARIS. CALCUTTA. MONTREAL.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

Western Pennsylvania Medical College,

City of Pittsburgh.

The *Regular Session* begins on the last Tuesday of September and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation.

A three years' graded course is also provided. The *Spring Session* embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects: this session begins the Second Tuesday in April and continues ten weeks.

The laboratories are open during the collegiate year for instruction in Chemistry, Microscopy, practical demonstrations in Medical and Surgical Pathology, and lessons in Normal Histology.

Special importance attaches to the superior clinical advantages possessed by this college. For particulars, see annual announcements and catalogue, for which address the Secretary, Prof. W. J. ASDALE. 2107 Penn. Avenue, Pittsburgh.

MEDICAL DEPARTMENT

The 123d ANNUAL WINTER SESSION will begin Monday, Oct. 1st, at 12 M., and continue 7 months.

The PRELIMINARY SESSION begins Monday, September 17th, the SPRING TERM Monday, May 6th, 1889.

The Curriculum is graded, and three annual Winter Sessions are required. Practical instruction, including laboratory-work in Chemistry, Histology, Osteology, and Pathology, with Bedside Instruction in Medicine, Surgery, and Gynæcology are a part of the regular course and without additional expense.

For catalogue and announcement containing particulars, apply to DR. JAMES TYSON, Sec'y,
36th and Woodland Ave., Phila.

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S, and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures.

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

For further particulars, and for College Circular, apply to

ANTISEPTIC DRAINAGE TUBES.—Glass.

These Tubes have large holes, one-half inch apart, arranged alternately on opposite sides.
They are carefully finished, especial care being taken to make them smooth.
In addition to the drainage-holes, each tube has at one end two smaller holes for the insertion of Safety-Pin, through which it is prevented slipping into the wound.

FURNISHED IN SEVEN SIZES.

No. 1,	$1.25 per doz.	No. 4,	$1.55 per doz.
No. 2,	1.25 "	No. 5,	1.70 "
No. 3,	1.40 "	No. 6,	1.90 "

No. 7, $2.10 per dozen.

RAW CAT-GUT. I put this up in coils of 10 feet, four different sizes, Nos. 1, 2, 3, 4 (4 is thickest). Nos. 2 and 3 are the most useful sizes. **No. 1 Coil, 10 Cents; No. 2 Coil, 12 Cents; No. 3 Coil, 14 Cents; No. 4 Coil, 16 Cents.** Full directions with each coil for making it absolutely aseptic.

WILLIAM SNOWDEN,
Manufacturer, Importer and Exporter of Surgical Instruments,
No. 7 SOUTH ELEVENTH STREET, PHILADELPHIA.

The only prominent Emulsion of Cod-Liver Oil introduced directly to the medical profession. It is advertised exclusively in medical journals.

HYDROLEINE.

(HYDRATED OIL.)

Produces rapid increase in Flesh and Strength.

FORMULA.—Each Dose contains:			
Pure Cod Liver Oil.....80 m. (drops)	Soda.....1-3 Grains.	Recommended and Prescribed by EMINENT PHYSICIANS Everywhere. It is pleasant to the Taste and acceptable to the most delicate Stomach.
Distilled Water.....35 "	Salicylic Acid.....1-4 "	
Soluble Pancreatin..... 5 Grains.	Hyocholic Acid.....1-90 "	

IT IS ECONOMICAL IN USE AND CERTAIN IN RESULTS.

HYDROLEINE (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhuæ, but a hydro-pancreated preparation, containing acids and a small percentage of soda. Pancreatin is the digestive principle of fatty foods, and in the soluble form here used, readily converts the oleaginous material into assimilable matter, a change so necessary to the reparative process in all wasting diseases.

The following are some of the diseases in which **HYDROLEINE** is indicated:

Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis, General Debility, etc.

TO BRAIN WORKERS of all classes, **HYDROLEINE** is invaluable,-supplying as it does, the true brain-food, and being more easily assimilated by the digestive organs than any other emulsion.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," and "Consumption and Wasting Diseases," by two distinguished London physicians, which will be sent free on application.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE UNITED STATES. 115 FULTON STREET, N. Y.

A Sample of Hydroleine will be sent free upon application, to any physician (enclosing business card) in the U. S.

The Curd of Cow's Milk Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

Doliber-Goodale Co., Boston, Mass.

Carnrick's Soluble Food

Is the nearest approach to Human Milk that has thus far been produced.

During the past season a large number of Physicians and eminent Chemists visited our Laboratory at Goshen, N. Y., and witnessed every detail connected with the production of Carnrick's Soluble Food. This invitation to witness our process is continuously open to Physicians and Chemists. All expenses from New York to Goshen and return will be paid by us. The care used in gathering the milk, its sterilization, and the cleanliness exercised in every step, cannot be excelled.

Pancrobilin.

Prepared (in both Liquid and Pill form) from Extract of Pancreas and Bile.

This preparation is designed expressly to increase the digestion and absorption of fats.

We believe that the fat-digesting properties of pancreatine and bile are inseparable, and that without their union in the intestinal tract but little, if any, fat would be digested and absorbed.

PANCROBILIN will be found of great service in *Phthisis and other wasting diseases, Nervous Prostration, Constipation, Inanition, Malnutrition, Intestinal Indigestion,* and wherever there is a failure to assimilate fats.

If the skin is first wet with LIQUID PANCROBILIN, the inunction of oils will be greatly facilitated.

LIQUID PANCROBILIN is put up in pound bottles.

PILL PANCROBILIN is put up in bottles holding 100 pills. The coating of the pills will resist acid digestion when given as directed, but will be quickly dissolved in the alkaline secretions of the duodenum.

Phospho-Caffein Comp.

(*Granular Effervescing.*)

Formula for each dessertspoonful:—

Caffein.
Acidi Phosphorici, ää, gr. ss.
Antipyrin.
Ext. Apii Grav. dulc. (Celery), ää gr. i.
Sodii Bromidi, gr. v.

The satisfactory results produced by PHOSPHO-CAFFEIN COMP. in *Headaches, Neuralgia, Insomnia, Neurasthenia, and general Nervous Irritability,* are not due to the effect of any one ingredient, but to the happy effect of the combination. A thorough series of comparative tests have demonstrated the superiority of the above formula over any other in the market.

REED & CARNRICK, New York.

Champagne ANALYZED

Of Interest to all Medical Practitioners.

WHAT IS SAID BY

THOMAS KING CHAMBERS, M.D., F.R.C.P.
R. OGDEN DOREMUS, M.D.
F. W. PAVY, M.D., F.R.S.

"Champagne, with a minimum of alcohol, is by far the wholesomest, and possesses remarkable exhilarating power."—THOMAS KING CHAMBERS, M.D., F.R.C.P.

"Having occasion to investigate the question of wholesome beverages, I have made a chemical analysis of the most prominent brands of Champagne. I find G. H. Mumm & Co.'s Extra Dry to contain, in a marked degree, less alcohol than the others I therefore most cordially commend it not only for its purity but as the most wholesome of the Champagnes."—R. OGDEN DOREMUS, M.D., *Professor of Chemistry, Bellevue Hospital Medical College, New York.*

"Champagne, while only possessing the alcoholic strength of natural wines, is useful for exciting the flagging powers in case of exhaustion"—F. W. PAVY, M.D., F.R.S., *Lecturer on Physiology at Guy's Hospital, London.*

The remarkable vintage of 1884 of **C. H. MUMM & CO.'S EXTRA DRY CHAMPAGNE,** the finest for a number of years, is now imported into this market, and pronounced by connoisseurs unsurpassed for excellence and bouquet.

FRED'K DE BARY & CO., New York,

SOLE AGENTS IN THE UNITED STATES AND CANADA.

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC,
PROPHYLACTIC,
DEODORANT.

LISTERINE

NON-TOXIC.
NON-IRRITANT.
NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field o

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request.

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

ARTIFICIAL LEGS AND ARMS

WITH

RUBBER FEET AND HANDS.

Although a man may meet with the misfortune of having both his legs severed from his body, he is not necessarily helpless. By having artificial legs applied, with rubber feet attached, he can be restored to his usefulness.

Fig. 2 is from an instantaneous photograph of a man ascending a ladder; he has two artificial legs substituting his natural ones, which were crushed by a railroad accident and amputated.

Fig. 1 exposes his stumps. With his rubber feet he can ascend or descend a ladder, balance himself on the rungs, and have his hands at liberty. He can walk and mingle with persons without betraying his loss; in fact, he is restored to his former self for all practical purposes.

FIG. 1.

With the old methods of complicated ankle-joints these results could not be so thoroughly attained.

Over nine thousand in practical use, scattered in all parts of the world. Many of these have been supplied without presenting themselves to us, simply by sending measurements on a copyright formula which any one can easily fill out. The press, eminent surgeons, and competent judges in many parts of the world have commended the rubber foot and hand for their remarkable advantages.

Awarded the highest prizes at every competitive exhibition.

Endorsed and purchased by the U. S. Government for pensioners of the army and navy.

A treatise of 400 pages and copyright formula, *sent free.*

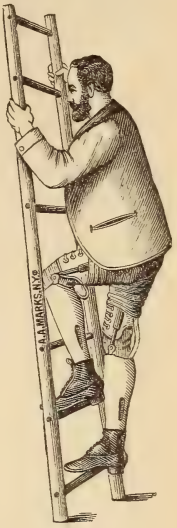

FIG. 2.

A. A. MARKS,

701 BROADWAY, NEW YORK CITY.

23291 DOCTORS

As far as we can ascertain from their letters and our agents' reports, prescribe Lactated Food. Those who once see its effects prescribe it wherever an easily assimilated and highly nutritious food is indicated, for either infants or invalids.

USE LACTATED FOOD

For it contains neither cane sugar nor starch; its base is sugar of milk; it is a cooked, pre-digested, non-irritating food. The great variety of palatable ways in which it may be prepared renders it specially valuable in convalescence.

SEND FOR FREE SAMPLE

If you are yet unacquainted with the merits of Lactated Food. We will forward, charges paid, on request, with interesting literature.

WELLS, RICHARDSON & CO., Burlington, Vt.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University, and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 <^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on pplication.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and our grains to eac pill.

SOLE LICENSEES AND SOLE AGENTS FOR THE UNITED STATES

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

" Chicago,	. . . . .	20 90	" "
" St. Louis,	. . . . .	20.49	" "

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

Murdock Liquid Food Co., Boston.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medica Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854. the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $3.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlets or other information, address

E. FOUGERA & CO., 30 North William St., New York,

Sole Agents for the above Preparations.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

Paris—CLIN & CO.—Paris

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared Compound Extract of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

Mr. Laroche, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, Anæmia, Chlorosis, Intestinal Hæmorrhage, Castralgia, Exhaustion, Etc., Etc.

CONSULTING SURGEONS

Dr. D. HAYES AGNEW Dr. SAMUEL W. GROSS Dr. JOHN B. ROBERTS

Physician in Charge, Dr. CHARLES MEIGS WILSON

The new Hospital building situated in the centre of the city, has accommodation for twenty patients and ten private rooms. Each private room has a special nurse, electric-bells, open fire-place, and meals privately served. Pay patients may enter the Hospital at any time previous to their confinement. The hygienic arrangements and sewage of the Hospital are perfect. Ample protection is provided against fire. A limited number of free and pay beds are reserved in an isolated portion of the building for Gynaecological cases.

Two courses of instruction in practical obstetrics and in practical gynaecology are given each year commencing in April and in October. Free patients only are used for purposes of clinical demonstration.

For particulars as to the admission of patients, or the courses of instruction in obstetrics and gynaecology, apply to DR. CHARLES MEIGS WILSON, Physician in Charge, by letter or in person, at the Charity, S. W. Cor. 11th and Cherry Sts. Phila., daily at 12 o'clock noon.

University of Pennsylvania

MEDICAL DEPARTMENT

The 123d ANNUAL WINTER SESSION will begin Monday, Oct. 1st, at 12 M., and continue 7 months.

The PRELIMINARY SESSION begins Monday, September 17th, the SPRING TERM Monday, May 6th, 1889.

The Curriculum is graded, and three annual Winter Sessions are required. Practical instruction, including laboratory-work in Chemistry, Histology, Osteology, and Pathology, with Bedside Instruction in Medicine, Surgery, and Gynæcology are a part of the regular course and without additional expense.

For catalogue and announcement containing particulars, apply to DR. JAMES TYSON, Sec'y, 36th and Woodland Ave., Phila.

No Chemicals.

W. BAKER & CO.'S Breakfast Cocoa

Is Absolutely Pure, and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa

is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

W. Baker & Co., Dorchester, Mass.

EFFERVESCENT SPECIALTIES

WM. R. WARNER & CO.'S
TRIPLE
(Effervescent)
BROMIDES

Advantages:—Useful in Headache, Nervousness, Sleeplessness, Migraine, Diurnal Epilepsy, Etc.

℞ Sodium Brom. grs. 15.
Potassium Brom. grs. 10.
Ammonium Brom. grs. 5.

Administer one teaspoonful in half a glass of water. Drink while effervescing. In Diurnal Epilepsy take a dessertspoonful three times daily until sense of taste is partly destroyed; after this reduce the frequency of dose, but keep the fauces in a benumbed condition.

WM. R. WARNER & CO.'S
CHALYBEATE
(Effervescent)
SALINE
(Ferric Saline Effervescens, Dr. Means)

℞ 1 gr. Citro-tartrate of Iron and 20 grs. of Soda.

DOSE.—A heaping teaspoonful of the salt, containing 1 gr. Citro-tartrate of Iron and 20 grs. of Soda, to be taken in a glass two-thirds full of water and drunk while effervescing. If a more decided effect is desired, warm instead of cold water may be used. In all cases this draught should be taken but once or twice a day, and then on an empty stomach, preferably before breakfast. No restrictions as to diet. One or two Pil. Digestiva (W. & Co.) may be taken at noon, before eating, as a dinner pill.

WM. R. WARNER & CO.'S
(ANTIPYRINE ET SODIUM SALICYLATE)
ANTALGIC
(Effervescent)
SALINE

℞ Antipyrine, 4 grs. Salicylate of Soda, 4 grs.
In each dessertspoonful.

DOSE.—One dessertspoonful, to be repeated as often as the case may require. Almost a specific in Neuralgic Headache. Prescribed in all cases where Antipyrine is used, with more better and more certain results.

WM. R. WARNER & CO.'S
APERIENT
(Effervescent)
SALINE

A pleasant and excellent aperient and refrigerant, very acceptable to the stomach. Given in all cases indicating the need of an active aperient, and to be given daily to all patients under treatment with Dosimetric therapeutics. (See Wm. R. Warner & Co.'s Dosimetric Granules.)

DOSE.—One tablespoonful in half a glass of water.

PREPARATIONS SUPPLIED BY ALL LEADING DRUGGISTS.

Samples of the above Salts furnished upon request.

The Curd of Cow's Milk
Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

CALIFORNIA VINTAGE CO.

21 PARK PLACE, N.Y.

Geo Hamlin Prest. Chas Roome Parmele Treas.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay, and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully, **L. WOLFF, M.D.,**
Demonstrator of Chemistry, Jefferson Medical College.

Hunter McGuire.

OFFICE HOURS:
8.30 TO 11.30 A. M

513 East Grace,
Richmond.

January 10th, 1889.

Messrs. Fairchild Bros. & Foster.

Dear Sirs:

Accept my thanks for the copies of the "Bed-Side Record." I find them valuable, as, indeed, I find anything else from your house.

Your digestive ferments are a necessity with me--without them, very often I could not use milk--without milk it would be difficult for me to practice my profession.

Very truly yours,

[SIGNED] HUNTER McGUIRE.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea, suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month, thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

SVAPNIA

OR

PURIFIED OPIUM

FOR PHYSICIANS USE ONLY.

Contains the Anodyne and Soporific Alkaloids, Codeia, Narceia and Morphia.

Excludes the Poisonous and Convulsive Alkaloids, Thebaine, Narcotine and Papaverine.

SVAPNIA has been in steadily increasing use for over twenty years, and whenever used has given great satisfaction.

To PHYSICIANS OF REPUTE, not already acquainted with its merits, samples will be mailed on application.

SVAPNIA is made to conform to a uniform standard of Opium of Ten per cent. Morphia strength.

JOHN FARR, Manufacturing Chemist, New York.

Platt's Chlorides

THE HOUSEHOLD DISINFECTANT

Platt's Chlorides is an odorless, colorless, saturated solution of those chloride salts which have proven most reliable and acceptable as deodorants, disinfectants, and antiseptics; is at once clean, powerful and stainless (contains no mercury), and is especially designed for the hygienic uses of the physician and the practical domestic uses of the housekeeper. It destroys the vitality of bacteria or disease-producing germs, while it is not dangerous or disagreeable, the least possible labor is involved in its use, and it is supplied at very slight cost.

It is sold in quart bottles by druggists everywhere, price 50 cents. But as this concentrated liquid admits of dilution, according to the directions on each bottle, with from four to twelve times its bulk of water, each quart bottle really represents about three gallons of disinfectant strong enough for general uses.

From the fact that so many thousands of physicians indorse the preparation and have found it an article of more than ordinary value and usefulness, we believe that in every sick-room, whether the disease be contagious or not, the use of this odorless disinfectant is of every-day utility and sanitary assistance, and does prove an aid and blessing to the patient, and a comfort and protection to the attendants.

To any physician who for any reason may be still unfamiliar with the practical value of Platt's Chlorides a sample will be sent, by express, prepaid, on request. Address, giving both Post and Express Offices.

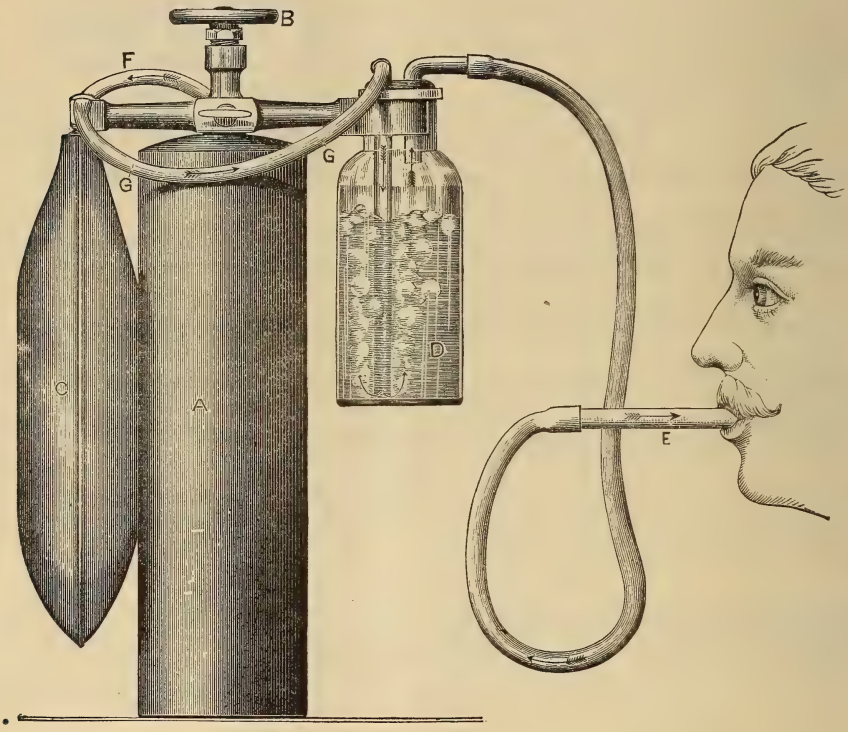
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or mixure of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

BUFFALO LITHIA WATER

IN THE

Uric Acid Diathesis, Bright's Disease of the Kidneys, Chronic Inflammation of the Bladder, &c.

Dr. THOMAS H. BUCKLER, of Paris (formerly of Baltimore), SUGGESTER OF LITHIA as a Solvent for URIC ACID.

"Nothing I could say would add to the **WELL-KNOWN REPUTATION OF THE BUFFALO LITHIA WATER. I HAVE FREQUENTLY USED IT WITH GOOD RESULTS IN URIC ACID DIATHESIS, RHEUMATISM AND GOUT,** and with this object I have ordered it to Europe from Coleman & Rogers, of Baltimore. Lithia is in no form so valuable as where it exists in the Carbonate (the form in which it is found in the **BUFFALO LITHIA WATER**), Nature's mode of solution and division in water which has passed through Lepedolite and Spondumine Mineral formation."

Dr. WM. A. HAMMOND, of New York, Surgeon-General U. S. Army (Retired), Professor of Diseases of the Mind and Nervous System in the University of New York, &c.

"I have for some time made use of the Buffalo Lithia Water in cases of affections of the **NERVOUS SYSTEM,** complicated with **BRIGHT'S DISEASE OF THE KIDNEYS** or with a **GOUTY DIATHESIS.** The results have been eminently satisfactory. Lithia has for many years been a favorite remedy with me in like cases, but the **BUFFALO WATER CERTAINLY ACTS BETTER THAN ANY EXTEMPORANEOUS SOLUTION OF THE LITHIA SALTS,** and is, moreover, better borne by the Stomach. I also often prescribe it in those cases of **CEREBRAL HYPERÆMIA** resulting from over-mental work—in which the condition called **NERVOUS DYSPEPSIA EXISTS**—and generally with marked benefit."

HUNTER McGUIRE, M.D., LL.D., Late Professor of Surgery, Medical College of Virginia, Richmond.

"**BUFFALO LITHIA WATER,** *Spring No. 2,* as an **ALKALINE DIURETIC,** *is invaluable.* In **URIC ACID GRAVEL,** *and, indeed,* in *diseases generally dependent* upon a **URIC ACID DIATHESIS,** *it is a remedy of extraordinary potency.* I have prescribed it in cases of **RHEUMATIC GOUT,** *which had resisted the ordinary remedies, with wonderful good results.* I have *used it also in my own case, being a great sufferer from this malady, and have derived more benefit from it than from any other remedy.*"

Dr. ROBERT BATTEY, of Georgia, SUGGESTER OF BATTEY'S OPERATION.

"I would state that I have been using the Buffalo Lithia Water, No. 2, in my practice for three years past, in cases of **CHRONIC INFLAMMATION** of the **BLADDER,** whether induced by **STONE,** by enlarged **PROSTATE** in the aged, or by **NEGLECTED GONORRHŒA, AND HAVE SECURED EXCELLENT RESULTS,** which encourages me to prescribe it for the future."

Dr. CYRUS EDSON, of New York,
Chief Inspector of Cutaneous Diseases in Health Department and President of the Board of Pharmacy.

"I have frequently made use of **BUFFALO LITHIA WATER,** Spring No. 2, in my practice, *with excellent results.* It is a potent remedy in correcting **RHEUMATIC DIATHESIS.** In a case of **URIC ACID GRAVEL,** in which I recently prescribed it, **ITS BENEFICIAL EFFECTS WERE APPARENT AFTER THE THIRD DOSE.** I have also prescribed it with great benefit in **BRIGHT'S DISEASE OF THE KIDNEYS.**"

Water in Cases of one dozen half-gallon Bottles, Five Dollars per Case, at the Springs.

NONE GENUINE WITHOUT

OUR TRADE MARK

DR. JAEGER'S SANITARY WOOLEN SYSTEM CO.

—OF PHILADELPHIA.—

WHOLESALE AND RETAIL WAREROOMS

1104 CHESTNUT STREET. 1106

Nearly a hundred years ago Count Rumford, one of the ablest scientists the world has ever produced, penned these remarkable words:

"I am astonished that the custom of wearing flannel next to the skin should not prevail more universally. I am confident it would prevent a multitude of diseases; and I know of no greater luxury than the comfortable sensation which arises from wearing it, especially after one is a little accustomed to it."

Dr. Jaeger's experiments upon the same subject have more than comfirmed all this; for they have not only demonstrated the great superiority of wool, but also the absolute unfitness of cotton and linen for the clothing of the human body and that there is no one prophylactic equal to properly graded, woven and constructed woolen underwear.

The soft, smooth, elastic "stockinet" fabrics used in the Jaeger system, especially in the underwear, silence all objection on the score of weight, coarseness, thickness, and irritating qualities. They are not "medicated" nor rendered dangerous by noxious dyes. The soft, gray colors are produced by the intermixture of the natural white and dark wools.

All garments are guaranteed to be made of absolutely pure wool and they comprise every article of clothing for both sexes and all ages.

Illustrated catalogue with price list and samples free.

Our goods cannot be bought through any other house in Philadelphia.

BEWARE OF IMITATIONS.

COMPRESSED TABLETS.

WE ask the attention of Physicians to the annexed list of recent additions of Compressed Tablets, as we think all of them are well deserving the careful attention of practitioners. We would be pleased to send to any physician, circular matter, compiled with great care and accuracy, giving therapeutic value and results in a concise form, that we are confident will be of interest, and possibly of advantage, to medical men who have not yet had access to the foreign and home authorities from which we have culled the information we give.

Acid Boracic, ... 5 grs.
Acetanilide, ... 3 and 5 "
Antifebrin, ... 3 " 5 "
Antipyrine, ... 3, 5 " 10 "
Blaud's
Ferri. Sulph. Exsic., 2 grs., Potass. Carb., 1 4-5 grs., Sacch. Alb., 1⅔ grs.
Iodol. . . . . ½, 1, 2, 3, and 5 grs.
Manganese Binoxide, ... 1 " 2 "
Opium, Camphor and Carb. Ammon., Opium Denarcot. ½ gr., Camphor, 2 grs., Ammon. Carb., 2½ grs.
Quinia Tannate, and Chocolate 1 grain, Quiniæ Tannat. 1 gr., Ext. Cacao, 9 grs.
Quinia Tannate and Chocolate, 2½ grs., Quiniæ Tannat. 2½ grs., Ext. Cacao, 7½ grs.
Salol, ... 2½ and 5 grs.
Sodium Succinate, ... 2 " 5 "
Thalline Sulphate, ... 2, 3 " 5 "
Trinitrin (Nitro-Glycerin), 1-20, 1-25, 1-33, 1-50, 1-100, and 1-200 gr.
Terpin Hydrate, ... 2, 3 and 5 grs

ANTISEPTIC TABLETS.

7.7 Hydrarg. Chlor. Corros., 7.3 Ammonium Chloride.

More than six months since, we sent a circular to the drug trade, stating that we had discontinued the manufacture of the Antiseptic Tablets introduced by us several years since at the suggestion of Dr. Charles Meigs Wilson, of this city. We have, however, received so many letters from physicians urging us to resume the manufacture, insisting that the Tablets prepared by us dissolved more readily and were more satisfactory than any substitute they had been able to procure, that we feel we could not ignore such persistent demands from our medical friends who have found our tablets an absolute necessity. We have therefore concluded to again prepare them, in a building entirely separate from our main establishment, with appliances and admirably devised protection by means of improved respirators, that will completely overcome any harmful effects to those engaged in their manufacture.

Druggists and physicians will be glad to learn that the Tablets as now prepared are perfectly white and free from the coloring-matter that we formerly added. This was done to lessen the danger of their being taken, or used in mistake; to guard against any such possibility, each Tablet, as now made, has the word "POISON" stamped upon it.

JOHN WYETH & BROTHER,

CHEMISTS, PHILADELPHIA.

BUFFALO LITHIA WATER

IN THE TREATMENT OF CHRONIC GASTRIC CATARRH

CLINICAL REPORTS.

CHRONIC GASTRIC CATARRH AND URIC ACID CALCULI.

A case stated by Dr. JNO. C. COLEMAN, of Scottsburg, Va., a retired Surgeon of the U. S. Navy.

"Mr. C. was for a number of years a sufferer from **CHRONIC GASTRIC CATARRH.** While his diet *was exclusively* **TEA** and **CRACKERS, BREAD** and **MILK,** *and other similar articles,* it was frequently thrown off in an undigested state soon after taking it, and at times he discharged from an empty stomach a strongly acid glairy mucus. A marked **URIC ACID DIATHESIS** supervened, consequent upon which he suffered for a period of some two years great **VESICAL IRRITATION** and possible **CYSTITIS,** attended by pain so intense and constantly present, as to require that he should be kept for the most part under the influence of opiates. After a persistent, but ineffectual exhibition of all remedies supposed to be indicated in the case, he was put for the latter affection upon the **BUFFALO LITHIA WATER,** Spring No. 2, with the happiest possible effect.

"In a few weeks, after commencing the use of it, the irritable condition of the *Bladder* was so far relieved that he was enabled to dispense entirely with the use of opiates. At the expiration of some eight weeks he had an attack of unusual severity, from which he was relieved by the discharge of a **CALCULUS,** followed at short intervals by the discharge of three others, which proved to be the termination of this trouble, as from that time there was entire subsidence of the painful symptoms described, and the *Bladder* resumed its natural state.

"While prescribed with special reference to the relief of the *Irritable Bladder,* the action of the water was not less surprisingly happy in the **GASTRIC AFFECTION,** with remarkable promptness correcting the highly acid condition of the **STOMACH,** restoring a healthy digestion and assimilation, and *tone* and *vigor* to the depressed *Nervous System.*

"In a few months he was able to eat, with perfect impunity, the coarsest articles of diet. He is now, after a lapse of several years, in robust health, having had no return of these painful maladies."

CHRONIC GASTRIC CATARRH.

Case of JOHN P. KEELING, Esq., stated by Dr. S. S. KEELING, Norfolk, Va., Member Medical Society of Virginia.

"Mr. John P. Keeling labored under **CHRONIC DYSPEPSIA,** and was always subject to attacks of *Spasmodic Gastralgia* immediately upon taking food into the stomach, which attacks were not at all amenable to treatment. Not unfrequently the stomach *rejected everything in the way of food and drink,* and he was of necessity confined to the lightest possible articles of diet, *meat and vegetables being entirely excluded.* He became so prostrated that it was with difficulty he could walk across his chamber floor, and had often to be lifted about. Such was the state of his **NERVOUS SYSTEM** *that great solicitude was felt as to his mental condition.*

"He visited Baltimore for medical aid, and was for many months under the treatment of some of the most eminent men of the profession in that city, but without beneficial result, and was finally advised that he had nothing to hope from remedies.

"Returning in an extremely critical condition to his home in the county of Princess Anne, he came under my professional care. Satisfied that medicine was unavailing in the case, I advised the **BUFFALO LITHIA WATER,** Spring No. 2. His stomach, however, was in a highly irritable condition, and I found it necessary to administer it in very small quantities; and it was at first given not exceeding an ounce at a dose, repeated at stated intervals. At the expiration of the third day the irritability of the stomach was decidedly less, and the quantity was then increased from day to day until the thirteenth day, when I found that the patient could take twelve ounces, which I regard as maximum dose at any time. Persisting in its use, on the twenty-eighth day he was free from pain, the stomach in a normal condition readily receiving both solids and liquids in moderate quantities, strength greatly increased, and nervous symptoms entirely relieved. At the expiration of the seventh week he was able to attend actively and regularly to his business on the farm. His recovery, which I regard as one of the most remarkable I ever knew of, I attribute entirely to the **BUFFALO LITHIA WATER.**"

GASTRO-INTESTINAL CATARRH.

Case of Mrs. Dr. F. J. GREGORY, of Virginia, reported by F. J. GREGORY, M.D., Keysville, Va.

"For eighteen months my wife, aged forty-one years, was a sufferer from a **GASTRO-INTESTINAL CATARRH,** which resisted my best-directed efforts at relief. The taking of the smallest quantity of the most easily-digested food on the stomach would produce an attack of *nausea and vomiting, the severity of which is seldom witnessed,* and when the stomach was free of food she would have attacks of *Gastralgia of the most excruciating nature.* She also suffered from habitual constipation, and at times with hemorrhages from the bowels. I pursued the usual line of treatment, such as simple bitters, Dilute Hydrocyanic Acid, Bismuth, etc., and called to my help two of the most skilled physicians in Southside Virginia, who supplemented my treatment with some of the newer drugs, such as **EFFERVESCING BICARB. POTASS. LACTOPEPTINE, CARLSBAD MINERAL SALTS,** etc., but with no benefit, and so her condition went on from bad to worse *until death seemed almost imminent from inanition.* I then put her on a milk diet with a glass of **BUFFALO LITHIA WATER,** Spring No. 2, every hour or so during the day, and *after the use of the first bottle improvement was marked, and before a case of it was used I regarded her cure as complete.* It has been nearly two years since, and there has been only one slight recurrence, which was a few days since, and it readily disappeared on the use of the water for a few days."

Water in cases of one dozen half-gallon bottles, $5 per case, at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 <^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on pplication.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and our grains to eac pill.

W. H. SCHIEFFELIN & CO.,

SOLE LICENSEES AND SOLE AGENTS FOR THE UNITED STATES

No Chemicals.

W. BAKER & CO.'S Breakfast Cocoa

Is Absolutely Pure, and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa

is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

Physician in Charge, Dr. CHARLES MEIGS WILSON

The new Hospital building situated in the centre of the city, has accommodation for twenty patients and ten private rooms. Each private room has a special nurse, electric-bells, open fire-place, and meals privately served. Pay patients may enter the Hospital at any time previous to their confinement. The hygienic arrangements and sewage of the Hospital are perfect. Ample protection is provided against fire. A limited number of free and pay beds are reserved in an isolated portion of the building for Gynaecological cases.

Two courses of instruction in practical obstetrics and in practical gynaecology are given each year commencing in April and in October. Free patients only are used for purposes of clinical demonstration.

For particulars as to the admission of patients, or the courses of instruction in obstetrics and gynaecology, apply to DR. CHARLES MEIGS WILSON, Physician in Charge, by letter or in person, at the Charity, S. W. Cor. 11th and Cherry Sts. Phila., daily at 12 o'clock noon.

ANTISEPTIC DRAINAGE TUBES.—Glass.

These Tubes have large holes, one-half inch apart, arranged alternately on opposite sides.
They are carefully finished, especial care being taken to make them smooth.
In addition to the drainage-holes, each tube has at one end two smaller holes for the insertion of Safety-Pin, through which it is prevented slipping into the wound.

FURNISHED IN SEVEN SIZES.

No. 1,	$1.25 per doz.	No. 4,	$1.55 per doz.
No. 2,	1.25 "	No. 5,	1.70 "
No. 3,	1.40 "	No. 6,	1.90 "

No. 7, $2.10 per dozen.

RAW CAT-GUT. I put this up in coils of 10 feet, four difierent sizes, Nos. 1, 2, 3, 4 (4 is thickest). Nos. 2 and 3 are the most useful sizes. **No. 1 Coil, 10 Cents; No. 2 Coil, 12 Cents; No. 3 Coil, 14 Cents; No. 4 Coil, 16 Cents.** Full directions with each coil for making it absolutely aseptic.

WILLIAM SNOWDEN,

Manufacturer, Importer and Exporter of Surgical Instruments,

No. 7 SOUTH ELEVENTH STREET, PHILADELPHIA.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medica Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York,

Sole Agents for the above Preparations.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

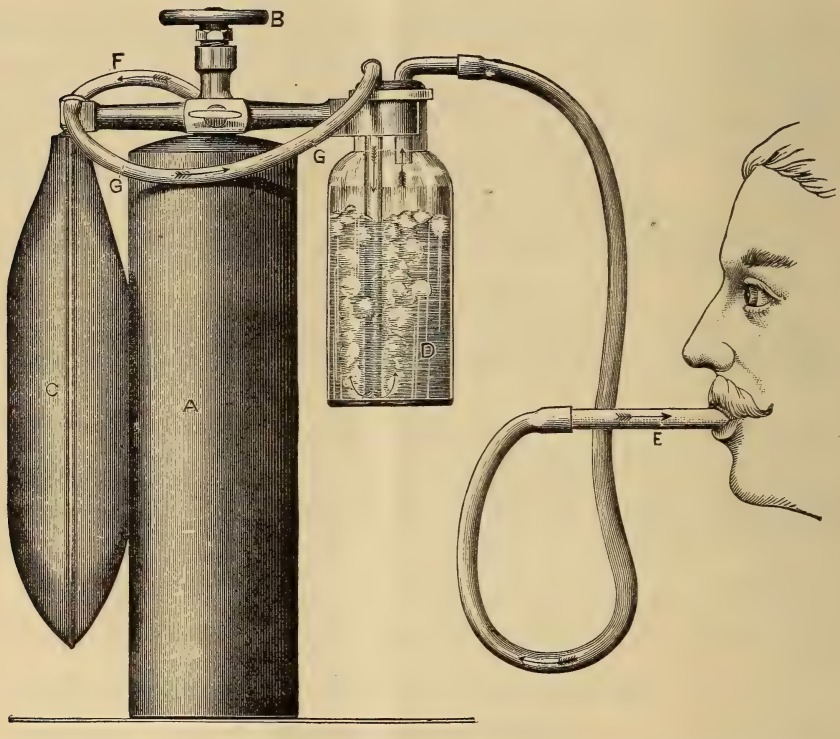
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or mixure of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field o

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request.

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

LENTZ'S
NEW COMPACT
OPERATING SET
No. 10.

One Amputating Knife (Leg and Arm). One Finger Knife. One Hernia Knife. One Sharp Curved Bistoury. Two Scalpels. One Tenotome. One Tenaculum. One pair Scissors, curved or flat. One Saw, 9-inch blade. One Liston's Spring Bone Forceps. One Artery and Needle Forceps, improved. One Dressing Forceps. One Esmarch's Flat Rubber Tourniquets, with Chain. One Director, with Aneurism Needle. Two Silver Probes. Silk, Wire, Wax, and Needles.

The above instruments are put up in a fine Morocco Case with nickel trimmings, lined with velvet, and has extra space for Trephine and Elevator, if desired. With the *sixteen* instruments contained in this case, any ordinary operation may be performed.

Size, 11 in. long, 4 in. wide, 2 in. high

Price, $25. With Trephine and Handle and Trephine Elevator in addition, $29.65. We also make the above case with hard rubber antiseptic handles on knives and saw. Price, $29.00. With Trephine and Elevator in addition, $33.65.

Discount 25 pr. ct. to Physicians

McARTHUR'S SYRUP.

(SYR: HYPOPHOS: COMP: C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION**, sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

Mention this Journal. McARTHUR HYPOPHOSPHITE CO., BOSTON, MASS.

Spring

Diet.

A Nutritious Diet for Infants during the Winter and Spring months has a very important bearing on the ability of the little ones to withstand the strain of the heated term during the ensuing summer.

Nestlé's Milk Food is noted for its nourishing properties, producing firm flesh, hard bone, and tough muscle. Prepared with water only, it is both nutritious and economical, and requires the addition of no foreign element to render it digestible, as in the case of a recent attempt to imitate Nestlé's Food. Every prominent writer on infant diets awards Nestlé's Food the first place. Each new compound put on the market in the last few years has either aimed at *imitating* Nestlé's Food or *attacking* it thereby testifying to its superiority.

DR. WILLIAM A. HAMMOND'S SANITARIUM

—FOR—

DISEASES OF THE NERVOUS SYSTEM,

WASHINGTON, D. C.

DR. WILLIAM A. HAMMOND announces to the medical profession that he has returned from New York to Washington, D. C., where he has established, in a building especially erected for the purpose, a *Sanitarium* for the treatment of mild and curable cases of mental derangement, diseases of the nervous system generally, cases of the morphia and chloral habits, and such other affections as may properly be treated by the remedial agencies under his control. His experience during many years has convinced him that most diseases embraced within the above-named classes can be managed much more successfully in an institution of this kind, under the constant supervision of the physician and with the aid of means not otherwise at command, than when the patients are seen by their medical advisers at intervals of several hours or days.

The *Sanitarium*, which has been constructed under the superintendence of A. B. Mullett, Esq., late architect of the United States Treasury department, and is situated on Columbia Heights, at the corner of Fourteenth Street and Sheridan Avenue. The position is the highest in the immediate vicinity of Washington, the soil is dry, and all the surroundings are free from noxious influences. It is readily reached by the Fourteenth Street Railway, the cars of which run to the doors. The building is very large, and as perfect in structure and arrangements as is possible from a knowledge of sanitary science and of the requirements of such an institution. It accommodates about thirty patients. So far as the rooms, table, etc., are concerned, they are equal to such as exist in the best hotels of our large cities. Electricity in all its forms; baths, douches, massage, inhalations, nursing, etc., are provided as may be required by patients, in addition to such other medical treatment as may be deemed advisable.

A large *Solarium* for sun-baths and exercise in cold or inclement weather and heated with steam in winter, is constructed on the top of the main building.

Each patient is thoroughly examined by Dr. Hammond and receives his daily personal attention, while Dr. E. L. Tompkins, a physician of ample hospital experience and of tried executive ability, resides in the institution and has, under Dr. Hammond, the immediate superintendence.

The *Sanitarium* is now opened for the reception of patients.

For further information Dr. Hammond can be addressed at The Sanitarium, Fourteenth Street and Sheridan Avenue, Washington, D. C.

A Peerless Chemico-Physiological Food and Restorative

Crystalline Phosphate

A TISSUE FOOD

PHOSPHATIC FOOD PRODUCTS TRADE MARK

Contains all essential inorganic components of the tissues in a semi-solid, easily soluble, crystalline mass,

COMPOSED OF

ACID PHOSPHATE OF CALCIUM.

WITH

Acid Phosphate of Magnesium,
" " " Iron,

CALIFORNIA VINTAGE CO.

21 PARK PLACE. N.Y.

Geo Hamlin Prest. Chas Roome Parmele Treas.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay, and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully,

L. WOLFF, M.D.,
Demonstrator of Chemistry, Jefferson Medical College.

23291 DOCTORS

As far as we can ascertain from their letters and our agents' reports, prescribe Lactated Food. Those who once see its effects prescribe it wherever an easily assimilated and highly nutritious food is indicated, for either infants or invalids.

USE LACTATED FOOD

For it contains neither cane sugar nor starch; its base is sugar of milk; it is a cooked, pre-digested, non-irritating food. The great variety of palatable ways in which it may be prepared renders it specially valuable in convalescence.

SEND FOR FREE SAMPLE

If you are yet unacquainted with the merits of Lactated Food. We will forward, charges paid, on request, with interesting literature.

WELLS, RICHARDSON & CO., Burlington, Vt.

SPORTING AND ATHLETIC GOODS OF EVERY DESCRIPTION.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cvstoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality in Boston,	25.60	per	1000.
" of Women in Boston,	29,00	"	"
" in **Murdock's Free Surgical Hospital,**	**5.00**	"	"
" New York,	26.32	"	"
" Philadelphia,	20.00	"	"
" Chicago,	20 90	"	"
" St. Louis,	20.49	"	"

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

Murdock Liquid Food Co., Boston.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron,** is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF

THE SALICYLATE OF SODA OF DOCTOR CLIN.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

POSITIVE MEDICATION

WITH POSITIVE AND DECIDED RESULTS, BY THE EMPLOYMENT OF THE

Viburnum Compound of Dr. Hayden

IN

Female Disorders

AND ALL SPASMODIC AFFECTIONS OF BOTH SEXES

TWENTY-TWO YEARS before the profession, without accident or complaint. Absolutely safe and free from all NARCOTICS or poisons—prompt and reliable in its action with no unpleasant sequelæ.

THE VIBURNUM COMPOUND of Dr. Hayden is employed in the leading hospitals and remedial institutions and by the most eminent physicians and gynæcologists with marked success.

We have the testimonials of

FIVE THOUSAND PHYSICIANS

testifying to the great merits of the VIBURNUM COMPOUND of Dr. Hayden—more than were ever given before for any special remedy in the world. Dispensed by all reliable Apothecaries, put up in 4 oz., 10 oz., and 16 oz. bottles.

For formula, report of cases, treatment, special directions, and much other interesting matter, and the written testimonials of

The Curd of Cow's Milk

Made as Soft and Digestible as that of

Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

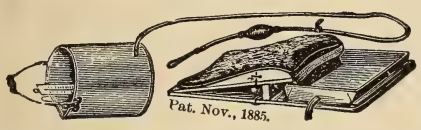
Improved Artificial Limbs

NEW PATENT
UNIVERSAL ANKLE JOINT
NEW PATENT
Adjustable Knee Side Joint

These are the Most Perfect and Durable Joints in Use

Arms with Finger, Wrist, and Elbow Movements. Also, extension apparatuses for shortened limbs. Illustrated catalogue free. Address, C. A. FREES, 766 Broadway, New York.



For more than four years the Perfection Douche has been subjected to the severest practical tests, by experienced gynaecologist in every part of this country, no objection, in a single instance, having been made to the principles upon which it is constructed.

It provides ample and comfortable support, with a slight elevation of either the shoulders or hips, furnishes means for the prolonged application of a sufficiently large amount of hot water, and completely conveys away all the drip without risk of wetting the clothing. No other apparatus for applying hot water in the treatment of uterine and pelvic diseases combines as many desirable and practical qualities. COMFORT, CONVENIENCE, DURABILITY, AND THOROUGHNESS OF APPLICATION are its main points of excellence.

Descriptive circulars, prices, and testimonials are furnished on application. These afford satisfactory evidence of unqualified endorsement of its superior advantages, and show the high appreciation in which the instrument is held by those who have repeatedly recommended and tested its work.

Applications for the Douche or for circulars or testimonials may be made to agents, or to "THE PERFECTION DOUCHE," BOX 7, ALBANY, N. Y.

COLDEN'S LIQUID BEEF TONIC

AN INVALUABLE AID IN MEDICAL PRACTICE

ORIGINAL | COLDEN'S LIEBIG'S LIQUID EXTRACT OF BEEF AND TONIC INVIGORATOR. | LABEL.

ESSENTIALLY DIFFERENT FROM ALL OTHER BEEF TONICS. UNIVERSALLY ENDORSED BY LEADING PHYSICIANS.

This preparation, consisting of the Extract of Beef (prepared by Baron Liebig's process), the best Brandy obtainable, soluble Citrate of Iron, Cinchona and Gentian is offered to the Medical Profession upon its own merits. It is of inestimable value in the treatment of **Debility, Convalescence from Severe Illness Anæmia, Malarial Fever, Chlorosis, Incipient Consumption, Nervous Weakness,** and maladies requiring a Tonic and Nutrient. It is quickly absorbed by the Stomach and upper portion of the Alimentary Canal, and therefore finds its way into the circulation quite rapidly.

COLDEN'S LIQUID BEEF TONIC appeals to the judgment of intelligent Physicians in the treatment of

ALL CASES OF GENERAL DEBILITY.

By the urgent request of several eminent members of the medical profession, I have added to each wineglassful of this preparation two grains of Soluble Citrate of Iron, and which is designated on the label, **"With Iron, No. 1;"** while the same preparation, **Without Iron,** is designated on the label as **"No. 2."**

In prescribing this preparation, physicians should be particular to mention *"COLDEN'S,"* viz., *"Ext. Carnis Fl. Comp. (Colden)."* A Sample of **COLDEN'S BEEF TONIC** will be sent free on application, to any physician (enclosing business card) in the United States. *Sold by druggists generally.*

NONE GENUINE WITHOUT

OUR TRADE MARK

DR. JAEGER'S
SANITARY WOOLEN SYSTEM CO.

——OF PHILADELPHIA.——

WHOLESALE AND RETAIL WAREROOMS

1104 CHESTNUT STREET. 1106

Nearly a hundred years ago Count Rumford, one of the ablest scientists the world has ever produced, penned these remarkable words:

"I am astonished that the custom of wearing flannel next to the skin should not prevail more universally. I am confident it would prevent a multitude of diseases; and I know of no greater luxury than the comfortable sensation which arises from wearing it, especially after one is a little accustomed to it."

Dr. Jaeger's experiments upon the same subject have more than comfirmed all this; for they have not only demonstrated the great superiority of wool, but also the absolute unfitness of cotton and linen for the clothing of the human body and that there is no one prophylactic equal to properly graded, woven and constructed woolen underwear.

The soft, smooth, elastic "stockinet" fabrics used in the Jaeger system, especially in the underwear, silence all objection on the score of weight, coarseness, thickness, and irritating qualities. They are not "medicated" nor rendered dangerous by noxious dyes. The soft, gray colors are produced by the intermixture of the natural white and dark wools.

All garments are guaranteed to be made of absolutely pure wool and they comprise every article of clothing for both sexes and all ages.

Illustrated catalogue with price list and samples free.

Our goods cannot be bought through any other house in Philadelphia.

BEWARE OF IMITATIONS.

SCRIBNER & SULZER,

1104 CHESTNUT ST. 1106

FELLOWS'
HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The essential elements** to the Animal Organization—Potash and Lime.

The **Oxydizing Agents**—Iron and Manganese;

The **Tonics**—Quinine and Strychnine,

And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

Circulars sent to Physicians on Application.

ARTIFICIAL LEGS AND ARMS

WITH

RUBBER FEET AND HANDS.

Although a man may meet with the misfortune of having both his legs severed from his body, he is not necessarily helpless. By having artificial legs applied, with rubber feet attached, he can be restored to his usefulness.

Fig. 2 is from an instantaneous photograph of a man ascending a ladder; he has two artificial legs substituting his natural ones, which were crushed by a railroad accident and amputated.

Fig. 1 exposes his stumps. With his rubber feet he can ascend or descend a ladder, balance himself on the rungs, and have his hands at liberty. He can walk and mingle with persons without betraying his loss; in fact, he is restored to his former self for all practical purposes.

FIG. 1.

With the old methods of complicated ankle-joints these results could not be so thoroughly attained.

Over nine thousand in practical use, scattered in all parts of the world. Many of these have been supplied without presenting themselves to us, simply by sending measurements on a copyright formula which any one can easily fill out. The press, eminent surgeons, and competent judges in many parts of the world have commended the rubber foot and hand for their remarkable advantages.

Awarded the highest prizes at every competitive exhibition.

Endorsed and purchased by the U. S. Government for pensioners of the army and navy.

A treatise of 400 pages and copyright formula, *sent free*.

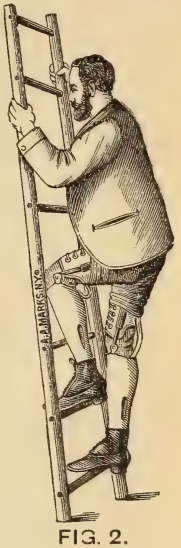

FIG. 2.

A. A. MARKS,

701 BROADWAY, NEW YORK CITY.

CALIFORNIA VINTAGE CO.

21 PARK PLACE. N.Y.

Geo Hamlin Prest. Chas Roome Parmele Treas.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay, and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully,

L. WOLFF, M.D.,
Demonstrator of Chemistry, Jefferson Medical College.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C\ H_3)_2{=}C{=}(C_2\ H_5\ SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University, and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6\ H_4 < {}^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeable symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians, will be mailed on application.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and one grains to each pill.

W. H. SCHIEFFELIN & CO.,

170 & 172 WILLIAMS STREET, NEW YORK,

SOLE LICENSEES AND SOLE AGENTS FOR THE UNITED STATES

SUCCUS ALTERANS

(McDADE.)

SUCCUS ALTERANS is a purely vegetable compound of the preserved juices of Stillingia Sylvatica Lappa Minor, Phytolacca Decandra, Smilax Sarsaparilla, and Xanthoxylum Carolinianum, as collected by Dr. Geo. W. McDade, exclusively for Eli Lilly & Co., and endorsed by Dr. J. Marion Sims.

SUCCUS ALTERANS continues to gain favor from its remarkable Alterative and Tonic properties, *eliminating specific poison from the blood* and *increasing the proportion of red corpuscles in anæmic patients* to a wonderful degree; is endorsed by the medical profession, and in use by many hospitals of note.

SUCCUS ALTERANS in venereal and cutaneous diseases is fast supplanting Mercury, the Iodides, and Arsenic; and is a certain remedy for Mercurialization, Iodism, and the dreadful effects often following the use of Arsenic in skin diseases.

SUCCUS ALTERANS is also strongly recommended for its Tonic and Alterative effects in myriad forms of scrofulous disease, and in all cases where anæmia is a factor. Such patients rapidly develop a good appetite, sleep soundly, and gain flesh rapidly. Many cases are on record where patients increased ten to twenty-five pounds in weight in a few weeks.

SUCCUS ALTERANS is giving satisfactory results in treatment of *Chronic Rheumatism*, and can be used with confidence.

SUCCUS ALTERANS may be given for any length of time, without injury to the patient.

SUCCUS ALTERANS is put up in pint round amber bottles, and *never in bulk.*

PHYSICIANS who have not received Dr. McDade's latest publication, the Monographia Syphilitica, should send their address, mentioning this journal, and we will mail a copy. It contains a paper, illustrated with colored plates, by Dr. D. H. Goodwillie, of New York, on the "Sequelæ of Syphilis," reports of cases in practice, and many other valuable papers.

ELIXIR PURGANS.

Elixir Purgans (Lilly) reliably stimulates the dormant liver without undue irritation, and has gentle yet positive effect upon the alimentary tract. In Habitual Constipation, so common in Women and Children, it will be found particularly useful. Its endorsement at Bellevue and many other prominent hospitals East and West, as well as its employment in general practice by the most eminent medical men, confirms the experience of years in its use.

Each Teaspoonful Represents

Rhamnus Purshiana, -	10 grs.
Euonymus Atropur., - -	8 grs.
Cassia Acutifolia (Purif.)	10 grs.
Iris Versicolor, - - -	4 grs.
Hyoscyamus Niger, -	2 grs.
Aromatics, etc.	

IN PRESCRIBING, PLEASE BE CAREFUL TO WRITE

ELIXIR PURGANS (LILLY),

THAT OTHER PREPARATIONS MAY NOT BE SUBSTITUTED.

HIGHLY RECOMMENDED.

We take pleasure in endorsing the Elixir Purgans (Lilly) as prepared from the above formula, for in it we find a near approach to positive *perfection* in the form of a *Liquid Cathartic*, and, from our experience with the preparation, can highly recommend it to the profession.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

WELLS, RICHARDSON & CO., Burlington, Vt.

The Curd of Cow's Milk Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

POSITIVE MEDICATION

WITH POSITIVE AND DECIDED RESULTS, BY THE EMPLOYMENT OF THE

Viburnum Compound of Dr. Hayden

IN

Female Disorders

AND ALL SPASMODIC AFFECTIONS OF BOTH SEXES

TWENTY-TWO YEARS before the profession, without accident or complaint. Absolutely safe and free from all NARCOTICS or poisons—prompt and reliable in its action with no unpleasant sequelæ.

THE VIBURNUM COMPOUND of Dr. Hayden is employed in the leading hospitals and remedial institutions and by the most eminent physicians and gynæcologists with marked success.

We have the testimonials of

FIVE THOUSAND PHYSICIANS

testifying to the great merits of the VIBURNUM COMPOUND of Dr. Hayden—more than were ever given before for any special remedy in the world. Dispensed by all reliable Apothecaries, put up in 4 oz., 10 oz., and 16 oz. bottles.

For formula, report of cases, treatment, special directions, and much other interesting matter, and the written testimonials of

ONE THOUSAND PHYSICIANS

send your address for our eighty-page ILLUSTRATIVE HANDBOOK, FREE.

Physician in Charge, Dr. CHARLES MEIGS WILSON

The new Hospital building situated in the centre of the city, has accommodation for twenty patients and ten private rooms. Each private room has a special nurse, electric-bells, open fire-place, and meals privately served. Pay patients may enter the Hospital at any time previous to their confinement. The hygienic arrangements and sewage of the Hospital are perfect. Ample protection is provided against fire. A limited number of free and pay beds are reserved in an isolated portion of the building for Gynaecological cases.

Two courses of instruction in practical obstetrics and in practical gynaecology are given each year commencing in April and in October. Free patients only are used for purposes of clinical demonstration.

For particulars as to the admission of patients, or the courses of instruction in obstetrics and gynaecology, apply to DR. CHARLES MEIGS WILSON, Physician in Charge, by letter or in person, at the Charity, S. W. Cor. 11th and Cherry Sts. Phila., daily at 12 o'clock noon.

University of Pennsylvania

MEDICAL DEPARTMENT

The 123d ANNUAL WINTER SESSION will begin Monday, Oct. 1st, at 12 M., and continue 7 months.

The PRELIMINARY SESSION begins Monday, September 17th, the SPRING TERM Monday, May 6th, 1889.

The Curriculum is graded, and three annual Winter Sessions are required. Practical instruction, including laboratory-work in Chemistry, Histology, Osteology, and Pathology, with Bedside Instruction in Medicine, Surgery, and Gynæcology are a part of the regular course and without additional expense.

For catalogue and announcement containing particulars, apply to DR. JAMES TYSON, Sec'y, 36th and Woodland Ave., Phila.

ILLUSTRATED CATALOGUE ON APPLICATION.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

No Chemicals.

W. BAKER & CO.'S Breakfast Cocoa

Is Absolutely Pure, and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa

is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

W. Baker & Co., Dorchester, Mass.

PRICE REDUCED.

True Salicylic Acid.

CRYSTALLIZED FROM

WINTERGREEN OIL.—ITS NATURAL SOURCE.

DR. P. W. LATHAM, Downing Professor of Medicine at Cambridge (England), lecturing on the treatment of gout and rheumatism at the Royal College of Physicians, says:

"The true Salicylic Acid obtained from the vegetable kingdom must alone be employed. If you have to give large doses, avoid giving the artificial product obtained from carbolic acid, however much it may have been dialyzed and purified. Give the acid without any alkali or base," etc.

A reprint of this exceedingly valuable paper will be sent on application.

A DESIDERATUM—not always appreciated.

The quality of medicines used in the prescription is as important a factor in the cure of disease as a correct diagnosis; and a physician violates no code, either of ethics or morals, in demanding of his druggist that which he knows to be reliable, instead of leaving to the latter to decide whose preparations he shall or shall not use.

GENUINE BLAUD'S PILLS.

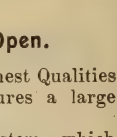
These pills, which have been inserted in the new French Pharmacopœia, have been employed with the greatest success for more than fifty years by most French and foreign physicians, to cure anemia, chlorosis, and all chlorotic affections in which iron is indicated.

Here is the opinion of men most eminent in medical science who have employed them:

"For thirty-five years, in which I have practised medicine, I have recognized the incontestable advantages of BLAUD'S PILLS over all other ferruginous preparations, and I regard them as the best anti-chlorotic."—DR. DOUBLE, *Ex-President of the Academy of Medicine.*

"Of all the ferruginous preparations, which have given good results in the treatment of chlorotic affections, BLAUD'S PILLS appear to us to deserve to hold the first rank."—*Dictionnaire universel de médecine*, Vol. II, p. 99.

These pills, prepared according to the genuine formule of the originator, by his nephew, Aug. Blaud, Pharmacist of the Faculty of Paris, are sold only in bottles of 200 pills and half bottles of 100 pills, at a cost of 5 and 3 francs ($1.00, and seventy-five cents), and never in smaller quantities. *See that his name is stamped on each pill.* **PARIS, 8 RUE PAYENNE, and at every Pharmacy.** (Beware of imitations.)



SPECIAL.

Spring Importations Now Open.

IMPORTING the Latest Styles in Finest Qualities only and in single patterns, insures a large variety and no Duplicates.

Avoiding the usual Long Credit System, which necessarily demands high charges.

A desire to merit a reputation for reasonable prices with highest grade of workmanship.

On this basis there can be but one department and prices uniform.

HARRY L. CARPENTER

RAW CAT-GUT. I put this up in coils of 10 feet, four different sizes, Nos. 1, 2, 3, 4 (4 is thickest). Nos. 2 and 3 are the most useful sizes. **No. 1 Coil, 10 Cents; No. 2 Coil, 12 Cents; No. 3 Coil, 14 Cents; No. 4 Coil, 16 Cents.** Full directions with each coil for making it absolutely aseptic.

WILLIAM SNOWDEN,
Manufacturer, Importer and Exporter of Surgical Instruments,
No. 7 SOUTH ELEVENTH STREET, PHILADELPHIA.

McARTHUR'S SYRUP.

(SYR: HYPOPHOS: COMP: C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION**, sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

Mention this Journal. McARTHUR HYPOPHOSPHITE CO., BOSTON, MASS.

THE SUSTAINED SUPREMACY

OF

Fairchild's Pepsin,

In ACTIVITY, PERMANENCE and GENERAL EXCELLENCE

Has won for this product a wide use and recognition in all the principal markets of the world.

We guarantee it to be unchangeable, to maintain its activity and quality under all ordinary commercial conditions; it is therefore, by far the most available for the dispensing counter, as well as in the manufacture of every form of pepsin preparation.

Under exactly parallel conditions, with any proper percentage of acidity and with any proportion of such acidulated water to the albumen, Fairchild's pepsin is positively superior to any pepsin known.

It will, under absolutely comparative conditions, grain for grain, digest more albumen than any other pepsin made.

We will be pleased to send samples to any physician who may wish to ascertain for himself the relative activity of Fairchild's pepsin, or to submit it to any practical trial.

Prices and complete information upon application.

FAIRCHILD BROS. & FOSTER,

New York. Chicago. London.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea, suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month, thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

Platt's Chlorides

THE HOUSEHOLD

DISINFECTANT

Platt's Chlorides is an odorless, colorless, saturated solution of those chloride salts which have proven most reliable and acceptable as deodorants, disinfectants, and antiseptics; is at once clean, powerful and stainless (contains no mercury), and is especially designed for the hygienic uses of the physician and the practical domestic uses of the housekeeper. It destroys the vitality of bacteria or disease-producing germs, while it is not dangerous or disagreeable, the least possible labor is involved in its use, and it is supplied at very slight cost.

It is sold in quart bottles by druggists everywhere, price 50 cents. But as this concentrated liquid admits of dilution, according to the directions on each bottle, with from four to twelve times its bulk of water, each quart bottle really represents about three gallons of disinfectant strong enough for general uses.

From the fact that so many thousands of physicians indorse the preparation and have found it an article of more than ordinary value and usefulness, we believe that in every sick-room, whether the disease be contagious or not, the use of this odorless disinfectant is of every-day utility and sanitary assistance, and does prove an aid and blessing to the patient, and a comfort and protection to the attendants.

To any physician who for any reason may be still unfamiliar with the practical value of Platt's Chlorides a sample will be sent, by express, prepaid, on request.

Address, giving both Post and Express Offices.

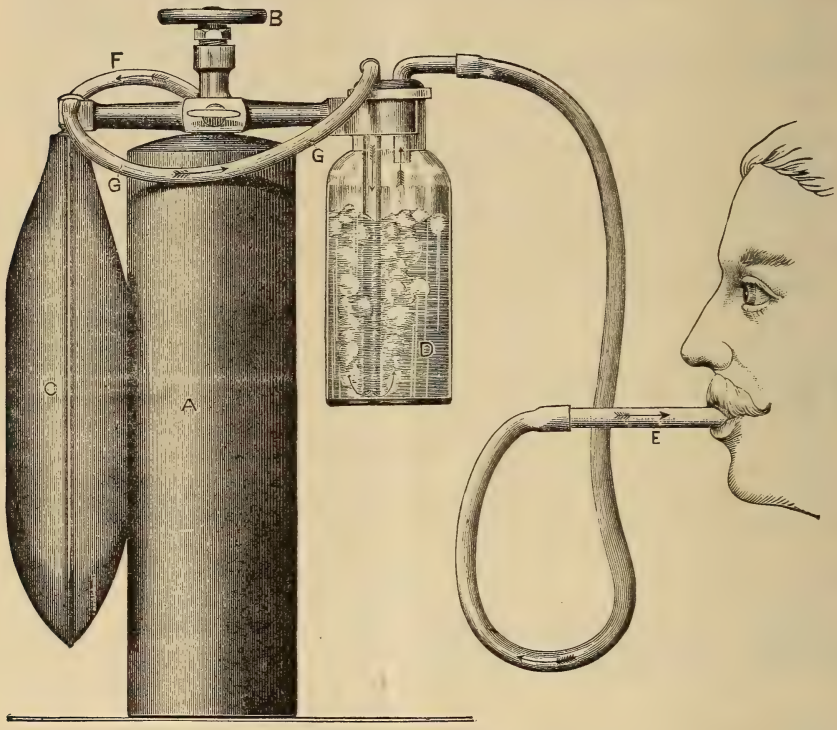
HENRY B. PLATT,

36 Platt St., New York.

INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or mixure of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE S. S. WHITE DENTAL MFG. CO.,

PHILADELPHIA, NEW YORK, BOSTON, CHICAGO, BROOKLYN.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medica Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality in Boston,	. . . . .	25.60	per 1000.
" of Women in Boston,	. . . . .	29,00	" "
" in **Murdock's Free Surgical Hospital,**	.	**5.00**	" "
" New York,	. . . . .	26.32	" "
" Philadelphia,	. . . . .	20.00	" "
" Chicago,	. . . . .	20 90	" "
" St. Louis,	. . . . .	20.49	" "

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

BUFFALO LITHIA WATER

IN THE TREATMENT OF

ALBUMINURIA, WHETHER OF BRIGHT'S DISEASE, PREGNANCY, OR SCARLET FEVER.

Dr. WM. B. TOWLES, Professor of Anatomy and Materia Medica in the Medical Department of the University of Virginia.

"BUFFALO LITHIA WATER, No. 2, belongs to the ALKALINE OR, *perhaps, to the* ALKALINE-SALINE Class, *for it has proved far more efficacious in many diseased conditions than any of the simple* ALKALINE *waters.*

. . . . . .

"*Its effects are marked in causing a disappearance of* ALBUMEN *from the Urine.* In a single case of BRIGHT'S DISEASE OF THE KIDNEYS I witnessed *decided beneficial results from its use, and from its action in this case I should have great confidence in it as a remedy in certain stages of the disease.*"

Dr. GRAEME M. HAMMOND, of New York, Professor of Diseases of the Mind and Nervous System in the New York Post-Graduate Medical School and Hospital.

"In *all* cases of BRIGHT'S DISEASE of the KIDNEYS I have found BUFFALO LITHIA WATER *of the greatest service in increasing the quantity of urine and in eliminating the* ALBUMEN."

Dr. GEORGE W. MILTENBERGER, Professor of Obstetrics, University of Maryland,

Before the Medical and Chirurgical Faculty of the State of Maryland, recommended BUFFALO LITHIA WATER as an ALKALINE Diuretic in ALBUMINURIA of PREGNANCY.—See *Trans. Faculty of State of Maryland*, 1886.

Dr. WM. H. DOUGHTY, Professor of Materia Medica and Therapeutics, Medical College of Georgia; Member of American Medical Association, etc.

"Over the NAUSEA AND VOMITING OF PREGNANCY, PARTICULARLY IN THE LATTER MONTHS, WHERE URÆMIC CONDITIONS are possibly established, and in PUERPERAL CONVULSIONS, URÆMIA CO-EXISTING, BUFFALO LITHIA WATER often exerts *marked control.*"

Dr. CALEB WINSLOW, 23 McCulloh Street, Baltimore, Member of the Medical and Chirurgical Faculty of Maryland.

"I have found the BUFFALO LITHIA WATER, Spring No. 2, of marked service in relieving the *Nausea* of *Pregnant Women.* I frequently resort to it at intervals *during the whole course of Pregnancy.* Being *antacid, laxative, diuretic, and tonic, it seems well adapted to relieve the disturbances usually attendant upon Gestation, and I have no doubt its free use might remove* URÆMIC POISON, *and prevent Convulsions produced thereby.*"

Dr. JOS. HOLT, New Orleans, President Board of Health, State of Louisiana.

"I have prescribed BUFFALO LITHIA WATER freely in affections of the *Kidneys* and *Urinary* passages, particularly in GOUTY *subjects.* in ALBUMINURIA, and in irritable conditions of the *Bladder* and *Urethra* in *females.* The results have been such as to satisfy me *of the extraordinary value of this Water in a large class of cases usually most difficult to treat.*"

Dr. JAMES B. McCAW, Professor of the Practice of Medicine in the Virginia Medical College.

[Extract from the Proceedings of the Richmond Academy of Medicine, October 15, 1878.]

"Dr. McCaw also spoke of the great value of BUFFALO LITHIA WATER in ALBUMINURIA of *Scarlet Fever* and in ALBUMINURIA of *Pregnant Women.*"

Dr. J. T. DAVIDSON, New Orleans, La., ex-President New Orleans Surgical and Medical Association.

"I have for several years prescribed BUFFALO LITHIA WATER, Spring No. 2, in all cases of *Scarlet Fever*, directing it to be drunk *ad libitum, with the effect of relieving all traces of* ALBUMEN *in the urine*, and have found it equally efficacious in renal diseases requiring the use of alkaline water."

Dr. G. W. SEMPLE, Hampton, Va., President Medical Society of Virginia.

"In SCARLET FEVER I have known BUFFALO LITHIA WATER *restore a healthy and abundant secretion of Urine, when it was highly charged with* ALBUMEN *and the secretion almost suppressed.*"

Dr. MARTIN L. JAMES, of Richmond, Va., Professor of Materia Medica and Therapeutics, Medical Society of Virginia.

[Proceedings of the Richmond, Virginia, Academy of Medicine, December 16, 1880.]

"The President of the Academy, Dr. M. L. James, reported a case of *Congestion* of the *Kidneys* in a lady eight months advanced in *Pregnancy, attended by marked Œdema*, both over the extremities and surface, and by URÆMIC POISONING *to such an extent as very seriously impaired the vision of the patient*, relieved by the free use of this Water for three weeks.

"Other remedies, he stated, were used in these cases, *but the favorable results seemed clearly attributable to the action of the Water.*"

Dr. HARVEY L. BYRD, of Baltimore, President and Professor of Obsetrics and Diseases of Women and Children in the Baltimore Medical College, formerly Professor of Practical Medicine, etc.

"I have prescribed BUFFALO LITHIA WATER with the most satisfactory results, both as a *remedy* and *prophylactic* in the *Parturient* or *Pregnant Puerperal Eclampsia* or *Convulsions; and I may say that I know of no remedy of equal efficacy with the Water of Spring No. 2 in Sequelæ of Scarlatina.*

"It has an *ascertained value* in BRIGHT'S DISEASE. *A knowledge of its action in that disease thus far would seem* to warrant the belief that it would, in many instances, *at least in its early stages, arrest it entirely, and in its more advanced stage prove a decided comfort and palliative.*

Water in cases of one dozen half-gallon bottles, $5.00 per case at the Springs.

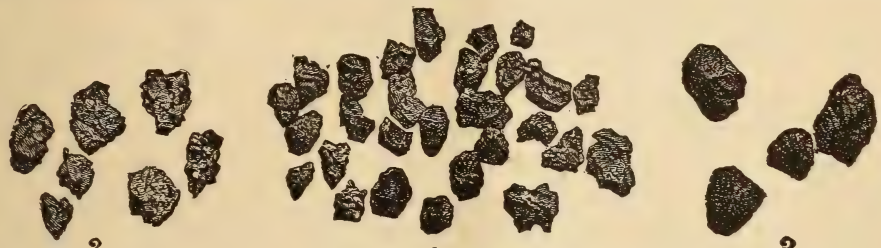
Buffalo Lithia Water

In the TREATMENT OF URINARY DEPOSIT.

Case of Dr. B. J. WEISTLING, of Middleton, Pa., stated by himself.

"Experience in its use in **STONE in the BLADDER** in my own person enables me to attest the efficacy of the **BUFFALO LITHIA WATER** in this painful malady. After having been long subjected to sufferings, the intensity of which cannot be described, I have, under the influence of this Water, passed an ounce of **CALCULI (URIC ACID)**, some of which weighed as much as four grains, affording inexpressible relief and leaving me in a condition of comparative ease and comfort.

"On one occasion I passed thirty-five **CALCULI** in forty-eight hours. The appearance of these **CALCULOUS NUCLEI** indicates unmistakably, I think, that they were all *component particles of one large* **CALCULUS** *destroyed by the action of the Water, by means of solution and disintegration.* At my advanced period of life (I am seventy-seven years and six months of age), and in my feeble general health, a surgical operation was not to be thought of, and the Water seems to have accomplished all that such an operation, if successful, could have done."



[The above plate is from a photograph, and represents the exact size and shape of some of the Calculi passed by Dr. Weistling. They were preserved by his son, Dr. J. Weir Weistling.]

Case stated by Dr. G. HALSTED BOYLAND, late Professor of Surgery, Baltimore Medical College, Member American Medical Association.

"The case of Mr. C., which came under my observation as Resident Physician at the Springs during the season of 1884, affords undoubted evidence that Buffalo Lithia Water is a **SOLVENT** *for Urinary Deposit*, commonly known as **STONE in the BLADDER.** He was operated upon for **STONE**, the operation affording but partial and temporary relief. A year afterward he visited the **BUFFALO LITHIA SPRINGS**, at the same time passing small quantities of a *Urinary Deposit*, of the **TRIPLE PHOSPHATE of AMMONIA** and **MAGNESIA VARIETY**, and his sufferings such as required that he should be kept constantly under the influence of opiates. In some eight weeks the solvent properties of the Water *were evident in the diminished consistency of the deposit, the increased quantity discharged, and by its change from Concrete Lumps to fine Sand*, which he discharged to the amount of *Four Ounces.* After a time, however, the quantity gradually diminished, and finally ceased, and he left the Springs *with the deposit dissolved* and *washed out of the system*, and the *Diathesis fons et origi morbi* altered. There had been a disappearance of the attending distressing symptoms, and great improvement in his general condition."

Dr. MARTIN L. JAMES, of Richmond, Va., Professor of Materia Medica and Therapeutics, Medical Society of Virginia.

[Proceedings of the Richmond, Virginia, Academy of Medicine, December 16, 1880.]

"The President of the Academy, Dr. M. L. James, reported three cases of marked **URIC ACID DIATHESIS** successfully treated by the Water of Spring No. 2 of the **BUFFALO LITHIA SPRINGS** of Virginia. In one of these patients there were, as a result of this Diathesis, **SANDY DEPOSITS** in the *Urine, Inflammation of the Kidneys, Irritability of the Bladder, and Hæmaturia*, and, finally, the passage of a **CALCULUS** of the size of a cherry, formed on a blood-clot as a nucleus. In another case there were frequent attacks of **NEPHRITIC COLIC**, attended by **SANDY DEPOSITIONS** in the urine. After the free use of this Water in these cases, no further manifestations of the disorder occurred."

Dr. HENRY M. WILSON, of Baltimore, ex-President Medical and Chirurgical Faculty of Maryland.

"My experience in the use of the **BUFFALO LITHIA WATER** has not been large, *but it is of such a positive character that I do not hesitate to express my preference for it, as a* **DIURETIC** in **URINARY CALCULI**, *over all other waters that I have ever used.*"

Water in cases of one dozen half-gallon bottles, $5 per case, at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University, and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 < {}^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on pplication.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and our grains to eac pill.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medica Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

Platt's Chlorides

THE HOUSEHOLD

DISINFECTANT

Platt's Chlorides is an odorless, colorless, saturated solution of those chloride salts which have proven most reliable and acceptable as deodorants, disinfectants, and antiseptics; is at once clean, powerful and stainless (contains no mercury), and is especially designed for the hygienic uses of the physician and the practical domestic uses of the housekeeper. It destroys the vitality of bacteria or disease-producing germs, while it is not dangerous or disagreeable, the least possible labor is involved in its use, and it is supplied at very slight cost.

It is sold in quart bottles by druggists everywhere, price 50 cents. But as this concentrated liquid admits of dilution, according to the directions on each bottle, with from four to twelve times its bulk of water, each quart bottle really represents about three gallons of disinfectant strong enough for general uses.

From the fact that so many thousands of physicians indorse the preparation and have found it an article of more than ordinary value and usefulness, we believe that in every sick-room, whether the disease be contagious or not, the use of this odorless disinfectant is of every-day utility and sanitary assistance, and does prove an aid and blessing to the patient, and a comfort and protection to the attendants.

To any physician who for any reason may be still unfamiliar with the practical value of Platt's Chlorides a sample will be sent, by express, prepaid, on request.

Address, giving both Post and Express Offices.

HENRY B. PLATT,

36 Platt St., New York.

No Chemicals.

W. BAKER & CO.'S Breakfast Cocoa

Is Absolutely Pure, and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa

is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

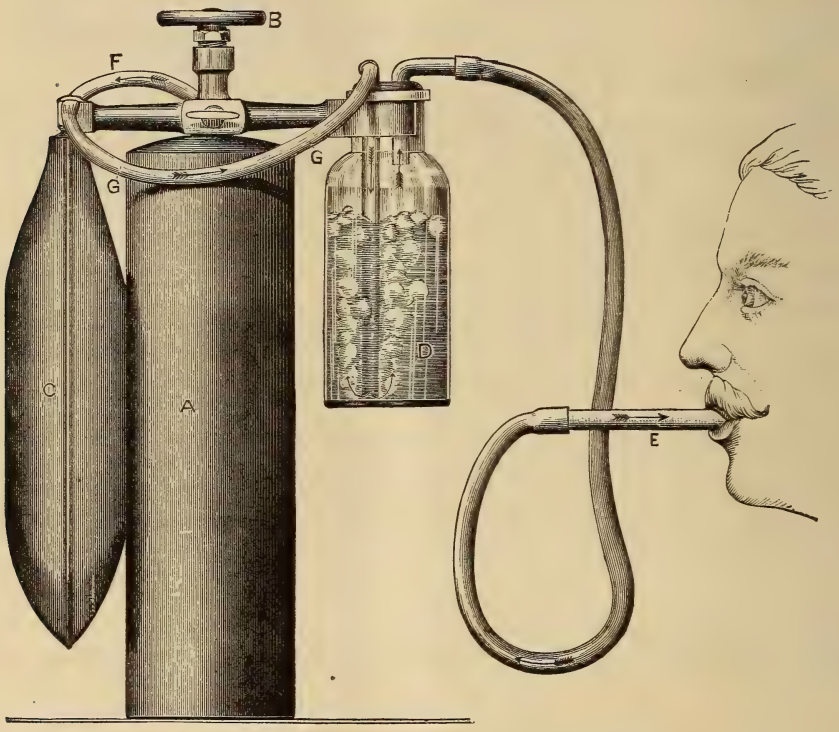
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE S. S. WHITE DENTAL MFG. CO.,

PHILADELPHIA, NEW YORK, BOSTON, CHICAGO, BROOKLYN.

McARTHUR'S SYRUP.

(SYR: HYPOPHOS: COMP: C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

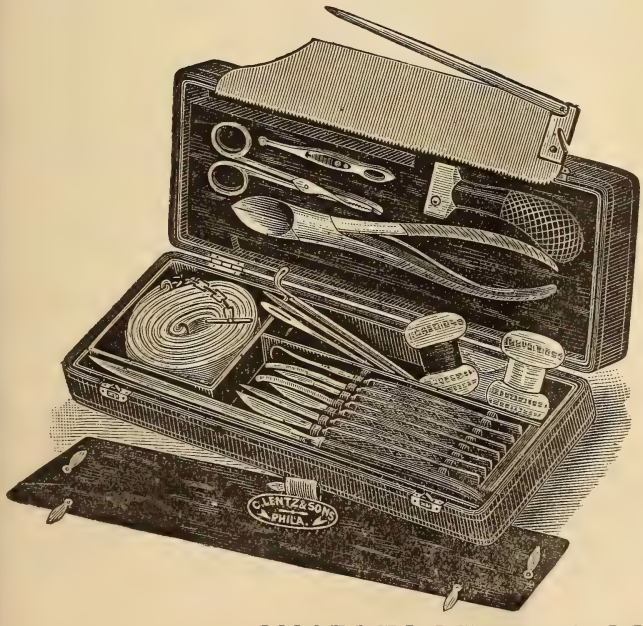
℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION**, sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

Mention this Journal. McARTHUR HYPOPHOSPHITE CO., BOSTON, MASS.



LENTZ'S NEW COMPACT OPERATING SET No. 10.

One Amputating Knife (Leg and Arm). One Finger Knife. One Hernia Knife. One Sharp Curved Bistoury. Two Scalpels. One Tenotome. One Tenaculum. One pair Scissors, curved or flat. One Saw, 9-inch blade. One Liston's Spring Bone Forceps. One Artery and Needle Forceps, improved. One Dressing Forceps. One Esmarch's Flat Rubber Tourniquets, with Chain. One Director, with Aneurism Needle. Two Silver Probes. Silk, Wire, Wax, and Needles.

The above instruments are put up in a fine Morocco Case with nickel trimmings, lined with velvet, and has extra space for Trephine and Elevator, if desired. With the *sixteen* instruments contained in this case, any ordinary operation may be performed.

Size, 11 in. long, 4 in. wide, 2 in. high

Price, $25. With Trephine and Handle and Trephine Elevator in addition, $29.65. We also make the above case with hard rubber antiseptic handles on knives and saw. Price, $29.00. With Trephine and Elevator in addition, $33.65.

Discount 25 pr. ct. to Physicians

23291 DOCTORS

As far as we can ascertain from their letters and our agents' reports, prescribe Lactated Food. Those who once see its effects prescribe it wherever an easily assimilated and highly nutritious food is indicated, for either infants or invalids.

USE LACTATED FOOD

For it contains neither cane sugar nor starch; its base is sugar of milk; it is a cooked, pre-digested, non-irritating food. The great variety of palatable ways in which it may be prepared renders it specially valuable in convalescence.

SEND FOR FREE SAMPLE

If you are yet unacquainted with the merits of Lactated Food. We will forward, charges paid, on request, with interesting literature.

WELLS, RICHARDSON & CO., Burlington, Vt.

THE SUSTAINED SUPREMACY

OF

Fairchild's Pepsin,

In ACTIVITY, PERMANENCE and GENERAL EXCELLENCE

Has won for this product a wide use and recognition in all the principal markets of the world.

We guarantee it to be unchangeable, to maintain its activity and quality under all ordinary commercial conditions; it is therefore, by far the most available for the dispensing counter, as well as in the manufacture of every form of pepsin preparation.

Under exactly parallel conditions, with any proper percentage of acidity and with any proportion of such acidulated water to the albumen, Fairchild's pepsin is positively superior to any pepsin known.

It will, under absolutely comparative conditions, grain for grain, digest more albumen than any other pepsin made.

We will be pleased to send samples to any physician who may wish to ascertain for himself the relative activity of Fairchild's pepsin, or to submit it to any practical trial.

Prices and complete information upon application.

Geo Hamlin Pres't Chas Roome Parmele Treas.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay, and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully,

L. WOLFF, M.D.,
Demonstrator of Chemistry, Jefferson Medical College.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. A NON-ALCOHOLIC LIQUID. WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

PHILADELPHIA.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality in Boston,	25.60	per	1000.
" of Women in Boston,	29,00	"	"
" in **Murdock's Free Surgical Hospital,**	**5.00**	"	"
" New York,	26.32	"	"
" Philadelphia,	20.00	"	"
" Chicago,	20.90	"	"
" St. Louis,	20.49	"	"

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

Murdock Liquid Food Co., Boston.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron,** is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

"Aconitine produces marvelous effects in the treatment "of *facial neuralgias* when they are not symptomatic of "intracranial tumor."—*Society of Biology of Paris, Meeting "of the 28th February, 1880.*

Dose—Take 3 to 6 pills during the twenty-four hours.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

BEDFORD SPRINGS, MASS.

The Curd of Cow's Milk

Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

Doliber-Goodale Co., Boston, Mass.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

MEDICAL DEPARTMENT

The 123d ANNUAL WINTER SESSION will begin Monday, Oct. 1st, at 12 M., and continue 7 months.

The PRELIMINARY SESSION begins Monday, September 17th, the SPRING TERM Monday, May 6th, 1889.

The Curriculum is graded, and three annual Winter Sessions are required. Practical instruction, including laboratory-work in Chemistry, Histology, Osteology, and Pathology, with Bedside Instruction in Medicine, Surgery, and Gynæcology are a part of the regular course and without additional expense.

For catalogue and announcement containing particulars, apply to DR. JAMES TYSON, Sec'y,
36th and Woodland Ave., Phila.

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S, and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY'S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures.

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

For further particulars, and for College Circular, apply to

PHILADELPHIA.

SPORTING AND ATHLETIC GOODS OF EVERY DESCRIPTION.

The only prominent Emulsion of Cod-Liver Oil introduced directly to the medical profession. It is advertised exclusively in medical journals.

HYDROLEINE.

(HYDRATED OIL.)

Produces rapid increase in Flesh and Strength.

FORMULA.—Each Dose contains:			
Pure Cod Liver Oil.....80 m. (drops)		Soda.....1-3 Grains.	
Distilled Water.....35 "		Salicylic Acid.....1-4 "	
Soluble Pancreatin..... 5 Grains.		Hyocholic Acid.....1-90 "	

Recommended and Prescribed by EMINENT PHYSICIANS Everywhere. It is pleasant to the Taste and acceptable to the most delicate Stomach.

IT IS ECONOMICAL IN USE AND CERTAIN IN RESULTS.

HYDROLEINE (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhuæ, but a hydro-pancreated preparation, containing acids and a small percentage of soda. Pancreatin is the digestive principle of fatty foods, and in the soluble form here used, readily converts the oleaginous material into assimilable matter, a change so necessary to the reparative process in all wasting diseases.

The following are some of the diseases in which **HYDROLEINE** is indicated:

Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis, General Debility, etc.

TO BRAIN WORKERS of all classes, **HYDROLEINE** is invaluable, supplying as it does, the true brain-food, and being more easily assimilated by the digestive organs than any other emulsion.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," and "Consumption and Wasting Diseases," by two distinguished London physicians, which will be sent free on application.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE UNITED STATES. 115 FULTON STREET, N. Y.

A Sample of Hydroleine will be sent free upon application, to any physician (enclosing business card) in the U. S.

CANVASSERS WANTED

Any doctor, or member of a doctor's family, who would like to canvass for subscribers to the REPORTER.

Carnrick's Soluble Food

Is the nearest approach to Human Milk that has thus far been produced.

During the past season a large number of Physicians and eminent Chemists visited our Laboratory at Goshen, N. Y., and witnessed every detail connected with the production of Carnrick's Soluble Food. This invitation to witness our process is continuously open to Physicians and Chemists. All expenses from New York to Goshen and return will be paid by us. The care used in gathering the milk, its sterilization, and the cleanliness exercised in every step, cannot be excelled.

Pancrobilin.

Prepared (in both Liquid and Pill form) from Extract of Pancreas and Bile.

This preparation is designed expressly to increase the digestion and absorption of fats.

We believe that the fat-digesting properties of pancreatine and bile are inseparable, and that without their union in the intestinal tract but little, if any, fat would be digested and absorbed.

PANCROBILIN will be found of great service in *Phthisis and other wasting diseases, Nervous Prostration, Constipation, Inanition, Malnutrition, Intestinal Indigestion,* and wherever there is a failure to assimilate fats.

If the skin is first wet with LIQUID PANCROBILIN, the inunction of oils will be greatly facilitated.

LIQUID PANCROBILIN is put up in pound bottles.

PILL PANCROBILIN is put up in bottles holding 100 pills. The coating of the pills will resist acid digestion when given as directed, but will be quickly dissolved in the alkaline secretions of the duodenum.

Phospho-Caffein Comp.

(*Granular Effervescing.*)

Formula for each dessertspoonful:—

Caffein.
Acidi Phosphorici, ää, gr. ss.
Antipyrin.
Ext. Apii Grav. dulc. (*Celery*), *ää gr. i.*
Sodii Bromidi, gr. v.

The satisfactory results produced by PHOSPHO-CAFFEIN COMP. in *Headaches, Neuralgia, Insomnia, Neurasthenia, and general Nervous Irritability,* are not due to the effect of any one ingredient, but to the happy effect of the combination. A thorough series of comparative tests have demonstrated the superiority of the above formula over any other in the market.

REED & CARNRICK, New York.

Champagne ANALYZED

Of Interest to all Medical Practitioners.

WHAT IS SAID BY

THOMAS KING CHAMBERS, M.D., F.R.C.P.
R. OGDEN DOREMUS, M.D.
F. W. PAVY, M.D., F.R.S.

"Champagne, with a minimum of alcohol, is by far the wholesomest, and possesses remarkable exhilarating power."—THOMAS KING CHAMBERS, M.D., F.R.C.P.

"Having occasion to investigate the question of wholesome beverages, I have made a chemical analysis of the most prominent brands of Champagne. I find G. H. Mumm & Co.'s Extra Dry to contain, in a marked degree, less alcohol than the others I therefore most cordially commend it not only for its purity but as the most wholesome of the Champagnes."—R. OGDEN DOREMUS, M.D., *Professor of Chemistry, Bellevue Hospital Medical College, New York.*

"Champagne, while only possessing the alcoholic strength of natural wines, is useful for exciting the flagging powers in case of exhaustion"—F. W. PAVY, M.D., F.R.S., *Lecturer on Physiology at Guy's Hospital, London.*

The remarkable vintage of 1884 of **G. H. MUMM & CO.'S EXTRA DRY CHAMPAGNE,** the finest for a number of years, is now imported into this market, and pronounced by connoisseurs unsurpassed for excellence and bouquet.

ARTIFICIAL LEGS AND ARMS
WITH
RUBBER FEET AND HANDS.

Although a man may meet with the misfortune of having both his legs severed from his body, he is not necessarily helpless. By having artificial legs applied, with rubber feet attached, he can be restored to his usefulness.

Fig. 2 is from an instantaneous photograph of a man ascending a ladder; he has two artificial legs substituting his natural ones, which were crushed by a railroad accident and amputated.

Fig. 1 exposes his stumps. With his rubber feet he can ascend or descend a ladder, balance himself on the rungs, and have his hands at liberty. He can walk and mingle with persons without betraying his loss; in fact, he is restored to his former self for all practical purposes.

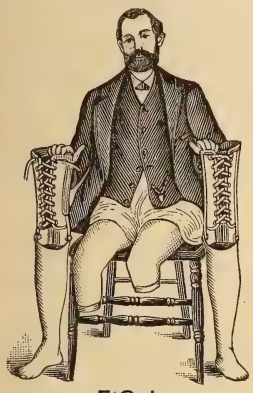

FIG. 1.

With the old methods of complicated ankle-joints these results could not be so thoroughly attained.

Over nine thousand in practical use, scattered in all parts of the world. Many of these have been supplied without presenting themselves to us, simply by sending measurements on a copyright formula which any one can easily fill out. The press, eminent surgeons, and competent judges in many parts of the world have commended the rubber foot and hand for their remarkable advantages.

Awarded the highest prizes at every competitive exhibition.

Endorsed and purchased by the U. S. Government for pensioners of the army and navy.

A treatise of 400 pages and copyright formula, *sent free.*

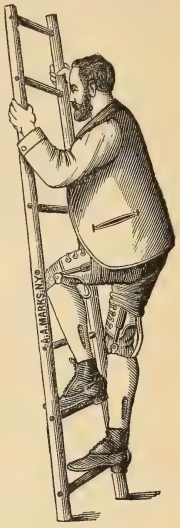

FIG. 2.

A. A. MARKS,

701 BROADWAY, NEW YORK CITY.

CALIFORNIA VINTAGE CO.
21 PARK PLACE N.Y.

Geo Hamlin Prest. Chas Roome Parmele Treas.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay, and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully,

L. WOLFF, M.D.,
Demonstrator of Chemistry, Jefferson Medical College.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University, and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 < \overset{O.C_2H_5}{NH(CO—CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on pplication.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and our grains to eac pill.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality in Boston,	25.60	per	1000.
" of Women in Boston,	29,00	"	"
" in **Murdock's Free Surgical Hospital,**	**5.00**	"	"
" New York,	26.32	"	"
" Philadelphia,	20.00	"	"
" Chicago,	20 90	"	"
" St. Louis,	20.49	"	"

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

Murdock Liquid Food Co., Boston.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR.

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

ST. LOUIS, MO.

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request.

EFFERVESCENT

BROMO-PYRINE.

Containing in Each Heaping Teaspoonful:

Caffein Hydrobromate, . 1 Gr.
Antipyrene, ... 3 Grs.
Sodium Bromide, . . 15 Grs.

Special Combinations Speedily and Carefully Prepared.

PREPARED SOLELY BY

HENRY K. WAMPOLE & CO.

Manufacturing Chemists,

PHILADELPHIA, PA.

No Chemicals.

W. BAKER & CO.'S Breakfast Cocoa

Is Absolutely Pure, and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

W. Baker & Co., Dorchester, Mass.

EFFERVESCENT SPECIALTIES

WM. R. WARNER & CO.'S
TRIPLE
(Effervescent)
BROMIDES

Advantages:—Useful in Headache, Nervousness, Sleeplessness, Migraine, Diurnal Epilepsy, Etc.

℞ Sodium Brom. grs. 15.
Potassium Brom. grs. 10.
Ammonium Brom. grs. 5.

Administer one teaspoonful in half a glass of water. Drink while effervescing. In Diurnal Epilepsy take a dessertspoonful three times daily until sense of taste is partly destroyed; after this reduce the frequency of dose, but keep the fauces in a benumbed condition.

WM. R. WARNER & CO.'S
CHALYBEATE
(Effervescent)
SALINE
(Ferric Saline Effervescens, Dr. Means)

℞ 1 gr. Citro-tartrate of Iron and 20 grs. of Soda.

DOSE.—A heaping teaspoonful of the salt, containing 1 gr. Citro-tartrate of Iron and 20 grs. of Soda, to be taken in a glass two-thirds full of water and drunk while effervescing. If a more decided effect is desired, warm instead of cold water may be used. In all cases this draught should be taken but once or twice a day, and then on an empty stomach, preferably before breakfast. No restrictions as to diet. One or two Pil. Digestiva (W. & Co.) may be taken at noon, before eating, as a dinner pill.

WM. R. WARNER & CO.'S
(ANTIPYRINE ET SODIUM SALICYLATE)
ANTALGIC
(Effervescent)
SALINE

℞ Antipyrine, 4 grs. Salicylate of Soda, 4 grs.
In each dessertspoonful.

DOSE.—One dessertspoonful, to be repeated as often as the case may require Almost a specific in Neuralgic Headache. Prescribed in all cases where Antipyrine is used, with more better and more certain results.

WM. R. WARNER & CO.'S
APERIENT
(Effervescent)
SALINE

A pleasant and excellent aperient and refrigerant, very acceptable to the stomach. Given in all cases indicating the need of an active aperient, and to be given daily to all patients under treatment with Dosimetric therapeutics. (See Wm. R. Warner & Co.'s Dosimetric Granules.)

DOSE.—One tablespoonful in half a glass of water.

PREPARATIONS SUPPLIED BY ALL LEADING DRUGGISTS.

☞Samples of the above Salts furnished upon request.

The Curd of Cow's Milk
Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea. suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month: thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

WILLIAM SNOWDEN,
Manufacturer, Importer and Exporter of Surgical Instruments,
No. 7 SOUTH ELEVENTH STREET, PHILADELPHIA

McARTHUR'S SYRUP.

(SYR: HYPOPHOS: COMP: C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children, the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION**, sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

Mention this Journal. McARTHUR HYPOPHOSPHITE CO., BOSTON, MASS.

THE SUSTAINED SUPREMACY

OF

Fairchild's Pepsin,

In ACTIVITY, PERMANENCE and GENERAL EXCELLENCE

Has won for this product a wide use and recognition in all the principal markets of the world.

We guarantee it to be unchangeable, to maintain its activity and quality under all ordinary commercial conditions; it is therefore, by far the most available for the dispensing counter, as well as in the manufacture of every form of pepsin preparation.

Under exactly parallel conditions, with any proper percentage of acidity and with any proportion of such acidulated water to the albumen, Fairchild's pepsin is positively superior to any pepsin known.

It will, under absolutely comparative conditions, grain for grain, digest more albumen than any other pepsin made.

We will be pleased to send samples to any physician who may wish to ascertain for himself the relative activity of Fairchild's pepsin, or to submit it to any practical trial.

Prices and complete information upon application.

Platt's Chlorides

THE HOUSEHOLD DISINFECTANT

Platt's Chlorides is an odorless, colorless, saturated solution of those chloride salts which have proven most reliable and acceptable as deodorants, disinfectants, and antiseptics; is at once clean, powerful and stainless (contains no mercury), and is especially designed for the hygienic uses of the physician and the practical domestic uses of the housekeeper. It destroys the vitality of bacteria or disease-producing germs, while it is not dangerous or disagreeable, the least possible labor is involved in its use, and it is supplied at very slight cost.

It is sold in quart bottles by druggists everywhere, price 50 cents. But as this concentrated liquid admits of dilution, according to the directions on each bottle, with from four to twelve times its bulk of water, each quart bottle really represents about three gallons of disinfectant strong enough for general uses.

From the fact that so many thousands of physicians indorse the preparation and have found it an article of more than ordinary value and usefulness, we believe that in every sick-room, whether the disease be contagious or not, the use of this odorless disinfectant is of every-day utility and sanitary assistance, and does prove an aid and blessing to the patient, and a comfort and protection to the attendants.

To any physician who for any reason may be still unfamiliar with the practical value of Platt's Chlorides a sample will be sent, by express, prepaid, on request.

Address, giving both Post and Express Offices.

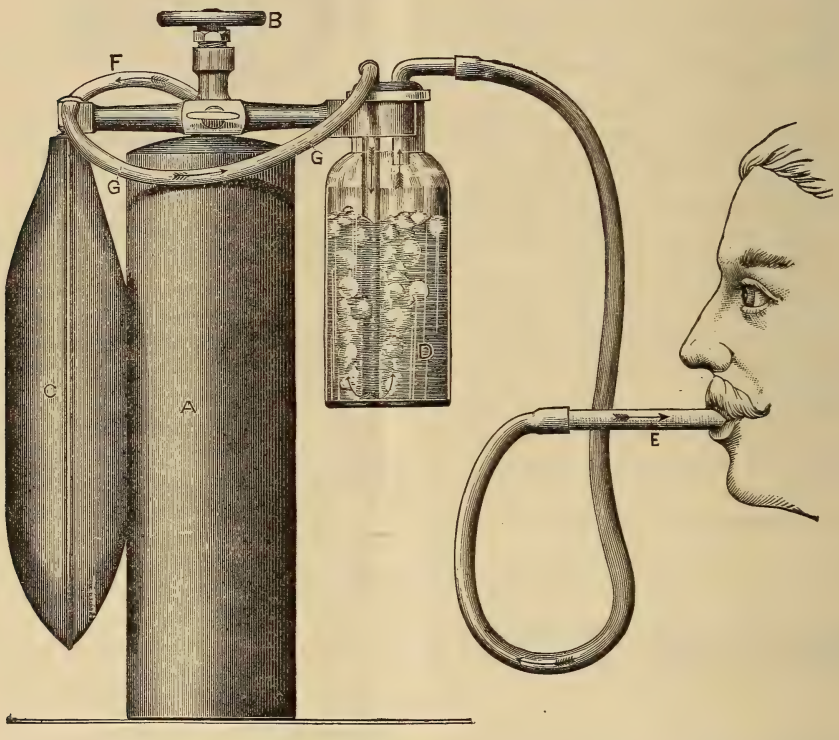
HENRY B. PLATT,

36 Platt St., New York.

INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

☞ Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

PHYSICIANS' LEDGER

Think how much time you spend every year over your accounts, and what a bother it is to make out your bills!

Now, one of the great merits of

The Model Ledger

is that it enables a physician to make out his bills with great ease. Beside this, it tells at a glance just how much he has earned in any quarter; how much he has received; and how much is still due him. These are all good things for a doctor to know.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medica Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

BUFFALO LITHIA WATER

IN THE

Uric Acid Diathesis, Bright's Disease of the Kidneys, Chronic Inflammation of the Bladder, &c.

Dr. THOMAS H. BUCKLER, of Paris (formerly of Baltimore), SUGGESTER OF LITHIA as a Solvent for URIC ACID.

"Nothing I could say would add to the **WELL-KNOWN REPUTATION OF THE BUFFALO LITHIA WATER. I HAVE FREQUENTLY USED IT WITH GOOD RESULTS IN URIC ACID DIATHESIS, RHEUMATISM AND GOUT,** and with this object I have ordered it to Europe from Coleman & Rogers, of Baltimore. Lithia is in no form so valuable as where it exists in the Carbonate (the form in which it is found in the **BUFFALO LITHIA WATER**), Nature's mode of solution and division in water which has passed through Lepedolite and Spondumine Mineral formation."

Dr. WM. A. HAMMOND, of New York, Surgeon-General U. S. Army (Retired), Professor of Diseases of the Mind and Nervous System in the University of New York, &c.

"I have for some time made use of the Buffalo Lithia Water in cases of affections of the **NERVOUS SYSTEM,** complicated with **BRIGHT'S DISEASE OF THE KIDNEYS** or with a **GOUTY DIATHESIS.** The results have been eminently satisfactory. Lithia has for many years been a favorite remedy with me in like cases, but the **BUFFALO WATER CERTAINLY ACTS BETTER THAN ANY EXTEMPORANEOUS SOLUTION OF THE LITHIA SALTS,** and is, moreover, better borne by the Stomach. I also often prescribe it in those cases of **CEREBRAL HYPERÆMIA** resulting from over-mental work—in which the condition called **NERVOUS DYSPEPSIA EXISTS**—and generally with marked benefit."

HUNTER McGUIRE, M.D., LL.D., Late Professor of Surgery, Medical College of Virginia, Richmond.

"**BUFFALO LITHIA WATER,** *Spring No. 2,* as an **ALKALINE DIURETIC,** *is invaluable.* In **URIC ACID GRAVEL,** *and, indeed,* in *diseases generally dependent* upon a **URIC ACID DIATHESIS,** *it is a remedy of extraordinary potency.* I have prescribed it in cases of **RHEUMATIC GOUT,** *which had resisted the ordinary remedies, with wonderful good results.* I have *used it also in my own case, being a great sufferer from this malady, and have derived more benefit from it than from any other remedy.*"

Dr. ROBERT BATTEY, of Georgia, SUGGESTER OF BATTEY'S OPERATION.

"I would state that I have been using the Buffalo Lithia Water, No. 2, in my practice for three years past, in cases of **CHRONIC INFLAMMATION** of the **BLADDER,** whether induced by **STONE,** by enlarged **PROSTATE** in the aged, or by **NEGLECTED GONORRHŒA, AND HAVE SECURED EXCELLENT RESULTS,** which encourages me to prescribe it for the future."

Dr. CYRUS EDSON, of New York,
Chief Inspector of Cutaneous Diseases in Health Department and President of the Board of Pharmacy.

"I have frequently made use of **BUFFALO LITHIA WATER,** Spring No. 2, in my practice, *with excellent results.* It is a potent remedy in correcting **RHEUMATIC DIATHESIS.** In a case of **URIC ACID GRAVEL,** in which I recently prescribed it, **ITS BENEFICIAL EFFECTS WERE APPARENT AFTER THE THIRD DOSE.** I have also prescribed it with great benefit in **BRIGHT'S DISEASE OF THE KIDNEYS.**"

Water in Cases of one dozen half-gallon Bottles, Five Dollars per Case, at the Springs.

PHILADELPHIA.

COMPRESSED TABLETS.

WE ask the attention of Physicians to the annexed list of recent additions of Compressed Tablets, as we think all of them are well deserving the careful attention of practitioners. We would be pleased to send to any physician, circular matter, compiled with great care and accuracy, giving therapeutic value and results in a concise form, that we are confident will be of interest, and possibly of advantage, to medical men who have not yet had access to the foreign and home authorities from which we have culled the information we give.

Acid Boracic, ... 5 grs.
Acetanilide, ... 3 and 5 "
Antifebrin, ... 3 " 5 "
Antipyrine, ... 3, 5 " 10 "
Blaud's
Ferri. Sulph. Exsic., 2 grs., Potass. Carb., 1 4-5 grs., Sacch. Alb., 1⅔ grs.
Iodol. . . . . ½, 1, 2, 3, and 5 grs.
Manganese Binoxide, ... 1 " 2 "
Opium, Camphor and Carb. Ammon., Opium Denarcot. ½ gr., Camphor, 2 grs., Ammon. Carb., 2½ grs.
Quinia Tannate, and Chocolate 1 grain, Quiniæ Tannat. 1 gr., Ext. Cacao, 9 grs.
Quinia Tannate and Chocolate, 2½ grs., Quiniæ Tannat. 2½ grs., Ext. Cacao, 7½ grs.
Salol, ... 2½ and 5 grs.
Sodium Succinate, ... 2 " 5 "
Thalline Sulphate, ... 2, 3 " 5 "
Trinitrin (Nitro-Glycerin), 1-20, 1-25, 1-33, 1-50, 1-100, and 1-200 gr.
Terpin Hydrate, ... 2, 3 and 5 grs

ANTISEPTIC TABLETS.

7.7 Hydrarg. Chlor. Corros., 7.3 Ammonium Chloride.

More than six months since, we sent a circular to the drug trade, stating that we had discontinued the manufacture of the Antiseptic Tablets introduced by us several years since at the suggestion of Dr. Charles Meigs Wilson, of this city. We have, however, received so many letters from physicians urging us to resume the manufacture, insisting that the Tablets prepared by us dissolved more readily and were more satisfactory than any substitute they had been able to procure, that we feel we could not ignore such persistent demands from our medical friends who have found our tablets an absolute necessity. We have therefore concluded to again prepare them, in a building entirely separate from our main establishment, with appliances and admirably devised protection by means of improved respirators, that will completely overcome any harmful effects to those engaged in their manufacture.

Druggists and physicians will be glad to learn that the Tablets as now prepared are perfectly white and free from the coloring-matter that we formerly added. This was done to lessen the danger of their being taken, or used in mistake; to guard against any such possibility, each Tablet, as now made, has the word "POISON" stamped upon it.

JOHN WYETH & BROTHER,

CHEMISTS, PHILADELPHIA.

BUFFALO LITHIA WATER

IN THE TREATMENT OF CHRONIC GASTRIC CATARRH

CLINICAL REPORTS.

CHRONIC GASTRIC CATARRH AND URIC ACID CALCULI.

A case stated by Dr. JNO. C. COLEMAN, of Scottsburg, Va., a retired Surgeon of the U. S. Navy.

"Mr. C. was for a number of years a sufferer from **CHRONIC GASTRIC CATARRH.** While his diet *was exclusively* **TEA** and **CRACKERS, BREAD** and **MILK,** *and other similar articles,* it was frequently thrown off in an undigested state soon after taking it, and at times he discharged from an empty stomach a strongly acid glairy mucus. A marked **URIC ACID DIATHESIS** supervened, consequent upon which he suffered for a period of some two years great **VESICAL IRRITATION** and possible **CYSTITIS,** attended by pain so intense and constantly present, as to require that he should be kept for the most part under the influence of opiates. After a persistent, but ineffectual exhibition of all remedies supposed to be indicated in the case, he was put for the latter affection upon the **BUFFALO LITHIA WATER,** Spring No. 2, with the happiest possible effect.

"In a few weeks, after commencing the use of it, the irritable condition of the *Bladder* was so far relieved that he was enabled to dispense entirely with the use of opiates. At the expiration of some eight weeks he had an attack of unusual severity, from which he was relieved by the discharge of a **CALCULUS,** followed at short intervals by the discharge of three others, which proved to be the termination of this trouble, as from that time there was entire subsidence of the painful symptoms described, and the *Bladder* resumed its natural state.

"While prescribed with special reference to the relief of the *Irritable Bladder,* the action of the water was not less surprisingly happy in the **GASTRIC AFFECTION,** with remarkable promptness correcting the highly acid condition of the **STOMACH,** restoring a healthy digestion and assimilation, and *tone* and *vigor* to the depressed *Nervous System.*

"In a few months he was able to eat, with perfect impunity, the coarsest articles of diet. He is now, after a lapse of several years, in robust health, having had no return of these painful maladies."

CHRONIC GASTRIC CATARRH.

Case of JOHN P. KEELING, Esq., stated by Dr. S. S. KEELING, Norfolk, Va., Member Medical Society of Virginia.

"Mr. John P. Keeling labored under **CHRONIC DYSPEPSIA,** and was always subject to attacks of *Spasmodic Gastralgia* immediately upon taking food into the stomach, which attacks were not at all amenable to treatment. Not unfrequently the stomach *rejected everything in the way of food and drink,* and he was of necessity confined to the lightest possible articles of diet, *meat and vegetables being entirely excluded.* He became so prostrated that it was with difficulty he could walk across his chamber floor, and had often to be lifted about. Such was the state of his **NERVOUS SYSTEM** *that great solicitude was felt as to his mental condition.*

"He visited Baltimore for medical aid, and was for many months under the treatment of some of the most eminent men of the profession in that city, but without beneficial result, and was finally advised that he had nothing to hope from remedies.

"Returning in an extremely critical condition to his home in the county of Princess Anne, he came under my professional care. Satisfied that medicine was unavailing in the case, I advised the **BUFFALO LITHIA WATER,** Spring No. 2. His stomach, however, was in a highly irritable condition, and I found it necessary to administer it in very small quantities; and it was at first given not exceeding an ounce at a dose, repeated at stated intervals. At the expiration of the third day the irritability of the stomach was decidedly less, and the quantity was then increased from day to day until the thirteenth day, when I found that the patient could take twelve ounces, which I regard as maximum dose at any time. Persisting in its use, on the twenty-eighth day he was free from pain, the stomach in a normal condition readily receiving both solids and liquids in moderate quantities, strength greatly increased, and nervous symptoms entirely relieved. At the expiration of the seventh week he was able to attend actively and regularly to his business on the farm. His recovery, which I regard as one of the most remarkable I ever knew of, I attribute entirely to the **BUFFALO LITHIA WATER.**"

GASTRO-INTESTINAL CATARRH.

Case of Mrs. Dr. F. J. GREGORY, of Virginia, reported by F. J. GREGORY, M.D., Keysville, Va.

"For eighteen months my wife, aged forty-one years, was a sufferer from a **GASTRO-INTESTINAL CATARRH,** which resisted my best-directed efforts at relief. The taking of the smallest quantity of the most easily-digested food on the stomach would produce an attack of *nausea and vomiting, the severity of which is seldom witnessed,* and when the stomach was free of food she would have attacks of *Gastralgia of the most excruciating nature.* She also suffered from habitual constipation, and at times with hemorrhages from the bowels. I pursued the usual line of treatment, such as simple bitters, Dilute Hydrocyanic Acid, Bismuth, etc., and called to my help two of the most skilled physicians in Southside Virginia, who supplemented my treatment with some of the newer drugs, such as **EFFERVESCING BICARB. POTASS. LACTOPEPTINE, CARLSBAD MINERAL SALTS,** etc., but with no benefit, and so her condition went on from bad to worse *until death seemed almost imminent from inanition.* I then put her on a milk diet with a glass of **BUFFALO LITHIA WATER,** Spring No. 2, every hour or so during the day, and *after the use of the first bottle improvement was marked, and before a case of it was used I regarded her cure as complete.* It has been nearly two years since, and there has been only one slight recurrence, which was a few days since, and it readily disappeared on the use of the water for a few days."

Water in cases of one dozen half-gallon bottles, $5 per case, at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University, and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit. Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 <^{O.C_2H_5}_{NH(CO—CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on pplication.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and our grains to eac pill.

PHYSICIANS' LEDGER

Think how much time you spend every year over your accounts, and what a bother it is to make out your bills!

Now, one of the great merits of

The Model Ledger

is that it enables a physician to make out his bills with great ease. Beside this, it tells at a glance just how much he has earned in any quarter; how much he has received; and how much is still due him. These are all good things for a doctor to know.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medica Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant t administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1863, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

Physician in Charge, Dr. CHARLES MEIGS WILSON

The new Hospital building situated in the centre of the city, has accommodation for twenty patients and ten private rooms. Each private room has a special nurse, electric-bells, open fire-place, and meals privately served. Pay patients may enter the Hospital at any time previous to their confinement. The hygienic arrangements and sewage of the Hospital are perfect. Ample protection is provided against fire. A limited number of free and pay beds are reserved in an isolated portion of the building for Gynaecological cases.

Two courses of instruction in practical obstetrics and in practical gynaecology are given each year commencing in April and in October. Free patients only are used for purposes of clinical demonstration.

For particulars as to the admission of patients, or the courses of instruction in obstetrics and gynaecology, apply to DR. CHARLES MEIGS WILSON, Physician in Charge, by letter or in person, at the Charity, S. W. Cor. 11th and Cherry Sts. Phila., daily at 12 o'clock noon.

Platt's Chlorides

THE HOUSEHOLD DISINFECTANT

Platt's Chlorides is an odorless, colorless, saturated solution of those chloride salts which have proven most reliable and acceptable as deodorants, disinfectants, and antiseptics; is at once clean, powerful and stainless (contains no mercury), and is especially designed for the hygienic uses of the physician and the practical domestic uses of the housekeeper. It destroys the vitality of bacteria or disease-producing germs, while it is not dangerous or disagreeable, the least possible labor is involved in its use, and it is supplied at very slight cost.

It is sold in quart bottles by druggists everywhere, price 50 cents. But as this concentrated liquid admits of dilution, according to the directions on each bottle, with from four to twelve times its bulk of water, each quart bottle really represents about three gallons of disinfectant strong enough for general uses.

From the fact that so many thousands of physicians indorse the preparation and have found it an article of more than ordinary value and usefulness, we believe that in every sick-room, whether the disease be contagious or not, the use of this odorless disinfectant is of every-day utility and sanitary assistance, and does prove an aid and blessing to the patient, and a comfort and protection to the attendants.

To any physician who for any reason may be still unfamiliar with the practical value of Platt's Chlorides a sample will be sent, by express, prepaid, on request.

Address, giving both Post and Express Offices.

HENRY B. PLATT,

36 Platt St., New York.

No Chemicals.

W. BAKER & Co.'s Breakfast Cocoa

Is Absolutely Pure, and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa

is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

A RARE OPPORTUNITY.

A lady physician died on the eleventh of this month, leaving an opening very desirable for a successor, there being

NO OTHER LADY DOCTOR IN THE CITY.

The property is in the very heart of a city of six thousand inhabitants; the practice is well established, of fifteen years existence; a well selected medical library, surgical instruments, house and office furniture complete. All for sale, together or separate, as desired. For further details, etc., etc., apply to Dr. C. N. Gleason, 1007 Arch St., Phila., or to Edward Lawrence, Admin'r, or Caleb Wheeler, of SALEM, NEW JERSEY.

For more than four years the Perfection Douche has been subjected to the severest practical tests, by experienced gynaecologist in every part of this country, no objection, in a single instance, having been made to the principles upon which it is constructed.

It provides ample and comfortable support, with a slight elevation of either the shoulders or hips, furnishes means for the prolonged application of a sufficiently large amount of hot water, and completely conveys away all the drip without risk of wetting the clothing. No other apparatus for applying hot water in the treatment of uterine and pelvic diseases combines as many desirable and practical qualities. COMFORT, CONVENIENCE, DURABILITY, AND THOROUGHNESS OF APPLICATION are its main points of excellence.

Descriptive circulars, prices, and testimonials are furnished on application. These afford satisfactory evidence of unqualified endorsement of its superior advantages, and show the high appreciation in which the instrument is held by those who have repeatedly recommended and tested its work.

Applications for the Douche or for circulars or testimonials may be made to agents, or to "THE PERFECTION DOUCHE," BOX 7, ALBANY, N. Y.

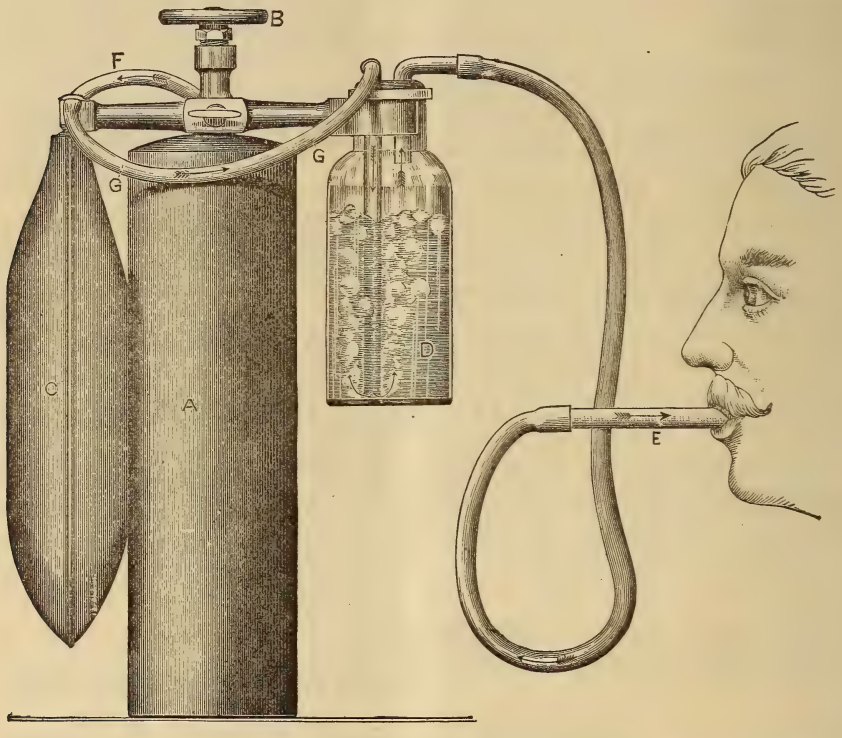
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

McARTHUR'S SYRUP.

(SYR: HYPOPHOS: COMP: C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION**, sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

Mention this Journal. McARTHUR HYPOPHOSPHITE CO., BOSTON, MASS.

THE

INS AND OUTS OF A DILEMMA.

The "INS" of the Infant Food Dilemma are the parties who are at present trying to imitate

NESTLÉ'S MILK FOOD FOR INFANTS.

The "OUTS" are the clear-headed and well-read practitioners who have used Nestlé's Food for many years, and know that when cholera infantum begins its savage onslaught on infant life in our large cities, Nestlé's Food is alone to be prescribed.

These men are in No DILEMMA; they prescribe Nestlé's Food from June to September. As the present summer will probably be a very hot one, make a note of above. Samples sent on application to

Geo Hamlin Pres't

Chas Roome Parmele Treas.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay, and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully,

L. WOLFF, M.D.,
Demonstrator of Chemistry, Jefferson Medical College.

23291 DOCTORS

As far as we can ascertain from their letters and our agents' reports, prescribe Lactated Food. Those who once see its effects prescribe it wherever an easily assimilated and highly nutritious food is indicated, for either infants or invalids.

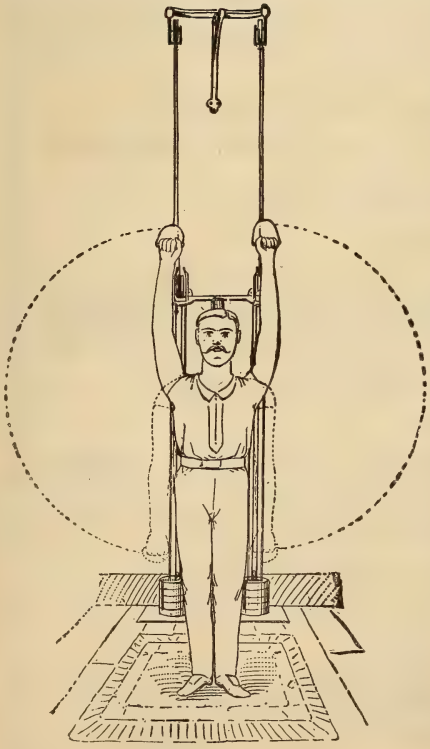
USE LACTATED FOOD

For it contains neither cane sugar nor starch; its base is sugar of milk; it is a cooked, pre-digested, non-irritating food. The great variety of palatable ways in which it may be prepared renders it specially valuable in convalescence.

SEND FOR FREE SAMPLE

If you are yet unacquainted with the merits of Lactated Food. We will forward, charges paid, on request, with interesting literature.

WELLS, RICHARDSON & CO., Burlington, Vt.



THE **Medical Profession** are cordially invited to visit our **GYMNASIUM SHOWROOM** containing over **FIVE THOUSAND DOLLARS** worth of apparatus for the **advancement of physical culture.**

Our O. K. Machine No. 2

Price, $10. Sent by Express to any part of the United States or Canada. No charge for casing.

Is endorsed by all **Physicians** who have seen it. It will develop any and every **muscle** of the body.

ADAPTED TO OLD AND YOUNG, MALE AND FEMALE.

We will mail our **Manual of Physical Culture,** together with **complete catalogue, free,** on application.

SPECIAL DISCOUNT TO THE PROFESSION.

SPORTING AND ATHLETIC GOODS OF EVERY DESCRIPTION.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. **A NON-ALCOHOLIC LIQUID.** WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

LONDON. PARIS. CALCUTTA. MONTREAL.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality in Boston,	25.60	per	1000.
" of Women in Boston,	29,00	"	"
" in **Murdock's Free Surgical Hospital,**	**5.00**	"	"
" New York,	26.32	"	"
" Philadelphia,	20.00	"	"
" Chicago,	20 90	"	"
" St. Louis,	20.49	"	"

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

Murdock Liquid Food Co., Boston.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

PARIS.—22 RUE DROUOT.—PARIS.

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY'S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25 Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

For further particulars, and for College Circular, apply to

WESTERN PENNSYLVANIA MEDICAL COLLEGE
CITY OF PITTSBURGH.

SESSIONS OF 1889—90.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, PROF. J. W. J. MCKENNAN.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

COLDEN'S LIQUID BEEF TONIC

AN INVALUABLE AID IN MEDICAL PRACTICE.

ORIGINAL | COLDEN'S LIEBIG'S LIQUID EXTRACT OF BEEF AND TONIC INVIGORATOR. | LABEL.

ESSENTIALLY DIFFERENT FROM ALL OTHER BEEF TONICS. UNIVERSALLY ENDORSED BY LEADING PHYSICIANS.

This preparation, consisting of the Extract of Beef (prepared by Baron Liebig's process), the best Brandy obtainable, soluble Citrate of Iron, Cinchona and Gentian is offered to the Medical Profession upon its own merits. It is of inestimable value in the treatment of **Debility, Convalescence from Severe Illness Anæmia, Malarial Fever, Chlorosis, Incipient Consumption, Nervous Weakness,** and maladies requiring a Tonic and Nutrient. It is quickly absorbed by the Stomach and upper portion of the Alimentary Canal, and therefore finds its way into the circulation quite rapidly.

COLDEN'S LIQUID BEEF TONIC appeals to the judgment of intelligent Physicians in the treatment of

ALL CASES OF GENERAL DEBILITY.

By the urgent request of several eminent members of the medical profession, I have added to each wineglassful of this preparation two grains of Soluble Citrate of Iron, and which is designated on the label, **"With Iron, No. 1;"** while the same preparation, **Without Iron,** is designated on the label as **"No. 2."**

In prescribing this preparation, physicians should be particular to mention *"COLDEN'S,"* viz., *"Ext. Carnis Fl. Comp. (Colden)."* A Sample of **COLDEN'S BEEF TONIC** will be sent free on application, to any physician (enclosing business card) in the United States. *Sold by druggists generally.*

HYPO-PHOS-PHITES

(SYR: HYPOPHOS: COMP: FELLOWS)

Contains **The essential elements** to the Animal Organization—Potash and Lime.

The **Oxydizing Agents**—Iron and Manganese;

The **Tonics**—Quinine and Strychnine,

And the **Vitalizing Constituent**—Phosphorus,

Combined in the form of a Syrup, with *slight alkaline reaction.*

It Differs in Effect from all others, being pleasant to taste, acceptable to the stomach, and harmless under prolonged use.

It has Sustained a High Reputation in America and England for efficiency in the treatment of Pulmonary Tuberculosis, Chronic Bronchitis, and other affections of the respiratory organs, and is employed also in various nervous and debilitating diseases with success.

Its Curative Properties are largely attributable to Stimulant, Tonic, and Nutritive qualities, whereby the various organic functions are recruited.

In Cases where innervating constitutional treatment is applied, and tonic treatment is desirable, this preparation will be found to act with safety and satisfaction.

Its Action is Prompt; stimulating the appetite and the digestion, it promotes assimilation, and enters directly into the circulation with the food products.

The Prescribed Dose produces a feeling of buoyancy, removing depression or melancholy, and hence is of great value in the treatment of MENTAL AND NERVOUS AFFECTIONS.

From its exerting a double tonic effect and influencing a healthy flow of the secretions, its use is indicated in a wide range of diseases.

Prepared by JAMES I. FELLOWS, Chemist,

48 VESEY STREET, NEW YORK.

Circulars sent to Physicians on Application.

FOR SALE BY ALL DRUGGISTS.

ARTIFICIAL LEGS AND ARMS
WITH
RUBBER FEET AND HANDS.

Although a man may meet with the misfortune of having both his legs severed from his body, he is not necessarily helpless. By having artificial legs applied, with rubber feet attached, he can be restored to his usefulness.

Fig. 2 is from an instantaneous photograph of a man ascending a ladder; he has two artificial legs substituting his natural ones, which were crushed by a railroad accident and amputated.

Fig. 1 exposes his stumps. With his rubber feet he can ascend or descend a ladder, balance himself on the rungs, and have his hands at liberty. He can walk and mingle with persons without betraying his loss; in fact, he is restored to his former self for all practical purposes.

FIG. 1.

With the old methods of complicated ankle-joints these results could not be so thoroughly attained.

Over nine thousand in practical use, scattered in all parts of the world. Many of these have been supplied without presenting themselves to us, simply by sending measurements on a copyright formula which any one can easily fill out. The press, eminent surgeons, and competent judges in many parts of the world have commended the rubber foot and hand for their remarkable advantages.

Awarded the highest prizes at every competitive exhibition.

Endorsed and purchased by the U. S. Government for pensioners of the army and navy.

A treatise of 400 pages and copyright formula, *sent free*.

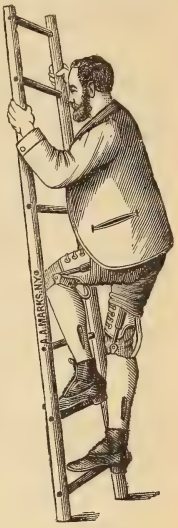

FIG. 2.

701 BROADWAY, NEW YORK CITY.

WESTERN PENNSYLVANIA MEDICAL COLLEGE
CITY OF PITTSBURGH.
SESSIONS OF 1889—90.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, PROF. J. W. J. McKENNAN.

Business correspondence should be addressed to
PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

Medical College of Ohio.

Medical Department of the University of Cincinnati.

The Seventy-first Annual Session will begin September 4, 1889, and continue until March 1, 1890.

FEES.—Matriculation Ticket, $5.00; General Lecture Ticket $75.00; Hospital Ticket, $5.00; Graduation Fee, $25.00.

For circulars, and further information, address

JAMES G. HYNDMAN, M.D., Secretary,
22 West Ninth Street, Cincinnati, Ohio.

UNIVERSITY OF PENNSYLVANIA.—Medical Department.

The 124TH ANNUAL WINTER SESSION will begin Tuesday, October 1st, 1889, at 12 M., and continue until May 1st, 1890.
The PRELIMINARY SESSION begins September 18th, 1889.

The curriculum is graded and three annual winter Sessions are required. Practical instruction, including laboratory work in Chemistry, Histology, Osteology and Pathology, with Bedside Instruction in Medicine, Surgery and Gynecology are a part of the regular course and without additional expense.

FACULTY.

JOSEPH LEIDY, M.D., LL.D., Professor of Anatomy.
D. HAYES AGNEW, M.D., LL.D., Honorary Professor of Clinical Surgery.
WILLIAM PEPPER, M.D., LL.D., Professor of Theory and Practice of Medicine, and of Clinical Medicine.
WILLIAM GOODELL, M.D., Professor of Gynecology.
JAMES TYSON, M.D., Professor of Clinical Medicine.
HORATIO C. WOOD, M.D., LL.D., Professor of Materia Medica, Pharmacy and General Therapeutics
THEODORE G. WORMLEY, M.D., LL.D., Professor of Chemistry and Toxicology.
JOHN ASHHURST, JR., M.D., Professor of Surgery and of Clinical Surgery.
EDWARD T. REICHERT, M.D., Professor of Physiology.
WILLIAM F. NORRIS, M.D., Honorary Prof. of Ophthalmology.
BARTON COOKE HIRST, M.D., } Associate Professors of
HOWARD A. KELLY, M.D., } Obstetrics.
J. WILLIAM WHITE, M.D., Professor of Clinical Surgery.
JOHN GUITÉRAS, M.D., Professor of General Pathology and Morbid Anatomy.
GEORGE A. PIERSOL, M.D., Professor of Histology and Embryology.
SAMUEL G. DIXON, M.D., Professor of Hygiene.

DR. JAMES TYSON, Dean,
36th and Woodland Avenue, Philadelphia

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 <^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on application.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to each pill.

W. H. SCHIEFFELIN & CO.,

170 & 172 WILLIAMS STREET, NEW YORK,

SOLE LICENSEES AND SOLE AGENTS FOR THE UNITED STATES

SUCCUS ALTERANS

(McDADE.)

SUCCUS ALTERANS is a purely vegetable compound of the preserved juices of Stillingia Sylvatica Lappa Minor, Phytolacca Decandra, Smilax Sarsaparilla, and Xanthoxylum Carolinianum, as collected by Dr. Geo. W. McDade, exclusively for Eli Lilly & Co., and endorsed by Dr. J. Marion Sims.

SUCCUS ALTERANS continues to gain favor from its remarkable Alterative and Tonic properties, *eliminating specific poison from the blood* and *increasing the proportion of red corpuscles in anæmic patients* to a wonderful degree; is endorsed by the medical profession, and in use by many hospitals of note.

SUCCUS ALTERANS in venereal and cutaneous diseases is fast supplanting Mercury, the Iodides, and Arsenic; and is a certain remedy for Mercurialization, Iodism, and the dreadful effects often following the use of Arsenic in skin diseases.

SUCCUS ALTERANS is also strongly recommended for its Tonic and Alterative effects in myriad forms of scrofulous disease, and in all cases where anæmia is a factor. Such patients rapidly develop a good appetite, sleep soundly, and gain flesh rapidly. Many cases are on record where patients increased ten to twenty-five pounds in weight in a few weeks.

SUCCUS ALTERANS is giving satisfactory results in treatment of *Chronic Rheumatism*, and can be used with confidence.

SUCCUS ALTERANS may be given for any length of time, without injury to the patient.

SUCCUS ALTERANS is put up in pint round amber bottles, and *never in bulk.*

PHYSICIANS who have not received Dr. McDade's latest publication, the Monographia Syphilitica, should send their address, mentioning this journal, and we will mail a copy. It contains a paper, illustrated with colored plates, by Dr. D. H. Goodwillie, of New York, on the "Sequelæ of Syphilis," reports of cases in practice, and many other valuable papers.

ELIXIR PURGANS.

Elixir Purgans (Lilly) reliably stimulates the dormant liver without undue irritation, and has gentle yet positive effect upon the alimentary tract. In Habitual Constipation, so common in Women and Children, it will be found particularly useful. Its endorsement at Bellevue and many other prominent hospitals East and West, as well as its employment in general practice by the most eminent medical men, confirms the experience of years in its use.

Each Teaspoonful Represents	
Rhamnus Purshiana, -	10 grs.
Euonymus Atropur., - -	8 grs.
Cassia Acutifolia (Purif.)	10 grs.
Iris Versicolor, - - -	4 grs.
Hyoscyamus Niger, -	2 grs.
Aromatics, etc.	

IN PRESCRIBING, PLEASE BE CAREFUL TO WRITE

ELIXIR PURGANS (LILLY),

THAT OTHER PREPARATIONS MAY NOT BE SUBSTITUTED.

HIGHLY RECOMMENDED.

We take pleasure in endorsing the Elixir Purgans (Lilly) as prepared from the above formula, for in it we find a near approach to positive *perfection* in the form of a *Liquid Cathartic*, and, from our experience with the preparation, can highly recommend it to the profession.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE**, is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

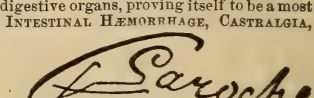
FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared Compound Extract of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

Mr. Laroche, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, Anæmia, Chlorosis, Intestinal Hæmorrhage, Castralgia, Exhaustion, Etc., Etc.

PARIS.—22 RUE DROUOT.—PARIS.



E. FOUGERA & CO., New York,

Sole Agents for the United States for the above Preparations.

What the Profession Think.

J. W. Crumbaugh, M.D., Hockessin, Del., writes: "I have to thank you, as a father, for the sample package of the Lactated Food. My youngest child was deep in the mire of cholera infantum, showing that intolerance of milk I so much dread, when your Food made its appearance. I at once prepared a watery solution of it, which he retained, and which proved to be the turning point in his case. He is now doing well. My wife wishes to join me in thanking you, and to say it was after all other of the prominent artificial foods failed, that yours succeeded so admirably."

M. W. Slocum, M.D., Buchanan, Mich., writes: "I tried Lactated Food in the case of our child, who was quite low with cholera infantum. I had tried all the kinds of food I could think of; at last I tried Lactated Food, with wonderful success. The child grew better right away, and has not been sick since.

W. W. Harris, M.D., Easonville, Ala., writes: "My own child, seven months old, had cholera infantum; its mother not supplying sufficient nourishment, I placed it on Lactated Food, and it proved altogether satisfactory."

Lactated Food contains neither cane sugar nor starch; its base is sugar of milk; it is a cooked, pre-digested, non-irritating Food. Used either with or without milk, it is best and most economical.

Prescribe Lactated Food for your little patients this summer. It will nourish them perfectly, and prevent all bowel troubles. In cholera infantum, it regulates the discharges, and is retained upon the stomach when all other foods are rejected.

Sample forwarded free to any physician unacquainted with its merits.

Wells, Richardson & Co., Burlington, Vt.

The Curd of Cow's Milk Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

Sodium Bromide, . . 15 Grs.

Special Combinations Speedily and Carefully Prepared.

PREPARED SOLELY BY

HENRY K. WAMPOLE & CO.

Manufacturing Chemists,

PHILADELPHIA, PA.

No Chemicals.

W. BAKER & CO.'S
Breakfast Cocoa

Is Absolutely Pure, and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa

is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

W. Baker & Co., Dorchester, Mass.

NON-ALCOHOLIC. NON-RESINOUS.
BLAND AND NON-IRRITATING.

Fluid Hydrastis.

A solution of definite strength and reliability, representing all the valuable constituents of the drug—the offensive and irritating resins being rejected. The only perfect representative of the drug in the fluid form within reach of the medical profession. Though often attempted, it has never been successfully imitated.

Send for our pamphlet on "Hydrastis and its Preparations."

☞ *Physicians who have been disappointed in the use of favorite Prescriptions have the remedy in their own hands.*

Prescriptions and orders should read "Wm. S. M. Chem. Co."

GREEN DRUG
FLUID EXTRACTS.

—CHARACTERISTICS.—

Uniform Strength, Convenience of administration,
Non-liability to deterioration by age,
Positive therapeutic efficacy.

The WM. S. MERRELL CHEMICAL CO. will not hold themselves responsible for the identity of Fluid Extracts, filled out by druggists from bulk stock, even though the written label may read "*Merrell's.*"

CAUTION—accept original packages only.

☞ *Read our Monograph—Green Drug Fluid Extracts—Their origin, history, and rationale.*

Sent free to any address.

PRICE REDUCED.

True Salicylic Acid.

CRYSTALLIZED FROM
WINTERGREEN OIL.—ITS NATURAL SOURCE.

DR. P. W. LATHAM, Downing Professor of Medicine at Cambridge (England), lecturing on the treatment of gout and rheumatism at the Royal College of Physicians, says:

"The true Salicylic Acid obtained from the vegetable kingdom must alone be employed. If you have to give large doses, avoid giving the artificial product obtained from carbolic acid, however much it may have been dialyzed and purified. Give the acid without any alkali or base," etc.

A reprint of this exceedingly valuable paper will be sent on application.

A DESIDERATUM—not always appreciated.

The quality of medicines used in the prescription is as important a factor in the cure of disease as a correct diagnosis; and a physician violates no code, either of ethics or morals, in demanding of his druggist that which he knows to be reliable, instead of leaving to the latter to decide whose preparations he shall or shall not use.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word **"Hunyadi"** forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea. suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month: thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

Platt's Chlorides

THE HOUSEHOLD

DISINFECTANT

Platt's Chlorides is an odorless, colorless, saturated solution of those chloride salts which have proven most reliable and acceptable as deodorants, disinfectants, and antiseptics; is at once clean, powerful and stainless (contains no mercury), and is especially designed for the hygienic uses of the physician and the practical domestic uses of the housekeeper. It destroys the vitality of bacteria or disease-producing germs, while it is not dangerous or disagreeable, the least possible labor is involved in its use, and it is supplied at very slight cost.

It is sold in quart bottles by druggists everywhere, price 50 cents. But as this concentrated liquid admits of dilution, according to the directions on each bottle, with from four to twelve times its bulk of water, each quart bottle really represents about three gallons of disinfectant strong enough for general uses.

From the fact that so many thousands of physi cians indorse the preparation and have found it an article of more than ordinary value and usefulness, we believe that in every sick-room, whether the disease be contagious or not, the use of this odorless disinfectant is of every-day utility and sanitary assistance, and does prove an aid and blessing to the patient, and a comfort and protection to the attendants.

To any physician who for any reason may be still unfamiliar with the practical value of Platt's Chlorides a sample will be sent, by express, prepaid, on request.

Address, giving both Post and Express Offices.

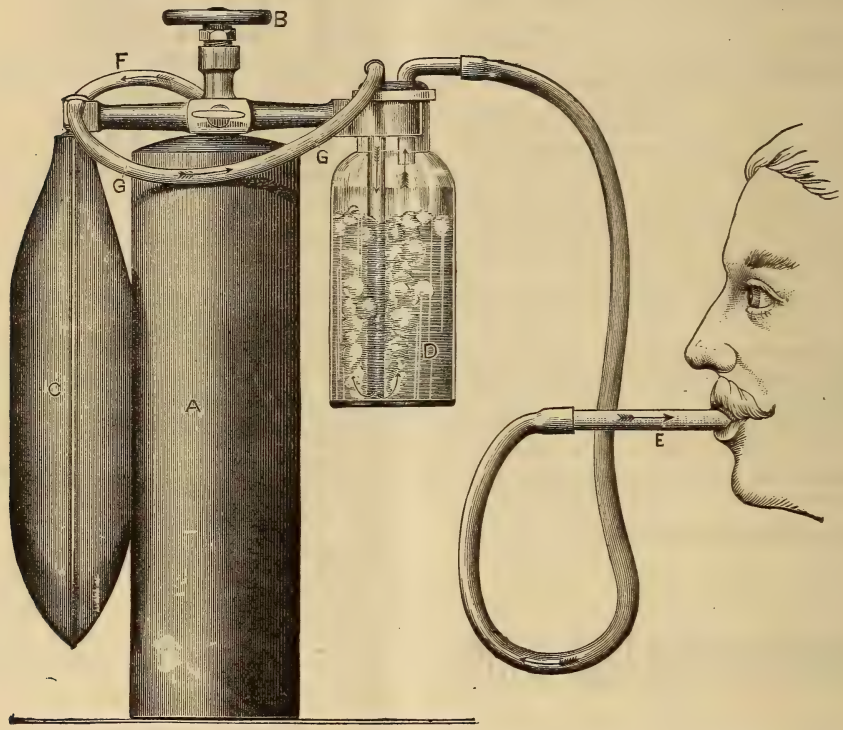
HENRY B. PLATT,

36 Platt St., New York.

INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



☞ In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

☞ We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

☞ Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE S. S. WHITE DENTAL MFG. CO.,

PHILADELPHIA, NEW YORK, BOSTON, CHICAGO, BROOKLYN.

McARTHUR'S SYRUP.

(SYR: HYPOPHOS: COMP: C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION,** sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

Mention this Journal. McARTHUR HYPOPHOSPHITE CO., BOSTON, MASS.

THE SUSTAINED SUPREMACY

OF

Fairchild's Pepsin,

In ACTIVITY, PERMANENCE and GENERAL EXCELLENCE

Has won for this product a wide use and recognition in all the principal markets of the world.

We guarantee it to be unchangeable, to maintain its activity and quality under all ordinary commercial conditions; it is therefore, by far the most available for the dispensing counter, as well as in the manufacture of every form of pepsin preparation.

Under exactly parallel conditions, with any proper percentage of acidity and with any proportion of such acidulated water to the albumen, Fairchild's pepsin is positively superior to any pepsin known.

It will, under absolutely comparative conditions, grain for grain, digest more albumen than any other pepsin made.

We will be pleased to send samples to any physician who may wish to ascertain for himself the relative activity of Fairchild's pepsin, or to submit it to any practical trial.

Prices and complete information upon application.

FOR SALE.

Residence and Practice in Village and Country about 25 miles from Philadelphia. Present income $2,500 to $3,000.

Address U,

Care of MEDICAL AND SURGICAL REPORTER.

P. O. Box 843. PHILADELPHIA

A RARE OPPORTUNITY.

A lady physician died on the eleventh of this month, leaving an opening very desirable for a successor, there being

NO OTHER LADY DOCTOR IN THE CITY.

The property is in the very heart of a city of six thousand inhabitants; the practice is well established, of fifteen years existence; a well selected medical library, surgical instruments, house and office furniture complete. All for sale, together or separate, as desired. For further details, etc., etc., apply to Dr. C. N. Gleason, 1007 Arch St., Phila., or to Edward Lawrence, Admin'r, or Caleb Wheeler, of SALEM, NEW JERSEY.

DETROIT COLLEGE OF MEDICINE.

SESSION 1888-89.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S, and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY'S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, September 26, and continues six months. During the session, the Professors will take special pains to examine the Students upon the subjects of the previous lectures.

SPRING SESSION begins March 27th, 1889, and closes June 17th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

For further particulars, and for College Circular, apply to

33 Lafayette Ave., Detroit, Mich

GENUINE BLAUD'S PILLS.

These pills, which have been inserted in the new French Pharmacopœia, have been employed with the greatest success for more than fifty years by most French and foreign physicians, to cure anemia, chlorosis, and all chlorotic affections in which iron is indicated.

Here is the opinion of men most eminent in medical science who have employed them:

"For thirty-five years, in which I have practised medicine, I have recognized the incontestable advantages of BLAUD'S PILLS over all other ferruginous preparations, and I regard them as the best anti-chlorotic."—DR. DOUBLE, *Ex-President of the Academy of Medicine.*

"Of all the ferruginous preparations, which have given good results in the treatment of chlorotic affections, BLAUD'S PILLS appear to us to deserve to hold the first rank."—*Dictionnaire universel de médecine*, Vol. II, p. 99.

These pills, prepared according to the genuine formule of the originator, by his nephew, Aug. Blaud, Pharmacist of the Faculty of Paris, are sold only in bottles of 200 pills and half bottles of 100 pills, at a cost of 5 and 3 francs ($1.00, and seventy-five cents), and never in smaller quantities. *See that his name is stamped on each pill.* **PARIS, 8 RUE PAYENNE, and at every Pharmacy.** (Beware of imitations.)

BLAUD

CALIFORNIA VINTAGE CO.
21 PARK PLACE N.Y.

Geo Hamlin Prest. Chas Roome Parmele Treas.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay, and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully,

L. WOLFF, M.D.,
Demonstrator of Chemistry, Jefferson Medical College.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

BUFFALO LITHIA WATER

IN THE TREATMENT OF

ALBUMINURIA, WHETHER OF BRIGHT'S DISEASE, PREGNANCY, OR SCARLET FEVER.

Dr. WM. B. TOWLES, Professor of Anatomy and Materia Medica in the Medical Department of the University of Virginia.

"BUFFALO LITHIA WATER, No. 2, belongs to the ALKALINE or, *perhaps, to the* ALKALINE-SALINE Class, *for it has proved far more efficacious in many diseased conditions than any of the simple* ALKALINE *waters.*

. . . . . .

"*Its effects are marked in causing a disappearance of* ALBUMEN *from the Urine.* In a single case of BRIGHT'S DISEASE OF THE KIDNEYS I witnessed *decided beneficial results from its use, and from its action in this case I should have great confidence in it as a remedy in certain stages of the disease.*"

Dr. GRAEME M. HAMMOND, of New York, Professor of Diseases of the Mind and Nervous System in the New York Post-Graduate Medical School and Hospital.

"In *all* cases of BRIGHT'S DISEASE of the KIDNEYS I have found BUFFALO LITHIA WATER *of the greatest service in increasing the quantity of urine and in eliminating the* ALBUMEN."

Dr. GEORGE W. MILTENBERGER, Professor of Obstetrics, University of Maryland,

Before the Medical and Chirurgical Faculty of the State of Maryland, recommended BUFFALO LITHIA WATER as an ALKALINE Diuretic in ALBUMINURIA of PREGNANCY.—See *Trans. Faculty of State of Maryland,* 1886.

Dr. WM. H. DOUGHTY, Professor of Materia Medica and Therapeutics, Medical College of Georgia; Member of American Medical Association, etc.

"Over the NAUSEA AND VOMITING OF PREGNANCY, PARTICULARLY IN THE LATTER MONTHS, WHERE URÆMIC CONDITIONS are possibly established, and in PUERPERAL CONVULSIONS, URÆMIA CO-EXISTING, BUFFALO LITHIA WATER often exerts *marked control.*"

Dr. CALEB WINSLOW, 23 McCulloh Street, Baltimore, Member of the Medical and Chirurgical Faculty of Maryland.

"I have found the BUFFALO LITHIA WATER, Spring No. 2, of marked service in relieving the *Nausea* of *Pregnant Women.* I frequently resort to it at intervals *during the whole course of Pregnancy.* Being *antacid, laxative, diuretic, and tonic, it seems well adapted to relieve the disturbances usually attendant upon Gestation, and I have no doubt its free use might remove* URÆMIC POISON, *and prevent Convulsions produced thereby.*"

Dr. JOS. HOLT, New Orleans, President Board of Health, State of Louisiana.

"I have prescribed BUFFALO LITHIA WATER freely in affections of the *Kidneys* and *Urinary* passages, particularly in GOUTY *subjects,* in ALBUMINURIA, and in irritable conditions of the *Bladder* and *Urethra* in *females.* The results have been such as to satisfy me *of the extraordinary value of this Water in a large class of cases usually most difficult to treat.*"

Dr. JAMES B. McCAW, Professor of the Practice of Medicine in the Virginia Medical College.

[Extract from the Proceedings of the Richmond Academy of Medicine, October 15, 1878.]

"Dr. McCaw also spoke of the great value of BUFFALO LITHIA WATER in ALBUMINURIA of *Scarlet Fever* and in ALBUMINURIA of *Pregnant Women.*"

Dr. J. T. DAVIDSON, New Orleans, La., ex-President New Orleans Surgical and Medical Association.

"I have for several years prescribed BUFFALO LITHIA WATER, Spring No. 2, in all cases of *Scarlet Fever,* directing it to be drunk *ad libitum, with the effect of relieving all traces of* ALBUMEN *in the urine,* and have found it equally efficacious in renal diseases requiring the use of alkaline water."

Dr. G. W. SEMPLE, Hampton, Va., President Medical Society of Virginia.

"In SCARLET FEVER I have known BUFFALO LITHIA WATER *restore a healthy and abundant secretion of Urine, when it was highly charged with* ALBUMEN *and the secretion almost suppressed.*"

Dr. MARTIN L. JAMES, of Richmond, Va., Professor of Materia Medica and Therapeutics, Medical Society of Virginia.

[Proceedings of the Richmond, Virginia, Academy of Medicine, December 16, 1880.]

"The President of the Academy, Dr. M. L. James, reported a case of *Congestion* of the *Kidneys* in a lady eight months advanced in *Pregnancy, attended by marked Œdema,* both over the extremities and surface, and by URÆMIC POISONING *to such an extent as very seriously impaired the vision of the patient,* relieved by the free use of this Water for three weeks.

"Other remedies, he stated, were used in these cases, *but the favorable results seemed clearly attributable to the action of the Water.*"

Dr. HARVEY L. BYRD, of Baltimore, President and Professor of Obsetrics and Diseases of Women and Children in the Baltimore Medical College, formerly Professor of Practical Medicine, etc.

"I have prescribed BUFFALO LITHIA WATER with the most satisfactory results, both as a *remedy* and *prophylactic* in the *Parturient* or *Pregnant Puerperal Eclampsia* or *Convulsions; and I may say that I know of no remedy of equal efficacy with the Water of Spring No. 2 in Sequelæ of Scarlatina.*

"It has an *ascertained value* in BRIGHT'S DISEASE. *A knowledge of its action in that disease thus far would seem* to warrant the belief that it would, in many instances, *at least in its early stages, arrest it entirely, and in its more advanced stage prove a decided comfort and palliative.*

Water in cases of one dozen half-gallon bottles, $5.00 per case at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality in Boston,	25.60	per 1000.
" of Women in Boston,	29,00	" "
" in **Murdock's Free Surgical Hospital,**	**5.00**	" "
" New York,	26.32	" "
" Philadelphia,	20.00	" "
" Chicago,	20.90	" "
" St. Louis,	20.49	" "

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

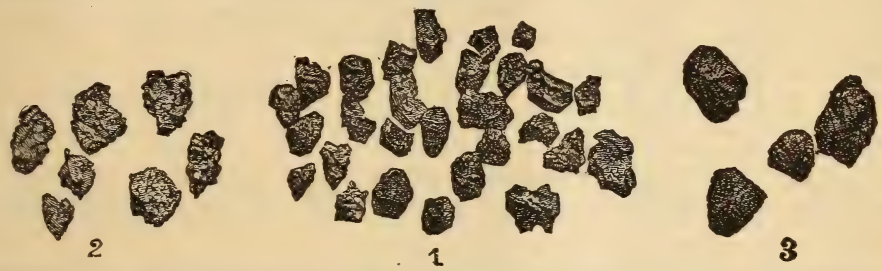
Buffalo Lithia Water

In the TREATMENT OF URINARY DEPOSIT.

Case of Dr. B. J. WEISTLING, of Middleton, Pa., stated by himself.

"Experience in its use in **STONE in the BLADDER** in my own person enables me to attest the efficacy **of the BUFFALO LITHIA WATER** in this painful malady. After having been long subjected to sufferings, the intensity **of** which cannot be described, I have, under the influence of this Water, passed an ounce of **CALCULI (URIC ACID)**, some of which weighed as much as four grains, affording inexpressible relief and leaving me in a condition of comparative ease and comfort.

"On one occasion I passed thirty-five **CALCULI** in forty-eight hours. The appearance of these **CALCULOUS NUCLEI** indicates unmistakably, I think, that they were all *component particles of one large* **CALCULUS** *destroyed by the action of the Water, by means of solution and disintegration.* At my advanced period of life (I am seventy-seven years and six months of age), and in my feeble general health, a surgical operation was not to be thought of, and the Water seems to have accomplished all that such an operation, if successful, could have done."



[The above plate is from a photograph, and represents the exact size and shape of some of the Calculi passed by Dr. Weistling. They were preserved by his son, Dr. J. Weir Weistling.]

Case stated by Dr. G. HALSTED BOYLAND, late Professor of Surgery, Baltimore Medical College, Member American Medical Association.

"The case of Mr. C., which came under my observation as Resident Physician at the Springs during the season of 1884, affords undoubted evidence that Buffalo Lithia Water is a **SOLVENT** *for Urinary Deposit*, commonly known as **STONE in the BLADDER.** He was operated upon for **STONE,** the operation affording but partial and temporary relief. A year afterward he visited the **BUFFALO LITHIA SPRINGS,** at the same time passing small quantities of a *Urinary Deposit*, of the **TRIPLE PHOSPHATE of AMMONIA** and **MAGNESIA VARIETY,** and his sufferings such as required that he should be kept constantly under the influence of opiates. In some eight weeks the solvent properties of the Water *were evident in the diminished consistency of the deposit, the increased quantity discharged, and by its change from Concrete Lumps to fine Sand,* which he discharged to the amount of *Four Ounces.* After a time, however, the quantity gradually diminished, and finally ceased, and he left the Springs *with the deposit dissolved* and *washed out of the system*, and the *Diathesis fons et origi morbi* altered. There had been a disappearance of the attending distressing symptoms, and great improvement in his general condition."

Dr. MARTIN L. JAMES, of Richmond, Va., Professor of Materia Medica and Therapeutics, Medical Society of Virginia.

[Proceedings of the Richmond, Virginia, Academy of Medicine, December 16, 1880.]

"The President of the Academy, Dr. M. L. James, reported three cases of marked **URIC ACID DIATHESIS** successfully treated by the Water of Spring No. 2 of the **BUFFALO LITHIA SPRINGS** of Virginia. In one of these patients there were, as a result of this Diathesis, **SANDY DEPOSITS** in the *Urine, Inflammation of the Kidneys, Irritability of the Bladder, and Hæmaturia*, and, finally, the passage of a **CALCULUS** of the size of a cherry, formed on a blood-clot as a nucleus. In another case there were frequent attacks of **NEPHRITIC COLIC,** attended by **SANDY DEPOSITIONS in the urine.** After the free use of this Water in these cases, no further manifestations of the disorder occurred."

Dr. HENRY M. WILSON, of Baltimore, ex-President Medical and Chirurgical Faculty of Maryland.

"My experience in the use of the **BUFFALO LITHIA WATER** has not been large, *but it is of such a positive character that I do not hesitate to express my preference for it, as a* **DIURETIC** in **URINARY CALCULI,** *over all other waters that I have ever used.*"

Water in cases of one dozen half-gallon bottles, $5 per case, at the Springs.

THOMAS F. GOODE, Proprietor,

BUFFALO LITHIA SPRINGS, VIRGINIA.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University, and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 <^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on application.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to each pill.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron,** is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the **three** Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

The Regular Session begins September 30th, 1889, and continues until the middle of April. It is preceded by a Preliminary Session of three weeks, and followed by a Spring Session lasting until the middle of June.

Seats are issued in the order of matriculation, and are forfeitable if fees are not paid before November 1st.

Preliminary examination or equivalent degree, and a three years' graded course obligatory. A fourth year voluntary.

Instruction is given by lectures, clinical teaching and practical demonstrations. In the subjects of Anatomy, Pharmacy, Chemistry, Histology and Pathology the usual methods of instruction are largely supplemented by laboratory work.

Examinations are held at the close of each Regular Session upon the studies of the term. Although the degree of Doctor of Medicine is conferred at the end of the third year, a fourth year is earnestly recommended, at the end of which the degree of Doctor of Medicine *cum laude* is given.

FEES.

Matriculation, $5; first and second years, each, $100; third year (no graduation fee), $100; fourth year, free to those who have attended three sessions in this school, to all others, $100.

Extra charges only for material used in the laboratories and dissecting-room.

For further information or announcement, address,

LENTZ'S

NEW COMPACT

OPERATING SET

No. 10.

One Amputating Knife (Leg and Arm). One Finger Knife. One Hernia Knife. One Sharp Curved Bistoury. Two Scalpels. One Tenotome. One Tenaculum. One pair Scissors, curved or flat. One Saw, 9-inch blade. One Liston's Spring. Bone Forceps. One Artery and Needle Forceps, improved. One Dressing Forceps. One Esmarch's Flat Rubber Tourniquets, with Chain. One Director, with Aneurism Needle. Two Silver Probes. Silk, Wire, Wax, and Needles.

The above instruments are put up in a fine Morocco Case with nickel trimmings, lined with velvet, and has extra space for Trephine and Elevator, if desired. With the *sixteen* instruments contained in this case, any ordinary operation may be performed.

Size, 11 in. long, 4 in. wide, 2 in. high

Price, $25. With Trephine and Handle and Trephine Elevator in addition, $29.65. We also make the above case with hard rubber antiseptic handles on knives and saw. Price, $29.00. With Trephine and Elevator in addition, $33.65.

Discount 25 pr. ct. to Physicians

Our New Catalogue of 260 pages will be sent on receipt of 10 cents for postage.

CHARLES LENTZ & SONS,

MANUFACTURERS OF

SURGICAL AND ORTHOPÆDIC APPARATUS,

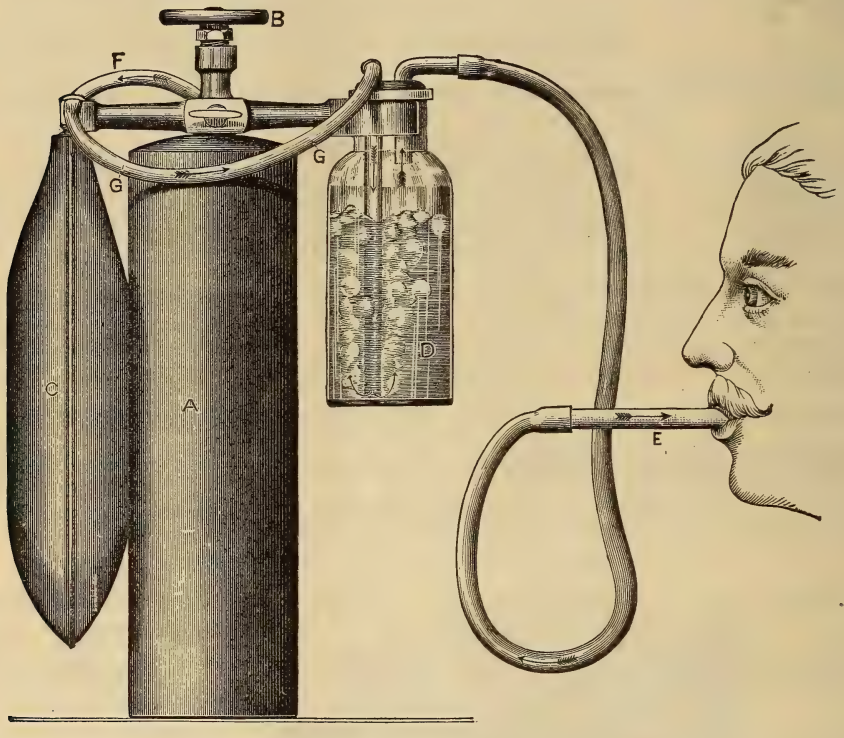
No. 18 North Eleventh Street,

Established 1866. Philadelphia.

INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00
Cylinder, 40 gallons' capacity	6.00
40 gallons Gas, either pure Oxygen or mixed Oxygen and Nitrous Oxide	2.00
Complete Apparatus, Cylinder, and 40 gallons Gas	$13.00
Inhalation Apparatus	$5.00
Cylinder, 100 gallons' capacity	15.00
100 gallons Gas, either pure or mixed	5.00
Complete Apparatus, Cylinder, and 100 gallons Gas	$25.00

THE S. S. WHITE DENTAL MFG. CO.,

PHILADELPHIA, NEW YORK, BOSTON, CHICAGO, BROOKLYN.

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request.

CALIFORNIA VINTAGE CO.

21 PARK PLACE N.Y.

Geo Hamlin Prest. Chas Roome Parmele Treas.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay, and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully,

L. WOLFF, M.D.,
Demonstrator of Chemistry, Jefferson Medical College.

THE SUSTAINED SUPREMACY

OF

Fairchild's Pepsin,

In ACTIVITY, PERMANENCE and GENERAL EXCELLENCE

Has won for this product a wide use and recognition in all the principal markets of the world.

We guarantee it to be unchangeable, to maintain its activity and quality under all ordinary commercial conditions; it is therefore, by far the most available for the dispensing counter, as well as in the manufacture of every form of pepsin preparation.

Under exactly parallel conditions, with any proper percentage of acidity and with any proportion of such acidulated water to the albumen, Fairchild's pepsin is positively superior to any pepsin known.

It will, under absolutely comparative conditions, grain for grain, digest more albumen than any other pepsin made.

We will be pleased to send samples to any physician who may wish to ascertain for himself the relative activity of Fairchild's pepsin, or to submit it to any practical trial.

Prices and complete information upon application.

FAIRCHILD BROS. & FOSTER,

New York. Chicago. London.

The Curd of Cow's Milk Made as Soft and Digestible as that of Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

Doliber-Goodale Co., Boston, Mass.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality in Boston,	. . . . .	25.60	per 1000.
" of Women in Boston,	. . . . .	29,00	" "
" in **Murdock's Free Surgical Hospital,**	.	**5.00**	" "
" New York,	. . . . .	26.32	" "
" Philadelphia,	. . . . .	20.00	" "
" Chicago,	. . . . .	20.90	" "
" St. Louis,	. . . . .	20.49	" "

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

Murdock Liquid Food Co., Boston.

CELERINA

NERVE TONIC, STIMULANT AND ANTISPASMODIC.

FORMULA.—Every Fluid Drachm represents FIVE grains EACH—Celery, Coca, Kola, Viburnum and Aromatics.

INDICATIONS.—Loss of Nerve-Power (so usual with Lawyers, Preachers, Writers and Business Men), Impotency, Spermatorrhea, Nervous Headache, Neuralgia, Paralysis, Hysteria, Opium Habit, Inebriety, Dyspepsia, and ALL LANGUID conditions of the System.

Indispensable to restore a patient after alcoholic excess.

DOSE.—One or two Teaspoonfuls three or more times a day, as directed by the Physician.

LIQUID IRON-RIO

Palatable and easily assimilated. Does not produce Nausea, nor irritate the Stomach. Does not Cause Headache, nor Constipate. Does not Stain the Teeth. It is so Acceptable to the Stomach that its Use is Admissible when all other forms of Iron would be rejected. Being so Readily Assimilable, it only requires a small Dose.

Each Fluid Drachm contains ONE GRAIN of Iron in a Pleasant and Digestible Form.

DOSE.—One or more Teaspoonfuls as indicated, during or after meals.

S. H. KENNEDY'S

CONCENTRATED EXTRACT OF

PINUS CANADENSIS

DARK. **A NON-ALCOHOLIC LIQUID.** WHITE.

A MOST VALUABLE NON-IRRITATING MUCOUS ASTRINGENT.

INDICATIONS.—Albuminuria, Diarrhea, Dysentery, Night-Sweats, Hemorrhages, Profuse Expectoration, Catarrh, Sore Throat, Leucorrhea, and other Vaginal Diseases, Piles, Sores, Ulcers, Burns, Scalds, Gonorrhea, Gleet, Etc.

When Used as an Injection, to Avoid Staining of Linen, the WHITE Pinus should be used.

RECOMMENDED BY PROMINENT EUROPEAN AND AMERICAN PHYSICIANS.

SPORTING AND ATHLETIC GOODS OF EVERY DESCRIPTION.

No Chemicals.

W. BAKER & CO.'S Breakfast Cocoa

Is Absolutely Pure, and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa

is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

WESTERN PENNSYLVANIA MEDICAL COLLEGE
CITY OF PITTSBURGH.
SESSIONS OF 1889—90.
The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.
The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, PROF. J. W. J. McKENNAN.

Specimen Pages will be sent on Application.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

BATTLE & CO.,

CHEMISTS' CORPORATION.

BRANCHES:

76 New Bond Street, London, W.
5 Rue de la Paix, Paris.
9 and 10 Dalhousie Square, Calcutta.

ST. LOUIS, MO.

The only prominent Emulsion of Cod-Liver Oil introduced directly to the medical profession. It is advertised exclusively in medical journals.

HYDROLEINE.

(HYDRATED OIL.)

Produces rapid increase in Flesh and Strength.

FORMULA.—Each Dose contains:	
Pure Cod Liver Oil.....80 m. (drops)	Soda.....1-3 Grains.
Distilled Water.....35 "	Salicylic Acid.....1-4 "
Soluble Pancreatin..... 3 Grains.	Hyocholic Acid.....1-90 "

Recommended and Prescribed by EMINENT PHYSICIANS Everywhere. It is pleasant to the Taste and acceptable to the most delicate Stomach.

IT IS ECONOMICAL IN USE AND CERTAIN IN RESULTS.

HYDROLEINE (Hydrated Oil) is not a simple alkaline emulsion of oleum morrhuæ, but a hydro-pancreated preparation, containing acids and a small percentage of soda. Pancreatin is the digestive principle of fatty foods, and in the soluble form here used, readily converts the oleaginous material into assimilable matter, a change so necessary to the reparative process in all wasting diseases.

The following are some of the diseases in which **HYDROLEINE** is indicated:

Phthisis, Tuberculosis, Catarrh, Cough, Scrofula, Chlorosis, General Debility, etc.

TO BRAIN WORKERS of all classes, **HYDROLEINE** is invaluable,-supplying as it does, the true brain-food, and being more easily assimilated by the digestive organs than any other emulsion.

The principles upon which this discovery is based have been described in a treatise on "The Digestion and Assimilation of Fats in the Human Body," and "Consumption and Wasting Diseases," by two distinguished London physicians, which will be sent free on application.

SOLD BY DRUGGISTS GENERALLY.

C. N. CRITTENTON,

SOLE AGENT FOR THE UNITED STATES. 115 FULTON STREET, N. Y.

A Sample of Hydroleine will be sent free upon application, to any physician (enclosing business card) in the U. S.

A RARE OPPORTUNITY.

A lady physician died on the eleventh of this month, leaving an opening very desirable for a successor, there being

NO OTHER LADY DOCTOR IN THE CITY.

Champagne ANALYZED

Of Interest to all Medical Practitioners.

WHAT IS SAID BY

THOMAS KING CHAMBERS, M.D.,F.R.C.P.
R. OGDEN DOREMUS, M.D.
F. W. PAVY, M.D., F.R.S.

"Champagne, with a minimum of alcohol, is by far the wholesomest, and possesses remarkable exhilarating power."—THOMAS KING CHAMBERS, M.D., F.R.C.P.

"Having occasion to investigate the question of wholesome beverages, I have made a chemical analysis of the most prominent brands of Champagne. I find G. H. Mumm & Co.'s Extra Dry to contain, in a marked degree, less alcohol than the others. I therefore most cordially commend it not only for its purity but as the most wholesome of the Champagnes."—R. OGDEN DOREMUS, M.D., *Professor of Chemistry, Bellevue Hospital Medical College, New York.*

"Champagne, while only possessing the alcoholic strength of natural wines, is useful for exciting the flagging powers in case of exhaustion"—F. W. PAVY, M.D., F.R.S., *Lecturer on Physiology at Guy's Hospital, London.*

The remarkable vintage of 1884 of **C. H. MUMM & CO.'S EXTRA DRY CHAMPAGNE,** the finest for a number of years, is now imported into this market, and pronounced by connoisseurs unsurpassed for excellence and bouquet.

FRED'K DE BARY & CO., New York,

SOLE AGENTS IN THE UNITED STATES AND CANADA.

What the Profession Think.

J. W. Crumbaugh, M.D , Hockessin, Del., writes: "I have to thank you, as a father, for the sample package of the Lactated Food. My youngest child was deep in the mire of cholera infantum, showing that intolerance of milk I so much dread, when your Food made its appearance. I at once prepared a watery solution of it, which he retained, and which proved to be the turning point in his case. He is now doing well. My wife wishes to join me in thanking you, and to say it was after all other of the prominent artificial foods failed, that yours succeeded so admirably."

M. W. Slocum, M.D., Buchanan, Mich., writes: "I tried Lactated Food in the case of our child, who was quite low with cholera infantum. I had tried all the kinds of food I could think of; at last I tried Lactated Food, with wonderful success. The child grew better right away, and has not been sick since.

W. W. Harris, M.D., Easonville, Ala., writes: "My own child, seven months old, had cholera infantum; its mother not supplying sufficient nourishment, I placed it on Lactated Food, and it proved altogether satisfactory."

Lactated Food contains neither cane sugar nor starch; its base is sugar of milk; it is a cooked, pre-digested, non-irritating Food. Used either with or without milk, it is best and most economical.

Prescribe Lactated Food for your little patients this summer. It will nourish them perfectly, and prevent all bowel troubles. In cholera infantum, it regulates the discharges, and is retained upon the stomach when all other foods are rejected.

Sample forwarded free to any physician unacquainted with its merits.

Wells, Richardson & Co., Burlington, Vt.

Carnrick's Soluble Food

Is the nearest approach to Human Milk that has thus far been produced.

During the past season a large number of Physicians and eminent Chemists visited our Laboratory at Goshen, N. Y., and witnessed every detail connected with the production of Carnrick's Soluble Food. This invitation to witness our process is continuously open to Physicians and Chemists. All expenses from New York to Goshen and return will be paid by us. The care used in gathering the milk, its sterilization, and the cleanliness exercised in every step, cannot be excelled.

Pancrobilin.

Prepared (in both Liquid and Pill form) from Extract of Pancreas and Bile.

This preparation is designed expressly to increase the digestion and absorption of fats.

We believe that the fat-digesting properties of pancreatine and bile are inseparable, and that without their union in the intestinal tract but little, if any, fat would be digested and absorbed.

PANCROBILIN will be found of great service in *Phthisis and other wasting diseases, Nervous Prostration, Constipation, Inanition, Malnutrition, Intestinal Indigestion*, and wherever there is a failure to assimilate fats.

If the skin is first wet with LIQUID PANCROBILIN, the inunction of oils will be greatly facilitated.

LIQUID PANCROBILIN is put up in pound bottles.

PILL PANCROBILIN is put up in bottles holding 100 pills. The coating of the pills will resist acid digestion when given as directed, but will be quickly dissolved in the alkaline secretions of the duodenum.

Phospho-Caffein Comp.

(*Granular Effervescing.*)

Formula for each dessertspoonful:—

Caffein.
Acidi Phosphorici, ää, gr. ss.
Antipyrin.
Ext. Apii Grav. dulc. (Celery), ää gr. i.
Sodii Bromidi, gr. v.

The satisfactory results produced by PHOSPHO-CAFFEIN COMP. in *Headaches, Neuralgia, Insomnia, Neurasthenia, and general Nervous Irritability*, are not due to the effect of any one ingredient, but to the happy effect of the combination. A thorough series of comparative tests have demonstrated the superiority of the above formula over any other in the market.

REED & CARNRICK, New York.

ARTIFICIAL LEGS AND ARMS
WITH
RUBBER FEET AND HANDS.

Although a man may meet with the misfortune of having both his legs severed from his body, he is not necessarily helpless. By having artificial legs applied, with rubber feet attached, he can be restored to his usefulness.

Fig. 2 is from an instantaneous photograph of a man ascending a ladder; he has two artificial legs substituting his natural ones, which were crushed by a railroad accident and amputated.

Fig. 1 exposes his stumps. With his rubber feet he can ascend or descend a ladder, balance himself on the rungs, and have his hands at liberty. He can walk and mingle with persons without betraying his loss; in fact, he is restored to his former self for all practical purposes.

F G. I.

With the old methods of complicated ankle-joints these results could not be so thoroughly attained.

Over nine thousand in practical use, scattered in all parts of the world. Many of these have been supplied without presenting themselves to us, simply by sending measurements on a copyright formula which any one can easily fill out. The press, eminent surgeons, and competent judges in many parts of the world have commended the rubber foot and hand for their remarkable advantages.

Awarded the highest prizes at every competitive exhibition.

Endorsed and purchased by the U. S. Government for pensioners of the army and navy.

A treatise of 400 pages and copyright formula, *sent free.*

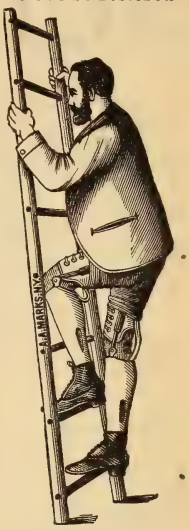

FIG. 2.

A. A. MARKS,

701 BROADWAY, NEW YORK CITY.

McARTHUR'S SYRUP.

(SYR: HYPOPHOS: COMP: C. P. McARTHUR.)

Its use is indicated in Consumption and Tuberculosis, Diseases of the Chest, Chronic Cough, Throat Affections, General Debility, Brain Exhaustion, Impotence and Loss of Memory.

The point of primary importance in the use of the Hypophosphites is their *chemical* purity, but unfortunately they are too often adulterated.

So little seems to be generally known, even among the medical profession, with regard to the chemistry of the Hypophosphites, and the absolute necessity of CHEMICAL purity, that we call attention to this point.

One of the first effects produced by the use of our CHEMICALLY PURE Hypophosphites is a general increase of nervous energy, with a feeling of ease and comfort.

The second effect is an increase of appetite; digestion is improved, and the bowels become regular in their action, the quantity and color of the blood is increased, respiration is controlled, a better expansion of the chest is observed, cough improves, easy expectoration is produced, night perspiration diminishes, the face becomes fuller, the lips red, the nails and hair grow, and in children the teeth, showing the importance of the Hypophosphites on the organ of nutrition.

☞ Physicians when prescribing will please write thus:

℞ SYR: HYPOPHOS: COMP: McARTHUR. ONE BOTTLE.

As it is made *only for physicians* there are no printed wrappers or advertisements about the bottle.

Our pamphlet on the **CURABILITY AND TREATMENT OF CONSUMPTION,** sent free to physicians upon application.

We will send one bottle of McArthur's Syrup to any physician, without charge, who will pay the express charges on the same.

Mention this Journal. McARTHUR HYPOPHOSPHITE CO., BOSTON, MASS.

THE NEW HYPNOTIC
SULFONAL-BAYER.

SULFONAL was discovered by Prof. Eugen A. Baumann, of Freiburg University, and was first prepared by the Farbenfabriken vorm. Friedr. Bayer & Co., Elberfeld.

SULFONAL (Diæthylsulfondimethylmethan) is in the form of colorless prisms, odorless, and tasteless, melting at 125.5° C. (258° F.) and has the composition $(C H_3)_2=C=(C_2 H_5 SO_2)_2$. It is slightly soluble in cold water, but easily soluble in hot water or alcohol.

SULFONAL was first examined as to its physiological and pathological effects by Prof. A. Kast, of Freiburg University and its hypnotic action was discovered and studied by him.

Since then SULFONAL has been the subject of numerous trials and experiments by many eminent and experienced physicians. Their testimony is unanimously favorable, and the conclusions reached by them are as follows:

SULFONAL is a prompt and reliable hypnotic, which in proper doses, produces quiet, natural sleep, lasting a number of hours.

SULFONAL has no unfavorable effects on the heart and the circulation, nor on the temperature, the pulse, or the respiration.

SULFONAL produces no disagreeable secondary symptoms; the patients with very few exceptions awake from their sleep feeling strong and greatly refreshed.

SULFONAL does not interfere with the process of digestion.

SULFONAL is a hypnotic, and not a narcotic; it acts by giving rest to the cells of the cerebral cortex, thereby causing sleep.

SULFONAL does not create an unconquerable desire for its repeated use; there is no danger of a SULFONAL-habit Neither is it necessary to increase the dose after long-continued use.

SULFONAL is best administered at supper-time, dissolved in hot liquids, *e. g.*, a bowl of soup or broth, a cup of milk, tea, coffee, cocoa, etc.

These points will be found to be fully exhibited in the series of contributions contained in our pamphlet, which will be mailed on application.

SULFONAL-BAYER is supplied by us in half-ounce and one-ounce vials.

We prepare 5-grain and 15-grain Tablets of Sulfonal-Bayer. The tablet form is admirably adapted to the purpose of administering this drug, as when they are placed in the liquids, they disintegrate and are thus received into the system.

We also put up Sulfonal-Bayer in the form of our Soluble Pills, containing five grains each.

THE NEW ANTIPYRETIC
PHENACETINE-BAYER.

Phenacetine-Bayer (Para-Acetphenetidine) is a white, glossy, crystalline powder, perfectly tasteless, melting at 135° C.=307° F and has the composition $C_6 H_4 <^{O.C_2H_5}_{NH(CO-CH_3)}$.

It is slightly soluble in water, a little more soluble in glycerine, but most freely in alcohol.

Phenacetine-Bayer was first prepared by the Farbenfabriken, formerly Friedr. Bayer & Co., Elberfeld, and is of absolute purity and uniform quality.

Summarizing the superiority of Phenacetine-Bayer over other antipyretics and antineuralgics, the following conclusions are formed:

1. ***Phenacetine-Bayer is an efficacious antipyretic.***
2. ***It does not develop any disagreeable or noxious after-effects.***
3. ***The dose required is half that of Antipyrine.***
4. ***It is perfectly tasteless.***
5. ***On account of its innocuousness and tastelessness, it is a valuable antipyretic both in adults and in children.***
6. ***Phenacetine-Bayer is an important antineuralgic; its effect is more energetic than that of Antipyrine and does not cause lassitude or any other disagreeble symptoms.***

Our pamphlet on Phenacetine-Bayer, containing the valuable testimony of eminent physicians will be mailed on application.

We offer Phenacetine-Bayer in one-ounce vials, or in the form of our Soluble Pills of the strength of two and four grains to each pill.

THE NEW YORK POLYCLINIC is a School of Clinical Medicine and Surgery for *Practitioners only.* No didactic lectures are given. The classes are limited. The demonstrations are made at the Polyclinic School and Hospital, and in the various Hospitals in New York City with which the Faculty are connected.

Session of 1889-'90 opens Monday, September 16th, 1889. Physicians matriculating for the Winter Session will be admitted to the Clinics from July 1st to September 14th, without additional charge. For further information and for catalogue, address

JOHN A. WYETH, M.D.,
Secretary of the Faculty,
Or WILLIS O. DAVIS, Clerk,
214, 216 & 218 East 34th Street, New York City.

RABUTEAU'S DRAGEES OF IRON

Laureate of the Institute of France.—Prize in Therapeutics.

The studies made by the Physicians of the Hospitals have demonstrated that the **Genuine Dragees of Iron of Rabuteau** are superior to all other preparations of Iron in cases of *Chlorosis, Anæmia, Leucorrhœa, Debility, Exhaustion, Convalescence, Weakness of Children*, and the maladies caused by the Impoverishment and Alteration of the blood after periods of fatigue, watching, and excesses of any kind.

TAKE 4 TO 6 DRAGEES DAILY.

Rabuteau's Elixir of Iron is recommended to those persons who may be unable to swallow the Dragees. Dose —*A small wineglassful with meals.*

Rabuteau's Syrup of Iron is specially designed for children. Chalybeate medication, by means of **Rabuteau's Iron**, is the most economical and the most rational known to therapeutics.

No constipation, no diarrhœa, complete assimilation.

Take only the GENUINE IRON OF RABUTEAU of

CLIN & CO., Paris.

SOLUTION OF THE SALICYLATE OF SODA OF DOCTOR CLIN.

Laureate of the Paris Faculty of Medicine (MONTYON PRIZE).

Dr. Clin's Solution, always identical in its composition, and of an agreeable taste, permits the easy administration of *pure Salicylate of Soda*, and the variation of the dose in accordance with the indications presented.

"The *Salicylate of Soda* used by **Clin** is of perfect purity, "and is prepared with the greatest care; it is a medicament "in which we may have every confidence."

—*Paris Society of Medicine, Meeting of Feb. 8th, 1879.*

Clin's Solution, very exactly mixed, contains: 2 grammes of *Salicylate of Soda* per tablespoonful, 50 centigrammes of *Salicylate of Soda* per teaspoonful.

Paris—CLIN & CO.—Paris

NEURALGIAS

PILLS OF DR. MOUSSETTE.

The **Moussette Pills** of aconitine and quinium, calm or cure *Gastralgia, Hemicrania, Headache, Sciatica*, and the most obstinate Neuralgias.

"The sedative action exerted by the **Moussette Pills** "upon the apparatus of the sanguineous circulation by the "intermediation of the vaso-motor nerves, indicates their "use in *neuralgias of the trigemini nerves*, (fifth pair), *con-* "*gestive neuralgias*, and *painful and inflammatory Rheumatismal* "*affections*."

"Aconitine produces marvelous effects in the treatment "of *facial neuralgias* when they are not symptomatic of "intracranial tumor."—*Society of Biology of Paris, Meeting* "*of the 28th February, 1880.*

DOSE—Take 3 to 6 pills during the twenty-four hours.

ACCEPT ONLY THE GENUINE MOUSSETTE PILLS OF

CLIN & CO.,—Paris.

GRAND NATIONAL PRIZE OF 16,600 FRANCS,

QUINA-LAROCHE

This meritorious **Elixir, QUINA-LAROCHE,** is prepared from the three Cinchonas; it is an agreeable and doubtless highly efficacious remedy.

—*The Lancet.*

VINOUS ELIXIR,

A STIMULATING RESTORATIVE

—AND—

ANTI-FEBRILE TONIC.

QUINA-LAROCHE under the form of a vinous **Elixir** contains the totality of the numerous principles of the **three** Cinchona barks. It is a preparation which renders great services to Therapeutics.—Extract of the *Gazette des Hôpitaux*, Paris.

FAR SUPERIOR TO ALL ORDINARY CINCHONA WINES.

LAROCHE'S QUINA, tried by the Academy of Medicine of Paris, is a specially prepared COMPOUND EXTRACT of Quinquina, a careful analysis, confirmed by experience, has shown that most of the wines and syrups hitherto used have not contained all the properties of this precious bark, of these some, although beneficial, are altogether lost, while many preparations contain but half the properties of the bark in varying proportions.

MR. LAROCHE, by his peculiar method, has succeeded in extracting all the active principles of the quinquina, combining these with *Catalan Wine* forming an Elixir free from the disagreeable bitterness of other similar preparations. Practitioners have found triple advantages in the use of this Elixir, it is a *strong tonic*, is easily administered, and perfectly harmless, being free from the unpleasant effects of Quinine.

THE FERRUGINOUS QUINA-LAROCHE is the invigorating tonic *par excellence*, having the advantage of being easily assimilated by the gastric juice; without, in any way, deranging the action of the digestive organs, proving itself to be a most efficacious remedy in cases of impoverishment of the blood, ANÆMIA, CHLOROSIS, INTESTINAL HÆMORRHAGE, CASTRALGIA, EXHAUSTION, ETC., ETC.

BEDFORD SPRINGS, MASS.

THE SUSTAINED SUPREMACY

OF

Fairchild's Pepsin,

In ACTIVITY, PERMANENCE and GENERAL EXCELLENCE

Has won for this product a wide use and recognition in all the principal markets of the world.

We guarantee it to be unchangeable, to maintain its activity and quality under all ordinary commercial conditions; it is therefore, by far the most available for the dispensing counter, as well as in the manufacture of every form of pepsin preparation.

Under exactly parallel conditions, with any proper percentage of acidity and with any proportion of such acidulated water to the albumen, Fairchild's pepsin is positively superior to any pepsin known.

It will, under absolutely comparative conditions, grain for grain, digest more albumen than any other pepsin made.

We will be pleased to send samples to any physician who may wish to ascertain for himself the relative activity of Fairchild's pepsin, or to submit it to any practical trial.

Prices and complete information upon application.

FAIRCHILD BROS. & FOSTER,

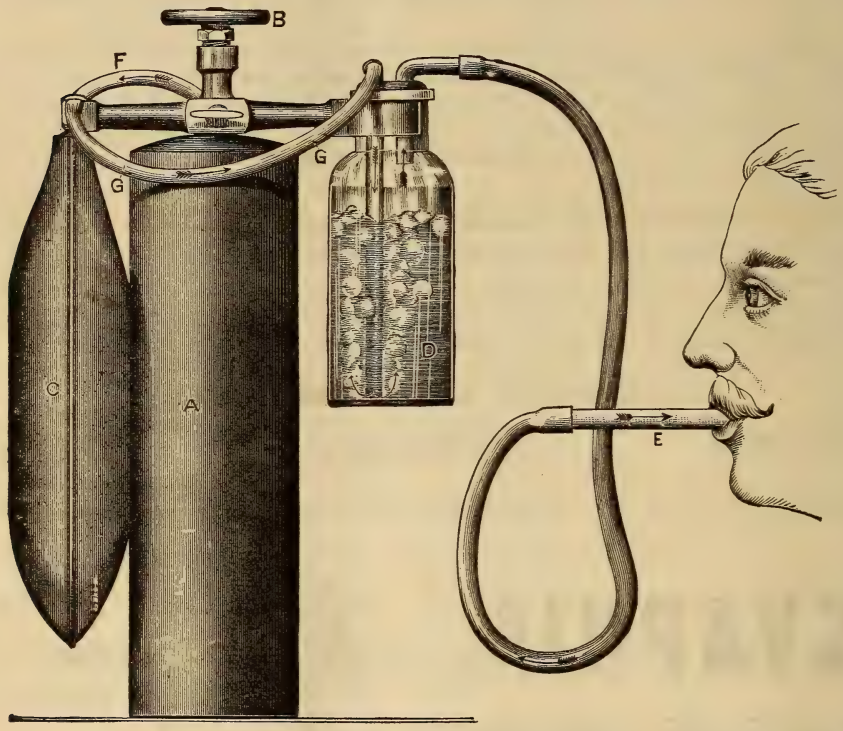
INHALATION APPARATUS

FOR

THE THERAPEUTIC ADMINISTRATION OF OXYGEN.



In the treatment of lung troubles by Oxygen its exhibition by inhalation is preferred. The apparatus herewith shown is a modification of the Nitrous Oxide apparatus which we have supplied for many years. It is made in the best manner throughout, and is the outcome of years of experience in the manufacture of gas apparatus. It will be found to meet all the requirements.

We supply the gas in two sizes of cylinders, containing respectively forty and one hundred gallons, either pure Oxygen, or a mixture of Oxygen and Nitrous Oxide in definite proportions of 20 per cent., and forty per cent. of Nitrous Oxide.

Whether pure or mixed the gas is sold at the uniform price of 5 cents a gallon. The cost of the cylinders will be refunded on their return empty with the valves in good condition. Full description of Inhalation and Enema apparatuses with directions for use accompany each apparatus, or will be supplied on application.

PRICES.

Inhalation Apparatus	$5.00

THE BEST ANTISEPTIC
FOR BOTH INTERNAL AND EXTERNAL USE.

ANTISEPTIC, PROPHYLACTIC, DEODORANT.

LISTERINE

NON-TOXIC, NON-IRRITANT, NON-ESCHAROTIC.

FORMULA—Listerine is the essential antiseptic constituent of Thyme, Eucalyptus, Baptisia, Gaultheria and Mentha Arvensis, in combination. Each fluid drachm also contains two grains of refined and purified Benzo-boracic Acid.

DOSE—Internally: One teaspoonful three or more times a day (as indicated) either full strength, or diluted, as necessary for varied conditions.

LISTERINE is a well-proven antiseptic agent—an antizymotic—especially adapted to internal use, and to make and maintain surgical cleanliness—asepsis—in the treatment of all parts of the human body, whether by spray, irrigation, atomization, or simple local application, and therefore characterized by its particular adaptability to the field of

PREVENTIVE MEDICINE—INDIVIDUAL PROPHYLAXIS.

Diseases of the Uric Acid Diathesis.

LAMBERT'S

LITHIATED HYDRANGEA

KIDNEY ALTERATIVE—ANTI-LITHIC.

FORMULA—Each fluid drachm of "Lithiated Hydrangea" represents thirty grains of FRESH HYDRANGEA and three grains of CHEMICALLY PURE Benzo-Salicylate of Lithia. Prepared by our improved process of osmosis, it is INVARIABLY of DEFINITE and UNIFORM therapeutic strength, and hence can be depended upon in clinical practice.

DOSE—One or two teaspoonfuls four times a day (preferably between meals).

Urinary Calculus, Gout, Rheumatism, Bright's Disease, Diabetes, Cystitis, Hæmaturia Albuminuria, and Vesical irritations generally.

We have much valuable literature upon { GENERAL ANTISEPTIC TREATMENT, LITHEMIA, DIABETES, CYSTITIS, ETC. } To forward to Physicians upon request:

LAMBERT PHARMACAL CO., ST. LOUIS, MO.

21 Park Place N.Y.

Geo Hamlin Prest. Chas Roome Parmele Treas.

GENTLEMEN:

The Case of your wines sent me for analysis by Dr. A. L. Hummel, of the "Annals of Hygiene," containing specimens of your La Rosa Zinfandel, Mataro, Riesling, Royal Tokay, and Royal Grape Brandy, has been duly received.

I have examined them for the common contaminants of wine; to wit: Sulphurous acid and sulphites, salicylic acid, fuchsin, lead salts, etc., none of which I found present therein.

I have also determined their alcoholic strength, extractives, and ashes, and found them to correspond strictly in this respect with the standard of pure and natural wines, which cannot be said of many of the imported wines.

As a native of a wine-producing country, I consider myself somewhat of a judge of wines, and regard your products as comparing more than favorably with most of the wines from abroad which are sold at higher prices, so much so that I enclose within my order for fifty bottles of La Rosa Zinfandel, which I expect to use hereafter exclusively at my table.

Very Respectfully,

L. WOLFF, M.D.,
Demonstrator of Chemistry, Jefferson Medical College.

W. R. WARNER & CO'S

NEW AND RELIABLE RECIPES FOR PHYSICIANS PRESCRIBING.

In order to get the full therapeutic effects, physicians will please specify (WARNER & CO.) when ordering or prescribing.

☞The coating of the following pill will dissolve in 4½ minutes.☜

PIL: CHALYBEATE COMP.

(WARNER & CO.)

Nux Vomica is added as an ingredient to Pill Chalybeate to increase the tonic effect when desired.
Composition of each Pill.—℞ (Chalybeate Mass.), Carb. Protoxide of Iron, gr. 2½., Ext. Nuc. Vom. gr. 1-6.

DOSE—1 to 3 Pills.

Most advantageously employed in the treatment of Anæmia, Chlorosis, Phthisis, Scrofula, Loss of Appetite, etc.

PIL: ANTISEPTIC.

Each Pill contains: Sulphite Soda, 1 gr. Salicylic Acid, 1 gr. Ext. Nuc. Vomica, ¼ gr.

DOSE—1 to 3 Pills.

Pil. Antiseptic is prescribed with great advantage in cases of Dyspepsia attended with acid stomach and enfeebled digestion following excessive indulgence in eating or drinking. It is used with advantage in Rheumatism.

Prepared by WM. R. WARNER & CO.

PIL: ANTISEPTIC COMP.

(WARNER & CO.)

Each Pill contains: Sulphite Soda, 1 gr. Salicylic Acid. 1 gr. Ext. Nuc. Vomica, ⅛ gr. Powd. Capsicum, 1-10 gr. Conc't Pepsin, 1 gr.

DOSE—1 to 3 Pills.

Pil. Antiseptic Comp. are prescribed with great advantage in cases of Dyspepsia, Indigestion, and Malassimilation of Food.

Supplied upon physician's prescription by all leading druggists.

1228 MARKET ST., Phila. 18 LIBERTY ST., New York.

The Curd of Cow's Milk
Made as Soft and Digestible as that of
Woman's Milk.

"From experiments which I have recently made — and my thanks are due to Prof. Salisbury of the Woman's Medical College, for assistance — it seems that the claim which is made by the advocates of the MELLIN'S FOOD is true, and that the addition of this food to cow's milk does cause it to break up in very small, flaky curds."— *Dr. Chas. Warrington Earle, Professor of Diseases of Children, Woman's Medical College, Professor of Obstetrics, College Physicians and Surgeons, Chicago, in his paper on Infant Feeding, before the American Medical Association, May, 1888.*

Any physician having a case in which he desires to test MELLIN'S FOOD can obtain a sample sufficient for trial, free of all expense, by application.

Doliber-Goodale Co., Boston, Mass.

THE BEST NATURAL APERIENT.

THE APOLLINARIS COMPANY, LIMITED, London, beg to announce that, as numerous APERIENT WATERS are offered to the public under names of which the word "Hunyadi" forms part, they have now adopted an additional Label comprising their Registered Trade Mark of selection, which consists of

A RED DIAMOND.

This Label will henceforth also serve to distinguish the HUNGARIAN APERIENT WATER SOLD BY THE COMPANY from all other Aperient Waters.

DEMAND THE 
DIAMOND MARK.

And insist upon receiving the HUNGARIAN APERIENT WATER of the APOLLINARIS COMPANY, LIMITED, London.

THE VALUE OF NUTRITION IN DISEASE.

All physicians who have ever used Murdock's Liquid Food and Suppositories recognize their value over all other foods, in breaking up disease and building up the patients after disease, preventing a relapse, **as the same results are obtained as in surgery.** Its value in surgical cases we illustrate by the records of the different cities and of Murdock's Free Surgical Hospital for Women, which is the largest in the United States. It contains 114 beds, every bed free, including operation, the operations ranging from 1000 to 1200 yearly, representing 90 of the worst classes known in surgery. Among these cases we have had **Cancer of uterus** (*Kolpo-hysterectomy*), 13; **Salpingitis** (*Tait's operation*), 31; **Fibroid of uterus** (*abdominal hysterectomy*), 19; **Ventral operation, hernia,** (*abdominal section*), 12; **Cancer of bowel** (*incision*), 2; **Parovarian cyst, 6; Papillomatous cyst** (*extirpation*), 4; **Tubercular peritonitis** (*incision*), 1; **Ovarian cystoma 27; Nymphomania** (*Battey*), 1; **Exploratory abdominal incisions, 12; Fibroid with abdominal abscess** (*Hegar*), 2; **Hysterorraphy, 2; Dermoid cyst, 3; Cirrhotic ovaries,** (*Battey*), 4; **Fibroid uterus** (*Hegar*), 6; **Hystero-epilepsy** (*Battey*), 1; **Haemato-Salpinx** (*Tait*), 5; **Rupture of intestine into vagina, 1; Dislocated kidney, 2; Fibroid tumor abdominal wall, 1; Resection of intestine** (*Senn*), 1; **Ruptured perineum, 294.** Patients are in the Hospital 8 days before and 26 days after operation, on an average.

In Boston, last year, 42 deaths were from Cancer in the Breast. In Murdock's Hospital, 35 such cases were operated on without a death, the patients remaining in the Hospital, on an average, 18 days.

Mortality in Boston,	25.60	per 1000.
" of Women in Boston,	29,00	" "
" in **Murdock's Free Surgical Hospital,**	**5.00**	" "
" New York,	26.32	" "
" Philadelphia,	20.00	" "
" Chicago,	20.90	" "
" St. Louis,	20.49	" "

showing our mortality is only one-sixth as great as of those in health. As good results were obtained in our General Hospital, which we kept open 27 months, **thus showing the value of nutrition as found in Murdock's Liquid Food, and so recognized by the British and American Medical Associations,** before which essays were read and discussed, and it is the only Raw food preparation on which essays were ever read.

Physicians are invited to visit our Hospitals and Works, also to send in patients and to be present at the operations. For any physician who has not used our Liquid Food (and Suppositories for adults and infants), we will deliver free samples to any express company in Boston.

When babies do not thrive, never change their food, but add five or more drops at each feeding of Murdock's Liquid Food, and their lost or needed vitality will be restored in less than thirty days. It is invaluable when weaning babies or when teething. If mothers will take one teaspoonful to a tablespoonful before each meal and on retiring, they will receive as much benefit as the baby.

Murdock Liquid Food Co., Boston.

ALETRIS CORDIAL

UTERINE TONIC AND RESTORATIVE.

Prepared from the Aletris Farinosa or True Unicorn and Aromatics.

INDICATIONS.

Amenorrhea, Dysmenorrhea, Leucorrhea, Prolapsus Uteri, Sterility, to Prevent Miscarriage, Etc.

DOSE:—ONE TEASPOONFUL THREE OR FOUR TIMES A DAY.

UNRIVALED AS A UTERINE TONIC IN IRREGULAR, PAINFUL, SUPPRESSED AND EXCESSIVE MENSTRUATION.

It Restores Normal Action to the Uterus, and Imparts Vigor to the Entire Uterine System.

☞Where women have miscarried during previous pregnancies, or in any case where miscarriage is feared, the ALETRIS CORDIAL is indicated, and should be continuously administered during entire gestation.

CHAS. CLAY, M. R. C. S., Manor House, Dewsbury, England, says:—I find Aletris Cordial (Rio) is of great service in threatened miscarriage.

FRANCIS E. CANE, L. R. C. S., &c., Leeds, England, says:—I have tried the Aletris Cordial (Rio) in two cases of long standing dysmenorrhea, with excellent results. One of these patients has spent a week in bed every month for two years. After all the usual remedies, I put her on Aletris Cordial, and for the last two periods she has been out and about all the time.

L. M. WATSON, M. D., Delhi, Ills., says:—I have used Aletris Cordial (Rio) in cases of dysmenorrhea, suppressed menses and threatened miscarriage, and also, combined with Celerina, as a tonic after confinement, with the happiest results, and now I am using it on a case of leucorrhea, with injections of S. H. Kennedy's Extract of Pinus Canadensis, and it is acting like a charm.

P. H. OWEN, M. D., Morganville, Ala., says:—I have prescribed Aletris Cordial (Rio) in several cases with the most satisfactory results, and regard it as the best uterine tonic I have met with in a professional experience of over twenty-five years. In cases of threatened miscarriage it acts like a charm. Would recommend its continuous administration in all cases when there is any indication of miscarriage.

Dr. W. BERTHELOT, Santander, Spain, says:—I have tried the Aletris Cordial (Rio), and it has seemed to me to be useful, especially in cases of dysmenorrhea.

Dr. RASQUINET, Jupile, near Liege, Belgium, says:—I tried Aletris Cordial (Rio) in the case of a woman who had had several miscarriages at the end of five months, and who is now again pregnant, having reached the seventh month: thanks to Aletris Cordial.

R. REECE, M. R. C. S., Walton-on-Thames, England, says:—Aletris Cordial (Rio) in painful menstruation is most valuable. A wife of a minister suffered much, and had had three miscarriages. I prescribed Aletris Cordial. She has for the first time, gone her full time, and was safely confined with a male child.

J. T. COLLIER, M. D., Brooks, Me., says:—I have used your Aletris Cordial (Rio) in cases of females at the menopause. Consider it one of the finest remedies for these cases.

Dr. GORDILLON, St. Amand, France, says: I have tried the Aletris Cordial (Rio) in a case of dysmenorrhea. The result I obtained from the use of your preparation was excellent, better than I had obtained in the same patient by prescribing the usual remedies employed in such cases.

W. F. TOOMBS, M. D., Morrillton, Ark., says:—I have used a great deal of your Aletris Cordial (Rio) and I find it all you claim for it in amenorrhea, dysmenorrhea, metritis, leucorrhea; I don't think it has an equal. I have used it in two cases of threatened miscarriage and the trouble was obviated. For a general Uterine Tonic I know of nothing superior.

R. D. PATTERSON, L. R. C. S. &c., Medical Officer, Caledon Dispensary, Co. Tyrone, Ireland, says:—I have very great pleasure in testifying to the very high opinion I hold of Aletris Cordial (Rio) in threatened miscarriage.

SPORTING AND ATHLETIC GOODS OF EVERY DESCRIPTION.

No Chemicals.

W. BAKER & Co.'S Breakfast Cocoa

Is Absolutely Pure, and it is Soluble.

To increase the solubility of the powdered cocoa, various expedients are employed, most of them being based upon the action of some alkali, potash, soda or even ammonia. Cocoa which has been prepared by one of these chemical processes, can usually be recognized at once by the distinct alkaline reaction of the infusion in water.

W. Baker & Co.'s Breakfast Cocoa

is manufactured from the first stage to the last by perfect mechanical processes, **no chemical being used in its preparation.** By one of the most ingenious of these mechanical processes the greatest degree of fineness is secured without the sacrifice of the attractive and beautiful red color which is characteristic of an absolutely pure and natural cocoa.

BOUDAULT'S PEPSINE

The only Pepsine used in the Hospitals of Paris for the last Thirty Years.

Unlike the various substitutes which, in most cases, are but unscientific or incompatible compounds, forced upon the Medical Profession as aids to digestion by extensive advertising, but which, when submitted to the proper tests, are found to be useless as digestive agents, Pepsine is constantly gaining in the esteem of the careful practitioner.

Since the introduction of Pepsine by Boudault and Corvisart in 1854, the original BOUDAULT'S PEPSINE HAS BEEN AT ALL TIMES CONSIDERED THE BEST, as is attested by the awards it has received at the Expositions of 1867, 1868, 187 1873, in 1876 at the Centennial Exposition of Philadelphia, and in 1878 at the Paris Exposition.

The most reliable tests, carefully applied, will satisfy everyone that BOUDAULT'S PEPSINE HAS A MUCH HIGHER DIGESTIVE POWER than the best Pepsines now before the Profession, and is therefore especially worthy of their attention.

BOUDAULT'S PEPSINE is prepared in the form of Pepsine Acid and Pepsine Neutral. It is sold in bottles of one ounce, with a measure containing exactly five grains; also in bottles of four, eight, and sixteen ounces for dispensing.

BOUDAULT'S WINE OF PEPSINE

FORMULA OF DR. CORVISART.

The taste of Pepsine being perfectly disguised in this Wine, it may be recommended to persons who have difficulty in taking Pepsine in the form of Powder. This Wine is tested so that a tablespoonful of it is equal in digestive power to ten grains of Boudault's Pepsine in powder. Sold only in bottles of eight ounces.

TANRET'S PELLETIERINE

For the Treatment of Tape-Worm (Tænia Solium).

This New Tænifuge, the Active Alkaloid of Pomegranate Bark, has of late come into extensive use in France for the treatment of Tape-Worm (Tænia Solium). The results of numerous experiments with it at the Marine Hospitals of Toulon, St. Mandrier, etc., and in the Hospitals of Paris, St. Antoine, La Charité, Necker Beaujon, etc., have all been most satisfactory. Doctor Dujardin Beaumetz, Member of the Academy of Medicine, and Professor Laboulbene, in their report to the Society of Therapeutics, have given it their unqualified approval, after the most searching experiments. This preparation is pleasant to administer, and, if certain preliminaries are observed, success will be insured.

Sold only in bottles containing one dose.

DUCRO'S ALIMENTARY ELIXIR

A Combination uniting the properties of Alcoholic Stimulants and Raw Meat.

This preparation, which has been used with great success in the hospitals of Paris since 1868, is adapted to the treatment of all diseases requiring administration, in a small volume, of a tonic able to stimulate and support the vital forces, as *Pulmonary Phthisis, Depression and Nervous Debility, Adynamia, Malarious Cachexia, etc.*

Prepared by EMILE DURIEZ & CO., Successors to DUCRO & CIE, Paris.

KIRKWOOD'S INHALER

This is the only complete, reliable, and effective inhaler in use, arranged for the direct application of Muriate of Ammonia and other remedial agents in the state of vapor to the diseased parts of the air-passages in the treatment of catarrh and diseases of the throat and lungs. No heat or warm liquids required in its use.

It is entirely different from the various frail, cheap instruments that have been introduced.

KIRKWOOD'S INHALER is accompanied by testimonials of the highest professional character, together with carefully prepared formulas for use.

RETAIL PRICE, COMPLETE, $2.50.

☞ A liberal discount allowed to the trade and profession. For descriptive pamphlet or other information address

E. FOUGERA & CO., 30 North William St., New York,

Sole Agents for the above Preparations.

Medical College of Ohio.

WESTERN PENNSYLVANIA MEDICAL COLLEGE

CITY OF PITTSBURGH.

SESSIONS OF 1889—90.

The REGULAR SESSION begins on the last Tuesday of September, and continues six months. During this session, in addition to four Didactic Lectures, two or three hours are daily allotted to Clinical Instruction. Attendance upon two regular courses of lectures is requisite for graduation. A three years' graded course is also provided. The SPRING SESSION embraces recitations, clinical lectures and exercises, and didactic lectures on special subjects; this session begins the second Tuesday in April, and continues ten weeks.

The laboratories are open during the collegiate year for instruction in chemistry, microscopy, practical demonstrations in medical and surgical pathology, and lessons in normal histology. Special importance attaches to "the superior clinical advantages possessed by this College." For particulars, see annual announcement and catalogue, for which, address the Secretary of Faculty, PROF. J. W. J. MCKENNAN.

Business correspondence should be addressed to
PROF. W. J. ASDALE, 2107 Penn Avenue, Pittsburgh.

Woman's Medical College

OF BALTIMORE.

S. E. Cor. Druid Hill Ave. and Hoffman St., Baltimore, Md.

THE EIGHTH ANNUAL SESSION WILL BEGIN ON WEDNESDAY, OCTOBER 2d, 1889.

For further information or catalogue, address
RANDOLPH WINSLOW, M.D., Acting Dean,
No. 1, Mount Royal Terrace, Baltimore, Md.

Planten's CAPSULES.

Known as reliable over FIFTY years for "General Excellence in Manufacture."

H. PLANTEN & SON, 224 William St., New York

Established 1836.

SOFT and HARD CAPSULES Filled of All Kinds.

Sizes: 3, 5, 10, and 15 Min., and 1, 2½, 5, 10, and 15 Gram.

NEW KINDS: SANDALWOOD, OIL OF WINTERGREEN, APIOL, ETC.

Improved. Empty, 8 Sizes.

Capacity in Grains, 12, 10, 5, 4, 2, 1, ½, ¼.

For taking medicines free of taste, smell, injury to the teeth mouth, or throat. Trial box, by mail, 25 cents.

RECTAL, 3 sizes. VAGINAL, 6 sizes. HORSE, 6 sizes
For LIQUIDS, 3 sizes.

CAPSULES FOR MECHANICAL PURPOSES.

New Articles, and Capsuling Private Formulæ a Specialty

☞SOLD BY ALL DRUGGISTS. SAMPLES FREE.

Specify PLANTEN'S on all Orders.

DETROIT COLLEGE OF MEDICINE.

SESSION 1889-90.

Clinical and Practical teaching are made an important feature of this College. Clinical instruction is given daily at HARPER, ST. MARY'S and ST. LUKE'S HOSPITAL, at the COLLEGE, at COLLEGE EYE and EAR INFIRMARY, ST. MARY'S FREE EYE and EAR INFIRMARY, and at the three FREE DISPENSARIES. The facilities offered by this college are unsurpassed for the practical study of MEDICINE, SURGERY, OBSTETRICS, GYNÆCOLOGY, DISEASES OF CHILDREN, GENITO-URINARY, and ORTHOPÆDIC SURGERY, OPHTHALMOLOGY and OTOLOGY, DERMATOLOGY and LARYNGOLOGY.

REGULAR SESSION opens on Wednesday, Sept. 25, and continues six months. During the session, the Professors will take special pains to examine the Student upon the subjects of the previous lectures.

SPRING SESSION begins April 2d, 1890; and closes June 11th.

FEES.—Matriculation fee, $5; Fees for Regular Session, $50; Spring Session, $10, to those who attend the regular term—to all others, $25; Hospital Fee, $10; Graduation Fee, $30; Perpetual Ticket, $100.

For further particulars, and for College Circular, apply to

H. O. WALKER, M.D., Secretary,
33 Lafayette Ave., Detroit, Mich.

UNIVERSITY OF PENNSYLVANIA.—Medical Department.

The 124TH ANNUAL WINTER SESSION will begin Tuesday, October 1st, 1889, at 12 M., and continue until May 1st, 1890.

The PRELIMINARY SESSION begins September 18th, 1889.

The curriculum is graded and three annual winter Sessions are required. Practical instruction, including laboratory work in Chemistry, Histology, Osteology and Pathology, with Bedside Instruction in Medicine, Surgery and Gynecology are a part of the regular course and without additional expense.

FACULTY.

JOSEPH LEIDY, M.D., LL.D., Professor of Anatomy.
D. HAYES AGNEW, M.D., LL.D., Honorary Professor of Clinical Surgery.

Eighty-third Annual Announcement, 1889-90. The next regular session will begin October 1st, 1889. A full course of didactic lectures, with ample clinical and dissecting-room facilities.

FACULTY:

GEORGE W. MILTENBERGER, M.D.,
Professor of Obstetrics.

CHRISTOPHER JOHNSON, M.D.,
Emeritus Professor of Surgery.

SAMUEL C. CHEW, M.D.,
Professor of Principles and Practice of Medicine and Hygiene.

FRANK DONALDSON, M.D.,
Emeritus Clinical Professor of Diseases of the Throat and Chest.

WILLIAM T. HOWARD, M.D.,
Professor of Diseases of Women and Children and Clinical Medicine.

JULIAN J. CHISOLM, M.D.,
Professor of Eye and Ear Diseases.

FRANCIS T. MILES, M.D.,
Professor of Physiology and Clinical Professor of Diseases of Nervous System.

L. McLANE TIFFANY, M.D.,
Professor of Surgery.

J. EDWIN MICHAEL, M.D.,
Professor of Anatomy and Clinical Surgery.

I. EDMONSON ATKINSON, M.D.,
Professor of Materia Medica and Therapeutics, Clinical Medicine and Dermatology.

R. DORSEY COALE, PH.D.,
Professor of Chemistry and Toxicology.

JOHN NOLAND MACKENZIE, M.D.,
Clinical Professor of Diseases of the Throat and Nose.

HERBERT HARLAN, M.D.,
Demonstrator of Anatomy.

For catalogue and further information, address: **Dr. J. EDWIN MICHAEL, Dean, 937 Madison Avenue.**

DENTAL DEPARTMENT.

Eighth Annual Announcement. Next regular session begins October 1st, 1889. New and excellent Infirmary and Laboratory, with abundance of clinical material.

FACULTY:

FRED. J. S. GORGAS, M.D., D.D.S.,
Professor of Principles of Dental Science, Dental Surgery, and Dental Mechanism.

JAMES H. HARRIS, M.D., D.D.S.,
Professor of Operative and Clinical Dentistry.

I. EDMONSON ATKINSON, M.D.,
Professor of Materia Medica and Therapeutics.

FRANCIS T. MILES, M.D.,
Professor of Physiology.

L. McLANE TIFFANY, M.D.,
Clinical Professor of Oral Surgery.

J. EDWIN MICHAEL, M.D.,
Professor of Anatomy.

R. DORSEY COALE, PH.D.,
Professor of Chemistry.

JOHN C. UHLER, M.D., D.D.S.,
Demonstrator of Mechanical Dentistry.

CHAS. L. STEEL, M.D., D.D.S.,
Demonstrator of Operative Dentistry.

HERBERT HARLAN, M.D.,
Demonstrator of Anatomy.

AND EIGHT ASSISTANT DEMONSTRATORS.

For catalogue and other information, apply to **Dr. F. J. S. GORGAS, Dean, 845 Eutaw Street, Baltimore.**

Medico-Chirurgical College of Philadelphia.

JAS. E. GARRETSON, A.M., M.D., Professor of Oral and Clinical Surgery.

WM. H. PANCOAST, A.M., M.D., Professor of General, Descriptive, and Surgical Anatomy and Clinical Surgery.

GEO. E. STUBBS, A.M., M.D., Professor of Clinical Surgery.

WM. F. WAUGH, A.M., M.D., Professor of Principles and Practice of Medicine and of Clinical Medicine.

ABRAHAM S. GERHARD, A.M., M.D., Professor of Forensic and Clinical Medicine.

WM. S. STEWART, A.M., M.D., Professor of Obstetrics and Clinical Gynecology.

H. EARNEST GOODMAN, M.D., Professor of Principles and Practice of Surgery and Clinical Surgery.

P. D. KEYSER, A.M., M.D., Dean, Professor of Ophthalmology.

SAMUEL B. HOWELL, A.M., M.D., Professor of Chemistry.

JOHN V. SHOEMAKER, A.M., M.D., Professor of Materia Medica, Pharmacology, Therapeutics and Clinical Medicine.

E. E. MONTGOMERY, B.S., M.D., Professor of Gynecology.

JAS. M. ANDERS, Ph.D., M.D., Professor of Hygiene and Clinical Diseases of Children; Associate Professor of Physiology.

JOHN V. SHOEMAKER, A.M., M.D., Clinical Professor of Skin Diseases.

FRANK WOODBURY, A.M., M.D., Honorary Professor of Clinical Medicine.

WM. B. ATKINSON, A.M., M.D. Honorary Professor of Sanitary Science and Paediatrics.

The Regular Session begins September 30th, 1889, and continues until the middle of April. It is preceded by a Preliminary Session of three weeks, and followed by a Spring Session lasting until the middle of June.

Seats are issued in the order of matriculation, and are forfeitable if fees are not paid before November 1st.

Preliminary examination or equivalent degree, and a three years' graded course obligatory. A fourth year voluntary.

Instruction is given by lectures, clinical teaching and practical demonstrations. In the subjects of Anatomy, Pharmacy, Chemistry, Histology and Pathology the usual methods of instruction are largely supplemented by laboratory work.

Examinations are held at the close of each Regular Session upon the studies of the term. Although the degree of Doctor of Medicine is conferred at the end of the third year, a fourth year is earnestly recommended, at the end of which the degree of Doctor of Medicine *cum laude* is given.

FEES.

Matriculation, $5; first and second years, each, $100; third year (no graduation fee), $100; fourth year, free to those who have attended three sessions in this school, to all others, $100.

Extra charges only for material used in the laboratories and dissecting-room.

For further information or announcement, address,

E. E. MONTGOMERY, M.D., Secretary,
Medico-Chirurgical College,
Cherry, below 18th Street, Philadelphia, Penna.

JOSEPH ZENTMAYER,

OPTICIAN,

209 South 11th Street, PHILADELPHIA.

HISTOLOGICAL MICROSCOPES, $65.00.

STUDENTS' MICROSCOPES $38.00 TO $46.00 COMPLETE.

ILLUSTRATED CATALOGUE ON APPLICATION.

STRYKER & OGDEN,

Walnut and 13th Streets, Philadelphia.

PHYSICIANS' OFFICE AND OPERATING

COATS.

MADE OF BLEACHED DRILLING;
WILL NOT SHRINK IN WASHING.

$1.25 each; $7.00 per ½ Dozen.

Single Coats by Post, 15 cents additional.

HIRSH, FRANK & CO.,

31 North Third St., Philadelphia.

☞In ordering, send chest measure and length of sleeve from middle of back.

BROMIDIA

THE HYPNOTIC.

FORMULA.—

Every fluid drachm contains 15 grains EACH of Pure Chloral Hydrat. and purified Brom. Pot., and one-eighth grain EACH of gen. imp. ext. Cannabis Ind. and Hyoscyam.

DOSE.—

One-half to one fluid drachm in WATER or SYRUP every hour, until sleep is produced.

INDICATIONS.—

Sleeplessness, Nervousness, Neuralgia, Headache, Convulsions, Colic, Mania, Epilepsy, Irritability, etc. In the restlessness and delirium of fevers it is absolutely invaluable.

IT DOES NOT LOCK UP THE SECRETIONS.

PAPINE

THE ANODYNE.

Papine is the Anodyne or pain-relieving principle of Opium, the Narcotic and Convulsive Elements being eliminated. It has less tendency to cause Nausea, Vomiting, Constipation, Etc.

INDICATIONS.—

Same as Opium or Morphia.

DOSE.—

(ONE FLUID DRACHM)—represents the Anodyne principle of one-eighth grain of Morphia.

IODIA

The Alterative and Uterine Tonic.

FORMULA.—

Iodia is a combination of active principles obtained from the Green Roots of Stillingia, Helonias, Saxifraga, Menispermum, and Aromatics. Each fluid drachm also contains five grains Iod. Potas., and three grains Phos. Iron.

DOSE.—

One or two fluid drachms (more or less as indicated) three times a day before meals.

INDICATIONS.—

Syphilitic, Scrofulous and Cutaneous Diseases, Dysmenorrhea, Menorrhagia, Leucorrhea, Amenorrhea, Impaired Vitality, Habitual Abortions, and General Uterine Debility.

BUFFALO LITHIA WATER

IN THE

Uric Acid Diathesis, Bright's Disease of the Kidneys, Chronic Inflammation of the Bladder, &c.

Dr. THOMAS H. BUCKLER, of Paris (formerly of Baltimore), SUGGESTER OF LITHIA as a Solvent for URIC ACID.

"Nothing I could say would add to the **WELL-KNOWN REPUTATION OF THE BUFFALO LITHIA WATER. I HAVE FREQUENTLY USED IT WITH GOOD RESULTS IN URIC ACID DIATHESIS, RHEUMATISM AND GOUT,** and with this object I have ordered it to Europe from Coleman & Rogers, of Baltimore. Lithia is in no form so valuable as where it exists in the Carbonate (the form in which it is found in the **BUFFALO LITHIA WATER**), Nature's mode of solution and division in water which has passed through Lepedolite and Spondumine Mineral formation."

Dr. WM. A. HAMMOND, of New York, Surgeon-General U. S. Army (Retired), Professor of Diseases of the Mind and Nervous System in the University of New York, &c.

"I have for some time made use of the Buffalo Lithia Water in cases of affections of the **NERVOUS SYSTEM,** complicated with **BRIGHT'S DISEASE OF THE KIDNEYS** or with a **GOUTY DIATHESIS.** The results have been eminently satisfactory. Lithia has for many years been a favorite remedy with me in like cases, but the **BUFFALO WATER CERTAINLY ACTS BETTER THAN ANY EXTEMPORANEOUS SOLUTION OF THE LITHIA SALTS,** and is, moreover, better borne by the Stomach. I also often prescribe it in those cases of **CEREBRAL HYPERÆMIA** resulting from over-mental work—in which the condition called **NERVOUS DYSPEPSIA EXISTS**—and generally with marked benefit."

HUNTER McGUIRE, M.D., LL.D., Late Professor of Surgery, Medical College of Virginia, Richmond.

"**BUFFALO LITHIA WATER,** *Spring No. 2,* as an **ALKALINE DIURETIC,** *is invaluable.* In **URIC ACID GRAVEL,** *and, indeed,* in *diseases generally dependent* upon a **URIC ACID DIATHESIS,** *it is a remedy of extraordinary potency.* I have prescribed it in cases of **RHEUMATIC GOUT,** *which had resisted the ordinary remedies, with wonderful good results.* I have *used it also in my own case, being a great sufferer from this malady, and have derived more benefit from it than from any other remedy.*"

Dr. ROBERT BATTEY, of Georgia, SUGGESTER OF BATTEY'S OPERATION.

"I would state that I have been using the Buffalo Lithia Water, No. 2, in my practice for three years past, in cases of **CHRONIC INFLAMMATION** of the **BLADDER,** whether induced by **STONE,** by enlarged **PROSTATE** in the aged, or by **NEGLECTED GONORRHŒA, AND HAVE SECURED EXCELLENT RESULTS,** which encourages me to prescribe it for the future."

Dr. CYRUS EDSON, of New York,
Chief Inspector of Cutaneous Diseases in Health Department and President of the Board of Pharmacy.

"I have frequently made use of **BUFFALO LITHIA WATER,** Spring No. 2, in my practice, *with excellent results.* It is a potent remedy in correcting **RHEUMATIC DIATHESIS.** In a case of **URIC ACID GRAVEL,** in which I recently prescribed it, **ITS BENEFICIAL EFFECTS WERE APPARENT AFTER THE THIRD DOSE.** I have also prescribed it with great benefit in **BRIGHT'S DISEASE OF THE KIDNEYS.**"

Water in Cases of one dozen half-gallon Bottles, Five Dollars per Case, at the Springs.

THOMAS F. GOODE,

PROPRIETOR,

BUFFALO LITHIA SPRINGS,

VIRGINIA.

COMPRESSED TABLETS.

WE ask the attention of Physicians to the annexed list of recent additions of Compressed Tablets, as we think all of them are well deserving the careful attention of practitioners. We would be pleased to send to any physician, circular matter, compiled with great care and accuracy, giving therapeutic value and results in a concise form, that we are confident will be of interest, and possibly of advantage, to medical men who have not yet had access to the foreign and home authorities from which we have culled the information we give.

Acid Boracic, ... 5 grs.
Acetanilide, ... 3 and 5 "
Antifebrin, ... 3 " 5 "
Antipyrine, ... 3. 5 " 10 "
Blaud's
Ferri. Sulph. Exsic., 2 grs., Potass. Carb., 1 4-5 grs., Sacch. Alb., 1⅔ grs.
Iodol. . . . . ½, 1, 2, 3, and 5 grs.
Manganese Binoxide, ... 1 " 2 "
Opium, Camphor and Carb. Ammon., Opium Denarcot. ½ gr., Camphor, 2 grs., Ammon. Carb., 2½ grs.
Quinia Tannate, and Chocolate 1 grain, Quiniæ Tannat. 1 gr., Ext. Cacao, 9 grs.
Quinia Tannate and Chocolate, 2½ grs., Quiniæ Tannat. 2½ grs., Ext. Cacao, 7½ grs.
Salol, ... 2½ and 5 grs.
Sodium Succinate, ... 2 " 5 "
Thalline Sulphate, ... 2, 3 " 5 "
Trinitrin (Nitro-Glycerin), 1-20, 1-25, 1-33, 1-50, 1-100, and 1-200 gr.
Terpin Hydrate, ... 2, 3 and 5 grs.

ANTISEPTIC TABLETS.

7.7 Hydrarg. Chlor. Corros., 7.3 Ammonium Chloride.

More than six months since, we sent a circular to the drug trade, stating that we had discontinued the manufacture of the Antiseptic Tablets introduced by us several years since at the suggestion of Dr. Charles Meigs Wilson, of this city. We have, however, received so many letters from physicians urging us to resume the manufacture, insisting that the Tablets prepared by us dissolved more readily and were more satisfactory than any substitute they had been able to procure, that we feel we could not ignore such persistent demands from our medical friends who have found our tablets an absolute necessity. We have therefore concluded to again prepare them, in a building entirely separate from our main establishment, with appliances and admirably devised protection by means of improved respirators, that will completely overcome any harmful effects to those engaged in their manufacture.

Druggists and physicians will be glad to learn that the Tablets as now prepared are perfectly white and free from the coloring-matter that we formerly added. This was done to lessen the danger of their being taken, or used in mistake; to guard against any such possibility, each Tablet, as now made, has the word "POISON" stamped upon it.
